4. In the event that a Party adopts or maintains a prohibition or restriction on the importation from or exportation to a non-Party of a good, no provision of this Agreement shall be construed to prevent the Party from:

- (a) limiting or prohibiting the importation from the territory of another Party of such good of that non-Party; or

¹ For greater certainty, this paragraph applies, *inter alia*, to prohibitions or restrictions on the importation of remanufactured goods.

- (b) requiring as a condition of export of such good of the Party to the territory of another Party, that the good not be re-exported to the non-Party, directly or indirectly, without being consumed in the territory of the other Party.

Chapter Three

Textiles and Apparel¹

Article 3.1: Textile Safeguard Measures

1. Subject to the following paragraphs, and during the transition period only, if, as a result of the reduction or elimination of a duty provided for in this Agreement, a textile or apparel good benefiting from preferential tariff treatment is being imported into the territory of another Party in such increased quantities, in absolute terms or relative to the domestic market for that good, and under such conditions as to cause serious damage, or actual threat thereof, to a domestic industry producing a like or directly competitive good, the importing Party may, to the extent necessary to prevent or remedy such damage and to facilitate adjustment, apply a textile safeguard measure to that good, consisting of an increase in the rate of duty on the good to a level not to exceed the lesser of:
 - (a) the most-favored-nation (MFN) applied rate of duty in effect at the time the measure is applied; and
 - (b) the MFN applied rate of duty in effect on the date of entry into force of this Agreement.
2. In determining serious damage, or actual threat thereof, the importing Party:
 - (a) shall examine the effect of increased imports of the good of the exporting Party or Parties on the particular industry, as reflected in changes in such relevant economic variables as output, productivity, utilization of capacity, inventories, market share, exports, wages, employment, domestic prices, profits and losses, and investment, none of which, either alone or combined with other factors, shall necessarily be decisive; and
 - (b) shall not consider changes in consumer preference or changes in technology in the importing Party as factors supporting a determination of serious damage or actual threat thereof.
3. The importing Party may apply a textile safeguard measure only following an investigation by its competent authority.
4. The investigations referred to in this Article shall be carried out according to procedures established by each Party, which shall be notified to the Parties upon entry into force of this Agreement or before a Party initiates an investigation.
5. The importing Party shall deliver to the exporting Party or Parties, without delay, written notice of the initiation of the investigation, as well as of its intent to apply or extend a textile safeguard measure and, on request of the exporting Party or Parties, shall enter into consultations with that Party or Parties.
6. The following conditions and limitations apply to any textile safeguard measure:
 - (a) no Party may maintain a textile safeguard measure for a period exceeding two years, except that the period may be extended for up to one year;

¹ For greater certainty, the obligations in Chapter Two (National Treatment and Market Access for Goods) with respect to trade in goods between the Parties apply to trade in textile and apparel goods between the Parties.

- (b) no Party may apply a textile safeguard measure to the same good of another Party more than once;
- (c) on termination of the textile safeguard measure, the Party applying the measure shall apply the rate of duty set out in its Schedule to Annex 2.3 (Tariff Elimination) as if the measure had never been applied; and
- (d) no Party may maintain a textile safeguard measure beyond the transition period.

7. The Party applying a textile safeguard measure shall provide to the Party or Parties against whose good the measure is taken mutually agreed trade liberalizing compensation in the form of concessions having substantially equivalent trade effects or equivalent to the value of the additional duties expected to result from the textile safeguard measure. Such concessions shall be limited to textile or apparel goods, unless the consulting Parties otherwise agree.

8. If the consulting Parties are unable to agree on compensation within 30 days of application of a textile safeguard measure, the Party or Parties against whose good the measure is taken may take tariff action having trade effects substantially equivalent to those of the textile safeguard measure. Such tariff action may be taken against any good of the Party applying the textile safeguard measure. The Party taking the tariff action shall apply it only for the minimum period necessary to achieve the substantially equivalent trade effects. The importing Party's obligation to provide trade compensation and the exporting Party's or Parties' right to take tariff action shall terminate when the textile safeguard measure terminates.

- 9. (a) Each Party maintains its rights and obligations under Article XIX of the GATT 1994 and the Safeguards Agreement.
- (b) No Party may apply, with respect to the same good at the same time, a textile safeguard measure and:
 - (i) a safeguard measure under Chapter Eight (Trade Remedies); or
 - (ii) a measure under Article XIX of the GATT 1994 and the Safeguards Agreement.

Article 3.2: Customs Cooperation and Verification of Origin

- 1. The competent authorities of the Parties shall cooperate for purposes of:
 - (a) enforcing or assisting in the enforcement, and deterring circumvention, of the laws, regulations, and procedures of each Party, and international agreements affecting trade in textile or apparel goods, and;
 - (b) ensuring the accuracy of claims of origin for textile or apparel goods.

The Parties recognize that, in accordance with paragraph 10, providing technical or other assistance to advance these purposes is an essential part of this Article.

- 2. A Party's request for cooperation under this Article shall identify the relevant laws, regulations, or procedures pertaining to that request.
- 3. (a) On the written request of the importing Party, an exporting Party shall conduct a verification for purposes of enabling the importing Party to determine:
 - (i) that a claim of origin for a textile or apparel good is accurate; or

- (ii) that the exporter or producer is complying with applicable customs laws, regulations, and procedures regarding trade in textile or apparel goods, including:
 - (A) laws, regulations, and procedures that the exporting Party adopts and maintains pursuant to this Agreement; and
 - (B) laws, regulations, and procedures of the importing Party and the exporting Party implementing other international agreements regarding trade in textile or apparel goods.
- (b) A request under subparagraph (a) shall include specific information regarding the reason the importing Party is requesting the verification and the determination the importing Party is seeking to make.
- (c) The exporting Party shall conduct a verification under subparagraph (a)(i), regardless of whether an importer claims preferential tariff treatment for the textile or apparel good for which a claim of origin has been made.
- (d) The exporting Party may conduct a verification of enterprises within its territory on its own initiative.

4. The importing Party, through its competent authority, may assist in a verification conducted under paragraph 3(a), including by conducting, along with the competent authority of the exporting Party, visits in the territory of the exporting Party to the premises of an exporter, producer, or any other enterprise involved in the movement of textile or apparel goods from the territory of the exporting Party to the territory of the importing Party. At the request of the exporting Party, the importing Party may undertake such verification.

- 5. (a) The competent authority of the importing Party shall provide a written request to the competent authority of the exporting Party 20 days before the proposed date of a visit under paragraph 4. The request shall identify the competent authority making the request, the names and titles of the authorized personnel that will conduct the visit; the reason for the visit, including a description of the type of goods that are the subject of the verification; and the proposed dates of the visit.
- (b) The competent authority of the exporting Party shall respond within ten days of receipt of the request, and shall indicate the date on which authorized personnel of the importing Party may perform the visit. The exporting party shall seek, in accordance with its laws, regulations, and procedures, permission from the enterprise to conduct the visit. If consent is not provided, the importing Party may deny preferential tariff treatment to the type of goods of the enterprise that would have been the subject of the verification, except that the importing Party may not deny preferential tariff treatment to such goods based solely on a postponement of the visit, if there is adequate reason for such postponement.
- (c) Authorized personnel of the importing and exporting Parties shall conduct the visit in accordance with the laws, regulations, and procedures of the exporting Party.
- (d) On completion of the visit, the importing Party shall provide the exporting Party with an oral summary of the results of the visit and provide it with a written report of the results of the visit within approximately 45 days of the visit. The written report shall include:
 - (i) the name of the enterprise visited;

- (ii) particulars of the shipments that were checked;
- (iii) observations made at the enterprise relating to circumvention, if any; and

 - (A) a textile or apparel good subject to a verification conducted under subparagraph 3(a)(i); or
 - (B) in the case of a verification conducted under subparagraph 3(a)(ii), any textile or apparel good exported or produced by the enterprise.

6. In accordance with its laws, each Party shall provide to the other Party production, trade, and transit documents and other information necessary to conduct verifications under paragraph 3(a). Each Party shall treat any documents or information exchanged in the course of such verification in accordance with Article 5.6 (Confidentiality). Notwithstanding the foregoing, a Party may publish the name² of an enterprise if the Party has determined, consistent with its laws, that such enterprise:

- (a) has engaged in circumvention of the laws, regulations, or procedures of that Party or of international agreements affecting trade in textile or apparel goods; or
- (b) has failed to demonstrate that it produces, or is capable of producing, textile or apparel goods.

7. (a) (i) If, during a verification conducted under subparagraph 3(a), the information to support a claim for preferential tariff treatment is insufficient, the importing Party may take the actions it considers appropriate, which may include suspending the application of such treatment to:
- (A) in the case of a verification conducted under subparagraph 3(a)(i), the textile or apparel good for which a claim for preferential tariff treatment has been made; and
 - (B) in the case of a verification conducted under subparagraph 3(a)(ii), any textile or apparel good exported or produced by the enterprise subject to that verification for which a claim of preferential tariff treatment has been made.
- (ii) If, on completion of a verification conducted under subparagraph 3(a), the information to support a claim for preferential tariff treatment is insufficient, the importing Party may take the actions it considers appropriate, which may include denying the application of such treatment to any textile or apparel good described in clauses (i)(A) and (B).
- (iii) If, during or on completion of a verification conducted under subparagraph 3(a), the importing Party discovers that an enterprise has provided incorrect information to support a claim for preferential tariff

treatment, the importing Party may take the actions it considers appropriate, which may include denying the application of such treatment to any textile or apparel good described in clauses (i)(A) and (B).

- (b) (i) If, during a verification conducted under subparagraph 3(a), the information to determine the country of origin is insufficient, the importing Party may take the actions it considers appropriate, which may include detention of any textile or apparel good exported or produced by the enterprise subject to the verification.
 - (ii) If, on completion of a verification conducted under subparagraph 3(a), the information to determine the country of origin is insufficient, the importing Party may take the actions it considers appropriate, which may include denying entry to any textile or apparel good exported or produced by the enterprise subject to the verification.
 - (iii) If, during or on completion of a verification conducted under subparagraph 3(a), the importing Party discovers that an enterprise has provided incorrect information as to the country of origin, the importing Party may take appropriate action, which may include denying entry to any textile or apparel good exported or produced by the enterprise subject to the verification.
- (c) The importing Party may continue to take the actions it considers appropriate under this paragraph only until it receives information sufficient to enable it to make the determination in subparagraphs 3(a)(i) or (ii), as the case may be.

8. No later than 45 days after it completes a verification conducted under subparagraph 3(a), the exporting Party shall provide the importing Party a written report on the results of the verification. The report shall include all documents and facts supporting any conclusion that the exporting Party reaches. After receiving the report, the importing Party shall notify the exporting Party of any action it will take under subparagraph 7(a)(ii) or (iii) or 7(b)(ii) or (iii), based on the information provided in the report.

9. On the written request of a Party, two or more Parties shall enter into consultations to resolve any technical or interpretive difficulties that may arise or to discuss ways to improve customs cooperation regarding the application of this Article. Unless the consulting Parties otherwise agree, consultations shall begin within 30 days after delivery of the request and conclude within 90 days after delivery.

10. A Party may request technical or other assistance from any other Party in implementing this Article. The Party receiving such a request shall make every effort to respond promptly and favorably to it.

Article 3.3: Rules of Origin, Origin Procedures, and Related Matters

1. Except as provided in this Article and the Annexes to this Chapter, Chapter Four (Rules of Origin and Origin Procedures) applies with respect to textile and apparel goods.

Consultations on Rules of Origin

2. On request of a Party, the Parties shall, within 30 days after the request is delivered, consult on whether the rules of origin applicable to a particular textile or apparel good should be revised.

3. Where the consultations referred to in paragraph 2 concern an input not available in commercial quantities, each Party shall consider all data that a Party presents demonstrating that there is substantial production in its territory of such input. The Parties shall consider that there is substantial production if a Party demonstrates that its domestic producers are capable of supplying commercial quantities of the input to the Parties in a timely manner.

4. The Parties shall endeavor to conclude the consultations within 90 days after delivery of the request. If the Parties reach an agreement to revise a rule of origin for a particular good, the agreement shall supersede that rule of origin when modified by the Commission in accordance with Article 20.1.3(b).

Fabrics, Yarns, and Fibers Not Available in Commercial Quantities

5. (a) At the request of an interested entity, the United States shall, within 30 business days of receiving the request, add a fabric, fiber, or yarn in an unrestricted or restricted quantity to the list in Annex 3-B, if the United States determines, based on information supplied by interested entities, that the fabric, fiber, or yarn is not available in commercial quantities in a timely manner in the territory of any Party, or if no interested entity objects to the request.
- (b) If there is insufficient information to make the determination in subparagraph (a), the United States may extend the period within which it must make that determination by no more than 14 business days, in order to meet with interested entities to substantiate the information.
- (c) If the United States does not make the determination in subparagraph (a) within 15 business days of the expiration of the period within which it must make that determination, as specified in subparagraph (a) or (b), the United States shall grant the request.
- (d) The United States may, within six months after adding a restricted quantity of a fabric, fiber, or yarn to the list in Annex 3-B pursuant to subparagraph (a), modify or eliminate the restriction.
- (e) If the United States determines before the date of entry into force of this Agreement that any fabrics or yarns not listed in Annex 3-B are not available in commercial quantities in the United States pursuant to section 112(b)(5)(B) of the *African Growth and Opportunity Act* (19 U.S.C. § 3721(b)), section 204(b)(3)(B)(ii) of the *Andean Trade Preference Act* (19 U.S.C. § 3203(b)(3)(B)(ii)), or section 213(b)(2)(A)(v)(II) of the *Caribbean Basin Economic Recovery Act* (19 U.S.C. § 2703(b)(2)(A)(v)(II)), the United States may, after consultation with the Parties, add such fabrics or yarns in an unrestricted quantity to the list in Annex 3-B.

6. At the request of an interested entity made no earlier than six months after the United States has added a fabric, yarn, or fiber in an unrestricted quantity to Annex 3-B pursuant to paragraph 5, the United States may, within 30 business days after it receives the request:

- (a) delete the fabric, yarn, or fiber from the list in Annex 3-B; or
- (b) introduce a restriction on the quantity of the fabric, yarn, or fiber added to Annex 3-B;

if the United States determines, based on the information supplied by interested entities, that the fabric, yarn, or fiber is available in commercial quantities in a timely manner in the territory of any Party. Such deletion or restriction shall not take effect until six months after the United

States publishes its determination.

7. Promptly after the date of entry into force of this Agreement, the United States shall publish the procedures it will follow in considering requests under paragraphs 5 and 6. After publication of such procedures, a Party or Parties may request consultations with respect to those procedures.

De Minimis

8. A textile or apparel good that is not an originating good because certain fibers or yarns used in the production of the component of the good that determines the tariff classification of the good do not undergo the applicable change in tariff classification set out in Annex 3-A, shall nonetheless be considered to be an originating good if the total weight of all such fibers or yarns in that component is not more than ten percent of the total weight of that component.³

9. Notwithstanding paragraph 8, a good containing elastomeric yarns⁴ in the component of the good that determines the tariff classification of the good shall be originating only if such yarns are wholly formed in the territory of a Party.⁵

Treatment of Sets

10. Notwithstanding the specific rules of origin in Annex 3-A textile or apparel goods classifiable as goods put up in sets for retail sale as provided for in General Rule of Interpretation 3 of the Harmonized System, shall not be regarded as originating goods unless each of the goods in the set is an originating good or the total value of the non-originating goods in the set does not exceed ten percent of the adjusted value of the set.

Treatment of Nylon Filament Yarn

11. A textile or apparel good that is not an originating good because certain yarns used in the production of the component of the good that determines the tariff classification of the good do not undergo an applicable change in tariff classification set out in Annex 3-A shall nonetheless be considered to be an originating good if the yarns are those described in Section 204(b)(3)(B)(vi)(IV) of the *Andean Trade Preference Act* (19 U.S.C. § 3203(b)(3)(B)(vi)(IV)).

Duty-free Treatment for Certain Goods

12. An importing and an exporting Party may identify at any time particular textile or apparel goods of the exporting Party that they mutually agree are:

- (a) hand-loomed fabrics;
- (b) hand-made goods made of such hand-loomed fabrics;
- (c) traditional folklore handicraft goods; or
- (d) handmade goods that substantially incorporate a historical or traditional regional design or motif.

³ For greater certainty, when the good is a fiber, yarn, or fabric, the “component of the good that determines the tariff classification of the good” is all of the fibers in the yarn, fabric, or group of fibers.

⁴ For greater certainty, the term “elastomeric yarns” does not include latex.

⁵ For purposes of this paragraph, “wholly formed” means that all the production process and finishing operations, starting with the extrusion of all filaments, strips, films, or sheets, or the spinning of all fibers into yarn, or both, and ending with a finished yarn or plied yarn, took place in the territory of the Party.

A historical or traditional regional design or motif includes, but is not limited to, depictions of traditional geometric patterns or native objects, landscapes, animals, or people.

13. The importing Party shall grant duty-free treatment to goods identified pursuant to paragraph 12, if the competent authority of the exporting Party certifies such identification.

Regional Cumulation

14. In the light of their desire to promote regional integration, the Parties shall enter into discussions, within six months of the date of entry into force of this Agreement, or at a time to be determined by the Parties, with a view to deciding, subject to their applicable domestic legal requirements (such as a requirement to consult with the legislature and domestic industry), whether materials that are goods of countries in the region may be counted for purposes of satisfying the origin requirement under this Chapter as a step toward achieving regional integration.

Article 3.4: Committee on Textile and Apparel Trade Matters

The Parties hereby establish a Committee on Textile and Apparel Trade Matters. The Committee on Textile and Apparel Trade Matters shall meet upon the request of any Party or the Free Trade Commission to consider any matter arising under this Chapter.

General Interpretative Notes

1. For goods covered in this Annex, a good is an originating good if:
 - (a) each of the non-originating materials used in the production of the good undergoes an applicable change in tariff classification specified in this Annex as a result of production occurring entirely in the territory of one or more of the Parties, or the good otherwise satisfies the applicable requirements of this Chapter where a change in tariff classification for each non-originating material is not required; and
 - (b) the good satisfies any other applicable requirements of this Chapter and Chapter Four (Rules of Origin and Origin Procedures).
2. For purposes of interpreting the rules of origin set out in this Annex:
 - (a) the specific rule, or specific set of rules, that applies to a particular heading or subheading is set out immediately adjacent to the heading or subheading;
 - (b) a rule applicable to a subheading shall take precedence over a rule applicable to the heading that is parent to that subheading;
 - (c) a requirement of a change in tariff classification applies only to non-originating materials; and
 - (d) the following definitions apply:

chapter means a chapter of the Harmonized System;

heading means the first four digits in the tariff classification number under the Harmonized System; and

subheading means the first six digits in the tariff classification number under the Harmonized System.
3. For purposes of these rules, the term **wholly** means that the good is entirely of the named material.
4. For goods of Chapters 42, 50 through 63, and 94, a good shall be originating if the good satisfies:
 - (a) Rule 1, 2, 3, or 4 of this Annex, if applicable to such good; or
 - (b) any applicable requirement of this Chapter, as discussed in Note 1.

Rule 1: A textile good of Chapters 50 through 60 of the Harmonized System shall be considered originating if it is wholly formed in the territory of one or more of the Parties from:

- (a) one or more fibers and yarns listed in Annex 3-B; or

- (b) a combination of the fibers and yarns referred to in subparagraph (a) and one or more fibers and yarns originating under this Annex.

The originating fibers and yarns referred to in subparagraph (b) may contain up to ten percent by weight of fibers and yarns that do not undergo an applicable change in tariff classification set out in this Annex. Any elastomeric yarn contained in the originating yarns referred to in subparagraph (b) must be formed in the territory of one or more of the Parties.

Rule 2: An apparel good of Chapter 61 or 62 of the Harmonized System shall be considered originating if it is cut or knit to shape, or both, and sewn or otherwise assembled in the territory of one or more of the Parties, and if the fabric of the outer shell, exclusive of collars and cuffs, where applicable, is wholly of:

- (a) one or more fabrics listed in Annex 3-B;
- (b) one or more fabrics or knit to shape components formed in the territory of one or more of the Parties from one or more of the yarns listed in Annex 3-B;
- (c) any combination of the fabrics referred to in subparagraph (a), the fabrics or knit to shape components referred to in subparagraph (b), or one or more fabrics or knit to shape components originating under this Annex.

The originating fabrics referred to in subparagraph (c) may contain up to ten percent by weight of fibers or yarns that do not undergo an applicable change in tariff classification set out in this Annex. Any elastomeric yarn contained in an originating fabric or knit to shape component referred to in subparagraph (c) must be formed in the territory of one or more of the Parties.

Rule 3: A textile good of Chapter 42, 63, or 94 of the Harmonized System shall be considered originating if it is cut or knit to shape, or both, and sewn or otherwise assembled in the territory of one or more of the Parties, and if the component that determines the tariff classification of the good is wholly of:

- (a) one or more fabrics listed in Annex 3-B;
- (b) one or more fabrics or knit to shape components formed in the territory of one or more of the Parties from one or more of the yarns listed in Annex 3-B; or
- (c) any combination of the fabrics referred to in subparagraph (a), the fabrics or knit to shape components referred to in subparagraph (b), or one or more fabrics or knit to shape components originating under this Annex.

The originating fabrics referred to in subparagraph (c) may contain up to ten percent by weight of fibers or yarns that do not undergo an applicable change in tariff classification set out in this Annex. Any elastomeric yarn contained in an originating fabric or knit to shape component referred to in subparagraph (c) must be formed in the territory of one or more of the Parties.

Rule 4: An apparel good of Chapter 61 or 62 shall be considered originating regardless of the origin of any visible lining fabric described in Chapter Rule 1, narrow fabrics described in Chapter Rule 3, sewing thread described in Chapter Rule 4, or pocketing fabric described in Chapter Rule 5 if any such material is identified in Annex 3-B and the good meets all other applicable requirements for preferential tariff treatment under this Agreement.

Chapter Four

Rules of Origin and Origin Procedures

Section A: Rules of Origin

Article 4.1: Originating Goods

Except as otherwise provided in this Chapter, each Party shall provide that a good is originating where:

- (a) it is a good wholly obtained or produced entirely in the territory of one or more of the Parties;
- (b) it is produced entirely in the territory of one or more of the Parties and
 - (i) each of the non-originating materials used in the production of the good undergoes an applicable change in tariff classification specified in Annex 4.1 or Annex 3-A (Textile and Apparel Specific Rules of Origin), or
 - (ii) the good otherwise satisfies any applicable regional value content or other requirements specified in Annex 4.1 or Annex 3-A (Textile and Apparel Specific Rules of Origin),

and the good satisfies all other applicable requirements of this Chapter; or

- (c) it is produced entirely in the territory of one or more of the Parties exclusively from originating materials.

Article 4.2: Regional Value Content

1. Where Annex 4.1 specifies a regional value content test to determine whether a good is originating, each Party shall provide that the importer, exporter, or producer may, for purposes of making a claim for preferential tariff treatment in accordance with Article 4.15, calculate regional value content based on one or the other of the following methods:

- (a) Method Based on Value of Non-Originating Materials (“Build-down Method”)

$$RVC = \frac{AV - VNM}{AV} \times 100$$

- (b) Method Based on Value of Originating Materials (“Build-up Method”)

$$RVC = \frac{VOM}{AV} \times 100$$

where,

RVC is the regional value content, expressed as a percentage;

AV is the adjusted value of the good;

VNM is the value of non-originating materials that are acquired and used by the producer in the production of the good; VNM does not include the value of a material that is self-produced; and

VOM is the value of originating materials acquired or self-produced, and used by the producer in the production of the good.

2. Each Party shall provide that all costs considered for the calculation of regional value content shall be recorded and maintained in conformity with the Generally Accepted Accounting Principles applicable in the territory of the Party where the good is produced.

3. Where Annex 4.1 specifies a regional value content test to determine if an automotive good¹ is originating, each Party shall provide that the importer, exporter, or producer shall, for purposes of making a claim for preferential tariff treatment in accordance with Article 4.15, calculate the regional value content of that good based solely on the following method:

Method for Automotive Products (“Net Cost Method”)

$$RVC = \frac{NC - VNM}{NC} \times 100$$

where,

RVC is the regional value content, expressed as a percentage;

NC is the net cost of the good; and

VNM is the value of non-originating materials acquired and used by the producer in the production of the good; VNM does not include the value of a material that is self-produced.

4. Each Party shall provide that, for purposes of the regional value content method in paragraph 3, the importer, exporter, or producer may use a calculation averaged over the producer’s fiscal year, using any one of the following categories, on the basis of all motor vehicles in the category or only those motor vehicles in the category that are exported to the territory of one or more of the Parties:

- (a) the same model line of motor vehicles in the same class of vehicles produced in the same plant in the territory of a Party;
- (b) the same class of motor vehicles produced in the same plant in the territory of a Party; or
- (c) the same model line of motor vehicles produced in the territory of a Party.

5. Each Party shall provide that, for purposes of calculating regional value content under paragraph 3 for automotive materials² produced in the same plant, an importer, exporter, or producer may use a calculation:

- (a) averaged:

¹ Paragraph 3 applies solely to goods classified under the following Harmonized System headings and subheadings: 8407.31 through 8407.34 (engines), 8408.20 (diesel engines for vehicles), 84.09 (parts of engines) 87.01 through 87.05 (motor vehicles), 87.06 (chassis), 87.07 (bodies), and 87.08 (motor vehicle parts).

² Paragraph 5 applies solely to automotive materials classified in the following Harmonized System headings and subheadings: 8407.31 through 8407.34 (engines), 8408.20 (diesel engines for vehicles), 84.09 (parts of engines), 87.06 (chassis), 87.07 (bodies), and 87.08 (motor vehicle parts).

- (i) over the fiscal year of the motor vehicle producer to whom the good is sold;
- (ii) over any quarter or month; or
- (iii) over the automotive materials producer's fiscal year,

provided that the good was produced during the fiscal year, quarter, or month forming the basis for the calculation;

- (b) in which the average in subparagraph (a) is calculated separately for such goods sold to one or more motor vehicle producers; or
- (c) in which the average in subparagraph (a) or (b) is calculated separately for those goods that are exported to the territory of one or more of the Parties.

Article 4.3: Value of Materials

Each Party shall provide that, for purposes of Articles 4.2 and 4.6, the value of a material shall be:

- (a) for a material imported by the producer of the good, the adjusted value of the material;
- (b) for a material acquired by the producer in the territory where the good is produced, the value, determined in accordance with Articles 1 through 8, Article 15 and the corresponding interpretative notes of the Customs Valuation Agreement, *i.e.*, in the same manner as for imported goods, with such reasonable modifications as may be required due to the absence of an importation by the producer; or
- (c) for a material that is self-produced,
 - (i) all the expenses incurred in the production of the material, including general expenses, and
 - (ii) an amount for profit equivalent to the profit added in the normal course of trade.

Article 4.4: Further Adjustments to the Value of Materials

1. Each Party shall provide that, for originating materials, the following expenses, where not included under Article 4.3, may be added to the value of the material:

- (a) the costs of freight, insurance, packing, and all other costs incurred in transporting the material within a Party's territory or between the territories of two or more of the Parties to the location of the producer;
- (b) duties, taxes, and customs brokerage fees on the material paid in the territory of one or more of the Parties, other than duties and taxes that are waived, refunded, refundable, or otherwise recoverable, including credit against duty or tax paid or payable; and
- (c) the cost of waste and spoilage resulting from the use of the material in the production of the good, less the value of renewable scrap or by-product.

