

International Trade in Services

Benefits Missouri's Companies and Workers

IMPORTANCE OF SERVICES TO THE OVERALL U.S. ECONOMY

- **The United States is the world's leading services exporting nation.** International services markets offer huge opportunities for U.S. firms and their employees, accounting today for nearly one-third of total U.S. exports. Total elimination of global barriers to trade in services could raise U.S. annual income by over \$450 billion or \$6,830 per family of four.
- **U.S. services exports have doubled over the past 10 years.** The United States recorded a \$66 billion surplus on exports totaling \$381 billion in 2005. This surplus was 22 percent higher than in 2004. Sales through U.S. services companies operating abroad measured \$477 billion in 2003. These international transactions support high-paying jobs across the United States.

IMPORTANCE OF SERVICES TO THE MISSOURI ECONOMY

- The services sector represents 66 percent of sales by Missouri businesses, employs 78 percent of the workforce, and pays 73 percent of the state's \$71 billion in wages.¹
- Services exporters in Missouri employed over 52,000 people and generated \$568 million in export revenues in 2002.² For example:
 - Professional, scientific and technical industry exporters from Missouri employed 15,500 people and generated \$262 million in export revenues.
 - Telecommunications exporters from Missouri employed 23,400 people and generated \$205 million in export revenues.
 - Publishing industry exporters from Missouri employed 11,800 people and generated \$83 million in export revenues.
- Affiliates of foreign services companies are part of this success. In 2003, companies such as Nestlé (Swiss) and Deutsche Telekom (German) had over \$1.9 billion invested in property, plants, and equipment (PPE) in Missouri and supported over 18,500 Missouri jobs.³