2. Each Party shall provide that, for non-originating materials, the following expenses, where included under Article 4.3, may be deducted from the value of the material:

- (a) the costs of freight, insurance, packing, and all other costs incurred in transporting the material within a Party's territory or between the territories of two or more of the Parties to the location of the producer;
- (b) duties, taxes, and customs brokerage fees on the material paid in the territory of two or more of the Parties, other than duties and taxes that are waived, refunded, refundable, or otherwise recoverable, including credit against duty or tax paid or payable;
- (c) the cost of waste and spoilage resulting from the use of the material in the production of the good, less the value of renewable scrap or by-product; and
- (d) the cost of originating materials used in the production of the non-originating material in the territory of a Party.

Article 4.5: Accumulation

1. Each Party shall provide that originating goods or materials of one or more of the Parties, incorporated into a good in the territory of another Party, shall be considered to originate in the territory of the other Party.

2. Each Party shall provide that a good is originating where the good is produced in the territory of one or more of the Parties by one or more producers, provided that the good satisfies the requirements in Article 4.1 and all other applicable requirements in this Chapter.

Article 4.6: De Minimis

Except as provided in Annex 4.6, each Party shall provide that a good that does not undergo a change in tariff classification pursuant to Annex 4.1 is nonetheless originating if the value of all non-originating materials used in the production of the good and that do not undergo the applicable change in tariff classification does not exceed ten percent of the adjusted value of the good, provided that the value of such non-originating materials shall be included in the value of non-originating materials for any applicable regional value content requirement and that the good meets all other applicable requirements in this Chapter.

Article 4.7: Fungible Goods and Materials

1. Each Party shall provide that an importer may claim that a fungible good or material is originating where the importer, exporter, or producer has:

- (a) physically segregated each fungible good or material; or
- (b) used any inventory management method, such as averaging, last-in-first-out (LIFO) or first-in-first-out (FIFO), recognized in the Generally Accepted Accounting Principles of the Party in which the production is performed or otherwise accepted by the Party in which the production is performed.

2. Each Party shall provide that the inventory management method selected under paragraph 1 for a particular fungible good or material shall continue to be used for that good or material throughout the fiscal year of the person that selected the inventory management method.

Article 4.8: Accessories, Spare Parts, and Tools

1. Each Party shall provide that a good's standard accessories, spare parts, or tools delivered with the good shall be treated as originating goods if the good is an originating good and shall be disregarded in determining whether all the non-originating materials used in the production of the good undergo the applicable change in tariff classification, provided that:

- (a) the accessories, spare parts, or tools are classified with and not invoiced separately from the good, regardless of whether they appear specified or separately identified in the invoice itself; and
- (b) the quantities and value of the accessories, spare parts, or tools are customary for the good.

2. If a good is subject to a regional value content requirement, the value of the accessories, spare parts, or tools described in paragraph 1 shall be taken into account as originating or non-originating materials, as the case may be, in calculating the regional value content of the good.

Article 4.9: Sets of Goods

1. Each Party shall provide that if goods are classified as a set as a result of the application of rule 3 of the General Rules of Interpretation of the Harmonized System, the set is originating only if each good in the set is originating and both the set and the goods meet all other applicable requirements in this Chapter.

2. Notwithstanding paragraph 1, a set of goods is originating if the value of all the non-originating goods in the set does not exceed 15 percent of the adjusted value of the set.

Article 4.10: Packaging Materials and Containers for Retail Sale

1. Each Party shall provide that packaging materials and containers in which a good is packaged for retail sale shall, if classified with the good, be disregarded in determining whether all the non-originating materials used in the production of the good undergo the applicable change in tariff classification set out in Annex 4.1 or Annex 3-A (Textile and Apparel Specific Rules of Origin).

2. If a good is subject to a regional value content requirement, the value of packaging materials and containers described in paragraph 1 shall be taken into account as originating or non-originating materials, as the case may be, in calculating the regional value content of the good.

Article 4.11: Packing Materials and Containers for Shipment

Each Party shall provide that packing materials and containers for shipment shall be disregarded in determining whether a good is originating.

Article 4.12: Indirect Materials Used in Production

Each Party shall provide that an indirect material shall be considered to be an originating material without regard to where it is produced.

Article 4.13: Transit and Transshipment

Each Party shall provide that a good shall not be considered to be an originating good if the good:

- (a) undergoes subsequent production or any other operation outside the territories of the Parties, other than unloading, reloading, or any other operation necessary to preserve the good in good condition or to transport the good to the territory of a Party; or
- (b) does not remain under the control of customs authorities in the territory of a non-Party.

Article 4.14: Consultation and Modifications

1. The Parties shall consult regularly to ensure that this Chapter is administered effectively, uniformly, and consistently with the spirit and objectives of this Agreement, and shall cooperate in the administration of this Chapter.
2. A Party that considers that a specific rule of origin set forth in Annex 4.1 requires modification to take into account developments in production processes, lack of supply of originating materials, or other relevant factors may submit a proposed modification along with supporting rationale and any studies to the other Parties for consideration.
3. On submission by a Party of a proposed modification under paragraph 2, the Commission may refer the matter to an *ad hoc* working group within 60 days or on such other date as the Commission may decide. The working group shall meet to consider the proposed modification within 60 days of the date of referral or on such other date as the Commission may decide.
4. Within such period as the Commission may direct, the working group shall provide a report to the Commission, setting out its conclusions and recommendations, if any.
5. On receipt of the report, the Commission may take appropriate action under Article 20.1.3(b).
6. With respect to a textile or apparel good, paragraphs 2 through 4 of Article 3.3 (Rules of Origin, Origin Procedures, and Related Matters) apply in place of paragraphs 2 through 5.

Section B: Origin Procedures

Article 4.15: Claims for Preferential Treatment

1. Each Party shall provide that an importer may make a claim for preferential tariff treatment based on either:
 - (a) a written or electronic certification by the importer, exporter, or producer; or
 - (b) the importer's knowledge that the good is an originating good, including reasonable reliance on information in the importer's possession that the good is an originating good.
2. Each Party shall provide that a certification need not be made in a prescribed format, provided that the certification is in written or electronic form, including but not limited to the following elements:
 - (a) the name of the certifying person, including as necessary contact or other identifying information;

- (b) tariff classification under the Harmonized System and a description of the good;
- (c) information demonstrating that the good is originating;
- (d) date of the certification; and
- (e) in the case of a blanket certification issued as set out in paragraph 4(b), the period that the certification covers.

3. Each Party shall provide that a certification by the producer or exporter of the good may be completed on the basis of:

- (a) the producer's or exporter's knowledge that the good is originating; or
- (b) in the case of an exporter, reasonable reliance on the producer's written or electronic certification that the good is originating.

No Party may require an exporter or producer to provide a written or electronic certification to another person.

4. Each Party shall provide that a certification may apply to:

- (a) a single shipment of a good into the territory of a Party; or
- (b) multiple shipments of identical goods within any period specified in the written or electronic certification, not exceeding 12 months from the date of the certification.

5. Each Party shall provide that a certification shall be valid for four years after the date it was issued.

6. Each Party shall allow an importer to submit a certification in the language of the importing Party or the exporting Party. In the latter case, the importing Party may require the importer to submit a translation of the certification in the language of the importing Party.

Article 4.16: Exceptions

No Party may require a certification or information demonstrating that a good is originating where:

- (a) the customs value of the importation does not exceed US\$1,500 or the equivalent amount in the currency of the importing Party, or such higher amount as may be established by the importing Party, unless the importing Party considers the importation to be part of a series of importations carried out or planned for the purpose of evading compliance with the Party's laws governing claims for preferential treatment under this Agreement; or
- (b) it is a good for which the importing Party does not require the importer to present a certification or information demonstrating origin.

Article 4.17: Record Keeping Requirements

1. Each Party shall provide that an exporter or a producer in its territory that provides a certification in accordance with Article 4.15 shall maintain, for a minimum of five years from the date the certification was issued, all records necessary to demonstrate that a good for

which the producer or exporter provided a certification was an originating good, including records concerning:

- (a) the purchase of, cost of, value of, and payment for, the exported good;
- (b) the purchase of, cost of, value of, and payment for all materials, including indirect materials, used in the production of the exported good; and
- (c) the production of the good in the form in which it was exported.

2. Each Party shall provide that an importer claiming preferential tariff treatment for a good imported into the Party's territory shall maintain, for a minimum of five years from the date of importation of the good, all records necessary to demonstrate the good qualified for the preferential tariff treatment.

Article 4.18: Verification

1. For purposes of determining whether a good imported into its territory from the territory of another Party is an originating good, the importing Party may conduct a verification by means of:

- (a) written requests for information from the importer, exporter, or producer;
- (b) written questionnaires to the importer, exporter, or producer;
- (c) visits to the premises of an exporter or producer in the territory of the other Party, to review the records referred to in Article 4.17 or observe the facilities used in the production of the good, in accordance with any guidelines that the Parties develop pursuant to Article 4.21.2; or
- (d) such other procedures to which the importing and exporting Parties may agree.

2. A Party may deny preferential tariff treatment to an imported good where:

- (a) the exporter, producer, or importer fails to respond to a written request for information or questionnaire within a reasonable period, as established in the importing Party's law;
- (b) after receipt of a written notification for a verification visit to which the importing and exporting Parties have agreed, the exporter or producer does not provide its written consent within a reasonable period, as established by the importing Party's law; or
- (c) the Party finds a pattern of conduct indicating that an importer, exporter, or producer has provided false or unsupported declarations or certifications that a good imported into its territory is an originating good.

3. A Party conducting a verification shall provide the importer a determination, in writing, of whether the good is originating. The Party's determination shall include factual findings and the legal basis for the determination.

4. If an importing Party makes a determination under paragraph 3 that a good is not originating, the Party shall not apply that determination to an importation made before the date of the determination where:

- (a) the exporting Party issued an advance ruling regarding the tariff classification or valuation of one or more materials used in the good under Article 5.10 (Advance Rulings);
- (b) the importing Party's determination is based on a tariff classification or valuation for such materials that is different than that provided for in the advance ruling referred to in subparagraph (a); and
- (c) the exporting Party issued the advance ruling before the importing Party's determination.

5. Where an importing Party determines through verification that an importer, exporter, or producer has engaged in a pattern of conduct in providing false or unsupported statements, declarations, or certifications that a good imported into its territory is originating, the Party may suspend preferential tariff treatment to identical goods covered by subsequent statements, declarations, or certifications by that importer, exporter, or producer until the importing Party determines that the importer, exporter, or producer is in compliance with this Chapter.

Article 4.19: Obligations Relating to Importations

1. Each Party shall grant any claim for preferential tariff treatment made in accordance with this Chapter, unless the Party issues a written determination that the claim is invalid as a matter of law or fact.

2. A Party may deny preferential tariff treatment to a good if the importer fails to comply with any requirement in this Chapter.

3. No Party may subject an importer to any penalty for making an invalid claim for preferential tariff treatment, if the importer:

- (a) did not engage in negligence, gross negligence, or fraud in making the claim and pays any customs duty owing; or

1. Each Party shall provide that, for purposes of interpreting the rules of origin set forth in this Annex:
 - (a) the specific rule, or specific set of rules, that applies to a particular heading or subheading is set out immediately adjacent to the heading or subheading;
 - (b) the requirement of a change in tariff classification applies only to non-originating materials;
 - (c) where a specific rule of origin is defined using the criterion of a change in tariff classification, and it is written to exclude tariff provisions at the level of a chapter, heading, or subheading of the Harmonized System, it shall be construed to mean that the rule of origin requires that materials classified in those excluded provisions be originating for the good to qualify as an originating good;
 - (d) when a heading or subheading is subject to alternative specific rules of origin, the rule will be considered to be met if a good satisfies one of the alternatives;
 - (e) when a single rule of origin is applicable to a group of headings or subheadings and that rule of origin specifies a change of heading or subheading, it shall be understood that the change in headings or subheadings may occur within a single heading or subheading or between headings or subheadings of the group. When, however, a rule refers to a change in heading or subheading “outside that group” this shall be understood to require that the change in heading or subheading must occur from a heading or subheading that is outside the group of headings or subheadings set out in the rule; and
 - (f) reference to weight in the rules for goods provided for in Chapter 1 through 24 of the Harmonized System means dry weight unless otherwise specified in the Harmonized System.

Note:

For purposes of this chapter, a “chemical reaction” is a process (including a biochemical process) that results in a molecule with a new structure by breaking intramolecular bonds and by forming new intramolecular bonds, or by altering the spatial arrangement of atoms in a molecule.

The following are not considered to be chemical reactions for the purposes of this definition:

For purposes of heading 27.10, the following processes confer origin:

- (a) Atmospheric distillation: A separation process in which petroleum oils are converted, in a distillation tower, into fractions according to boiling point and the vapor then condensed into different liquefied fractions.
- (b) Vacuum distillation: Distillation at a pressure below atmospheric but not so low that it would be classed as molecular distillation.

Rule 1: Chemical Reaction

A good of Chapters 28 through 38, except ethyl isopropyl thionocarbamates of subheading 2930.20 and goods of heading 38.23, that results from a chemical reaction in the territory of one or more of the Parties shall be treated as an originating good.

Note: For purposes of this Section, a "chemical reaction" is a process (including a biochemical process) that results in a molecule with a new structure by breaking intramolecular bonds and by forming new intramolecular bonds, or by altering the spatial arrangement of atoms in a molecule.

The following are not considered to be chemical reactions for the purposes of determining whether a good is originating:

- (a) dissolution in water or in another solvent;
- (b) the elimination of solvents, including solvent water; or
- (c) the addition or elimination of water of crystallization.

Rule 2: Purification

A good of Chapters 28 through 38, that is subject to purification shall be treated as an originating good provided that the purification occurs in the territory of one or more of the Parties and results in the following:

- (a) the elimination of 80 percent of the impurities; or

- (b) the reduction or elimination of impurities resulting in a good suitable:
 - (i) as a pharmaceutical, medicinal, cosmetic, veterinary, or food grade substance;
 - (ii) as a chemical product or reagent for analytical, diagnostic, or laboratory uses;
 - (iii) as an element or component for use in micro-elements;
 - (iv) for specialized optical uses;

Rule 4: Change in Particle Size

A good of Chapter 30, 31, or 33, shall be treated as an originating good if the deliberate and controlled modification in particle size of the good, including micronizing by dissolving a polymer and subsequent precipitation, other than by merely crushing or pressing, resulting in a good having a defined particle size, defined particle size distribution, or defined surface area, which is relevant to the purposes of the resulting good and have different physical or chemical characteristics from the input materials, occurs in the territory of one or more of the Parties.

Rule 5: Standards Materials

A good of Chapters 28 through 38, shall be treated as an originating good if the production of standards materials occurs in the territory of one or more of the Parties.

For the purposes of this rule “standards materials” (including standard solutions) are preparations suitable for analytical, calibrating, or referencing uses, having precise degrees of purity or proportions that are certified by the manufacturer.

A good that is subject to purification shall be treated as an originating good provided that the purification occurs in the territory of one or more of the Parties and result in the following:

- (a) the elimination of 80 percent of the impurities; or
- (b) the reduction or elimination of impurities resulting in a good suitable:
 - (i) as a pharmaceutical, medicinal, cosmetic, veterinary, or food grade substances;
 - (ii) as a chemical product or reagent for analytical, diagnostic or laboratory uses;
 - (iii) as an element or component for use in micro-elements;
 - (iv) for specialized optical uses;

Chapter Seven

Technical Barriers to Trade

Objectives

The objectives of this Chapter are to increase and facilitate trade and obtain effective market access through the improved implementation of the TBT Agreement, the elimination of unnecessary technical barriers to trade, and the enhancement of bilateral cooperation.

Article 7.1: Affirmation of the TBT Agreement

Further to Article 1.2 (Relation to Other Agreements), the Parties affirm their existing rights and obligations with respect to each other under the TBT Agreement.

Article 7.2: Scope and Coverage

1. This Chapter applies to the preparation, adoption, and application of all standards, technical regulations, and conformity assessment procedures of central government bodies that may, directly or indirectly, affect trade in goods between the Parties,¹ including any amendments² thereto and any addition to their rules or the product coverage thereof, except amendments and additions of an insignificant nature.
2. Notwithstanding paragraph 1, this Chapter does not apply to:
 - (a) technical specifications prepared by governmental bodies for production or consumption requirements of such bodies; and
 - (b) sanitary and phytosanitary measures.

Articles 7.3: Trade Facilitation

1. The Parties shall intensify their joint work in the field of standards, technical regulations, and conformity assessment procedures with a view to facilitating trade between the Parties. In particular, the Parties shall seek to identify, develop, and promote trade facilitating initiatives regarding standards, technical regulations, and conformity assessment procedures that are appropriate for particular issues or sectors, taking into consideration the Parties' experience in other bilateral, regional, and multilateral agreements, as appropriate. Such initiatives may include cooperation on regulatory issues, such as convergence, alignment with international standards, reliance on a supplier's declaration of conformity, the recognition and acceptance of the results of conformity assessment procedures, and the use of accreditation to qualify conformity assessment bodies.
2. In determining whether an international standard, guide, or recommendation within the meaning of Articles 2 and 5 and Annex 3 of the TBT Agreement exists, each Party shall apply the principles set out in *Decisions and Recommendations adopted by the Committee since 1 January 1995*, G/TBT/1/Rev.8, 23 May 2002, Section IX (*Decision of the Committee on Principles for the Development of International Standards, Guides and Recommendations with relation to Articles 2, 5 and Annex 3 of the Agreement*) issued by the WTO Committee on Technical Barriers to Trade.

¹ For greater certainty, the Parties understand that any reference in this Chapter to a standard, technical regulation, or conformity assessment procedure includes those related to metrology.

² "Any amendments" includes the elimination of technical regulations.

3. Where a Party detains at a port of entry a good originating in the territory of another Party due to a perceived failure to comply with a technical regulation, it shall immediately notify the importer of the reasons for the detention.

4. On request of another Party, a Party shall give favorable consideration to any sector-specific proposal that the requesting Party makes for further cooperation under this Chapter.

Article 7.4: Conformity Assessment

1. The Parties recognize that a broad range of mechanisms exists to facilitate the acceptance in a Party's territory of the results of conformity assessment procedures conducted in another Party's territory. For example:

- (a) the importing Party may rely on a supplier's declaration of conformity;
- (b) a conformity assessment body located in the territory of a Party may enter into a voluntary arrangement with a conformity assessment body located in the territory of another Party to accept the results of each other's assessment procedures;
- (c) a Party may agree with another Party to accept the results of conformity assessment procedures that bodies located in the other Party's territory conduct with respect to specific technical regulations;
- (d) a Party may adopt accreditation procedures for qualifying conformity assessment bodies located in the territory of another Party;
- (e) a Party may designate conformity assessment bodies located in the territory of another Party; and
- (f) a Party may recognize the results of conformity assessment procedures conducted in the territory of another Party.

The Parties shall intensify their exchange of information on these and other similar mechanisms.

2. Where a Party does not accept the results of a conformity assessment procedure conducted in the territory of another Party, it shall, on request of that other Party, explain the reasons so that corrective action may be taken, if necessary.

3. Each Party shall accredit, approve, license, or otherwise recognize conformity assessment bodies in the territories of the other Parties on terms no less favorable than those it accords to conformity assessment bodies in its territory. Where a Party accredits, approves, licenses, or otherwise recognizes a body assessing conformity with a specific technical regulation or standard in its territory and refuses to accredit, approve, license, or otherwise recognize a body assessing conformity with that technical regulation or standard in the territory of another Party, it shall, on request of that other Party, explain the reasons for its decision so that corrective action may be taken, if necessary.

4. Where a Party declines a request from another Party to engage in negotiations or conclude an agreement on facilitating recognition in its territory of the results of conformity assessment procedures conducted by bodies in the other Party's territory, it shall, on request of that other Party, explain the reasons for its decision.

Article 7.5: Technical Regulations

1. Where a Party provides that foreign technical regulations may be accepted as equivalent to a specific technical regulation of its own, and the Party does not accept a technical regulation of another Party as equivalent to that technical regulation, it shall, at the request of that other Party, explain the reasons for its decision. A Party seeking the acceptance of its technical regulation as equivalent should provide, as appropriate, information regarding the relationship of its technical regulation to international standards referenced in the technical regulation of the other Party, the circumstances which gave rise to the adoption of its technical regulation, and the similarity of the respective conformity assessment procedures.
2. Where a Party does not provide that foreign technical regulations may be accepted as equivalent to its own, it shall, at the request of another Party, explain its reasons for not accepting that other Party's technical regulations as equivalent.
3. At the request of a Party which may have an interest in developing a similar technical regulation, and in order to minimize duplicate expenses, the other Party shall provide any available information, studies, or other relevant documents, except for confidential information on which it has relied in the development of a technical regulation.

Article 7.6: Transparency

1. Each Party shall allow persons of the other Parties to participate in the development of its standards, technical regulations, and conformity assessment procedures. Each Party shall permit persons of the other Parties to participate in the development of such measures on terms no less favorable than those accorded to its own persons and to persons of any other Party.
2. Each Party shall recommend that non-governmental standardizing bodies in its territory observe paragraph 1.
3. In order to enhance the opportunity for persons to be aware of, and to understand, proposed technical regulations and conformity assessment procedures, and to be able to provide meaningful comments on such regulations and procedures, a Party publishing a notice and filing a notification under Article 2.9, 3.2, 5.6 or 7.2 of the TBT Agreement, shall:
 - (a) include in the notice a statement describing the objective of the proposed technical regulation or conformity assessment procedure and the rationale for the approach the Party is proposing; and
 - (b) transmit the proposal electronically to the other Parties through the inquiry points each Party has established under Article 10 of the TBT Agreement at the same time as it notifies other WTO Members of the proposal pursuant to the TBT Agreement.

Each Party shall publish and notify those technical regulations that are in accordance with the technical content of any relevant international standards.

Each Party should allow at least 60 days after it transmits a proposal under subparagraph (b) for persons and the other Parties to provide comments in writing on the proposal. A Party shall give favorable consideration to reasonable requests for extending the comment period.

4. Each Party shall publish or otherwise make available to the public, either in print or electronically, its responses to significant comments that it receives from persons or the other

Parties under paragraph 3 no later than the date it publishes the final technical regulation or conformity assessment procedure.

5. Where a Party makes a notification under Article 2.10, 3.2, 5.7, or 7.2 of the TBT Agreement because urgent problems have arisen or threaten to arise, the notifying Party shall at the same time transmit the notification electronically to the other Parties through the inquiry points referenced in subparagraph 3(b).

Each Party also shall notify those technical regulations that are in accordance with the technical content of any relevant international standards.

6. A Party shall, on request of another Party, provide information regarding the objectives of, and rationale for, a standard, technical regulation, or conformity assessment procedure that the Party has adopted or is proposing to adopt.

7. Each Party shall implement this Article as soon as is practicable and under no circumstance later than three years from the date of entry into force of this Agreement.

Article 7.7: Committee on Technical Barriers to Trade

1. The Parties hereby establish the Committee on Technical Barriers to Trade, comprising representatives of each Party, as set out in Annex 7.7.

2. The Committee's functions shall include:

- (a) monitoring the implementation and administration of this Chapter;
- (b) promptly addressing any issue that a Party raises related to the development, adoption, application, or enforcement of standards, technical regulations, or conformity assessment procedures;
- (c) enhancing cooperation in the development and improvement of standards, technical regulations, and conformity assessment procedures and, as appropriate, designing and proposing mechanisms for technical assistance of the type described in Article 11 of the TBT Agreement, in coordination with the Committee on Trade Capacity Building, as appropriate;
- (d) where appropriate, facilitating sectoral cooperation between governmental and non-governmental conformity assessment bodies in the territories of two or more Parties;
- (e) exchanging information on developments in non-governmental, regional, and multilateral fora engaged in activities related to standards, technical regulations, and conformity assessment procedures;
- (f) at a Party's request, consulting on any matter arising under this Chapter;
- (g) reviewing this Chapter in light of any developments under the TBT Agreement and developing recommendations for amendments to this Chapter in light of those developments;
- (h) taking any other steps the Parties consider will assist them in implementing this Chapter and the TBT Agreement and in facilitating trade;
- (i) as it considers appropriate, reporting to the Commission on the implementation of this Chapter;

- (j) establishing, if necessary, for particular issues or sectors, working groups for the treatment of specific matters related to this Chapter and the TBT Agreement; and
 - (k) exchanging information, at a Party's request, on the Parties' respective views regarding third party issues concerning standards, technical regulations, and conformity assessment procedures so as to foster a common approach to their resolution.
3. When a Party requests consultations under subparagraph 2(f), the Parties shall make every effort to obtain a mutually satisfactory solution within 60 days .
4. Where the Parties have had recourse to consultations under subparagraph 2(f), such consultations shall constitute consultations under Article 21.4 (Consultations).
5. The Committee shall meet at least once a year unless the Parties otherwise agree. The Committee shall carry out its work through the communication channels agreed to by the Parties, which may include electronic mail, videoconferencing, or other means.
6. All decisions of the Committee shall be made by consensus unless the Committee decides otherwise.

Article 7.8: Information Exchange

1. If a Party requests any information or explanation pursuant to the provisions of this Chapter, the other Party shall provide such information or explanation in print or electronically within a reasonable time. A Party shall endeavor to respond to each such request within 60 days.
2. With respect to information exchanges, in compliance with Article 10 of the TBT Agreement, each Party shall apply the recommendations set out in *Decisions and Recommendations adopted by the Committee since 1 January 1995, G/TBT/1/Rev. 8, 23 May 2002, Section IV (Procedure for information exchanges)* issued by the WTO Committee on Technical Barriers to Trade.

Chapter Eight

Trade Remedies

Section A: Safeguard Measures

Article 8.1: Imposition of a Safeguard Measure

1. A Party may apply a measure described in paragraph 2, during the transition period only, if as a result of the reduction or elimination of a duty pursuant to this Agreement,¹ an originating good is being imported into the Party's territory in such increased quantities, in absolute terms or relative to domestic production, and under such conditions as to constitute a substantial cause of serious injury, or threat thereof, to a domestic industry producing a like or directly competitive good.
2. If the conditions in paragraph 1 are met, a Party may to the extent necessary to prevent or remedy serious injury, or threat thereof, and facilitate adjustment:
 - (a) suspend the further reduction of any rate of duty provided for under this Agreement on the good; or
 - (b) increase the rate of duty on the good to a level not to exceed the lesser of
 - (i) the most-favored-nation (MFN) applied rate of duty in effect at the time the measure is applied, and
 - (ii) the MFN applied rate of duty in effect on the day immediately preceding the date of entry into force of this Agreement.²
3. A Party shall apply a safeguard measure to imports of an originating good³ irrespective of their source.
4. No Party may apply a safeguard measure against an originating good of another Party as long as the exporting Party's share of imports of the originating good in the importing Party does not exceed three percent, provided that Parties with less than three percent import share collectively account for not more than nine percent of total imports of such originating good.

Article 8.2: Standards for a Safeguard Measure

1. No Party may maintain a safeguard measure:
 - (a) except to the extent, and for such time, as may be necessary to prevent or remedy serious injury and to facilitate adjustment;

¹ The Parties note that prior to the date of entry into force of this Agreement, the United States accorded duty-free treatment under the U.S. Generalized System of Preferences and the U.S. Andean Trade Preference Act, as amended, to many of the goods imported from the other Parties.

² The Parties understand that neither tariff rate quotas nor quantitative restrictions would be a permissible form of safeguard measure.

³ For greater certainty, goods imported into one Party from another Party under an Andean Community certificate of origin shall not be subject to safeguard measures under this Chapter.

- (b) for a period exceeding two years; except that the period may be extended by up to two years if the competent authority determines, in conformity with the procedures set out in Article 8.3, that the measure continues to be necessary to prevent or remedy serious injury and to facilitate adjustment and that there is evidence that the domestic industry is adjusting; or
 - (c) beyond the expiration of the transition period.
- 2. In order to facilitate adjustment in a situation where the expected duration of a safeguard measure is over one year, the Party applying the measure shall progressively liberalize it at regular intervals during the period of application.
- 3. No Party may apply a safeguard measure more than once on the same good.
- 4. On the termination of a safeguard measure, the rate of duty shall be no higher than the rate that, according to the Party's Schedule to Annex 2.3 (Tariff Elimination), would have been in effect one year after the initiation of the measure. Beginning on January 1 of the year following the termination of the measure, the Party that has applied the measure shall:
 - (a) apply the rate of duty set out in the Party's Schedule to Annex 2.3 (Tariff Elimination) as if the safeguard measure had never been applied; or

Article 8.3: Investigation Procedures and Transparency Requirements

- 1. A Party shall apply a safeguard measure only following an investigation by the Party's competent authority in accordance with Articles 3 and 4.2(c) of the Safeguards Agreement; and to this end, Articles 3 and 4.2(c) of the Safeguards Agreement are incorporated into and made part of this Agreement, *mutatis mutandis*.
- 2. In the investigation described in paragraph 1, a Party shall comply with the requirements of Article 4.2(a) of the Safeguards Agreement; and to this end, Article 4.2(a) of the Safeguards Agreement is incorporated into and made part of this Agreement, *mutatis mutandis*.

Article 8.4: Notification and Consultation

- 1. A Party shall promptly notify the other Parties, in writing on:
 - (a) initiating a safeguard proceeding under this Chapter;
 - (b) making a finding of serious injury, or threat thereof, caused by increased imports under Article 8.1; and
 - (c) taking a decision to apply or extend a safeguard measure.
- 2. A Party shall provide to the other Parties a copy of the public version of the report of its competent investigating authority required under Article 8.3.1.
- 3. On request of a Party whose good is subject to a safeguard proceeding under this Chapter, the Party conducting that proceeding shall enter into consultations with the requesting Party to review a notification under paragraph 1 or any public notice or report that

the competent investigating authority has issued in connection with the proceeding.

Article 8.5: Compensation

1. A Party applying a safeguard measure shall, after consultations with each Party against whose good the measure is applied, provide mutually agreed trade liberalizing compensation in the form of concessions having substantially equivalent trade effects or equivalent to the value of the additional duties expected to result from the measure. The Party applying the safeguard measure shall provide an opportunity for such consultations no later than 30 days after the application of the safeguard measure.

2. If the consultations under paragraph 1 do not result in an agreement on trade liberalizing compensation within 30 days, any Party against whose good the measure is applied may suspend the application of substantially equivalent concessions to the trade of the Party applying the safeguard measure.

3. A Party against whose good the measure is applied shall notify the Party applying the safeguard measure in writing at least 30 days before suspending concessions under paragraph 2.

4. The obligation to provide compensation under paragraph 1 and the right to suspend concessions under paragraph 2 shall terminate on the later of:

- (a) the termination of the safeguard measure, or
- (b) the date on which the rate of duty returns to the rate of duty set out in the Party's Schedule to Annex 2.3 (Tariff Elimination).

Article 8.6: Global Safeguard Measures

1. Each Party retains its rights and obligations under Article XIX of the GATT 1994 and the Safeguards Agreement.

2. This Agreement does not confer any additional rights or obligations on the Parties with regard to actions taken pursuant to Article XIX of the GATT 1994 and the Safeguards Agreement except that a Party taking a global safeguard measure may exclude imports of an originating good of another Party if such imports are not a substantial cause of serious injury or threat thereof.

3. No Party may apply, with respect to the same good, at the same time:

- (a) a safeguard measure; and
- (b) a measure under Article XIX of the GATT 1994 and the Safeguards Agreement.

Article 8.7: Definitions

2. For purposes of this Chapter, covered procurement means a procurement of goods, services, or both:

Compliance

8. Each Party shall ensure that its procuring entities comply with this Chapter in conducting covered procurements.

Valuation

9. In estimating the value of a procurement for the purpose of ascertaining whether it is a covered procurement, a procuring entity shall:

- (a) neither divide a procurement into separate procurements nor use a particular method for estimating the value of the procurement for the purpose of avoiding the application of this Chapter;

- (c) where the procurement is to be conducted in multiple parts, with contracts to be awarded at the same time or over a given period to one or more suppliers, base its calculation of the total maximum value of the procurement over its entire duration.

10. Where the total estimated maximum value of a procurement over its entire duration is not known, the procurement shall be covered by this Chapter.

Article 9.2: General Principles

National Treatment and Non-Discrimination

1. With respect to any measure covered by this Chapter, each Party shall accord unconditionally to the goods and services of the other Party and to the suppliers of the other Party offering such goods or services, treatment no less favorable than the most favorable treatment the Party accords to domestic goods, services, and suppliers.

2. With respect to any measure covered by this Chapter, a Party may not:

- (a) treat a locally established supplier less favorably than another locally established supplier on the basis of degree of foreign affiliation or ownership; or
- (b) discriminate against a locally established supplier on the basis that the goods or services offered by that supplier for a particular procurement are goods or services of the other Party.

Tendering Procedures

3. A procuring entity shall use an open tendering procedure for covered procurement, except where Articles 9.7.3 through 9.7.5 and 9.8 apply.

Rules of Origin

4. Each Party shall apply to covered procurement of goods the rules of origin that it applies in the normal course of trade to those goods.

Offsets

5. A procuring entity may not seek, take account of, impose, or enforce offsets in the qualification and selection of suppliers, goods, or services, in the evaluation of tenders, or in the award of contracts, before or in the course of a covered procurement.

Measures Not Specific to Procurement

6. Paragraphs 1 and 2 shall not apply to measures respecting customs duties and charges of any kind imposed on or in connection with importation, the method of levying such duties and charges, other import regulations or formalities, or measures affecting trade in services, other than measures specifically governing covered procurements.

- (a) laws, regulations, and procedures; and
- (b) judicial decisions and administrative rulings of general application.

2. Each Party shall, on request, provide to the other Party an explanation relating to such information.

Article 9.4: Publication of Notices

Notice of Intended Procurement

1. For each covered procurement, except in the circumstances described in Article 9.8, a procuring entity shall publish a notice inviting interested suppliers to submit tenders (“notice of intended procurement”) or, where appropriate, applications for participation in the procurement. Any such notice shall be published in an electronic or paper medium that is widely disseminated and readily accessible to the public for the entire period established for tendering. Each Party shall encourage procuring entities to publish notices of intended procurement in a single point of entry electronic publication that is accessible through the Internet or a comparable network.

2. Except as provided for in paragraphs 3, 4, and 5, a procuring entity shall establish that the final date for the submission of tenders shall be not less than 40 days:
 - (a) from the date on which the notice of intended procurement is published; or
 - (b) where the procuring entity has used selective tendering, from the date on which the entity invites suppliers to submit tenders.
3. A procuring entity may reduce the time limit for submission of tenders by up to 10 days where the entity publishes a notice of intended procurement in accordance with Article 9.4 in an electronic medium and concurrently provides the tender documentation in an electronic medium.
4. A procuring entity may establish a time limit for tendering that is less than 40 days, or 30 days where the entity has complied with paragraph 3, provided that the time given to suppliers is sufficient to enable them to prepare and submit responsive tenders and is in no case less than 10 days before the final date for the submission of tenders, where:

- (a) the procuring entity published a separate notice, including a notice of planned procurement under Article 9.4.3 at least 40 days and not more than 12 months in advance, and such separate notice contains a description of the procurement, the relevant time limits for the submission of tenders or, where appropriate, applications for participation in a procurement, and the address from which documents relating to the procurement may be obtained;
- (b) the procuring entity procures commercial goods or services; or
- (c) a state of unforeseen urgency, duly substantiated by the procuring entity, renders impracticable the time limits specified in paragraph 2 or, where applicable, paragraph 3.

5. A procuring entity shall require all participating suppliers to submit tenders in accordance with a common deadline. For greater certainty, this requirement also applies where:

- (a) as a result of the need to amend information provided to suppliers during the procurement process, the procuring entity extends the time limits for qualification or tendering procedures; or
- (b) in the case of negotiations, the negotiations are concluded and suppliers may submit new tenders.

Article 9.6: Information on Intended Procurements

Tender Documentation

1. A procuring entity shall promptly provide, on request, to any supplier interested in participating in a procurement tender documentation that includes all information necessary to permit suppliers to prepare and submit responsive tenders. Unless already provided in the notice of intended procurement, such documentation shall include a complete description of:

- (a) the procurement, including the nature, scope, and, where known, the quantity of the goods or services to be procured and any requirements to be fulfilled, including any technical specifications, conformity certification, plans, drawings, or instructional materials;
- (b) any conditions for participation, including any financial guarantees, information, and documents that suppliers are required to submit;
- (c) all criteria to be considered in the awarding of the contract and, except where price is the determinative factor, the relative importance of such criteria;
- (d) where there will be a public opening of tenders, the date, time, and place for the opening of tenders; and
- (e) any other terms or conditions relevant to the evaluation of tenders.

2. A procuring entity shall promptly reply to any reasonable request for relevant information by a supplier participating in a covered procurement, except that the entity shall not make available information with regard to a specific procurement in a manner that would give the requesting supplier an advantage over its competitors in the procurement.

Technical Specifications

3. A procuring entity may not prepare, adopt, or apply any technical specification or prescribe any conformity assessment procedure with the purpose or the effect of creating an unnecessary obstacle to trade between the Parties.
4. In prescribing the technical specifications for the good or service being procured, a procuring entity shall:
 - (a) specify the technical specification, wherever appropriate, in terms of performance and functional requirements, rather than design or descriptive characteristics; and
 - (b) base the technical specification on international standards, where such exist and are applicable to the procuring entity, except where the use of an international standard would fail to meet the entity's program requirements or would impose a greater burden than the use of a recognized national standard.
5. A procuring entity may not prescribe any technical specifications that require or refer to a particular trademark or trade name, patent, copyright, design or type, specific origin, producer, or supplier, unless there is no other sufficiently precise or intelligible way of describing the procurement requirements and provided that, in such cases, words such as "or equivalent" are also included in the tender documentation.
6. A procuring entity may not seek or accept, in a manner that would have the effect of precluding competition, advice that may be used in the preparation or adoption of any technical specification for a specific procurement from any person that may have a commercial interest in the procurement.
7. For greater certainty, this Article is not intended to preclude a procuring entity from preparing, adopting, or applying technical specifications:
 - (a) to promote the conservation of natural resources and the environment; or
 - (b) to require a supplier to comply with generally applicable laws regarding
 - (i) fundamental principles and rights at work;
 - (ii) acceptable conditions of work with respect to minimum wages, hours of work, and occupational safety and health,in the territory in which the good is produced or the service is performed.

Modifications

8. Where, in the course of a covered procurement, a procuring entity modifies the criteria or technical requirements set out in a notice or tender documentation provided to participating suppliers, it shall transmit all such modifications in writing:
 - (a) to all the suppliers that are participating at the time the information is modified, if the identities of such suppliers are known, and, in all other cases, in the same manner that the original information was transmitted; and
 - (b) in adequate time to allow such suppliers to modify and re-submit their initial tenders, as appropriate.

Article 9.7: Conditions for Participation

General Requirements

1. Where a procuring entity requires suppliers to satisfy conditions for participation, the entity shall, subject to the other provisions of this Chapter:
 - (a) limit such conditions to those that are essential to ensure that a supplier has the legal, commercial, technical, and financial abilities to fulfill the requirements and technical specifications of the procurement;
 - (b) assess the commercial, technical, and financial abilities of a supplier on the basis of the supplier's global business activities, including its activity in the territory of the Party of the supplier as well as its activity, if any, in the territory of the Party of the procuring entity;
 - (c) not make it a condition for participation in a procurement that a supplier has previously been awarded one or more contracts by a procuring entity of the Party of the procuring entity or that the supplier has prior work experience in the territory of the Party;
 - (d) base its determination of whether a supplier has satisfied the conditions for participation solely on the conditions that have been specified in advance in notices or tender documentation; and
 - (e) allow all domestic suppliers and suppliers of the other Party that satisfy the conditions for participation to participate in the procurement.
2. A procuring entity may exclude a supplier from a procurement on grounds such as:
 - (a) bankruptcy; or
 - (b) false declarations.

Multi-use Lists

3. A procuring entity may establish a multi-use list provided that the entity annually publishes or otherwise makes available continuously in electronic form a notice inviting interested suppliers to apply for inclusion on the list. The notice shall include:
 - (a) a description of the goods or services that may be procured using the list;
 - (b) the conditions for participation to be satisfied by suppliers and the methods that the procuring entity will use to verify a supplier's satisfaction of the conditions;
 - (c) the name and address of the procuring entity and any other information necessary to contact the entity and obtain all relevant documents relating to the list;
 - (d) any deadlines for submission of applications for inclusion on the list; and
 - (e) an indication that the list may be used for procurement covered by this Chapter.
4. A procuring entity that maintains a multi-use list shall:

- (a) include on the list, within a reasonably short time following submission of an application, any supplier that satisfies the conditions for participation; and
- (b) where an entity uses the multi-use list in any intended procurement, invite all suppliers on the multi-use list to submit tenders.

Selective Tendering

5. Where a Party's law allows the use of selective tendering procedures, a procuring entity shall, for each intended procurement:

- (a) publish a notice inviting suppliers to apply for participation in the procurement sufficiently in advance to provide interested suppliers time to prepare and submit applications and for the entity to evaluate, and make its determinations based on, such applications; and
- (b) allow all domestic suppliers and suppliers of the other Party that the entity has determined satisfy the conditions for participation to submit a tender, unless the entity has stated in the notice of intended procurement or, where publicly available, the tender documentation a limitation on the number of suppliers that will be permitted to tender and the criteria for such a limitation.

Information on Procuring Entity's Decisions

6. Where a supplier applies for participation in a covered procurement, a procuring entity shall promptly advise such supplier of the entity's decision with respect to the supplier's application.

7. Where a procuring entity:

- (a) rejects an application for participation in a procurement conducted using the procedures described in paragraph 5;
- (b) rejects a request for inclusion on a list referred to in paragraph 3; or
- (c) ceases to recognize a supplier as having satisfied the conditions for participation,

the entity shall promptly inform the supplier and, on request, promptly provide the supplier with a written explanation of the reasons for the entity's decision.

Article 9.8: Limited Tendering

1. Provided that a procuring entity does not use this provision to avoid competition, to protect domestic suppliers, or in a manner that discriminates against suppliers of the other Party, the entity may contact a supplier or suppliers of its choice and may choose not to apply Articles 9.4 through 9.7, 9.9.1, and 9.9.3 through 9.9.7 in any of the following circumstances:

- (a) where, in response to a prior notice or invitation to participate,
 - (i) no tenders were submitted,
 - (ii) no tenders were submitted that conform to the essential requirements in the tender documentation, or
 - (iii) no suppliers satisfied the conditions for participation,

and the entity does not substantially modify the essential requirements of the procurement;

- (b) where a good or service can be supplied only by a particular supplier and no reasonable alternative or substitute good or service exists for any of the following reasons:
 - (i) the requirement is for a work of art,
 - (ii) protection of patents, copyrights, or other exclusive rights, or proprietary information, or
 - (iii) due to an absence of competition for technical reasons;
- (c) for additional deliveries of goods or services by the original supplier that are intended either as replacement parts, extensions, or continuing services for existing equipment, software, services, or installations, where a change of supplier would compel the procuring entity to procure goods or services that do not meet requirements of interchangeability with existing equipment, software, services, or installations;
- (d) for goods purchased on a commodity market;
- (e) where a procuring entity procures a prototype or a first good or service that is developed at its request in the course of, and for, a particular contract for research, experiment, study, or original development. For greater certainty, when such a contract has been fulfilled, subsequent procurements of the goods or services shall be subject to Articles 9.4 through 9.7 and 9.9;
- (f) in so far as is strictly necessary, where, for reasons of extreme urgency brought about by events unforeseeable by the procuring entity, the goods or services cannot be obtained in time under procedures consistent with Articles 9.4 through 9.7 and the use of such procedures would result in serious injury to the procuring entity or the relevant Party; or
- (g) where additional construction services that were not included in the initial contract but that were within the objectives of the original tender documentation have, due to unforeseeable circumstances, become necessary to complete the construction services described therein. In such cases, the total value of contracts awarded for additional construction services may not exceed 50 percent of the amount of the initial contract.

2. For each contract awarded under paragraph 1, a procuring entity shall prepare and, on request, submit to the other Party a written report that includes:

- (a) the name of the procuring entity;
- (b) the value and kind of goods or services procured; and
- (c) a statement indicating the circumstances and conditions described in paragraph 1 that justified the use of a procedure other than open or selective tendering procedures.

Article 9.9: Treatment of Tenders and Awarding of Contracts

Receipt and Opening of Tenders

1. A procuring entity shall receive and open all tenders under procedures that guarantee the fairness and impartiality of the procurement process.
2. A procuring entity shall treat tenders in confidence until at least the opening of the tenders. In particular, the procuring entity shall not provide information to particular suppliers that might prejudice fair competition between suppliers.
3. Where a procuring entity provides suppliers with an opportunity to correct unintentional errors of form between the opening of tenders and the awarding of the contract, the entity shall provide the same opportunity to all participating suppliers.

Awarding of Contracts

4. A procuring entity shall require that, in order to be considered for an award, a tender must be submitted:
 - (a) in writing and, at the time of opening, must conform to the essential requirements and evaluation criteria specified in the notices and tender documentation; and
 - (b) by a supplier that satisfies any conditions for participation.
5. Unless a procuring entity determines that it is not in the public interest to award a contract, the entity shall award the contract to the supplier that the entity has determined satisfies the conditions for participation and is fully capable of undertaking the contract and whose tender is determined to be the lowest price or the most advantageous solely on the basis of the requirements and evaluation criteria specified in the notices and tender documentation.
6. A procuring entity may not cancel a procurement or terminate or modify awarded contracts in a manner that circumvents this Chapter.

Information Provided to Suppliers

7. A procuring entity shall promptly inform suppliers that have submitted tenders of its contract award decision. Subject to Article 9.13, a procuring entity shall, on request, provide an unsuccessful supplier with the reasons that the entity did not select that supplier's tender and the relative advantages of the successful supplier's tender.

Publication of Award Information

8. Not later than 60 days after an award, a procuring entity shall publish in an officially designated publication, which may be in either an electronic or paper medium, a notice that includes at least the following information about the contract:
 - (a) the name and address of the procuring entity;
 - (b) a description of the goods or services procured;
 - (c) the date of award;
 - (d) the name and address of the successful supplier;

- (e) the contract value; and

Maintenance of Records

9. A procuring entity shall maintain reports and records of tendering procedures relating to covered procurements, including the reports provided for in Article 9.8.2, and shall retain such reports and records for a period of at least three years after the award of a contract.

Article 9.10: Ensuring Integrity in Procurement Practices

Further to Article 19.9 (Anti-Corruption Measures), each Party shall establish or maintain procedures to declare ineligible for participation in the Party's procurements, either indefinitely or for a stated period of time, suppliers that the Party has determined to have engaged in fraudulent or other illegal actions in relation to procurement. On the request of a Party, the Party receiving the request shall identify the suppliers determined to be ineligible under these procedures, and, where appropriate, exchange information regarding those suppliers or the fraudulent or illegal action.

Article 9.11: Domestic Review of Supplier Challenges

1. Each Party shall establish or designate at least one impartial administrative or judicial authority that is independent from its procuring entities to receive and review challenges that suppliers submit relating to the application by a procuring entity of a Party's measures implementing this Chapter, and to make appropriate findings and recommendations. In the event that a body other than such an authority initially reviews a supplier's challenge, the Party shall ensure that the supplier may appeal the initial decision to an impartial administrative or judicial authority that is independent of the procuring entity that is the subject of the challenge.
2. Each Party shall ensure that a supplier may invoke the review procedure without jeopardizing its participation in ongoing or future procurement activities by the Party's procuring entities.
3. Each Party shall provide that an authority established or designated under paragraph 1 may take prompt interim measures, pending the resolution of a challenge, to preserve the supplier's opportunity to participate in the procurement and to ensure that the procuring entities of the Party comply with measures implementing this Chapter. Such interim measures may include the suspension of the award of a contract or the performance of a contract that has already been awarded.
4. Each Party shall ensure that its review procedures are publicly available in writing, and are timely, transparent, effective, and consistent with the principle of due process.
5. Each Party shall ensure that its review procedures are conducted in accordance with the following:
 - (a) a supplier shall be allowed sufficient time to prepare and submit a written challenge, which in no case shall be less than 10 days from the time when the basis of the complaint became known, or reasonably should have become known, to the supplier;

- (b) a procuring entity shall respond in writing to a supplier's complaint and disclose all relevant documents to the review authority;
- (c) a supplier that initiates a complaint shall be provided an opportunity to reply to the procuring entity's response before the review authority takes a decision on the complaint; and
- (d) the review authority shall provide its decision on a supplier's challenge in a timely fashion, in writing, with an explanation of the basis for the decision.

Article 9.12: Modifications and Rectifications to Coverage

1. A Party may make rectifications of a purely formal nature to its coverage under this Chapter, or minor amendments to its Schedules in Annex 9.1, provided that it notifies the other Party in writing and the other Party does not object in writing within 30 days of the notification. A Party that makes such a rectification or minor amendment need not provide compensatory adjustments to the other Party.
2. A Party may otherwise modify its coverage under this Chapter provided that the Party:
 - (a) notifies the other Party in writing and the other Party does not object in writing within 30 days of the notification; and
 - (b) offers, within 30 days of the notification, acceptable compensatory adjustments to the other Party to maintain a level of coverage comparable to that existing prior to the modification, where necessary.
3. A Party need not provide compensatory adjustments in those circumstances where the Parties agree that the proposed modification covers a procuring entity over which a Party has effectively eliminated its control or influence. Where a Party objects to the assertion that such government control or influence has been effectively eliminated, the objecting Party may request further information or consultations with a view to clarifying the nature of any government control or influence and reaching agreement on the procuring entity's continued coverage under this Chapter.
4. The Commission shall modify Annex 9.1 to reflect any agreed rectification, minor amendment, or modification.¹

Article 9.13: Disclosure of Information

Provision of Information to a Party

1. On request, a Party shall provide to the requesting Party information on the tender and evaluation procedures used in the conduct of a procurement sufficient to determine whether a particular procurement was conducted fairly, impartially, and in accordance with this Chapter. The information shall include information on the characteristics and relative advantages of the successful tender and on the contract price.

Non-Disclosure of Information

2. No Party, procuring entity or review authority, referred to in Article 9.11, may disclose information that the person providing it has designated as confidential, in accordance with domestic law, except with the authorization of such person.

¹ For purposes of this Article, the Commission shall comprise the Parties that have agreed to the rectification, minor amendment, or modification.

3. Nothing in this Chapter shall be construed to require a Party, including its procuring entities, to provide information disclosure of which would:

- (a) impede law enforcement;
- (b) prejudice fair competition between suppliers;
- (c) prejudice the legitimate commercial interests of particular suppliers or procuring entities, including the protection of intellectual property; or
- (d) otherwise be contrary to the public interest.

Article 9.14: Exceptions

1. Provided that such measures are not applied in a manner that would constitute a means of arbitrary or unjustifiable discrimination between the Parties where the same conditions prevail or a disguised restriction on trade, nothing in this Chapter shall be construed to prevent a Party from adopting or maintaining measures:

- (a) necessary to protect public morals, order, or safety;
- (b) necessary to protect human, animal, or plant life or health;
- (c) necessary to protect intellectual property; or
- (d) relating to goods or services of handicapped persons, of philanthropic institutions, or of prison labor.

2. The Parties understand that paragraph 1(b) includes environmental measures necessary to protect human, animal, or plant life or health.

Article 9.15: Committee on Procurement

The Parties hereby establish a Committee on Procurement comprising representatives of each Party. On request of a Party, the Committee shall meet to address matters related to the implementation of this Chapter, such as:

- (a) cooperation relating to the development and use of electronic communications in government procurement systems, including developments that may allow procuring entities to reduce the time limits for tendering set out in Article 9.5.2;
- (b) exchange of statistics and other information to assist the Parties in monitoring the implementation and operation of this Chapter;
- (c) consideration of further negotiations aimed at broadening the coverage of this Chapter; and
- (d) efforts to increase understanding of their respective government procurement systems, with a view to maximizing access to government procurement opportunities, especially for small business suppliers. To that end, a Party may ask the other Party to provide trade-related technical assistance, including training of government personnel or interested suppliers on specific elements of that Party's government procurement system, in coordination with the Committee on Trade Capacity Building, as appropriate.

 - (b) promptly notify the United States of the value in its currency of the adjusted thresholds.

Dear Minister Botero:

In connection with the signing on this date of the United States – Colombia Trade Promotion Agreement (the “Agreement”), I have the honor to confirm the following understanding reached by the Governments of the United States of America and Colombia during the course of the negotiation of Chapter Nine (Government Procurement).

In respect of Article 9.11, in the case of Colombia, the *Tribunal Contencioso Administrativo* and *Consejo de Estado* are impartial authorities for the purposes of paragraph 1 of Article 9.11. As these impartial authorities do not have authority to provide the interim remedies referred to in paragraph 3 of Article 9.11, the remedies available to the *Procuraduría General de la Nación* shall be deemed to satisfy the requirements of that paragraph. The *Procuraduría General de la Nación* is an independent agency that has the authority to suspend tendering procedures and the awarding of a contract in the course of any disciplinary proceedings brought against the government officials responsible for a procurement.

I have the honor to propose that this letter and your letter in reply confirming that your Government shares this understanding shall constitute an agreement between our two Governments.

Sincerely,

John K. Veroneau

Honorable John K. Veroneau
Representante Comercial Adjunto de los Estados Unidos
Washington, DC

Estimado Embajador Veroneau:

Tengo el honor de confirmar la recepción de su carta de fecha de hoy, la cual lee como sigue a continuación:

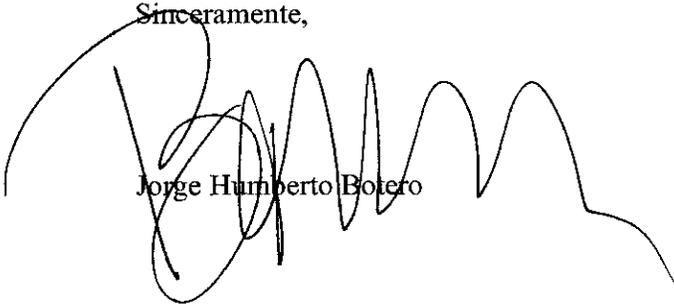

“En relación con la firma en esta fecha del Acuerdo de Promoción Comercial entre los Estados Unidos y Colombia (el “Acuerdo”), tengo el honor de confirmar el siguiente entendimiento alcanzado por los Gobiernos de los Estados Unidos y Colombia durante el curso de la negociación del Capítulo Nueve (Contratación Pública).

Con respecto al Artículo 9.11, en el caso de Colombia, el Tribunal Contencioso Administrativo y el Consejo de Estado son autoridades imparciales para los propósitos del párrafo 1 del Artículo 9.11. Como estas autoridades imparciales no tienen la autoridad de disponer medidas provisionales de conformidad con el párrafo 3 del Artículo 9.11, las medidas atribuidas a la Procuraduría General de la Nación se consideran suficientes para satisfacer los requisitos de ese párrafo. La Procuraduría General de la Nación es una entidad independiente que tiene la autoridad de suspender los procedimientos de licitación y la adjudicación de los contratos en el curso de cualquier proceso disciplinario que se siga contra los representantes del gobierno responsables de la contratación pública.

Tengo el honor en proponer que esta carta y su carta en respuesta confirmando que su Gobierno comparte este entendimiento constituirá un acuerdo entre nuestros dos Gobiernos”.

Tengo el honor de confirmar que mi Gobierno comparte el entendimiento expresado en su carta y confirmar que su carta y esta carta de respuesta constituyen parte integral del Acuerdo.

Sinceramente,

Jorge Humberto Botero

Chapter Ten

Investment

Section A: Investment

Article 10.1: Scope and Coverage¹

1. This Chapter applies to measures adopted or maintained by a Party relating to:
 - (a) investors of another Party;
 - (b) covered investments; and
 - (c) with respect to Articles 10.9 and 10.11, all investments in the territory of the Party.
2. A Party's obligations under this Section shall apply to a state enterprise or other person when it exercises any regulatory, administrative, or other governmental authority delegated to it by that Party, such as the authority to expropriate, grant licenses, approve commercial transactions, or impose quotas, fees, or other charges.
3. For greater certainty, this Chapter does not bind any Party in relation to any act or fact that took place or any situation that ceased to exist before the date of entry into force of this Agreement.

Article 10.2: Relation to Other Chapters

1. In the event of any inconsistency between this Chapter and another Chapter, the other Chapter shall prevail to the extent of the inconsistency.
2. A requirement by a Party that a service supplier of another Party post a bond or other form of financial security as a condition of the cross-border supply of a service does not of itself make this Chapter applicable to measures adopted or maintained by the Party relating to such cross-border supply of the service. This Chapter applies to measures adopted or maintained by the Party relating to the posted bond or financial security, to the extent that such bond or financial security is a covered investment.
3. This Chapter does not apply to measures adopted or maintained by a Party to the extent that they are covered by Chapter Twelve (Financial Services).

Article 10.3: National Treatment

1. Each Party shall accord to investors of another Party treatment no less favorable than that it accords, in like circumstances, to its own investors with respect to the establishment, acquisition, expansion, management, conduct, operation, and sale or other disposition of investments in its territory.
2. Each Party shall accord to covered investments treatment no less favorable than that it accords, in like circumstances, to investments in its territory of its own investors with respect

¹ For greater certainty, nothing in this Chapter shall be construed to impose an obligation on a Party to privatize any investment that it owns or controls or to prevent a Party from designating a monopoly, provided that, if a Party adopts or maintains a measure to privatize such an investment or a measure to designate a monopoly, this Chapter shall apply to such measure.

to the establishment, acquisition, expansion, management, conduct, operation, and sale or other disposition of investments.

3. The treatment to be accorded by a Party under paragraphs 1 and 2 means, with respect to a regional level of government, treatment no less favorable than the most favorable treatment accorded, in like circumstances, by that regional level of government to investors, and to investments of investors, of the Party of which it forms a part.

Article 10.4: Most-Favored-Nation Treatment

1. Each Party shall accord to investors of another Party treatment no less favorable than that it accords, in like circumstances, to investors of any other Party or of any non-Party with respect to the establishment, acquisition, expansion, management, conduct, operation, and sale or other disposition of investments in its territory.

2. Each Party shall accord to covered investments treatment no less favorable than that it accords, in like circumstances, to investments in its territory of investors of any other Party or of any non-Party with respect to the establishment, acquisition, expansion, management, conduct, operation, and sale or other disposition of investments.²

Article 10.5: Minimum Standard of Treatment³

1. Each Party shall accord to covered investments treatment in accordance with customary international law, including fair and equitable treatment and full protection and security.

2. For greater certainty, paragraph 1 prescribes the customary international law minimum standard of treatment of aliens as the minimum standard of treatment to be afforded to covered investments. The concepts of “fair and equitable treatment” and “full protection and security” do not require treatment in addition to or beyond that which is required by that standard, and do not create additional substantive rights. The obligation in paragraph 1 to provide:

- (a) “fair and equitable treatment” includes the obligation not to deny justice in criminal, civil, or administrative adjudicatory proceedings in accordance with the principle of due process embodied in the principal legal systems of the world; and
- (b) “full protection and security” requires each Party to provide the level of police protection required under customary international law.

3. A determination that there has been a breach of another provision of this Agreement, or of a separate international agreement, does not establish that there has been a breach of this Article.

Article 10.6: Treatment in Case of Strife

1. Notwithstanding Article 10.13.5(b), each Party shall accord to investors of another Party, and to covered investments, non-discriminatory treatment with respect to measures it

² For greater certainty, treatment “with respect to the establishment, acquisition, expansion, management, conduct, operation, and sale or other disposition of investments” referred to in paragraphs 1 and 2 of Article 10.4 does not encompass dispute resolution mechanisms, such as those in Section B, that are provided for in international investment treaties or trade agreements.

³ Article 10.5 shall be interpreted in accordance with Annex 10-A.

adopts or maintains relating to losses suffered by investments in its territory owing to armed conflict or civil strife.

2. Notwithstanding paragraph 1, if an investor of a Party, in the situations referred to in paragraph 1, suffers a loss in the territory of another Party resulting from:

- (a) requisitioning of its covered investment or part thereof by the latter's forces or authorities; or
- (b) destruction of its covered investment or part thereof by the latter's forces or authorities, which was not required by the necessity of the situation,

the latter Party shall provide the investor restitution, compensation, or both, as appropriate, for such loss. Any compensation shall be prompt, adequate, and effective in accordance with Article 10.7.2 through 10.7.4, *mutatis mutandis*.

3. Paragraph 1 does not apply to existing measures relating to subsidies or grants that would be inconsistent with Article 10.3 but for Article 10.13.5(b).

Article 10.7: Expropriation and Compensation⁴

1. No Party may expropriate or nationalize a covered investment either directly or indirectly through measures equivalent to expropriation or nationalization ("expropriation"), except:

- (a) for a public purpose⁵;
- (b) in a non-discriminatory manner;
- (c) on payment of prompt, adequate, and effective compensation; and
- (d) in accordance with due process of law and Article 10.5.

2. The compensation referred to in paragraph 1(c) shall:

- (a) be paid without delay;
- (b) be equivalent to the fair market value of the expropriated investment immediately before the expropriation took place ("the date of expropriation");
- (c) not reflect any change in value occurring because the intended expropriation had become known earlier; and
- (d) be fully realizable and freely transferable.

3. If the fair market value is denominated in a freely usable currency, the compensation referred to in paragraph 1(c) shall be no less than the fair market value on the date of expropriation, plus interest at a commercially reasonable rate for that currency, accrued from the date of expropriation until the date of payment.

⁴ Article 10.7 shall be interpreted in accordance with Annex 10-B.

⁵ For greater certainty, for purposes of this article, the term "public purpose" refers to a concept in customary international law. Domestic law may express this or a similar concept using different terms, such as "public necessity," "public interest," or "public use."

4. If the fair market value is denominated in a currency that is not freely usable, the compensation referred to in paragraph 1(c) – converted into the currency of payment at the market rate of exchange prevailing on the date of payment – shall be no less than:

- (a) the fair market value on the date of expropriation, converted into a freely usable currency at the market rate of exchange prevailing on that date, plus
- (b) interest, at a commercially reasonable rate for that freely usable currency, accrued from the date of expropriation until the date of payment.

5. This Article does not apply to the issuance of compulsory licenses granted in relation to intellectual property rights in accordance with the TRIPS Agreement, or to the revocation, limitation, or creation of intellectual property rights, to the extent that such issuance, revocation, limitation, or creation is consistent with Chapter Sixteen (Intellectual Property Rights).

Article 10.8: Transfers

1. Each Party shall permit all transfers relating to a covered investment to be made freely and without delay into and out of its territory. Such transfers include:

- (a) contributions to capital;
- (b) profits, dividends, capital gains, and proceeds from the sale of all or any part of the covered investment or from the partial or complete liquidation of the covered investment;
- (c) interest, royalty payments, management fees, and technical assistance and other fees;
- (d) payments made under a contract, including a loan agreement;
- (e) payments made pursuant to Article 10.6.1 and 10.6.2 and Article 10.7; and
- (f) payments arising out of a dispute.

2. Each Party shall permit transfers relating to a covered investment to be made in a freely usable currency at the market rate of exchange prevailing at the time of transfer.

3. Each Party shall permit returns in kind relating to a covered investment to be made as authorized or specified in a written agreement between the Party and a covered investment or an investor of another Party.

4. Notwithstanding paragraphs 1 through 3, a Party may prevent a transfer through the equitable, non-discriminatory, and good faith application of its laws relating to:

- (a) bankruptcy, insolvency, or the protection of the rights of creditors;
- (b) issuing, trading, or dealing in securities, futures, options, or derivatives;
- (c) criminal or penal offenses;
- (d) financial reporting or record keeping of transfers when necessary to assist law enforcement or financial regulatory authorities; or
- (e) ensuring compliance with orders or judgments in judicial or administrative proceedings.

Article 10.9: Performance Requirements

1. No Party may, in connection with the establishment, acquisition, expansion, management, conduct, operation, or sale or other disposition of an investment of an investor of a Party or of a non-Party in its territory, impose or enforce any requirement or enforce any commitment or undertaking:⁶

- (a) to export a given level or percentage of goods or services;
- (b) to achieve a given level or percentage of domestic content;
- (c) to purchase, use, or accord a preference to goods produced in its territory, or to purchase goods from persons in its territory;
- (d) to relate in any way the volume or value of imports to the volume or value of exports or to the amount of foreign exchange inflows associated with such investment;
- (e) to restrict sales of goods or services in its territory that such investment produces or supplies by relating such sales in any way to the volume or value of its exports or foreign exchange earnings;
- (f) to transfer a particular technology, a production process, or other proprietary knowledge to a person in its territory;⁷ or
- (g) to supply exclusively from the territory of the Party the goods that such investment produces or the services that it supplies to a specific regional market or to the world market.

2. No Party may condition the receipt or continued receipt of an advantage, in connection with the establishment, acquisition, expansion, management, conduct, operation, or sale or other disposition of an investment in its territory of an investor of a Party or of a non-Party, on compliance with any requirement:

- (a) to achieve a given level or percentage of domestic content;
- (b) to purchase, use, or accord a preference to goods produced in its territory, or to purchase goods from persons in its territory;
- (c) to relate in any way the volume or value of imports to the volume or value of exports or to the amount of foreign exchange inflows associated with such investment; or
- (d) to restrict sales of goods or services in its territory that such investment produces or supplies by relating such sales in any way to the volume or value of its exports or foreign exchange earnings.

3. (a) Nothing in paragraph 2 shall be construed to prevent a Party from conditioning the receipt or continued receipt of an advantage, in connection with an

⁶ For greater certainty, a condition for the receipt or continued receipt of an advantage referred to in paragraph 2 does not constitute a “commitment or undertaking” for the purposes of paragraph 1.

⁷ For greater certainty, nothing in paragraph 1 shall be construed to prevent a Party, in connection with the establishment, acquisition, expansion, management, conduct, operation, or sale or other disposition of an investment of an investor of a Party or of a non-Party in its territory, from imposing or enforcing a requirement or enforcing a commitment or undertaking to train workers in its territory, provided that such training does not require the transfer of a particular technology, production process, or other proprietary knowledge to a person in its territory.

investment in its territory of an investor of a Party or of a non-Party, on compliance with a requirement to locate production, supply a service, train or employ workers, construct or expand particular facilities, or carry out research and development, in its territory.

- (b) Paragraph 1(f) does not apply:
 - (i) when a Party authorizes use of an intellectual property right in accordance with Article 31 of the TRIPS Agreement, or to measures requiring the disclosure of proprietary information that fall within the scope of, and are consistent with, Article 39 of the TRIPS Agreement; or
 - (ii) when the requirement is imposed or the commitment or undertaking is enforced by a court, administrative tribunal, or competition authority to remedy a practice determined after judicial or administrative process to be anticompetitive under the Party's competition laws.⁸
- (c) Provided that such measures are not applied in an arbitrary or unjustifiable manner, and provided that such measures do not constitute a disguised restriction on international trade or investment, paragraphs 1(b), (c), and (f), and 2(a) and (b), shall not be construed to prevent a Party from adopting or maintaining measures, including environmental measures:
 - (i) necessary to secure compliance with laws and regulations that are not inconsistent with this Agreement,
 - (ii) necessary to protect human, animal, or plant life or health, or
 - (iii) related to the conservation of living or non-living exhaustible natural resources.
- (d) Paragraphs 1(a), (b), and (c), and 2(a) and (b), do not apply to qualification requirements for goods or services with respect to export promotion and foreign aid programs.
- (e) Paragraphs 1(b), (c), (f), and (g), and 2(a) and (b), do not apply to procurement.
- (f) Paragraphs 2(a) and (b) do not apply to requirements imposed by an importing Party relating to the content of goods necessary to qualify for preferential tariffs or preferential quotas.

4. For greater certainty, paragraphs 1 and 2 do not apply to any commitment, undertaking, or requirement other than those set out in those paragraphs.

5. This Article does not preclude enforcement of any commitment, undertaking, or requirement between private parties, where a Party did not impose or require the commitment, undertaking, or requirement.

Article 10.10: Senior Management and Boards of Directors

1. No Party may require that an enterprise of that Party that is a covered investment appoint to senior management positions natural persons of any particular nationality.

⁸ The Parties recognize that a patent does not necessarily confer market power.

2. A Party may require that a majority of the board of directors, or any committee thereof, of an enterprise of that Party that is a covered investment, be of a particular nationality, or resident in the territory of the Party, provided that the requirement does not materially impair the ability of the investor to exercise control over its investment.

Article 10.11: Investment and Environment

Nothing in this Chapter shall be construed to prevent a Party from adopting, maintaining, or enforcing any measure otherwise consistent with this Chapter that it considers appropriate to ensure that investment activity in its territory is undertaken in a manner sensitive to environmental concerns.

Article 10.12: Denial of Benefits

1. A Party may deny the benefits of this Chapter to an investor of another Party that is an enterprise of such other Party and to investments of that investor if persons of a non-Party own or control the enterprise and the denying Party:

- (a) does not maintain diplomatic relations with the non-Party; or
- (b) adopts or maintains measures with respect to the non-Party or a person of the non-Party that prohibit transactions with the enterprise or that would be violated or circumvented if the benefits of this Chapter were accorded to the enterprise or to its investments.

2. A Party may deny the benefits of this Chapter to an investor of another Party that is an enterprise of such other Party and to investments of that investor if the enterprise has no substantial business activities in the territory of any Party, other than the denying Party, and persons of a non-Party, or of the denying Party, own or control the enterprise.

Article 10.13: Non-Conforming Measures

1. Articles 10.3, 10.4, 10.9, and 10.10 do not apply to:

- (a) any existing non-conforming measure that is maintained by a Party at:
 - (i) the central level of government, as set out by that Party in its Schedule to Annex I,
 - (ii) a regional level of government, as set out by that Party in its Schedule to Annex I, or
 - (iii) a local level of government;
- (b) the continuation or prompt renewal of any non-conforming measure referred to in subparagraph (a); or
- (c) an amendment to any non-conforming measure referred to in subparagraph (a) to the extent that the amendment does not decrease the conformity of the measure, as it existed immediately before the amendment, with Article 10.3, 10.4, 10.9, or 10.10.

2. Articles 10.3, 10.4, 10.9, and 10.10 do not apply to any measure that a Party adopts or maintains with respect to sectors, subsectors, or activities, as set out in its Schedule to Annex II.

3. No Party may, under any measure adopted after the date of entry into force of this Agreement and covered by its Schedule to Annex II, require an investor of another Party, by reason of its nationality, to sell or otherwise dispose of an investment existing at the time the measure becomes effective.
4. Articles 10.3 and 10.4 do not apply to any measure that is an exception to, or derogation from, the obligations under paragraph 8 of Article 16.1 (General Provisions) as specifically provided in that Article.
5. Articles 10.3, 10.4, and 10.10 do not apply to:
 - (a) procurement; or
 - (b) subsidies or grants provided by a Party, including government-supported loans, guarantees, and insurance.

Article 10.14: Special Formalities and Information Requirements

1. Nothing in Article 10.3 shall be construed to prevent a Party from adopting or maintaining a measure that prescribes special formalities in connection with covered investments, such as a requirement that investors be residents of the Party or that covered investments be legally constituted under the laws or regulations of the Party, provided that such formalities do not materially impair the protections afforded by a Party to investors of another Party and covered investments pursuant to this Chapter.
2. Notwithstanding Articles 10.3 and 10.4, a Party may require an investor of another Party or its covered investment to provide information concerning that investment solely for informational or statistical purposes. The Party shall protect any confidential business information from any disclosure that would prejudice the competitive position of the investor or the covered investment. Nothing in this paragraph shall be construed to prevent a Party from otherwise obtaining or disclosing information in connection with the equitable and good faith application of its law.

Section B: Investor-State Dispute Settlement

Article 10.15: Consultation and Negotiation

In the event of an investment dispute, the claimant and the respondent should initially seek to resolve the dispute through consultation and negotiation, which may include the use of non-binding, third-party procedures.

provided that a claimant may submit pursuant to subparagraph (a)(i)(C) or (b)(i)(C) a claim for breach of an investment agreement only if the subject matter of the claim and the claimed damages directly relate to the covered investment that was established or acquired, or sought to be established or acquired, in reliance on the relevant investment agreement.

2. At least 90 days before submitting any claim to arbitration under this Section, a claimant shall deliver to the respondent a written notice of its intention to submit the claim to arbitration (“notice of intent”). The notice shall specify:

(c) under the UNCITRAL Arbitration Rules; or

- (d) if the claimant and respondent agree, to any other arbitration institution or under any other arbitration rules.

- (d) referred to under any arbitral institution or arbitral rules selected under paragraph 3(d) is received by the respondent.

A claim asserted by the claimant for the first time after such notice of arbitration is submitted shall be deemed submitted to arbitration under this Section on the date of its receipt under the applicable arbitral rules.

5. The arbitration rules applicable under paragraph 3, and in effect on the date the claim or claims were submitted to arbitration under this Section, shall govern the arbitration except to the extent modified by this Agreement.

6. The claimant shall provide with the notice of arbitration:

- (a) the name of the arbitrator that the claimant appoints; or
- (b) the claimant's written consent for the Secretary-General to appoint that arbitrator.

Article 10.17: Consent of Each Party to Arbitration

1. Each Party consents to the submission of a claim to arbitration under this Section in accordance with this Agreement.

2. The consent under paragraph 1 and the submission of a claim to arbitration under this Section shall satisfy the requirements of:

- (b) Article II of the New York Convention for an "agreement in writing;" and
- (c) Article I of the Inter-American Convention for an "agreement."

Article 10.18: Conditions and Limitations on Consent of Each Party

2. No claim may be submitted to arbitration under this Section unless:

- (a) the claimant consents in writing to arbitration in accordance with the procedures set out in this Agreement; and
- (b) the notice of arbitration is accompanied,
 - (i) for claims submitted to arbitration under Article 10.16.1(a), by the claimant's written waiver, and
 - (ii) for claims submitted to arbitration under Article 10.16.1(b), by the claimant's and the enterprise's written waivers

of any right to initiate or continue before any administrative tribunal or court under the law of any Party, or other dispute settlement procedures, any proceeding with respect to any measure alleged to constitute a breach referred to in Article 10.16.

3. Notwithstanding paragraph 2(b), the claimant (for claims brought under Article 10.16.1(a)) and the claimant or the enterprise (for claims brought under Article 10.16.1(b)) may initiate or continue an action that seeks interim injunctive relief and does not involve the payment of monetary damages before a judicial or administrative tribunal of the respondent, provided that the action is brought for the sole purpose of preserving the claimant's or the enterprise's rights and interests during the pendency of the arbitration.⁹

- 4. (a) No claim may be submitted to arbitration:

- (b) For greater certainty, if a claimant elects to submit a claim of the type described in subparagraph (a) to an administrative tribunal or court of the respondent, or to any other binding dispute settlement procedure, that election shall be definitive, and the claimant may not thereafter submit the claim to arbitration under Section B.

Article 10.19: Selection of Arbitrators

1. Unless the disputing parties otherwise agree, the tribunal shall comprise three arbitrators, one arbitrator appointed by each of the disputing parties and the third, who shall be the presiding arbitrator, appointed by agreement of the disputing parties.

2. The Secretary-General shall serve as appointing authority for an arbitration under this Section.

⁹ In an action for interim injunctive relief described in paragraph 3 (including an action seeking to preserve evidence or property during the pendency of a dispute submitted to arbitration), a judicial or administrative tribunal of the Party that is the respondent in a dispute submitted to arbitration under Section B may apply the law of that Party, including its rules on the conflict of laws, and such rules of international law as may be applicable.

4. For purposes of Article 39 of the ICSID Convention and Article 7 of Schedule C to the ICSID Additional Facility Rules, and without prejudice to an objection to an arbitrator on a ground other than nationality:
 - (a) the respondent agrees to the appointment of each individual member of a tribunal established under the ICSID Convention or the ICSID Additional Facility Rules;
 - (b) a claimant referred to in Article 10.16.1(a) may submit a claim to arbitration under this Section, or continue a claim, under the ICSID Convention or the ICSID Additional Facility Rules, only on condition that the claimant agrees in writing to the appointment of each individual member of the tribunal; and
 - (c) a claimant referred to in Article 10.16.1(b) may submit a claim to arbitration under this Section, or continue a claim, under the ICSID Convention or the ICSID Additional Facility Rules, only on condition that the claimant and the enterprise agree in writing to the appointment of each individual member of the tribunal.

Article 10.20: Conduct of the Arbitration

1. The disputing parties may agree on the legal place of any arbitration under the arbitral rules applicable under Article 10.16.3. If the disputing parties fail to reach agreement, the tribunal shall determine the place in accordance with the applicable arbitral rules, provided that the place shall be in the territory of a State that is a party to the New York Convention.
2. A non-disputing Party may make oral and written submissions to the tribunal regarding the interpretation of this Agreement.
3. The tribunal shall have the authority to accept and consider *amicus curiae* submissions from a person or entity that is not a disputing party. Each submission shall identify the author and any person or entity that has provided, or will provide, any financial or other assistance in preparing the submission.
4. Without prejudice to a tribunal's authority to address other objections as a preliminary question, such as an objection that a dispute is not within the tribunal's competence, a tribunal shall address and decide as a preliminary question any objection by the respondent that, as a matter of law, a claim submitted is not a claim for which an award in favor of the claimant may be made under Article 10.26.¹⁰
 - (a) Such objection shall be submitted to the tribunal as soon as possible after the tribunal is constituted, and in no event later than the date the tribunal fixes for the respondent to submit its counter-memorial (or, in the case of an amendment to the notice of arbitration, the date the tribunal fixes for the respondent to submit its response to the amendment).

¹⁰ For greater certainty, with respect to a claim submitted under Article 10.16.1(a)(i)(C) or 10.16.1(b)(i)(C), an objection that, as a matter of law, a claim submitted is not a claim for which an award in favor of the claimant may be made under Article 10.26 may include, where applicable, an objection provided for under the law of the respondent.

- (b) On receipt of an objection under this paragraph, the tribunal shall suspend any proceedings on the merits, establish a schedule for considering the objection consistent with any schedule it has established for considering any other preliminary question, and issue a decision or award on the objection, stating the grounds therefor.
- (c) In deciding an objection under this paragraph, the tribunal shall assume to be true claimant's factual allegations in support of any claim in the notice of arbitration (or any amendment thereof) and, in disputes brought under the UNCITRAL Arbitration Rules, the statement of claim referred to in Article 18 of the UNCITRAL Arbitration Rules. The tribunal may also consider any relevant facts not in dispute.
- (d) The respondent does not waive any objection as to competence or any argument on the merits merely because the respondent did or did not raise an objection under this paragraph or make use of the expedited procedure set out in paragraph 5.

5. In the event that the respondent so requests within 45 days after the tribunal is constituted, the tribunal shall decide on an expedited basis an objection under paragraph 4 and any objection that the dispute is not within the tribunal's competence. The tribunal shall suspend any proceedings on the merits and issue a decision or award on the objection(s), stating the grounds therefor, no later than 150 days after the date of the request. However, if a disputing party requests a hearing, the tribunal may take an additional 30 days to issue the decision or award. Regardless of whether a hearing is requested, a tribunal may, on a showing of extraordinary cause, delay issuing its decision or award by an additional brief period, which may not exceed 30 days.

6. When it decides a respondent's objection under paragraph 4 or 5, the tribunal may, if warranted, award to the prevailing disputing party reasonable costs and attorney's fees incurred in submitting or opposing the objection. In determining whether such an award is warranted, the tribunal shall consider whether either the claimant's claim or the respondent's objection was frivolous, and shall provide the disputing parties a reasonable opportunity to comment.

7. A respondent may not assert as a defense, counterclaim, right of set-off, or for any other reason that the claimant has received or will receive indemnification or other compensation for all or part of the alleged damages pursuant to an insurance or guarantee contract.

8. A tribunal may order an interim measure of protection to preserve the rights of a disputing party, or to ensure that the tribunal's jurisdiction is made fully effective, including an order to preserve evidence in the possession or control of a disputing party or to protect the tribunal's jurisdiction. A tribunal may not order attachment or enjoin the application of a measure alleged to constitute a breach referred to in Article 10.16. For purposes of this paragraph, an order includes a recommendation.

9. (a) In any arbitration conducted under this Section, at the request of a disputing party, a tribunal shall, before issuing a decision or award on liability, transmit its proposed decision or award to the disputing parties and to the non-disputing Parties. Within 60 days after the tribunal transmits its proposed decision or award, the disputing parties may submit written comments to the tribunal concerning any aspect of its proposed decision or award. The tribunal shall consider any such comments and issue its decision or award not later than 45 days after the expiration of the 60-day comment period.

- (b) Subparagraph (a) shall not apply in any arbitration conducted pursuant to this Section for which an appeal has been made available pursuant to paragraph 10 or Annex 10-D.

10. If a separate, multilateral agreement enters into force between the Parties that establishes an appellate body for purposes of reviewing awards rendered by tribunals constituted pursuant to international trade or investment arrangements to hear investment disputes, the Parties shall strive to reach an agreement that would have such appellate body review awards rendered under Article 10.26 in arbitrations commenced after the multilateral agreement enters into force between the Parties.

Article 10.21: Transparency of Arbitral Proceedings

1. Subject to paragraphs 2 and 4, the respondent shall, after receiving the following documents, promptly transmit them to the non-disputing Parties and make them available to the public:

- (a) the notice of intent;
- (b) the notice of arbitration;
- (c) pleadings, memorials, and briefs submitted to the tribunal by a disputing party and any written submissions submitted pursuant to Article 10.20.2 and 10.20.3 and Article 10.25;
- (d) minutes or transcripts of hearings of the tribunal, where available; and
- (e) orders, awards, and decisions of the tribunal.

2. The tribunal shall conduct hearings open to the public and shall determine, in consultation with the disputing parties, the appropriate logistical arrangements. However, any disputing party that intends to use information designated as protected information in a hearing shall so advise the tribunal. The tribunal shall make appropriate arrangements to protect the information from disclosure.

3. Nothing in this Section requires a respondent to disclose protected information or to furnish or allow access to information that it may withhold in accordance with Article 22.2 (Essential Security) or Article 22.4 (Disclosure of Information).

4. Any protected information that is submitted to the tribunal shall be protected from disclosure in accordance with the following procedures:

- (a) subject to subparagraph (d), neither the disputing parties nor the tribunal shall disclose to any non-disputing Party or to the public any protected information where the disputing party that provided the information clearly designates it in accordance with subparagraph (b);
- (b) any disputing party claiming that certain information constitutes protected information shall clearly designate the information at the time it is submitted to the tribunal;
- (c) a disputing party shall, at the time it submits a document containing information claimed to be protected information, submit a redacted version of the document that does not contain the information. Only the redacted version

shall be provided to the non-disputing Parties and made public in accordance with paragraph 1; and

- (d) the tribunal shall decide any objection regarding the designation of information claimed to be protected information. If the tribunal determines that such information was not properly designated, the disputing party that submitted the information may (i) withdraw all or part of its submission containing such information, or (ii) agree to resubmit complete and redacted documents with corrected designations in accordance with the tribunal's determination and subparagraph (c). In either case, the other disputing party shall, whenever necessary, resubmit complete and redacted documents which either remove the information withdrawn under (i) by the disputing party that first submitted the information or redesignate the information consistent with the designation under (ii) of the disputing party that first submitted the information.

5. Nothing in this Section requires a respondent to withhold from the public information required to be disclosed by its laws.

Article 10.22: Governing Law

1. Subject to paragraph 3, when a claim is submitted under Article 10.16.1(a)(i)(A) or Article 10.16.1(b)(i)(A), the tribunal shall decide the issues in dispute in accordance with this Agreement and applicable rules of international law.

2. Subject to paragraph 3 and the other terms of this Section, when a claim is submitted under Article 10.16.1(a)(i)(B) or (C), or Article 10.16.1(b)(i)(B) or (C), the tribunal shall apply:

- (a) the rules of law specified in the pertinent investment authorization or investment agreement, or as the disputing parties may otherwise agree; or
- (b) if the rules of law have not been specified or otherwise agreed:
 - (i) the law of the respondent, including its rules on the conflict of laws,¹¹ and
 - (ii) such rules of international law as may be applicable.

3. A decision of the Commission declaring its interpretation of a provision of this Agreement under Article 20.1.3 (Free Trade Commission) shall be binding on a tribunal, and any decision or award issued by a tribunal must be consistent with that decision.

Article 10.23: Interpretation of Annexes

1. Where a respondent asserts as a defense that the measure alleged to be a breach is within the scope of an entry set out in Annex I or Annex II, the tribunal shall, on request of the respondent, request the interpretation of the Commission on the issue. The Commission shall submit in writing any decision declaring its interpretation under Article 20.1.3 (Free Trade Commission) to the tribunal within 60 days of delivery of the request.

¹¹ The "law of the respondent" means the law that a domestic court or tribunal of proper jurisdiction would apply in the same case.

2. A decision issued by the Commission under paragraph 1 shall be binding on the tribunal, and any decision or award issued by the tribunal must be consistent with that decision. If the Commission fails to issue such a decision within 60 days, the tribunal shall decide the issue.

Article 10.24: Expert Reports

Without prejudice to the appointment of other kinds of experts where authorized by the applicable arbitration rules, a tribunal, at the request of a disputing party or, unless the disputing parties disapprove, on its own initiative, may appoint one or more experts to report to it in writing on any factual issue concerning environmental, health, safety, or other scientific matters raised by a disputing party in a proceeding, subject to such terms and conditions as the disputing parties may agree.

Article 10.25: Consolidation

1. Where two or more claims have been submitted separately to arbitration under Article 10.16.1 and the claims have a question of law or fact in common and arise out of the same events or circumstances, any disputing party may seek a consolidation order in accordance with the agreement of all the disputing parties sought to be covered by the order or the terms of paragraphs 2 through 10.

2. A disputing party that seeks a consolidation order under this Article shall deliver, in writing, a request to the Secretary-General and to all the disputing parties sought to be covered by the order and shall specify in the request:

- (a) the names and addresses of all the disputing parties sought to be covered by the order;
- (b) the nature of the order sought; and
- (c) the grounds on which the order is sought.

3. Unless the Secretary-General finds within 30 days after receiving a request under paragraph 2 that the request is manifestly unfounded, a tribunal shall be established under this Article.

4. Unless all the disputing parties sought to be covered by the order otherwise agree, a tribunal established under this Article shall comprise three arbitrators:

- (a) one arbitrator appointed by agreement of the claimants;
- (b) one arbitrator appointed by the respondent; and
- (c) the presiding arbitrator appointed by the Secretary-General, provided, however, that the presiding arbitrator shall not be a national of any Party.

5. If, within 60 days after the Secretary-General receives a request made under paragraph 2, the respondent fails or the claimants fail to appoint an arbitrator in accordance with paragraph 4, the Secretary-General, on the request of any disputing party sought to be covered by the order, shall appoint the arbitrator or arbitrators not yet appointed. If the respondent fails to appoint an arbitrator, the Secretary-General shall appoint a national of the disputing Party, and if the claimants fail to appoint an arbitrator, the Secretary-General shall appoint a national of a Party of the claimants.

6. Where a tribunal established under this Article is satisfied that two or more claims that have been submitted to arbitration under Article 10.16.1 have a question of law or fact in common, and arise out of the same events or circumstances, the tribunal may, in the interest of fair and efficient resolution of the claims, and after hearing the disputing parties, by order:

- (a) assume jurisdiction over, and hear and determine together, all or part of the claims;
- (b) assume jurisdiction over, and hear and determine one or more of the claims, the determination of which it believes would assist in the resolution of the others; or
- (c) instruct a tribunal previously established under Article 10.19 to assume jurisdiction over, and hear and determine together, all or part of the claims, provided that
 - (i) that tribunal, at the request of any claimant not previously a disputing party before that tribunal, shall be reconstituted with its original members, except that the arbitrator for the claimants shall be appointed pursuant to paragraphs 4(a) and 5; and
 - (ii) that tribunal shall decide whether any prior hearing shall be repeated.

7. Where a tribunal has been established under this Article, a claimant that has submitted a claim to arbitration under Article 10.16.1 and that has not been named in a request made under paragraph 2 may make a written request to the tribunal that it be included in any order made under paragraph 6, and shall specify in the request:

- (a) the name and address of the claimant;
- (b) the nature of the order sought; and
- (c) the grounds on which the order is sought.

The claimant shall deliver a copy of its request to the Secretary-General.

8. A tribunal established under this Article shall conduct its proceedings in accordance with the UNCITRAL Arbitration Rules, except as modified by this Section.

9. A tribunal established under Article 10.19 shall not have jurisdiction to decide a claim, or a part of a claim, over which a tribunal established or instructed under this Article has assumed jurisdiction.

10. On application of a disputing party, a tribunal established under this Article, pending its decision under paragraph 6, may order that the proceedings of a tribunal established under Article 10.19 be stayed, unless the latter tribunal has already adjourned its proceedings.

Article 10.26: Awards

1. Where a tribunal makes a final award against a respondent, the tribunal may award, separately or in combination, only:

- (a) monetary damages and any applicable interest; and

- (b) restitution of property, in which case the award shall provide that the respondent may pay monetary damages and any applicable interest in lieu of restitution.

A tribunal may also award costs and attorney's fees in accordance with this Section and the applicable arbitration rules.

2. Subject to paragraph 1, where a claim is submitted to arbitration under Article 10.16.1(b):

- (a) an award of restitution of property shall provide that restitution be made to the enterprise;
- (b) an award of monetary damages and any applicable interest shall provide that the sum be paid to the enterprise; and
- (c) the award shall provide that it is made without prejudice to any right that any person may have in the relief under applicable domestic law.

3. A tribunal may not award punitive damages.

4. An award made by a tribunal shall have no binding force except between the disputing parties and in respect of the particular case.

5. Subject to paragraph 6 and the applicable review procedure for an interim award, a disputing party shall abide by and comply with an award without delay.

6. A disputing party may not seek enforcement of a final award until:

- (a) in the case of a final award made under the ICSID Convention,
 - (i) 120 days have elapsed from the date the award was rendered and no disputing party has requested revision or annulment of the award; or
 - (ii) revision or annulment proceedings have been completed; and
- (b) in the case of a final award under the ICSID Additional Facility Rules, the UNCITRAL Arbitration Rules, or the rules selected pursuant to Article 10.16.3(d),
 - (i) 90 days have elapsed from the date the award was rendered and no disputing party has commenced a proceeding to revise, set aside, or annul the award; or
 - (ii) a court has dismissed or allowed an application to revise, set aside, or annul the award and there is no further appeal.

7. Each Party shall provide for the enforcement of an award in its territory.

8. If the respondent fails to abide by or comply with a final award, on delivery of a request by the Party of the claimant, a panel shall be established under Article 21.6 (Request for an Arbitral Panel). The requesting Party may seek in such proceedings:

- (a) a determination that the failure to abide by or comply with the final award is inconsistent with the obligations of this Agreement; and

- (b) in accordance with Article 21.13 (Initial Report), a recommendation that the respondent abide by or comply with the final award.

9. A disputing party may seek enforcement of an arbitration award under the ICSID Convention, the New York Convention, or the Inter-American Convention regardless of whether proceedings have been taken under paragraph 8.

10. A claim that is submitted to arbitration under this Section shall be considered to arise out of a commercial relationship or transaction for purposes of Article I of the New York Convention and Article I of the Inter-American Convention.

Article 10.27: Service of Documents

Delivery of notice and other documents on a Party shall be made to the place named for that Party in Annex 10-C.

- (b) to supply services to the public on behalf of the Party, such as power generation or distribution, water treatment or distribution, or telecommunications; or

¹² Some forms of debt, such as bonds, debentures, and long-term notes, are more likely to have the characteristics of an investment, while other forms of debt, such as claims to payment that are immediately due and result from the sale of goods or services, are less likely to have such characteristics.

¹³ Loans issued by one Party to another Party are not investments.

¹⁴ Whether a particular type of license, authorization, permit, or similar instrument (including a concession, to the extent that it has the nature of such an instrument) has the characteristics of an investment depends on such factors as the nature and extent of the rights that the holder has under the law of the Party. Among the licenses, authorizations, permits, and similar instruments that do not have the characteristics of an investment are those that do not create any rights protected under domestic law. For greater certainty, the foregoing is without prejudice to whether any asset associated with the license, authorization, permit, or similar instrument has the characteristics of an investment.

¹⁵ The term “investment” does not include an order or judgment entered in a judicial or administrative action.

¹⁶ “Written agreement” refers to an agreement in writing, executed by both parties, whether in a single instrument or in multiple instruments, that creates an exchange of rights and obligations, binding on both parties under the law applicable under Article 10.22.2. For greater certainty, (a) a unilateral act of an administrative or judicial authority, such as a permit, license, or authorization issued by a Party solely in its regulatory capacity, or a decree, order, or judgment, standing alone; and (b) an administrative or judicial consent decree or order, shall not be considered a written agreement.

national means a natural person who has the nationality of a Party according to Annex 1.3 (Country-Specific Definitions);

negotiated restructuring means the restructuring or rescheduling of a debt instrument that has been effected through (i) a modification or amendment of such debt instrument, as provided for under its terms, or (ii) a comprehensive debt exchange or other similar process in which the holders of no less than 75 percent of the aggregate principal amount of the outstanding debt under such debt instrument have consented to such debt exchange or other process.

Annex 10-A

Customary International Law

The Parties confirm their shared understanding that “customary international law” generally and as specifically referenced in Article 10.5 results from a general and consistent practice of States that they follow from a sense of legal obligation. With regard to Article 10.5, the customary international law minimum standard of treatment of aliens refers to all customary international law principles that protect the economic rights and interests of aliens.

Annex 10-B

Expropriation

The Parties confirm their shared understanding that:

1. An action or a series of actions by a Party cannot constitute an expropriation unless it interferes with a tangible or intangible property right or property interest in an investment.
2. Article 10.7.1 addresses two situations. The first is direct expropriation, where an investment is nationalized or otherwise directly expropriated through formal transfer of title or outright seizure.
3. The second situation addressed by Article 10.7.1 is indirect expropriation, where an action or series of actions by a Party has an effect equivalent to direct expropriation without formal transfer of title or outright seizure.
 - (a) The determination of whether an action or series of actions by a Party, in a specific fact situation, constitutes an indirect expropriation, requires a case-by-case, fact-based inquiry that considers, among other factors:
 - (i) the economic impact of the government action, although the fact that an action or series of actions by a Party has an adverse effect on the economic value of an investment, standing alone, does not establish that an indirect expropriation has occurred;
 - (ii) the extent to which the government action interferes with distinct, reasonable investment-backed expectations; and
 - (iii) the character of the government action.
 - (b) Except in rare circumstances, non-discriminatory regulatory actions by a Party that are designed and applied to protect legitimate public welfare objectives, such as public health, safety, and the environment, do not constitute indirect expropriations.²⁰

²⁰ For greater certainty, the list of “legitimate public welfare objectives” in this subparagraph is not exhaustive.

Annex 10-E

Special Dispute Settlement Provisions

1. Where a claimant submits a claim to arbitration alleging that a Party other than the United States has breached an obligation under Section A, other than Article 10.3 or 10.4, through the imposition of a restrictive measure with regard to payments and transfers, Section B shall apply, except as follows:
 - (a) The claimant may not submit any such claim to arbitration until one year after the events that give rise to the claim.
 - (b) Loss or damages arising from the restrictive measure on capital inflows shall be limited to the reduction in value of the transfers and shall exclude loss of profits or business and any similar consequential or incidental damages.
 - (c) Subparagraph (a) shall not apply to a claim that arises from restrictions on:
 - (i) payments or transfers on current transactions,
 - (ii) payments or transfers associated with equity investments, or
 - (iii) payments pursuant to a loan or bond,²¹ provided that such payments are made in accordance with the terms and conditions of the loan or bond agreement.
 - (d) If the measure restricts outward payments or transfers:
 - (i) it shall not prevent investors from earning a market rate of return in the territory of the Party imposing the measure on any restricted assets;
 - (ii) the Party imposing the measure shall afford investors a reasonable opportunity to mitigate any losses arising from such measure; and
 - (iii) so long as the Party imposing the measure has complied with its obligations under this paragraph, the claimant may not recover any alleged opportunity costs or any similar consequential or incidental damages from forgoing alternative investments.

²¹ For greater certainty, the term “payments pursuant to a loan or bond” as used in this subparagraph does not include capital account transactions relating to inter-bank loans, including loans to or from financial institutions established in the territory of the Party subject to the claim.

2. A Party may not request the establishment of a panel under Chapter Twenty-One (Dispute Settlement) relating to the imposition of a restrictive measure with regard to payments and transfers by a Party other than the United States until one year after the imposition of such measure.

Annex 10-F

Public Debt

1. The Parties recognize that the purchase of debt issued by a Party entails commercial risk. For greater certainty, no award may be made in favor of a claimant for a claim under Article 10.16.1(a)(i)(A) or Article 10.16.1(b)(i)(A) with respect to default or non-payment of debt issued by a Party unless the claimant meets its burden of proving that such default or non-payment constitutes an uncompensated expropriation for purposes of Article 10.7.1 or a breach of any other obligation under Section A.
2. No claim that a restructuring of debt issued by a Party other than the United States breaches an obligation under Section A may be submitted to, or if already submitted continue in, arbitration under Section B if the restructuring is a negotiated restructuring at the time of submission, or becomes a negotiated restructuring after such submission, except for a claim that the restructuring violates Article 10.3 or 10.4.
3. Notwithstanding Article 10.16.3, and subject to paragraph 2 of this Annex, an investor of another Party may not submit a claim under Section B that a restructuring of debt issued by a Party other than the United States breaches an obligation under Section A (other than Article 10.3 or 10.4) unless 270 days have elapsed from the date of the events giving rise to the claim.

Annex 10-G

Submission of a Claim to Arbitration

1. An investor of the United States may not submit to arbitration under Section B a claim that a Party has breached an obligation under Section A either:

- (a) on its own behalf under Article 10.16.1(a), or
- (b) on behalf of an enterprise of a Party other than the United States that is a juridical person that the investor owns or controls directly or indirectly under Article 10.16.1(b),

if the investor or the enterprise, respectively, has alleged that breach of an obligation under Section A in proceedings before a court or administrative tribunal of that Party.

2. For greater certainty, if an investor of the United States elects to submit a claim of the type described in paragraph 1 to a court or administrative tribunal of a Party other than the United States, that election shall be definitive, and the investor may not thereafter submit the claim to arbitration under Section B.

Chapter Eleven

Cross-Border Trade in Services

Article 11.1: Scope and Coverage

1. This Chapter applies to measures adopted or maintained by a Party affecting cross-border trade in services by service suppliers of another Party. Such measures include measures affecting:

 - (c) the access to and use of distribution, transport, or telecommunications networks and services in connection with the supply of a service;
 - (d) the presence in its territory of a service supplier of another Party; and
 - (e) the provision of a bond or other form of financial security as a condition for the supply of a service.
2. For the purposes of this Chapter, “measures adopted or maintained by a Party” means measures adopted or maintained by:
 - (a) central, regional, or local governments and authorities; and
 - (b) non-governmental bodies in the exercise of powers delegated by central, regional, or local governments or authorities.
3. Articles 11.4, 11.7, and 11.8 also apply to measures by a Party affecting the supply of a service in its territory by a covered investment.¹
4. This Chapter does not apply to:
 - (a) financial services as defined in Article 12.20 (Definitions), except that paragraph 3 applies where the financial service is supplied by a covered investment that is not a covered investment in a financial institution (as defined in Article 12.20) in the Party’s territory;
 - (b) “government procurement” or “procurement”, as defined in Article 1.3 (Definitions of General Application);
 - (c) air services, including domestic and international air transportation services, whether scheduled or non-scheduled, and related services in support of air services, other than:
 - (i) aircraft repair and maintenance services during which an aircraft is withdrawn from service, and
 - (ii) specialty air services; or
 - (d) subsidies or grants provided by a Party, including government-supported loans, guarantees, and insurance.

¹ The Parties understand that nothing in this Chapter, including this paragraph, is subject to investor-state dispute settlement pursuant to Section B of Chapter Ten (Investment).

Annex 11-A sets forth an understanding of the Parties related to subparagraph (d).

5. This Chapter does not impose any obligation on a Party with respect to a national of another Party seeking access to its employment market, or employed on a permanent basis in its territory, and does not confer any right on that national with respect to that access or employment.

6. This Chapter does not apply to services supplied in the exercise of governmental authority in a Party's territory. A "service supplied in the exercise of governmental authority" means any service which is supplied neither on a commercial basis, nor in competition with one or more service suppliers.

7. Nothing in this Chapter or any other provision of this Agreement shall be construed to impose any obligation on a Party regarding its immigration measures, including admission or conditions of admission for temporary entry.

Article 11.2: National Treatment

1. Each Party shall accord to service suppliers of another Party treatment no less favorable than that it accords, in like circumstances, to its own service suppliers.

2. The treatment to be accorded by a Party under paragraph 1 means, with respect to a regional level of government, treatment no less favorable than the most favorable treatment accorded, in like circumstances, by that regional level of government to service suppliers of the Party of which it forms a part.

Article 11.3: Most-Favored-Nation Treatment

Each Party shall accord to service suppliers of another Party treatment no less favorable than that it accords, in like circumstances, to service suppliers of any other Party or any non-Party.

Article 11.4: Market Access

No Party may adopt or maintain, either on the basis of a regional subdivision or on the basis of its entire territory, measures that:

- (a) impose limitations on:
 - (i) the number of service suppliers whether in the form of numerical quotas, monopolies, exclusive service suppliers, or the requirement of an economic needs test,
 - (ii) the total value of service transactions or assets in the form of numerical quotas or the requirement of an economic needs test,
 - (iii) the total number of service operations or the total quantity of services output expressed in terms of designated numerical units in the form of quotas or the requirement of an economic needs test,² or
 - (iv) the total number of natural persons that may be employed in a particular service sector or that a service supplier may employ and who are necessary for, and directly related to, the supply of a specific service in the form of numerical quotas or the requirement of an economic needs test; or

² This clause does not cover measures of a Party that limit inputs for the supply of services.

- (b) restrict or require specific types of legal entity or joint venture through which a service supplier may supply a service.

Article 11.5: Local Presence

No Party may require a service supplier of another Party to establish or maintain a representative office or any form of enterprise, or to be resident, in its territory as a condition for the cross-border supply of a service.

Article 11.6: Non-Conforming Measures

1. Articles 11.2, 11.3, 11.4, and 11.5 do not apply to:
 - (a) any existing non-conforming measure that is maintained by a Party at:
 - (i) the central level of government, as set out by that Party in its Schedule to Annex I,
 - (ii) a regional level of government, as set out by that Party in its Schedule to Annex I, or
 - (iii) a local level of government;
 - (b) the continuation or prompt renewal of any non-conforming measure referred to in subparagraph (a); or
 - (c) an amendment to any non-conforming measure referred to in subparagraph (a) to the extent that the amendment does not decrease the conformity of the measure, as it existed immediately before the amendment, with Articles 11.2, 11.3, 11.4, or 11.5.
2. Articles 11.2, 11.3, 11.4, and 11.5 do not apply to any measure that a Party adopts or maintains with respect to sectors, subsectors, or activities as set out in its Schedule to Annex II.

Article 11.7: Domestic Regulation

1. Where a Party requires authorization for the supply of a service, the Party's competent authorities shall, within a reasonable time after the submission of an application considered complete under its laws and regulations, inform the applicant of the decision concerning the application. At the request of the applicant, the Party's competent authorities shall provide, without undue delay, information concerning the status of the application. This obligation shall not apply to authorization requirements that are within the scope of Article 11.6.2.
2. With a view to ensuring that measures relating to qualification requirements and procedures, technical standards, and licensing requirements do not constitute unnecessary barriers to trade in services, each Party shall endeavor to ensure, as appropriate for individual sectors, that such measures are:
 - (a) based on objective and transparent criteria, such as competence and the ability to supply the service;
 - (b) not more burdensome than necessary to ensure the quality of the service; and
 - (c) in the case of licensing procedures, not in themselves a restriction on the supply of the service.

3. If the results of the negotiations related to Article VI:4 of the GATS (or the results of any similar negotiations undertaken in other multilateral fora in which each of the Parties participate) enter into effect, this Article shall be amended, as appropriate, after consultations between the Parties, to bring those results into effect under this Agreement. The Parties shall coordinate on such negotiations, as appropriate.

Article 11.8: Transparency in Developing and Applying Regulations³

Further to Chapter Nineteen (Transparency):

- (a) each Party shall maintain or establish appropriate mechanisms for responding to inquiries from interested persons regarding its regulations relating to the subject matter of this Chapter;
- (b) if a Party does not provide advance notice and opportunity for comment pursuant to Article 19.2 (Publication), it shall, to the extent possible, address in writing the reasons therefor;
- (c) at the time it adopts final regulations relating to the subject matter of this Chapter, each Party shall, to the extent possible, including upon request, address in writing substantive comments received from interested persons with respect to the proposed regulations; and
- (d) to the extent possible, each Party shall allow reasonable time between publication of final regulations and their effective date.

Article 11.9: Recognition

1. For the purposes of fulfilment, in whole or in part, of its standards or criteria for the authorization, licensing, or certification of services suppliers, and subject to the requirements of paragraph 4, a Party may recognize the education or experience obtained, requirements met, or licenses or certifications granted in a particular country. Such recognition, which may be achieved through harmonization or otherwise, may be based upon an agreement or arrangement with the country concerned or may be accorded autonomously.

2. Where a Party recognizes, autonomously or by agreement or arrangement, the education or experience obtained, requirements met, or licenses or certifications granted in the territory of a non-Party, nothing in Article 11.3 shall be construed to require the Party to accord such recognition to the education or experience obtained, requirements met, or licenses or certifications granted in the territory of another Party.

3. A Party that is a party to an agreement or arrangement of the type referred to in paragraph 1, whether existing or future, shall afford adequate opportunity for another Party, if that other Party is interested, to negotiate accession to such an agreement or arrangement or to negotiate one comparable with it. Where a Party accords recognition autonomously, it shall afford adequate opportunity for another Party to demonstrate that education, experience, licenses, or certifications obtained or requirements met in that other Party's territory should be recognized.

4. No Party may accord recognition in a manner that would constitute a means of discrimination between countries in the application of its standards or criteria for the authorization, licensing, or certification of services suppliers, or a disguised restriction on trade in services.

³ For greater certainty, "regulations" includes regulations establishing or applying to licensing authorization or criteria.

5. Annex 11-B (Professional Services) applies to measures adopted or maintained by a Party relating to the licensing or certification of professional service suppliers as set out in that Annex.

Article 11.10: Transfers and Payments

1. Each Party shall permit all transfers and payments relating to the cross-border supply of services to be made freely and without delay into and out of its territory.

2. Each Party shall permit such transfers and payments relating to the cross-border supply of services to be made in a freely usable currency at the market rate of exchange prevailing on the date of transfer.

3. Notwithstanding paragraphs 1 and 2, a Party may prevent or delay a transfer or payment through the equitable, non-discriminatory, and good faith application of its laws relating to:

- (a) bankruptcy, insolvency, or the protection of the rights of creditors;
- (b) issuing, trading, or dealing in securities, futures, options, or derivatives;
- (c) financial reporting or record keeping of transfers when necessary to assist law enforcement or financial regulatory authorities;
- (d) criminal or penal offences; or
- (e) ensuring compliance with orders or judgments in judicial or administrative proceedings.

Article 11.11: Denial of Benefits

1. A Party may deny the benefits of this Chapter to a service supplier of another Party if the service supplier is an enterprise owned or controlled by persons of a non-Party, and the denying Party:

- (a) does not maintain diplomatic relations with the non-Party; or
- (b) adopts or maintains measures with respect to the non-Party or a person of the non-Party that prohibit transactions with the enterprise or that would be violated or circumvented if the benefits of this Chapter were accorded to the enterprise.

2. Subject to Article 21.4 (Consultations), a Party may deny the benefits of this Chapter to a service supplier of another Party if the service supplier is an enterprise owned or controlled by persons of a non-Party or of the denying Party that has no substantial business activities in the territory of that other Party.

Article 11.12: Specific Commitments

1. Annex 11-C sets out certain obligations with regard to certain limitations on the employment of specialty personnel and professionals.

2. Annex 11-D sets out obligations with regard to the supply of express delivery services.

3. Annex 11-E will set out other specific commitments that the Parties may agree.

Article 11.13: Implementation

The Parties shall consult annually, or as otherwise agreed, to review the implementation of this Chapter and consider other matters of mutual interest affecting trade in services.

Article 11.14: Definitions

For the purposes of this Chapter:

cross-border trade in services or **cross-border supply of services** means the supply of a service:

- (a) from the territory of one Party into the territory of another Party;
- (b) in the territory of one Party by a person of that Party to a person of another Party; or
- (c) by a national of a Party in the territory of another Party;

but does not include the supply of a service in the territory of a Party by a covered investment;

enterprise means an “enterprise” as defined in Article 1.3 (Definitions of General Application), and a branch of an enterprise;

enterprise of a Party means an enterprise organized or constituted under the laws of that Party; and a branch located in the territory of that Party and carrying out business activities there;

professional services means services, the supply of which requires specialized⁴ post-secondary education, or equivalent training or experience, and for which the right to practice is granted or restricted by a Party, but does not include services supplied by trades-persons or vessel and aircraft crew members;

service supplier of a Party means a person of that Party that seeks to supply or supplies a service;⁵ and

specialty air services means any non-transportation air services, such as aerial fire-fighting, sightseeing, spraying, surveying, mapping, photography, parachute jumping, glider towing, and helicopter-lift for logging and construction, and other airborne agricultural, industrial, and inspection services.

⁴ For greater certainty, the term “specialized post-secondary education” includes education beyond the high-school level that is related to a specific area of knowledge.

⁵ For the purposes of Articles 11.2 and 11.3, “services suppliers” has the same meaning as “services and service suppliers” as used in Articles II and XVII of the GATS.

Annex 11-A

The Parties understand that if a Party establishes or maintains a fund to promote development of a particular service within its territory, disbursements from such fund would be subject to the same treatment as a measure covered by Article 11.1.4(d), even when a privately owned entity is wholly or partially responsible for the administration of the fund.⁶

⁶ For greater certainty, this annex does not prejudice the position of the Parties in subsidies negotiations in any other forum.

Annex 11-B

Professional Services

Development of Professional Services Standards

1. Each Party shall encourage the relevant bodies in its territory to develop mutually acceptable standards and criteria for licensing and certification of professional services suppliers and to provide recommendations on mutual recognition to the Commission.
2. The standards and criteria referred to in paragraph 1 may be developed with regard to the following matters:
 - (a) education – accreditation of schools or academic programs;
 - (b) examinations – qualifying examinations for licensing, including alternative methods of assessment such as oral examinations and interviews;
 - (c) experience – length and nature of experience required for licensing;
 - (d) conduct and ethics – standards of professional conduct and the nature of disciplinary action for non-conformity with those standards;
 - (e) professional development and re-certification – continuing education and ongoing requirements to maintain professional certification;
 - (f) scope of practice – extent of, or limitations on, permissible activities;
 - (g) local knowledge – requirements for knowledge of such matters as local laws, regulations, language, geography, or climate; and
 - (h) consumer protection – including alternatives to residency requirements, such as bonding, professional liability insurance, and client restitution funds, to provide for the protection of consumers.
3. On receipt of a recommendation referred to in paragraph 1, the Commission shall review the recommendation within a reasonable time to determine whether it is consistent with this Agreement. Based on the Commission’s review, each Party shall encourage its respective competent authorities, where appropriate, to implement the recommendation within a mutually agreed time.

Temporary Licensing

4. For mutually agreed individual professional services, each Party shall encourage the relevant bodies in its territory to develop procedures for the temporary licensing of professional service suppliers of the other Parties.

Working Group on Professional Services

5. The Parties shall establish a Working Group on Professional Services (Working Group), comprising representatives of each Party, to facilitate the activities listed in paragraphs 1 and 4.
6. In pursuing this objective, the Working Group shall consider, as appropriate, relevant bilateral, plurilateral, and multilateral agreements relating to professional services.

7. The Working Group shall consider, for professional services generally and, as appropriate, for individual professional services, the following matters:
- (a) procedures for fostering the development of mutual recognition agreements or arrangements among relevant professional bodies;
 - (b) the feasibility of developing model procedures for the licensing and certification of professional services providers; and
 - (c) other issues of mutual interest relating to the provision of professional services.
8. To facilitate the efforts of the Working Group, each Party shall consult with the relevant bodies in its territory to seek to identify professional services to which the Working Group should give consideration, giving priority to engineering and architecture services.
9. The Working Group shall report to the Commission on its progress, including with respect to any recommendations for initiatives to promote mutual recognition of standards and criteria and for temporary licensing, and on the further direction of its work, no later than 18 months after establishment of the Working Group.
10. The Working Group shall be established no later than one year after the entry into force of the Agreement.

Review

11. The Commission shall review the implementation of this Annex at least once every three years.

Temporary Licensing of Engineers

12. At its first meeting, the Working Group shall consider establishing a work program in conjunction with the relevant professional bodies in the territories of the Parties to develop procedures for the temporary licensing by the competent authorities in one Party of engineers of other Parties.
13. To this end, each Party shall consult with relevant professional bodies in its territory to obtain their recommendations on:
- (a) the development of procedures for the temporary licensing of engineers of the other Parties to practice their engineering specialties in the territory of the consulting Party;
 - (b) the development of model procedures for adoption by the competent authorities throughout its territory to facilitate the temporary licensing of engineers of the other Parties;
 - (c) the engineering specialties and, as applicable, the regional jurisdictions with respect to which priority should be given in developing temporary licensing procedures; and
 - (d) other matters of mutual interest to the Parties relating to the temporary licensing of engineers identified by the consulting Party in such consultations.

15. Each Party shall encourage the relevant professional bodies in its territory to meet at the earliest opportunity with the relevant professional bodies located in the territory of the other Parties, with a view to cooperating in the development of joint recommendations described in paragraph 13 within 18 months of the date of establishment of the Working Group. Each Party shall request an annual report from relevant professional bodies in its territory on the progress achieved in developing those recommendations.

16. The Parties shall promptly review any recommendation under paragraph 14 or 15 to ensure its consistency with this Agreement. Based on the Commission's review, each Party shall encourage its respective competent authorities, where appropriate, to implement the recommendation within a mutually agreed time.

Annex 11-C

1. Notwithstanding Article 11.1.1 and 11.1.5, this Annex applies to the limitations set forth in paragraphs 2 and 3.
2. The following limitations may be maintained or promptly renewed, except to the extent they restrict the ability of an enterprise to hire, as a dependent employee or as an independent contractor, professionals and specialty personnel of another Party on a temporary basis:

For Colombia:

- (a) *Código Sustantivo del Trabajo*, 1993, Article 74 and 75⁷.

- (b) *Código de Comercio de 1974*, Articles 1803 and 1804.
- (c) *Ley 74 de 1966*, Article 7.

4. Nothing in this Annex shall be construed to limit a Party's obligations under Article 10.10 (Senior Management and Board of Directors) or Article 12.12 (Senior Management and Board of Directors).

5. For greater certainty, the limitations listed in paragraphs 2 and 3 are not inconsistent with Article 10.9 (Performance Requirements).

6. For purposes of this Annex:

professionals means natural persons employed to supply professional services;

⁷ Training requirements pursuant to Article 75 of the *Código Sustantivo del Trabajo* are not necessarily a restriction on the ability of an enterprise to hire, as a dependent employee or as an independent contractor, professionals and specialty personnel of another Party.

specialty personnel means natural persons who are employed to use their expert or proprietary knowledge of an enterprise's services, equipment, techniques, or management; and may include, but are not limited to, members of licensed professions; and

temporary means for a specified period that may be up to three years, depending on the relevant Party's domestic law, which may or may not be renewable.

Annex 11-D

Express Delivery Services

1. For the purposes of this Agreement, **express delivery services** means the collection, transport, and delivery, of documents, printed matter, parcels, goods, or other items on an expedited basis while tracking and maintaining control of these items throughout the supply of the service. Express delivery services do not include (i) air transport services, (ii) services supplied in the exercise of governmental authority, or (iii) maritime transport services.⁸
2. The Parties confirm their desire to maintain at least the level of market openness for express delivery services they provide on the date this Agreement is signed. If a Party considers that another Party is not maintaining such level of access, it may request consultations. The other Party shall afford adequate opportunity for consultations and, to the extent possible, shall provide information in response to inquiries regarding the level of access and any related matter.
3. Each Party shall ensure that, where its monopoly supplier of postal services competes, either directly or through an affiliated company, in the supply of express delivery services outside the scope of its monopoly rights, such a supplier does not abuse its monopoly position to act in the Party's territory in a manner inconsistent with the Party's obligations under Articles 10.3 (National Treatment), 10.4 (Most-Favored-Nation Treatment), 11.2, 11.3, or 11.4. Further to Article 1.2 (Relation to Other Agreements), the Parties also reaffirm their rights and obligations under Article VIII of the GATS.⁹
4. Each Party confirms its intention to prevent the direction of revenues derived from monopoly postal services to confer an advantage to its own or any other competitive supplier's express delivery services.
5. Notwithstanding Article 11.1.1 and 11.1.4(d), Colombia shall not use revenues derived from the payments required under Article 24(a) and (b) of *Decreto 229* of 1995 and its amendments or successor legislation to subsidize the supply of express delivery services by the Government or a state enterprise.
6. If Colombia provides for the supply of universal postal services by a government entity or a state enterprise or by concession, it shall also provide for an independent authority to regulate the entity or enterprise and any services supplied by the entity or enterprise in competition with private service suppliers.

⁸ For greater certainty, for the United States, express delivery services do not include delivery of letters subject to the Private Express Statutes (18 U.S.C. 1693 et seq., 39 U.S.C. 601 et seq.), but do include delivery of letters subject to the exceptions to, or suspensions promulgated under, those statutes, which permit private delivery of extremely urgent letters.

⁹ For greater certainty, the Parties reaffirm that nothing in this Article is subject to investor-state dispute settlement pursuant to Section B of Chapter Ten (Investment).

Annex 11-E

1. If a Party maintains a measure at the central level of government:
 - (a) entitling the agent, upon termination of a commercial agency contract, to a payment from the principal equivalent to a portion of the commission, royalty, or profit the agent received pursuant to the contract¹⁰;
 - (b) requiring that in the event the principal terminates a commercial agency contract without just cause or the agent terminates a contract for just cause arising from actions of the principal, the principal must provide an equitable indemnity to the agent as compensation for the agent's efforts to build the brand, the product line, or the services subject to a commercial agency contract; or
 - (c) providing that a commercial agency contract creates an exclusive agency unless the contract provides otherwise;

that Party shall revise or eliminate the measure in accordance with paragraph 2 within six months after entry into force of this Agreement.

2. A Party shall:
 - (a) revise a measure described in subparagraph 1(a) by making the entitlement to the payment inapplicable to the parties to a commercial agency contract;
 - (b) revise a measure described in subparagraph 1(b) by making the requirement to pay the equitable indemnity inapplicable to parties that enter into a commercial agency contract, and instead, that any indemnity upon termination of the commercial agency contract by the principal without just cause, or upon termination of such a contract by the agent for just cause arising from actions of the principal, shall be determined in accordance with:
 - (i) general principles of contract law (for example, costs that have not been recovered, lost profits, and detrimental reliance);¹¹ and, in the event that the parties expressly stipulate this,
 - (ii) provisions voluntarily agreed upon by the principal and agent and set out in a commercial agency contract, to the extent consistent with applicable law; and
 - (c) revise a measure described in subparagraph 1(c) by providing that a principal may contract more than one agent in a single geographic area for the same scope of activities or products, unless the commercial agency contract provides otherwise.

3. Nothing in this Annex shall prevent the continued application, to the extent required under a Party's Constitution, of a measure described in paragraph 1(a) or (c) to commercial

¹⁰ This subparagraph does not refer to other measures that may be adopted or maintained in relation to payments associated with the termination of a contract in bad faith or in violation of the terms of the contract.

¹¹ The provision for damages based on the concepts set out in this clause does not constitute an equitable indemnity for purposes of paragraph 1(b).

agency contracts entered into before entry into force of legislation adopted to implement this Annex.¹²

4. A Party shall not adopt a measure described in paragraph 1.
5. For purposes of this Annex, commercial agency contract means,
 - (a) for Colombia, a commercial agency contract within the meaning of Articles 1317 through 1331 of the *Código de Comercio* of Colombia; only when this contract is related to commercial goods¹³; and
 - (b) for the United States, any contract in which a party agrees to distribute commercial goods for another party.

¹² In the case of Colombia, the relevant provision is Article 58 of the *Constitution Política de Colombia*. For greater certainty, a measure described in paragraph 2(b) will apply as of the entry into force of the legislation adopted to implement that measure, to contracts entered into before that date.

¹³ For purposes of this Annex, "commercial goods" includes software. This is without prejudice to the treatment of software in other contexts or in other fora.

Article 12.3: Most-Favored-Nation Treatment

1. Each Party shall accord to investors of another Party, financial institutions of another Party, investments of investors in financial institutions, and cross-border financial service suppliers of another Party treatment no less favorable than that it accords to the investors, financial institutions, investments of investors in financial institutions, and cross-border financial service suppliers of any other Party or of a non-Party, in like circumstances.

2. A Party may recognize prudential measures of another Party or of a non-Party in the application of measures covered by this Chapter. Such recognition may be:

- (a) accorded autonomously;
- (b) achieved through harmonization or other means; or
- (c) based upon an agreement or arrangement with another Party or a non-Party.

3. A Party according recognition of prudential measures under paragraph 2 shall provide adequate opportunity to another Party to demonstrate that circumstances exist in which there are or would be equivalent regulation, oversight, implementation of regulation, and, if appropriate, procedures concerning the sharing of information between the relevant Parties.

4. Where a Party accords recognition of prudential measures under paragraph 2(c) and the circumstances set out in paragraph 3 exist, the Party shall provide adequate opportunity to another Party to negotiate accession to the agreement or arrangement, or to negotiate a comparable agreement or arrangement.

Article 12.4: Market Access for Financial Institutions

No Party may adopt or maintain, with respect to financial institutions of another Party or investors of another Party seeking to establish such institutions, either on the basis of a regional subdivision or on the basis of its entire territory, measures that:

- (a) impose limitations on:
 - (i) the number of financial institutions whether in the form of numerical quotas, monopolies, exclusive service suppliers, or the requirements of an economic needs test,
 - (ii) the total value of financial service transactions or assets in the form of numerical quotas or the requirement of an economic needs test,
 - (iii) the total number of financial service operations or on the total quantity of financial services output expressed in terms of designated numerical

units in the form of quotas or the requirement of an economic needs test,¹ or

(iv) the total number of natural persons that may be employed in a particular financial service sector or that a financial institution may employ and who are necessary for, and directly related to, the supply of a specific financial service in the form of numerical quotas or the requirement of an economic needs test; or

Article 12.5: Cross-Border Trade

2. Each Party shall permit persons located in its territory, and its nationals wherever located, to purchase financial services from cross-border financial service suppliers of another Party located in the territory of that other Party or of any other Party. This obligation does not require a Party to permit such suppliers to do business or solicit in its territory. Each Party may define “doing business” and “solicitation” for purposes of this obligation, provided that those definitions are not inconsistent with paragraph 1.

3. Without prejudice to other means of prudential regulation of cross-border trade in financial services, a Party may require the registration of cross-border financial service suppliers of another Party and of financial instruments.

Article 12.6: New Financial Services²

Each Party shall permit a financial institution of another Party established in its territory to supply any new financial service that the Party would permit its own financial institutions, in like circumstances, to supply without additional legislative action by the Party. Notwithstanding Article 12.4(b), a Party may determine the institutional and juridical form through which the new financial service may be supplied and may require authorization for the supply of the service. Where a Party requires authorization to supply a new financial service, a decision shall be made within a reasonable time and the authorization may only be refused for prudential reasons.

Article 12.7: Treatment of Certain Information

Nothing in this Chapter requires a Party to furnish or allow access to:

- (a) information related to the financial affairs and accounts of individual customers of financial institutions or cross-border financial service suppliers; or
- (b) any confidential information the disclosure of which would impede law enforcement or otherwise be contrary to the public interest or prejudice legitimate commercial interests of particular enterprises.

¹ This clause does not cover measures of a Party that limit inputs for the supply of financial services.

² The Parties understand that nothing in Article 12.6 prevents a financial institution of a Party from applying to another Party to request that it authorize the supply of a financial service that is not supplied in the territory of any Party. Such application shall be subject to the law of the Party to which the application is made and, for greater certainty, shall not be subject to the obligations of Article 12.6.

Article 12.8: Senior Management and Boards of Directors

1. A Party may not require financial institutions of another Party to engage individuals of any particular nationality as senior managerial or other essential personnel.
2. A Party may not require that more than a minority of the board of directors of a financial institution of another Party be composed of nationals of the Party, persons residing in the territory of the Party, or a combination thereof.

Article 12.9: Non-Conforming Measures

1. Articles 12.2 through 12.5 and 12.8 do not apply to:

 - (iii) a local level of government;
 - (b) the continuation or prompt renewal of any non-conforming measure referred to in subparagraph (a); or
 - (c) an amendment to any non-conforming measure referred to in subparagraph (a) to the extent that the amendment does not decrease the conformity of the measure, as it existed immediately before the amendment, with Article 12.2, 12.3, 12.4, or 12.8.³
2. Articles 12.2 through 12.5 and 12.8 do not apply to any measure that a Party adopts or maintains with respect to sectors, subsectors, or activities as set out, in Section B of its Schedule to Annex III.
3. A non-conforming measure set out in a Party's Schedule to Annex I or II as a measure to which Article 10.3 (National Treatment), 10.4 (Most-Favored-Nation Treatment), 11.2 (National Treatment), or 11.3 (Most-Favored-Nation Treatment) does not apply shall be treated as a non-conforming measure not subject to Article 12.2 or 12.3, as the case may be, to the extent that the measure, sector, subsector, or activity set out in the non-conforming measure is covered by this Chapter.

Article 12.10: Exceptions

1. Notwithstanding any other provision of this Chapter or Chapter Ten (Investment), Fourteen (Telecommunications), or Fifteen (Electronic Commerce), including specifically Articles 14.16 (Relationship to Other Chapters), and 11.1 (Scope and Coverage) with respect to the supply of financial services in the territory of a Party by a covered investment, a Party shall not be prevented from adopting or maintaining measures for prudential reasons,⁴ including for the protection of investors, depositors, policy holders, or persons to whom a fiduciary duty is owed by a financial institution or cross-border financial service supplier, or

³ For greater certainty, Article 12.5 does not apply to an amendment to any non-conforming measure referred to in subparagraph (a) to the extent that the amendment does not decrease the conformity of the measure, as it existed on the date of entry into force of the Agreement, with Article 12.5.

⁴ It is understood that the term "prudential reasons" includes the maintenance of the safety, soundness, integrity, or financial responsibility of individual financial institutions or cross-border financial service suppliers.

to ensure the integrity and stability of the financial system. Where such measures do not conform with the provisions of this Agreement referred to in this paragraph, they shall not be used as a means of avoiding the Party's commitments or obligations under such provisions.

2. Nothing in this Chapter or Chapter Ten (Investment), Fourteen (Telecommunications), or Fifteen (Electronic-Commerce), including specifically Articles 14.16 (Relationship to Other Chapters), and 11.1 (Scope and Coverage) with respect to the supply of financial services in the territory of a Party by a covered investment, applies to non-discriminatory measures of general application taken by any public entity in pursuit of monetary and related credit or exchange rate policies. This paragraph shall not affect a Party's obligations under Article 10.9 (Performance Requirements) with respect to measures covered by Chapter Ten (Investment) or under Article 10.8 (Transfers) or 11.10 (Transfers and Payments).

3. Notwithstanding Articles 10.8 (Transfers) and 11.10 (Transfers and Payments), as incorporated into this Chapter, a Party may prevent or limit transfers by a financial institution or cross-border financial service supplier to, or for the benefit of, an affiliate of or person related to such institution or supplier, through the equitable, non-discriminatory, and good faith application of measures relating to maintenance of the safety, soundness, integrity, or financial responsibility of financial institutions or cross-border financial service suppliers. This paragraph does not prejudice any other provision of this Agreement that permits a Party to restrict transfers.

4. For greater certainty, nothing in this Chapter shall be construed to prevent the adoption or enforcement by any Party of measures necessary to secure compliance with laws or regulations that are not inconsistent with this Chapter, including those relating to the prevention of deceptive and fraudulent practices or to deal with the effects of a default on financial services contracts, subject to the requirement that such measures are not applied in a manner which would constitute a means of arbitrary or unjustifiable discrimination between countries where like conditions prevail, or a disguised restriction on investment in financial institutions or cross-border trade in financial services.

Article 12.11: Transparency and Administration of Certain Measures

1. The Parties recognize that transparent regulations and policies governing the activities of financial institutions and cross-border financial service suppliers are important in facilitating their ability to gain access to and operate in another Party's markets. Each Party commits to promote regulatory transparency in financial services.

3. In lieu of Article 19.2.2, each Party shall, to the extent practicable:

4. At the time it adopts final regulations, a Party should, to the extent practicable, address in writing substantive comments received from interested persons with respect to the proposed regulations.⁵

⁵ For greater certainty, a Party may consolidate its responses to the comments received from interested persons and publish them in a separate document from that setting forth the final regulations.

5. To the extent practicable, each Party should allow reasonable time between publication of final regulations and their effective date.
6. Each Party shall ensure that the rules of general application adopted or maintained by self-regulatory organizations of the Party are promptly published or otherwise made available in such a manner as to enable interested persons to become acquainted with them.
7. Each Party shall maintain or establish appropriate mechanisms for responding to inquiries from interested persons regarding measures of general application covered by this Chapter.
8. Each Party's regulatory authorities shall make publicly available the requirements, including any documentation required, for completing applications relating to the supply of financial services.
9. On the request of an applicant, a Party's regulatory authority shall inform the applicant of the status of its application. If the authority requires additional information from the applicant, it shall notify the applicant without undue delay.
10. A Party's regulatory authority shall make an administrative decision on a completed application of an investor in a financial institution, a financial institution, or a cross-border financial service supplier of another Party relating to the supply of a financial service within 120 days, and shall promptly notify the applicant of the decision. An application shall not be considered complete until all relevant hearings are held and all necessary information is received. Where it is not practicable for a decision to be made within 120 days, the regulatory authority shall notify the applicant without undue delay and shall endeavor to make the decision within a reasonable time thereafter.
11. On the request of an unsuccessful applicant, a regulatory authority that has denied an application shall, to the extent practicable, inform the applicant of the reasons for denial of the application.
12. Annex 12.11 sets out the Parties' understanding with regard to certain provisions of this Article.

Article 12.12: Self-Regulatory Organizations

Where a Party requires a financial institution or a cross-border financial service supplier of another Party to be a member of, participate in, or have access to, a self-regulatory organization to provide a financial service in or into its territory, the Party shall ensure observance of the obligations of Articles 12.2 and 12.3 by such self-regulatory organization.

Article 12.13: Payment and Clearing Systems

Under terms and conditions that accord national treatment, each Party shall grant financial institutions of another Party established in its territory access to payment and clearing systems operated by public entities, and to official funding and refinancing facilities available in the normal course of ordinary business. This paragraph is not intended to confer access to the Party's lender of last resort facilities.

Article 12.14: Expedited Availability of Insurance Services

Article 12.17: Consultations

1. A Party may request consultations with another Party regarding any matter arising under this Agreement that affects financial services. The other Party shall give sympathetic consideration to the request. The consulting Parties shall report the results of their consultations to the Committee.
2. Consultations under this Article shall include officials of the authorities specified in Annex 12.16.1.
3. Nothing in this Article shall be construed to require regulatory authorities participating in consultations under paragraph 1 to disclose information or take any action that would interfere with specific regulatory, supervisory, administrative, or enforcement matters.
4. Nothing in this Article shall be construed to require a Party to derogate from its relevant law regarding sharing of information among financial regulators or the requirements of an agreement or arrangement between financial authorities of two or more Parties.

Article 12.18: Dispute Settlement

1. Section A (Dispute Settlement) of Chapter Twenty-One (Dispute Settlement) applies as modified by this Article to the settlement of disputes arising under this Chapter.
2. When a Party claims that a dispute arises under this Chapter, Article 21.9 (Panel Selection) shall apply, except that:
 - (a) where the disputing Parties so agree, the panel shall be composed entirely of panelists meeting the qualifications in paragraph 3; and
 - (b) in any other case,
 - (i) each disputing Party may select panelists meeting the qualifications set out in paragraph 3 or in Article 21.8 (Qualifications of Panelists), and

 - (b) the financial services sector and any other sector, the complaining Party may suspend benefits in the financial services sector that have an effect equivalent to the effect of the measure in the Party’s financial services sector.

Article 12.19: Investment Disputes in Financial Services

1. Where an investor of a Party submits a claim to arbitration under Section B of Chapter Ten, (Investor-State Dispute Settlement) and the respondent invokes Article 12.10 as a defense, the following provisions shall apply:
- (a) The respondent shall, within 120 days of the date the claim is submitted to arbitration under Section B of Chapter Ten (Investor-State Dispute Settlement), submit in writing to the authorities responsible for financial services for the respondent and for the Party of the claimant, as set out in Annex 12.16.1, a request for a joint determination on the issue of whether and to what extent Article 12.10 is a valid defense to the claim. The respondent shall promptly provide the tribunal, if constituted, a copy of such request. The arbitration may proceed with respect to the claim only as provided in subparagraph (d).
 - (b) If a non-disputing Party other than the Party of the claimant considers that it has a substantial interest in the joint determination, such non-disputing Party may request that its authorities responsible for financial services, as set out in Annex 12.16.1, be included in any consultations held with a view to making that determination. They shall be included in such consultations if the respondent and the Party of the claimant agree that the claim of substantial interest is well founded. Where the substantial interest of the non-disputing Party is based on ownership or control of the claimant by a person of the non-disputing Party, the substantial interest shall be deemed to be well founded.
 - (c) The authorities referred to in subparagraph (a) shall attempt in good faith to make a joint determination as described in that subparagraph. Any such joint determination shall be transmitted promptly to the disputing parties, the

Financial Services Committee, and, if constituted, to the tribunal. The joint determination shall be binding on the tribunal.

- (d) If the authorities referred to in subparagraph (a), within 60 days of the date by which they have received the respondent's written request for a joint determination under that subparagraph, have not made a joint determination as described in that subparagraph, the tribunal shall decide the issue left unresolved by the authorities. The provisions of Section B of Chapter Ten (Investor-State Dispute Settlement) shall apply, except as modified by this subparagraph.
 - (i) In the appointment of all arbitrators not yet appointed to the tribunal, each disputing party shall take appropriate steps to ensure that the tribunal has expertise or experience as described in Article 12.18.3(a). The expertise or experience of particular candidates with respect to financial services shall be taken into account to the greatest extent possible in the appointment of the presiding arbitrator.
 - (ii) If, prior to the submission of the request for a joint determination in conformance with subparagraph (a), the presiding arbitrator has been appointed pursuant to Article 10.19.2, such arbitrator shall be replaced upon the request of either disputing party and the tribunal shall be reconstituted consistent with subparagraph (d)(i). If, within 30 days of the date the arbitration proceedings are resumed under subparagraph (e), the disputing parties have not agreed on the appointment of a new presiding arbitrator, the Secretary-General, on the request of a disputing party, shall appoint the presiding arbitrator consistent with subparagraph (d)(i).
 - (iii) The Party of the claimant may make oral and written submissions to the tribunal regarding the issue of whether and to what extent Article 12.10 is a valid defense to the claim. Unless it makes such a submission, the Party of the claimant shall be presumed, for purposes of the arbitration, to take a position on Article 12.10 not inconsistent with that of the respondent.
- (e) The arbitration referred to in subparagraph (a) may proceed with respect to the claim:
 - (i) 10 days after the date the joint determination has been received, in accordance with subparagraph (c), by the disputing parties, the Committee, and, if constituted, the tribunal, or
 - (ii) 10 days after the expiration of the 60-day period extended to the authorities in subparagraph (d).

Except to ensure that enterprises operating broadcast stations and cable systems have continued access to and use of public telecommunications services, as set out in Article 14.2, this Chapter does not apply to any measure relating to broadcast or cable distribution of radio or television programming.
3. Nothing in this Chapter shall be construed to:
 - (a) require a Party (or require a Party to compel any enterprise) to establish, construct, acquire, lease, operate, or provide telecommunications networks or services where such networks or services are not offered to the public generally;
 - (b) require a Party to compel any enterprise exclusively engaged in the broadcast or cable distribution of radio or television programming to make available its broadcast or cable facilities as a public telecommunications network; or

4. Notwithstanding paragraph 3, a Party may take such measures as are necessary to:

- (a) ensure the security and confidentiality of messages; or
- (b) protect the privacy of non-public personal data of subscribers to public telecommunications services,

provided that such measures are not applied in a manner that would constitute a means of arbitrary or unjustifiable discrimination or disguised restriction on trade in services.

5. Each Party shall ensure that no condition is imposed on access to and use of public telecommunications networks or services, other than that necessary to:

- (a) safeguard the public service responsibilities of suppliers of public telecommunications networks or services, in particular their ability to make their networks or services available to the public generally; or
- (b) protect the technical integrity of public telecommunications networks or services.

6. Provided that conditions for access to and use of public telecommunications networks or services satisfy the criteria set out in paragraph 5, such conditions may include:

- (b) the availability of technical interfaces necessary for interconnection.

Competitive Safeguards

- 2. (a) Each Party shall maintain appropriate measures for the purpose of preventing suppliers that, alone or together, are a major supplier in its territory from engaging in or continuing anti-competitive practices.
- (b) The anti-competitive practices referred to in subparagraph (a) include in particular:

 - (ii) using information obtained from competitors with anti-competitive results; and
 - (iii) not making available, on a timely basis, to suppliers of public telecommunications services, technical information about essential facilities and commercially relevant information that are necessary for them to provide public telecommunications services.

Resale

- 3. Each Party shall ensure that major suppliers in its territory:
 - (a) offer for resale, at reasonable rates, to suppliers of public telecommunications services of another Party, public telecommunications services that such major suppliers provide at retail to end-users that are not suppliers of public telecommunications services; and
 - (b) do not impose unreasonable or discriminatory conditions or limitations on the resale of such services.⁵

Unbundling of Network Elements

- 4. (a) Each Party shall provide its telecommunications regulatory body or other relevant body the authority to require major suppliers in its territory to offer access to network elements on an unbundled basis on terms and conditions, and at cost-oriented rates, that are reasonable, non-discriminatory, and transparent for the supply of public telecommunications services.
- (b) Each Party may determine the network elements required to be made available in its territory, and the suppliers that may obtain such elements, in accordance with its law or regulations.

⁵ Where provided in its law or regulations, a Party may prohibit a reseller that obtains, at wholesale rates, a public telecommunications service available at retail to only a limited category of subscribers from offering the service to a different category of subscribers.

Interconnection

5. (a) General Terms and Conditions

Each Party shall ensure that major suppliers in its territory provide interconnection for the facilities and equipment of suppliers of public telecommunications services of another Party:

- (i) at any technically feasible point in the major suppliers' networks;
- (ii) under non-discriminatory terms, conditions (including technical standards and specifications), and rates;

- (iv) in a timely fashion, on terms, conditions (including technical standards and specifications), and cost-oriented rates that are transparent, reasonable, having regard to economic feasibility, and sufficiently unbundled so that suppliers need not pay for network components or facilities that they do not require for the service to be provided; and
- (v) on request, at points in addition to the network termination points offered to the majority of users, subject to charges that reflect the cost of construction of necessary additional facilities.

(b) Options for Interconnecting with Major Suppliers

Each Party shall ensure that suppliers of public telecommunications services of another Party may interconnect their facilities and equipment with those of major suppliers in its territory pursuant to at least one of the following options:

- (i) a reference interconnection offer or another standard interconnection offer containing the rates, terms, and conditions that the major suppliers offer generally to suppliers of public telecommunications services;
- (ii) the terms and conditions of an interconnection agreement in force; or
- (iii) through negotiation of a new interconnection agreement.

(c) Public Availability of Interconnection Offers

- 6. (a) Each Party shall ensure that major suppliers in its territory provide enterprises of another Party leased circuits services that are public telecommunications services on terms and conditions, and at rates that are reasonable and non-discriminatory.
- (b) In carrying out subparagraph (a), each Party shall provide its telecommunications regulatory body the authority to require major suppliers in its territory to offer leased circuits services that are public telecommunications services to enterprises of another Party at capacity-based, cost-oriented prices.

Co-location

- 7. (a) Subject to subparagraphs (b) and (c), each Party shall ensure that major suppliers in its territory provide to suppliers of public telecommunications services of another Party physical co-location of equipment necessary for interconnection on terms and conditions, and at cost-oriented rates, that are reasonable, non-discriminatory, and transparent.
- (b) Where physical co-location is not practical for technical reasons or because of space limitations, each Party shall ensure that major suppliers in its territory provide an alternative solution, such as facilitating virtual co-location, on terms and conditions, and at cost-oriented rates, that are reasonable, non-discriminatory, and transparent.
- (c) Each Party may specify in its law or regulations which premises are subject to subparagraphs (a) and (b).

Access to Poles, Ducts, Conduits, and Rights-of-way

- 8. Each Party shall ensure that major suppliers in its territory afford access to poles, ducts, conduits, and rights-of-way owned or controlled by such major suppliers to suppliers of public telecommunications services of another Party on terms and conditions, and at rates, that are reasonable and non-discriminatory.

Article 14.5: Submarine Cable Systems

Each Party shall ensure that any enterprise that it authorizes to operate a submarine cable system in its territory as a public telecommunications service accords reasonable and non-discriminatory treatment with respect to access to that system (including landing facilities) to suppliers of public telecommunications services of another Party.

⁶ In the United States, this obligation may be satisfied by requiring filing with a regulatory authority at the regional level.

Article 14.6: Conditions for the Supply of Information Services

1. No Party may require an enterprise in its territory that it classifies as a supplier of information services⁷ and that supplies those services over facilities that it does not own to:

- (a) supply those services to the public generally;
- (b) cost-justify its rates for those services;
- (c) file a tariff for those services;
- (d) connect with any particular customer for the supply of those services; or
- (e) conform with any particular standard or technical regulation for connecting to any network, other than a public telecommunications network.

2. Notwithstanding paragraph 1, a Party may take the actions described in subparagraphs (a) through (e) to remedy a practice of a supplier of information services that the Party has found in a particular case to be anti-competitive under its law or regulations, or to otherwise promote competition or safeguard the interests of consumers.

Article 14.7: Independent Regulatory Bodies and Government-owned Telecommunications Suppliers

1. Each Party shall ensure that its telecommunications regulatory body is separate from, and not accountable to, any supplier of public telecommunications services. To this end, each Party shall ensure that its telecommunications regulatory body does not hold a financial interest or maintain an operating role in any such supplier.

2. Each Party shall ensure that the decisions and procedures of its telecommunications regulatory body are impartial with respect to all interested persons. To this end, each Party shall ensure that any financial interest that it holds in a supplier of public telecommunications services does not influence the decisions and procedures of its telecommunications regulatory body.

3. No Party may accord more favorable treatment to a supplier of public telecommunications services or to a supplier of information services than that accorded to a like supplier of another Party on the basis that the supplier receiving more favorable treatment is owned, wholly or in part, by the central level of government of the Party.

Article 14.8: Universal Service

Each Party has the right to define the kind of universal service obligations it wishes to maintain and shall administer those obligations in a transparent, non-discriminatory, and competitively neutral manner and shall ensure that its universal service obligation is not more burdensome than necessary for the kind of universal service that it has defined.

Article 14.9: Licenses and Other Authorizations

1. Where a Party requires a supplier of public telecommunications services to have a license, concession, permit, registration, or other type of authorization, the Party shall make publicly available:

⁷ For purposes of applying this Article, each Party may classify which services in its territory are information services.

Article 14.10: Allocation and Use of Scarce Resources

1. Each Party shall administer its procedures for the allocation and use of scarce telecommunications resources, including frequencies, numbers, and rights-of-way, in an objective, timely, transparent, and non-discriminatory manner.
2. Each Party shall make publicly available the current state of allocated frequency bands but shall not be required to provide detailed identification of frequencies allocated for specific government uses.
3. A Party's measures allocating and assigning spectrum and managing frequencies are not measures that are *per se* inconsistent with Article 11.4 (Market Access), either as it applies to cross-border trade in services or, through the operation of Article 11.1.3 (Scope and Coverage), to a covered investment of another Party. Accordingly, each Party retains the right to establish and apply its spectrum and frequency management policies that may have the effect of limiting the number of suppliers of public telecommunications services, provided that it does so in a manner that is consistent with other provisions of this Agreement. This includes the ability to allocate frequency bands, taking into account current and future needs and spectrum availability.
4. When making a spectrum allocation for non-government telecommunications services, each Party shall endeavor to rely on an open and transparent public comment process that considers the overall public interest. Each Party shall endeavor to rely generally on market-based approaches in assigning spectrum for terrestrial non-government telecommunications services.

Article 14.11: Enforcement

Each Party shall provide its competent authority with the authority to enforce compliance with the Party's measures relating to the obligations set out in Articles 14.2 through 14.5. Such authority shall include the ability to impose effective sanctions, which may include financial penalties, injunctive relief (on an interim or final basis), or the modification, suspension, and revocation of licenses or other authorizations.

Article 14.12: Resolution of Telecommunications Disputes

Further to Articles 19.4 (Administrative Proceedings) and 19.5 (Review and Appeal), each Party shall ensure the following:

Recourse to Telecommunications Regulatory Bodies

- (a) (i) Enterprises of another Party may seek review by a telecommunications regulatory body or other relevant body to resolve disputes regarding the Party's measures relating to a matter set out in Articles 14.2 through 14.5.

- (ii) Suppliers of public telecommunications services of another Party that have requested interconnection with a major supplier in the Party's territory may seek review, within a reasonable and publicly specified period after the supplier requests interconnection, by a telecommunications regulatory body⁸ to resolve disputes regarding the terms, conditions, and rates for interconnection with such major supplier.

Reconsideration

- (b) Any enterprise that is aggrieved or whose interests are adversely affected by a determination or decision of the Party's telecommunications regulatory body may petition the body to reconsider⁹ that determination or decision. No Party may permit such a petition to constitute grounds for non-compliance with the determination or decision of the telecommunications regulatory body unless an appropriate authority stays such determination or decision.¹⁰

Judicial Review

- (c) Any enterprise that is aggrieved or whose interests are adversely affected by a determination or decision of the Party's telecommunications regulatory body may obtain judicial review of such determination or decision by an independent judicial authority. An application for judicial review shall not constitute grounds for non-compliance with such a determination or decision unless stayed by the relevant judicial body.

Article 14.13: Transparency

Further to Articles 19.2 (Publication) and 19.3 (Notification and Provision of Information), each Party shall ensure that:

- (a) rulemakings, including the basis for such rulemakings, of its telecommunications regulatory body and end-user tariffs filed with its telecommunications regulatory body are promptly published or otherwise made publicly available;
- (b) interested persons are provided, to the extent possible, with adequate advance public notice of, and the opportunity to comment on, any rulemaking that its telecommunications regulatory body proposes; and
- (c) its measures relating to public telecommunications services are made publicly available, including measures relating to:
 - (i) tariffs and other terms and conditions of service;

⁸ The United States may comply with this obligation by providing for review by a regulatory authority at the regional level.

⁹ With respect to the obligations of a Party other than the United States under this subparagraph, enterprises may not petition for reconsideration of rulings of general application, as defined in Article 19.6 (Definitions), unless provided for under its law and regulation.

¹⁰ Notwithstanding this subparagraph, in Colombia, if a petition for reconsideration is filed, the determination or decision of the telecommunications regulatory body will not become effective pending the outcome of the reconsideration. Petitions for reconsideration shall be ruled upon promptly.

- (ii) procedures relating to judicial and other adjudicatory proceedings;
- (iii) specifications of technical interfaces;
- (iv) bodies responsible for preparing, amending, and adopting standards-related measures affecting access and use;
- (v) conditions for attaching terminal or other equipment to the public telecommunications network; and
- (vi) notification, permit, registration, or licensing requirements, if any.

Article 14.14: Flexibility in the Choice of Technologies

No Party may prevent suppliers of public telecommunications services from having the flexibility to choose the technologies that they use to supply their services, including commercial mobile wireless services, subject to requirements necessary to satisfy legitimate public policy interests.

Article 14.15: Forbearance

The Parties recognize the importance of relying on market forces to achieve wide choices in the supply of telecommunications services. To this end, each Party may forbear from applying a regulation to a service that the Party classifies as a public telecommunications service, if its telecommunications regulatory body determines that:

- (a) enforcement of that regulation is not necessary to prevent unreasonable or discriminatory practices;
- (b) enforcement of that regulation is not necessary for the protection of consumers; and
- (c) forbearance is consistent with the public interest, including promoting and enhancing competition between suppliers of public telecommunications services.

In respect of all categories of intellectual property covered in this Chapter, each Party shall accord to nationals¹ of the other Parties treatment no less favorable than it accords to its own nationals with regard to the protection² and enjoyment of such intellectual property rights and any benefits derived from such rights.

9. A Party may derogate from paragraph 8 in relation to its judicial and administrative procedures, including requiring a national of the other Party to designate an address for service of process in its territory, or to appoint an agent in its territory, provided that such derogation is necessary to secure compliance with laws and regulations that are not inconsistent with this Chapter and is not applied in a manner that would constitute a disguised restriction on trade.

10. Paragraph 8 does not apply to procedures provided in multilateral agreements to which the Parties are party concluded under the auspices of the WIPO in relation to the acquisition or maintenance of intellectual property rights.

Application of this Agreement to Existing Subject Matter and Prior Acts

11. Except as it provides otherwise, including in Article 16.7.2, this Chapter gives rise to obligations in respect of all subject matter existing at the date of entry into force of this Agreement that is protected on that date in the territory of the Party where protection is claimed, or that meets or comes subsequently to meet the criteria for protection under this Chapter.

12. Except as otherwise provided in this Chapter, including Article 16.7.2, a Party shall not be required to restore protection to subject matter that on the date of entry into force of this Agreement has fallen into the public domain in the Party where the protection is claimed.

13. This Chapter does not give rise to obligations in respect of acts that occurred before the date of entry into force of this Agreement.

Transparency

14. Further to Article 19.2 (Publication), and with the object of making the protection and enforcement of intellectual property rights transparent, each Party shall ensure that all laws, regulations, and procedures concerning the protection or enforcement of intellectual property rights shall be in writing and shall be published,³ or where publication is not practicable

¹ For purposes of Articles 16.1.8, 16.1.9, 16.3.1, and 16.6.4, a **national of a Party** shall also mean, in respect of the relevant right, an entity located in such Party that would meet the criteria for eligibility for protection provided for in the agreements listed in Articles 16.1.2 through 16.1.4 and the TRIPS Agreement.

² For purposes of this paragraph, “protection” includes matters affecting the availability, acquisition, scope, maintenance, and enforcement of intellectual property rights as well as matters affecting the use of intellectual property rights specifically covered by this Chapter. Further, for purposes of this paragraph, “protection” also includes the prohibition on circumvention of effective technological measures set out in Article 16.7.4 and the rights and obligations concerning rights management information set out in Article 16.7.5.

³ For greater certainty, a Party may satisfy the requirement to publish a law, regulation, or procedure by making it available to the public on the Internet.

made publicly available, in a national language in such a manner as to enable governments and right holders to become acquainted with them.

Article 16.2: Trademarks

1. No Party shall require, as a condition of registration, that signs be visually perceptible, nor may a Party deny registration of a trademark solely on the grounds that the sign of which it is composed is a sound or a scent.
2. Each Party shall provide that trademarks shall include collective and certification marks. Each Party shall also provide that signs that may serve, in the course of trade, as geographical indications may constitute certification or collective marks.⁴
3. In view of the obligations of Article 20 of the TRIPS Agreement, each Party shall ensure that its measures mandating the use of the term customary in common language as the common name for a good or service (“common name”) including, *inter alia*, requirements concerning the relative size, placement, or style of use of the trademark in relation to the common name, do not impair the use or effectiveness of trademarks used in relation to such good or service.⁵
4. Each Party shall provide that the owner of a registered trademark shall have the exclusive right to prevent all third parties not having the owner’s consent from using in the course of trade identical or similar signs, including geographical indications, for goods or services that are related to those goods or services in respect of which the owner’s trademark is registered, where such use would result in a likelihood of confusion.
5. Each Party may provide limited exceptions to the rights conferred by a trademark, such as fair use of descriptive terms, provided that such exceptions take account of the legitimate interest of the owner of the trademark and of third parties.
6. Article 6bis of the *Paris Convention for the Protection of Industrial Property* (1967) shall apply, *mutatis mutandis*, to goods or services that are not identical or similar to those identified by a well-known trademark, whether registered or not, provided that use of that trademark in relation to those goods or services would indicate a connection between those goods or services and the owner of the trademark, and provided that the interests of the owner of the trademark are likely to be damaged by such use.
7. In determining whether a trademark is well known, no Party shall require that the reputation of the trademark extend beyond the sector of the public that normally deals with the relevant goods or services. For greater certainty, the sector of the public that normally deals with the relevant goods or services is determined according to each Party’s domestic law.
8. Each Party shall provide a system for the registration of trademarks, which shall include:
 - (a) a requirement to provide to the applicant a communication in writing, which may be electronic, of the reasons for a refusal to register a trademark;

⁴ **Geographical indications** means indications that identify a good as originating in the territory of a Party, or a region or locality in that territory, where a given quality, reputation, or other characteristic of the good is essentially attributable to its geographical origin. Any sign or combination of signs, in any form whatsoever, shall be eligible to be a geographical indication. The term “originating” in this Chapter does not have the meaning ascribed to that term in Article 1.3 (Definitions of General Application).

⁵ For greater certainty, the existence of such measures does not, *per se*, amount to impairment.

- (b) an opportunity for the applicant to respond to communications from the trademark authorities, to contest an initial refusal, and to appeal judicially a final refusal to register;
 - (c) an opportunity for interested parties to petition to oppose a trademark application or to seek cancellation of a trademark after it has been registered; and
 - (d) a requirement that decisions in opposition or cancellation proceedings be reasoned and in writing.
9. Each Party shall provide:
- (a) a system for the electronic application for, and electronic processing, registration, and maintenance of, trademarks;⁶ and
 - (b) a publicly available electronic database, including an online database, of trademark applications and registrations.
10. Each Party shall provide that:
- (a) each registration or publication that concerns a trademark application or registration and that indicates goods or services shall indicate the goods or services by their names, grouped according to the classes of the classification established by the *Nice Agreement Concerning the International Classification of Goods and Services for the Purposes of the Registration of Marks* (1979), as revised and amended (Nice Classification); and
 - (b) goods or services may not be considered as being similar to each other solely on the ground that, in any registration or publication, they appear in the same class of the Nice Classification. Conversely, each Party shall provide that goods or services may not be considered as being dissimilar from each other solely on the ground that, in any registration or publication, they appear in different classes of the Nice Classification.
11. Each Party shall provide that initial registration and each renewal of registration of a trademark shall be for a term of no less than ten years.
12. No Party may require recordation of trademark licenses to establish the validity of the license, to assert any rights in a trademark, or for other purposes.⁷

Article 16.3: Geographical Indications

1. If a Party provides the means to apply for protection or petition for recognition of geographical indications, through a system of protection of trademarks or otherwise, it shall accept those applications and petitions without the requirement for intercession by a Party on behalf of its nationals, and shall:
- (a) process applications or petitions, as the case may be, for geographical indications with a minimum of formalities;

⁶ For greater certainty, such a system will be established according to each Party's domestic law.

⁷ Nothing in this paragraph prevents a Party from requesting the presentation of evidence of a license for informational purposes.

- (b) make its regulations governing filing of such applications or petitions, as the case may be, readily available to the public;
 - (c) provide that applications or petitions, as the case may be, for geographical indications are published for opposition, and shall provide procedures for opposing geographical indications that are the subject of applications or petitions. Each Party shall also provide procedures to cancel a registration resulting from an application or a petition; and
 - (d) provide that measures governing the filing of applications or petitions for geographical indications set out clearly the procedures for these actions. Such procedures shall include contact information sufficient for applicants or petitioners, as the case may be, to obtain specific procedural guidance regarding the processing of applications and petitions.
2. Each Party shall provide that grounds for refusing protection or recognition of a geographical indication include the following:
- (a) the geographical indication is likely to cause confusion with a trademark that is the subject of a good-faith pending application or registration; and
 - (b) the geographical indication is likely to cause confusion with a pre-existing trademark, the rights to which have been acquired in accordance with the Party's law.

Article 16.4: Domain Names on the Internet

1. In order to address the problem of trademark cyber-piracy, each Party shall require that the management of its country-code top-level domain (ccTLD) provide an appropriate procedure for the settlement of disputes, based on the principles established in the Uniform Domain-Name Dispute-Resolution Policy (1999).
2. Each Party shall require that the management of its ccTLD provide online public access to a reliable and accurate database of contact information on domain-name registrants.

Article 16.5: Copyrights

1. Further to Article 1.2 (Relation to Other Agreements), the Parties affirm their existing rights and obligations under the *Berne Convention for the Protection of Literary and Artistic Works* (Berne Convention).
2. Each Party shall provide that authors⁸ have the right to authorize or prohibit⁹ all reproductions of their works, in any manner or form, permanent or temporary (including temporary storage in electronic form).
3. Each Party shall provide to authors the right to authorize the making available to the public of the original and copies¹⁰ of their works through sale or other transfer of ownership.

⁸ References in this Chapter to "authors" include any successors in interest.

⁹ With respect to copyrights in this Chapter, a right to authorize or prohibit, or a right to authorize, means an exclusive right.

¹⁰ The expressions "copies" and "original and copies," being subject to the right of distribution under this paragraph, refer exclusively to fixed copies that can be put into circulation as tangible objects.

4. Without prejudice to Articles 11(1)(ii), 11*bis*(1)(i) and (ii), 11*ter*(1)(ii), 14(1)(ii), and 14*bis*(1) of the Berne Convention, each Party shall provide to authors the exclusive right to authorize or prohibit the communication to the public of their works, by wire or wireless means, including the making available to the public of their works in such a way that members of the public may access these works from a place and at a time individually chosen by them.

5. Each Party shall provide that, where the term of protection of a work (including a photographic work) is to be calculated:

- (a) on the basis of the life of a natural person, the term shall be not less than the life of the author and 70 years after the author's death; and
- (b) on a basis other than the life of a natural person, the term shall be
 - (i) not less than 70 years from the end of the calendar year of the first authorized publication of the work, or
 - (ii) failing such authorized publication within 50 years from the creation of the work, not less than 70 years from the end of the calendar year of the creation of the work.

6. Ownership of copyright in an artistic or literary work shall vest initially in the author or authors of the work.

Article 16.6: Related Rights

1. Further to Article 1.2 (Relation to Other Agreements), the Parties affirm their existing rights and obligations under the *WIPO Performances and Phonograms Treaty* (1996).

2. Each Party shall provide that performers and producers of phonograms¹¹ have the right to authorize or prohibit¹² all reproductions of their performances¹³ and phonograms, in any manner or form, permanent or temporary (including temporary storage in electronic form).

3. Each Party shall provide to performers and producers of phonograms the right to authorize the making available to the public of the original and copies¹⁴ of their performances and phonograms through sale or other transfer of ownership.

4. Each Party shall accord the rights provided for in this Chapter with respect to performers and producers of phonograms to the performers and producers of phonograms who are nationals of another Party and to performances or phonograms first published or first fixed in the territory of a Party. A performance or phonogram shall be considered first

¹¹ References in this Chapter to “performers” and “producers of phonograms” include any successors in interest.

¹² With respect to related rights in this Chapter, a right to authorize or prohibit, or a right to authorize, means an exclusive right.

¹³ With respect to related rights in this Chapter, a “performance” refers to a performance fixed in a phonogram unless otherwise specified.

¹⁴ The expressions “copies” and “original and copies,” being subject to the right of distribution under this paragraph, refer exclusively to fixed copies that can be put into circulation as tangible objects.

published in the territory of a Party in which it is published within 30 days of its original publication.¹⁵

5. Each Party shall provide to performers the right to authorize or prohibit (a) the broadcasting and communication to the public of their unfixed performances, except where the performance is already a broadcast performance; and (b) the fixation of their unfixed performances.
6. (a) Each Party shall provide to performers and producers of phonograms the right to authorize or prohibit the broadcasting or any communication to the public of their performances or phonograms, by wire or wireless means, including the making available to the public of those performances and phonograms in such a way that members of the public may access them from a place and at a time individually chosen by them.

(b) Notwithstanding subparagraph (a) and Article 16.7.8, the application of this right to analog transmissions and free over-the-air broadcasts, and exceptions or limitations to this right for such activity, shall be a matter of each Party's law.

(c) Any limitations to this right in respect of other noninteractive transmissions shall be in accordance with Article 16.7.8 and shall not prejudice the right of the performer or producer of phonograms to obtain equitable remuneration.
7. Each Party shall provide that, where the term of protection of a performance or phonogram is to be calculated:
 - (a) on the basis of the life of a natural person, the term shall be not less than the life of that person and 70 years after that person's death; and
 - (b) on a basis other than the life of a natural person, the term shall be
 - (i) not less than 70 years from the end of the calendar year of the first authorized publication of the performance or phonogram, or
 - (ii) failing such authorized publication within 50 years from the creation of the performance or phonogram, not less than 70 years from the end of the calendar year of the creation of the performance or phonogram.
8. For purposes of this Article and Article 16.7, the following definitions apply with respect to performers and producers of phonograms:
 - (a) **broadcasting** means the transmission by wireless means or satellite to the public of sounds or sounds and images, or of the representations thereof, including wireless transmission of encrypted signals where the means for decrypting are provided to the public by the broadcasting organization or with its consent; "broadcasting" does not include transmissions over computer networks or any transmissions where the time and place of reception may be individually chosen by members of the public;
 - (b) **communication to the public** of a performance or a phonogram means the transmission to the public by any medium, other than by broadcasting, of sounds of a performance or the sounds or the representations of sounds fixed in

¹⁵ For purposes of this Article and Article 16.7, fixation includes the finalization of the master tape or its equivalent.

a phonogram. For purposes of paragraph 6, “communication to the public” includes making the sounds or representations of sounds fixed in a phonogram audible to the public;

- (c) **fixation** means the embodiment of sounds, or of the representations thereof, from which they can be perceived, reproduced, or communicated through a device;
- (d) **performers** means actors, singers, musicians, dancers, and other persons who act, sing, deliver, declaim, play in, interpret, or otherwise perform literary or artistic works or expressions of folklore;
- (e) **phonogram** means the fixation of the sounds of a performance or of other sounds, or of a representation of sounds, other than in the form of a fixation incorporated in a cinematographic or other audiovisual work;
- (f) **producer of a phonogram** means the person who, or the legal entity which, takes the initiative and has the responsibility for the first fixation of the sounds of a performance or other sounds, or the representations of sounds; and
- (g) **publication** of a performance or a phonogram means the offering of copies of the performance or the phonogram to the public, with the consent of the rightholder, and provided that copies are offered to the public in reasonable quantity.

Article 16.7: Obligations Common to Copyright and Related Rights

1. In order to ensure that no hierarchy is established between rights of authors, on the one hand, and rights of performers and producers of phonograms, on the other hand, each Party shall provide that in cases where authorization is needed from both the author of a work embodied in a phonogram and a performer or producer owning rights in the phonogram, the need for the authorization of the author does not cease to exist because the authorization of the performer or producer is also required. Likewise, each Party shall provide that in cases where authorization is needed from both the author of a work embodied in a phonogram and a performer or producer owning rights in the phonogram, the need for the authorization of the performer or producer does not cease to exist because the authorization of the author is also required.

2. Each Party shall apply Article 18 of the Berne Convention and Article 14.6 of the TRIPS Agreement, *mutatis mutandis*, to the subject matter, rights, and obligations in Articles 16.5 through 16.7.

3. Each Party shall provide that for copyright and related rights, any person acquiring or holding any economic right in a work, performance, or phonogram:

- (a) may freely and separately transfer that right by contract; and
- (b) by virtue of a contract, including contracts of employment underlying performances, the production of phonograms, and the creation of works, shall be able to exercise that right in that person’s own name and enjoy fully the benefits derived from that right.

4. (a) In order to provide adequate legal protection and effective legal remedies against the circumvention of effective technological measures that authors, performers, and producers of phonograms use in connection with the exercise

of their rights and that restrict unauthorized acts in respect of their works, performances, and phonograms, each Party shall provide that any person who:

- (i) circumvents without authority any effective technological measure that controls access to a protected work, performance, or phonogram; or
- (ii) manufactures, imports, distributes, offers to the public, provides or otherwise traffics in devices, products, or components, or offers to the public or provides services, that:
 - (A) are promoted, advertised, or marketed for the purpose of circumvention of any effective technological measure;
 - (B) have only a limited commercially significant purpose or use other than to circumvent any effective technological measure; or
 - (C) are primarily designed, produced, or performed for the purpose of enabling or facilitating the circumvention of any effective technological measure,

shall be liable and subject to the remedies set out in Article 16.11.15. Each Party shall provide for criminal procedures and penalties to be applied when any person, other than a nonprofit library, archive, educational institution, or public noncommercial broadcasting entity, is found to have engaged willfully and for purposes of commercial advantage or private financial gain in any of the foregoing activities.

- (b) **Effective technological measure** means any technology, device, or component that, in the normal course of its operation, controls access to a protected work, performance, or phonogram, or protects any copyright or any rights related to copyright.
- (c) In implementing subparagraph (a), no Party shall be obligated to require that the design of, or the design and selection of parts and components for, a consumer electronics, telecommunications, or computing product provide for a response to any particular technological measure, so long as such product does not otherwise violate any measures implementing subparagraph (a).
- (d) Each Party shall provide that a violation of a measure implementing this paragraph is a separate civil or criminal offense, independent of any infringement that might occur under the Party's law on copyright and related rights.
- (e) Each Party shall confine exceptions and limitations to measures implementing subparagraph (a) to the activities below and in subparagraph (f), which shall be applied to relevant measures in accordance with subparagraph (g):
 - (i) noninfringing reverse engineering activities with regard to a lawfully obtained copy of a computer program, carried out in good faith with respect to particular elements of that computer program that have not been readily available to the person engaged in those activities, for the sole purpose of achieving interoperability of an independently created computer program with other programs;

- (ii) noninfringing good faith activities, carried out by an appropriately qualified researcher who has lawfully obtained a copy, unfixed performance or display of a work, performance, or phonogram, and who has made a good faith effort to obtain authorization for such activities, to the extent necessary for the sole purpose of identifying and analyzing flaws and vulnerabilities of technologies for scrambling and descrambling of information;
 - (iii) the inclusion of a component or part for the sole purpose of preventing the access of minors to inappropriate on-line content in a technology, product, service, or device that itself is not prohibited under the measures implementing subparagraph (a)(ii);
 - (iv) noninfringing good faith activities that are authorized by the owner of a computer, computer system, or computer network for the sole purpose of testing, investigating, or correcting the security of that computer, computer system, or computer network;
 - (v) access by a nonprofit library, archive, or educational institution to a work, performance, or phonogram, not otherwise available to it, for the sole purpose of making acquisition decisions; and
 - (vi) noninfringing activities for the sole purpose of identifying and disabling a capability to carry out undisclosed collection or dissemination of personally identifying information reflecting the on-line activities of a natural person in a way that has no other effect on the ability of any person to gain access to any work.
- (f) Noninfringing uses of a work, performance, or phonogram, in a particular class of works, performances, or phonograms, provided that any exception or limitation adopted in reliance on this subparagraph shall be based on the existence of substantial evidence, as found in a legislative or administrative proceeding, of an actual or likely adverse impact on those noninfringing uses; and provided further that a review of such finding, conducted in an administrative or legislative proceeding, shall be completed at intervals of not more than four years to determine whether there still exists substantial evidence of an actual or likely adverse impact on those noninfringing uses.
- (g) The exceptions and limitations to measures implementing subparagraph (a) for the activities set forth in subparagraphs (e) and (f) may only be applied as follows, and only to the extent that they do not impair the adequacy of legal protection or the effectiveness of legal remedies against the circumvention of effective technological measures:
- (i) measures implementing subparagraph (a)(i) may be subject to exceptions and limitations with respect to each activity set forth in subparagraphs (e) and (f);
 - (ii) measures implementing subparagraph (a)(ii), as they apply to effective technological measures that control access to a work, performance, or phonogram, may be subject to exceptions and limitations with respect to activities set forth in subparagraphs (e)(i), (ii), (iii), and (iv); and
 - (iii) measures implementing subparagraph (a)(ii), as they apply to effective technological measures that protect any copyright or any rights related

to copyright, may be subject to exceptions and limitations with respect to activities set forth in subparagraph (e)(i).

- (h) Each Party may provide exceptions to any measure implementing the prohibitions referred to in subparagraph (a) for lawfully authorized investigative, protective, information security or intelligence activity carried out by government employees, agents or contractors. For the purposes of this paragraph, the term “information security” means activities carried out in order to identify and address the vulnerabilities of a government computer, computer system, or computer network.

5. In order to provide adequate and effective legal remedies to protect rights management information:

- (a) Each Party shall provide that any person who without authority, and knowing, or, with respect to civil remedies, having reasonable grounds to know, that it would induce, enable, facilitate, or conceal an infringement of any copyright or related right,
 - (i) knowingly removes or alters any rights management information;
 - (ii) distributes or imports for distribution rights management information knowing that the rights management information has been removed or altered without authority; or
 - (iii) distributes, imports for distribution, broadcasts, communicates or makes available to the public copies of works, performances, or phonograms, knowing that rights management information has been removed or altered without authority,

shall be liable and subject to the remedies set out in Article 16.11.15. Each Party shall provide for criminal procedures and penalties to be applied when any person, other than a nonprofit library, archive, educational institution, or public noncommercial broadcasting entity, is found to have engaged willfully and for purposes of commercial advantage or private financial gain in any of the foregoing activities.

- (b) To the extent a Party adopts exceptions and limitations to measures implementing subparagraph (a), such exceptions and limitations shall be confined to lawfully authorized investigative, protective, information security or intelligence activity carried out by government employees, agents, or contractors. For the purposes of this paragraph, the term “information security” means activities carried out in order to identify and address the vulnerabilities of a government computer, computer system or computer network.
- (c) **Rights management information** means:
 - (i) information that identifies a work, performance, or phonogram; the author of the work, the performer of the performance, or the producer of the phonogram; or the owner of any right in the work, performance, or phonogram;
 - (ii) information about the terms and conditions of the use of the work, performance, or phonogram; or

(iii) any numbers or codes that represent such information,

when any of these items is attached to a copy of the work, performance, or phonogram or appears in connection with the communication or making available of a work, performance, or phonogram, to the public.

6. Each Party shall issue appropriate laws, orders, regulations, or administrative or executive decrees mandating that its agencies use computer software only as authorized by the right holder. These measures shall actively regulate the acquisition and management of software for government use.

7. The Parties recognize the important role that collective management societies with voluntary membership can play in appropriate cases by facilitating, in a transparent manner, the collection and distribution of royalties.

8. With respect to Articles 16.5 through 16.7, each Party shall confine limitations or exceptions to exclusive rights to certain special cases that do not conflict with a normal exploitation of the work, performance, or phonogram, and do not unreasonably prejudice the legitimate interests of the right holder.

9. Notwithstanding Articles 16.7.8 and 16.6.6(b), no Party may permit the retransmission of television signals (whether terrestrial, cable, or satellite) on the Internet without the authorization of the right holder or right holders of the content of the signal and, if any, of the signal.

10. No Party may subject the enjoyment and exercise of the rights of authors, performers, and producers of phonograms provided for in this Chapter to any formality.

Article 16.8: Protection of Encrypted Program-Carrying Satellite Signals

1. Each Party shall make it a criminal offense:

- (a) to manufacture, assemble, modify, import, export, sell, lease, or otherwise distribute a tangible or intangible device or system, knowing or having reason to know that the device or system is primarily of assistance in decoding an encrypted program-carrying satellite signal without the authorization of the lawful distributor of such signal; and
- (b) willfully to receive or further distribute a program-carrying signal that originated as an encrypted satellite signal knowing that it has been decoded without the authorization of the lawful distributor of the signal.

2. Each Party shall provide for civil remedies, including compensatory damages, for any person injured by any activity described in paragraph 1, including any person that holds an interest in the encrypted programming signal or its content.

Article 16.9: Patents

1. Each Party shall make patents available for any invention, whether a product or process, in all fields of technology, provided that the invention is new, involves an inventive step, and is capable of industrial application. For the purposes of this Article, a Party may treat the terms “inventive step” and “capable of industrial application” as being synonymous with the terms “non-obvious” and “useful,” respectively.

2. Nothing in this Chapter shall be construed to prevent a Party from excluding inventions from patentability as set out in Articles 27.2 and 27.3 of the TRIPS Agreement.

Notwithstanding the foregoing, a Party that does not provide patent protection for plants by the date of entry into force of this Agreement shall undertake all reasonable efforts to make such patent protection available consistent with paragraph 1. Any Party that provides patent protection for plants or animals on or after the date of entry into force of this Agreement shall maintain such protection.

3. Each Party may provide limited exceptions to the exclusive rights conferred by a patent, provided that such exceptions do not unreasonably conflict with a normal exploitation of the patent and do not unreasonably prejudice the legitimate interests of the patent owner, taking account of the legitimate interests of third parties.

4. Without prejudice to Article 5.A(3) of the Paris Convention, each Party shall provide that a patent may be revoked or nullified only on grounds that would have justified a refusal to grant the patent according to its laws. However, a Party may also provide that fraud, misrepresentation, or inequitable conduct may be the basis for revoking, nullifying, or holding a patent unenforceable.

5. Consistent with paragraph 3, if a Party permits a third person to use the subject matter of a subsisting patent to generate information necessary to support an application for marketing approval of a pharmaceutical product or agricultural chemical product, that Party shall provide that any product produced under such authority shall not be made, used, sold, offered for sale, or imported in the territory of that Party other than for purposes related to generating information to meet requirements for approval to market the product once the patent expires, and if the Party permits exportation, the product shall only be exported outside the territory of that Party for purposes of meeting marketing approval requirements of that Party.

6. (a) Each Party shall make best efforts to process patent applications and marketing approval applications expeditiously with a view to avoiding unreasonable delays. The Parties shall cooperate and provide assistance to one another to achieve these objectives.

(b) Each Party shall provide the means to and shall, at the request of the patent owner, compensate for unreasonable delays in the issuance of a patent, other than a patent for a pharmaceutical product, by restoring patent term or patent rights. Each Party may provide the means to and may, at the request of the patent owner, compensate for unreasonable delays in the issuance of a patent for a pharmaceutical product by restoring patent term or patent rights. Any restoration under this subparagraph shall confer all of the exclusive rights of a patent subject to the same limitations and exceptions applicable to the original patent. For purposes of this subparagraph, an unreasonable delay shall at least include a delay in the issuance of the patent of more than five years from the date of filing of the application in the territory of the Party, or three years after a request for examination of the application has been made, whichever is later, provided that periods attributable to actions of the patent applicant need not be included in the determination of such delays.

(c) With respect to any pharmaceutical product that is covered by a patent, each Party may make available a restoration of the patent term or patent rights to compensate the patent owner for unreasonable curtailment of the effective patent term resulting from the marketing approval process related to the first commercial marketing of the product in that Party. Any restoration under this subparagraph shall confer all of the exclusive rights of a patent subject to the same limitations and exceptions applicable to the original patent.

7. Each Party shall disregard information contained in public disclosures used to determine if an invention is novel or has an inventive step if the public disclosure (a) was made or authorized by, or derived from, the patent applicant, and (b) occurred within 12 months prior to the date of filing of the application in the territory of the Party.

8. Each Party shall provide patent applicants with at least one opportunity to make amendments, corrections, and observations in connection with their applications. Each Party shall provide that no amendment or correction shall introduce new matter into the disclosure of the invention as filed in the original application.

9. Each Party shall provide that a disclosure of a claimed invention shall be considered to be sufficiently clear and complete if it provides information that allows the invention to be carried out by a person skilled in the art, without undue experimentation, as of the filing date and may require the applicant to indicate the best mode for carrying out the invention known to the inventor as of the filing date.

10. With the aim of ensuring that the claimed invention is sufficiently described, each Party shall provide that a claimed invention is sufficiently supported by its disclosure if the disclosure reasonably conveys to a person skilled in the art that the applicant was in possession of the claimed invention as of the filing date.

11. Each Party shall provide that a claimed invention is industrially applicable if it has a specific, substantial, and credible utility.¹⁶

Article 16.10: Measures Related to Certain Regulated Products¹⁷

Agricultural Chemical Products

1. (a) If a Party requires or permits, as a condition of granting marketing approval for a new agricultural chemical product, the submission of information concerning safety or efficacy of the product, the Party shall not, without the consent of a person that previously submitted such safety or efficacy information to obtain marketing approval in the Party, authorize another to market a same or a similar product based on:

- (i) the safety or efficacy information submitted in support of the marketing approval; or
- (ii) evidence of the marketing approval,

for at least ten years from the date of marketing approval in the territory of the Party.

(b) If a Party requires or permits, in connection with granting marketing approval for a new agricultural chemical product, the submission of evidence concerning the safety or efficacy of a product that was previously approved in another territory, such as evidence of prior marketing approval in the other territory, the Party shall not, without the consent of a person that previously submitted the safety or efficacy information to obtain marketing approval in another territory, authorize another to market a same or a similar product based on:

¹⁶ For greater certainty, this paragraph is without prejudice to paragraphs 1 and 2.

¹⁷ For greater certainty, the references in Article 16.13.2 to “this Chapter” include this Article 16.10.

(i) the safety or efficacy information submitted in support of the prior marketing approval in the other territory; or

(ii) evidence of prior marketing approval in the other territory,

for at least ten years from the date of marketing approval of the new product in the territory of the Party. In order to receive protection under this subparagraph, a Party may require that the person providing the information in the other territory seek approval in the territory of the Party within five years after obtaining marketing approval in the other territory.

(c) For purposes of this Article, a new agricultural chemical product is one that contains a chemical entity that has not been previously approved in the territory of the Party for use in an agricultural chemical product.

Pharmaceutical Products

2. (a) If a Party requires, as a condition for approving the marketing of a pharmaceutical product that utilizes a new chemical entity, the submission of undisclosed test or other data necessary to determine whether the use of such products is safe and effective, the Party shall protect against disclosure of the data of persons making such submissions, where the origination of such data involves considerable effort, except where the disclosure is necessary to protect the public or unless steps are taken to ensure that the data are protected against unfair commercial use.
- (b) Each Party shall provide that for data subject to subparagraph (a) that are submitted to the Party after the date of entry into force of this Agreement, no person other than the person that submitted them may, without the latter's permission, rely on such data in support of an application for product approval during a reasonable period of time after their submission. For this purpose, a reasonable period shall normally mean five years from the date on which the Party granted approval to the person that produced the data for approval to market its product, taking account of the nature of the data and person's efforts and expenditures in producing them. Subject to this provision, there shall be no limitation on any Party to implement abbreviated approval procedures for such products on the basis of bioequivalence or bioavailability studies.
- (c) Where a Party relies on a marketing approval granted by the other Party, and grants approval within six months of the filing of a complete application for marketing approval filed in the Party, the reasonable period of exclusive use of the data submitted in connection with obtaining the approval relied on shall begin with the date of the first marketing approval relied on.
- (d) A Party need not apply the provisions of subparagraphs (a), (b), and (c) with respect to a pharmaceutical product that contains a chemical entity that has been previously approved in the territory of the Party for use in a pharmaceutical product.
- (e) Notwithstanding subparagraphs (a), (b), and (c), a Party may take measures to protect public health in accordance with:
- (i) the Declaration on the TRIPS Agreement and Public Health (WT/MIN(01)/DEC/2) (the "Declaration");

- (ii) any waiver of any provision of the TRIPS Agreement granted by WTO Members in accordance with the WTO Agreement to implement the Declaration and in force between the Parties; and
- (iii) any amendment of the TRIPS Agreement to implement the Declaration that enters into force with respect to the Parties.

3. Each Party shall provide:

- (a) procedures, such as judicial or administrative proceedings, and remedies, such as preliminary injunctions or equivalent effective provisional measures, for the expeditious adjudication of disputes concerning the validity or infringement of a patent with respect to patent claims that cover an approved pharmaceutical product or its approved method of use;
- (b) a transparent system to provide notice to a patent holder that another person is seeking to market an approved pharmaceutical product during the term of a patent covering the product or its approved method of use; and
- (c) sufficient time and opportunity for a patent holder to seek, prior to the marketing of an allegedly infringing product, available remedies for an infringing product.

4. Where a Party permits, as a condition of approving the marketing of a pharmaceutical product, persons, other than the person originally submitting safety or efficacy information, to rely on evidence of safety or efficacy information of a product that was previously approved, such as evidence of prior marketing approval in the territory of the Party or in another territory, the Party may implement the provisions of paragraph 3 by:

- (a) implementing measures in its marketing approval process to prevent such other persons from marketing a product covered by a patent claiming the product or its approved method of use during the term of that patent, unless by consent or acquiescence of the patent owner;¹⁸ and
- (b) providing that the patent owner shall be informed of the identity of any such other person who requests marketing approval to enter the market during the term of a patent identified to the approving authority as covering that product;

provided that the Party also provides:

- (c) an expeditious administrative or judicial procedure in which the person requesting marketing approval can challenge the validity or applicability of the identified patent; and
- (d) effective rewards for a successful challenge of the validity or applicability of the patent.¹⁹

General Provisions

5. Subject to paragraph 2(e), when a product is subject to a system of marketing approval in the territory of a Party pursuant to paragraph 1 or 2 and is also covered by a patent in the

¹⁸ For greater certainty, the Parties recognize that this provision does not imply that the marketing approval authority should make patent validity or infringement determinations.

¹⁹ A Party may comply with clause (d) by providing a period of marketing exclusivity for the first applicant to successfully challenge the validity or applicability of the patent.

territory of that Party, the Party shall not alter the term of protection that it provides pursuant to paragraph 1 or 2 in the event that the patent protection terminates on a date earlier than the end of the term of protection specified in paragraph 1 or 2.

Article 16.11: Enforcement of Intellectual Property Rights

General Obligations

1. Each Party understands that procedures and remedies set forth in this Article for enforcement of intellectual property rights are established in accordance with the principles of due process that each Party recognizes and the foundations of its own legal system.
2. Each Party shall provide that final judicial decisions and administrative rulings of general applicability pertaining to the enforcement of intellectual property rights shall be in writing and shall state any relevant findings of fact and the reasoning or the legal basis on which the decisions or rulings are based. Each Party shall also provide that such decisions or rulings shall be published²⁰ or, where publication is not practicable, otherwise made available to the public, in a national language in such a manner as to enable governments and right holders to become acquainted with them.
3. Each Party shall publicize information on its efforts to provide effective enforcement of intellectual property rights in its civil, administrative, and criminal systems, including any statistical information that the Party may collect for such purposes.
4. This Article does not create for the Parties any obligation:
 - (a) to put in place a judicial system for the enforcement of intellectual property rights distinct from that for the enforcement of law in general; or
 - (b) with respect to the distribution of resources for enforcement of intellectual property rights and the enforcement of law in general.

The Parties understand that a decision that a Party makes on the distribution of enforcement resources shall not be a reason for not complying with the provisions of this Chapter.

5. In civil, administrative, and criminal proceedings involving copyright or related rights, each Party shall provide for a presumption that, in the absence of proof to the contrary, the person whose name is indicated in the usual manner is the right holder in the work, performance, or phonogram as designated.²¹ Each Party shall also provide for a presumption that, in the absence of proof to the contrary, the copyright or related right subsists in such subject matter.

Civil and Administrative Procedures and Remedies

6. Each Party shall make available to right holders²² civil judicial procedures concerning the enforcement of any intellectual property right.

²⁰ A Party may satisfy the requirement for publication by making the decision or ruling available to the public on the Internet.

²¹ For greater certainty, the Parties recognize that this provision does not address the allocation of rights among the right holders.

²² For purposes of this Article, “right holder” includes federations and associations as well as exclusive licensees and other duly authorized licensees having the legal standing and authority to assert such rights. “Licensee” shall include the licensee of any one or more of the exclusive intellectual property rights.

7. Each Party shall provide that:

- (a) in civil judicial proceedings, its judicial authorities shall have the authority to order the infringer to pay the right holder:
 - (i) damages adequate to compensate for the injury the right holder has suffered as a result of the infringement; and
 - (ii) at least in the case of copyright or related rights infringement and trademark counterfeiting, the profits of the infringer that are attributable to the infringement and that are not taken into account in computing the amount of the damages referred to in clause (i); and
- (b) in determining the amount of damages for infringement of intellectual property rights, its judicial authorities shall consider, *inter alia*, the value of the infringed-on good or service, according to the suggested retail price or other legitimate measure of value submitted by the right holder.

8. In civil judicial proceedings, each Party shall, at least with respect to infringement concerning copyright or related rights and trademark counterfeiting, establish or maintain pre-established damages, which shall be available on the election of the right holder as an alternative to actual damages. Such pre-established damages shall be set out in domestic law and determined by the judicial authorities, taking into account the aims of the intellectual property system, in an amount sufficient to compensate the right holder for the harm caused by the infringement and constitute a deterrent to future infringements.²³

9. Each Party shall provide that its judicial authorities, except in exceptional circumstances, shall have the authority to order, at the conclusion of civil judicial proceedings concerning infringement of copyright or related rights and trademark infringement, that the prevailing party shall be awarded payment of court costs or fees and reasonable attorney's fees by the losing party.

10. In civil judicial proceedings concerning copyright and related rights infringement and trademark counterfeiting, each Party shall provide that its judicial authorities shall have the authority to order the seizure of suspected infringing goods, any related materials and implements, and, at least for trademark counterfeiting, documentary evidence relevant to the infringement.

11. Each Party shall provide that:

- (a) in civil judicial proceedings, at the right holder's request, goods that have been found to be pirated or counterfeit shall be destroyed, except in exceptional circumstances;
- (b) its judicial authorities shall have the authority to order that materials and implements that have been used in the manufacture or creation of such pirated or counterfeit goods be, without compensation of any sort, promptly destroyed or, in exceptional circumstances, without compensation of any sort, disposed of outside the channels of commerce in such a manner as to minimize the risks of further infringements; and

²³ For greater certainty, the Parties understand that the damages set forth in this paragraph do not constitute punitive damages.

- (c) in regard to counterfeit trademarked goods, the simple removal of the trademark unlawfully affixed shall not be sufficient to permit the release of goods into the channels of commerce.

12. Each Party shall provide that in civil judicial proceedings concerning the enforcement of intellectual property rights, its judicial authorities shall have the authority to order the infringer to provide any information that the infringer possesses regarding any person or persons involved in any aspect of the infringement and regarding the means of production or distribution channel of such goods or services, including the identification of third persons involved in the production and distribution of the infringing goods or services or in their channels of distribution, and to provide this information to the right holder.²⁴

13. Each Party shall provide that the judicial authorities shall have the authority to order the infringer to inform the right holder of the identity of third persons involved in the production and distribution of the infringing goods or services and their channels of distribution. Each Party shall provide that its judicial authorities shall have the authority to impose sanctions, in appropriate cases, on a party to a proceeding that fails to abide by valid orders issued by such authorities.

14. To the extent that any civil remedy can be ordered as a result of administrative procedures on the merits of a case, each Party shall provide that such procedures conform to principles equivalent in substance to those set out in this Chapter.

15. Each Party shall provide for civil remedies concerning the acts described in Articles 16.7.4 and 16.7.5. Available civil remedies shall include at least:

- (a) provisional measures, including seizure of devices and products suspected of being involved in the prohibited activity;
- (b) the opportunity for the right holder to elect between actual damages (plus any profits attributable to the prohibited activity not taken into account in computing those damages) or pre-established damages as provided in paragraph 8;
- (c) payment to the prevailing right holder at the conclusion of civil judicial proceedings of court costs and fees, and reasonable attorney's fees, by the party engaged in the prohibited conduct; and
- (d) destruction of devices and products found to be involved in the prohibited activity, at the discretion of the judicial authorities, as provided in subparagraphs (a) and (b) of paragraph 11.

No Party may make damages under this paragraph available against a nonprofit library, archive, educational institution, or public broadcasting entity that sustains the burden of proving that it was not aware and had no reason to believe that its acts constituted a prohibited activity.

16. In civil judicial proceedings concerning the enforcement of intellectual property rights, each Party shall provide that its judicial authorities shall have the authority to order a party to desist from an infringement, in order, *inter alia*, to prevent the entry into the channels of commerce in the jurisdiction of those authorities of imported goods that involve the infringement of an intellectual property right immediately after customs clearance of such goods, or to prevent their exportation.

²⁴ For greater certainty, this provision does not apply to the extent that it would conflict with constitutional, common law, or statutory privilege.

17. In the event that a Party's judicial or other authorities appoint technical or other experts in civil proceedings concerning the enforcement of intellectual property rights and require that the parties to the litigation bear the costs of such experts, the Party should seek to ensure that such costs are closely related, *inter alia*, to the quantity and nature of work to be performed and do not unreasonably deter recourse to such proceedings.

Provisional Measures

18. Each Party shall act on requests for relief *in audita altera parte* and execute such requests expeditiously according to its rules of judicial procedure.

19. Each Party shall provide that its judicial authorities shall have the authority to require the plaintiff to provide any reasonably available evidence in order to satisfy themselves with a sufficient degree of certainty that the plaintiff's right is being infringed or that such infringement is imminent, and to order the plaintiff to provide a reasonable security or equivalent assurance sufficient to protect the defendant and to prevent abuse, and so as not to unreasonably deter recourse to such procedures.

Special Requirements Related to Border Measures

20. Each Party shall provide that any right holder initiating procedures for its competent authorities to suspend release of suspected counterfeit or confusingly similar trademark goods, or pirated copyright goods,²⁵ into free circulation is required to provide adequate evidence to satisfy the competent authorities that, under the laws of the country of importation, there is *prima facie* an infringement of the right holder's intellectual property right and to supply sufficient information that may reasonably be expected to be within the right holder's knowledge to make the suspected goods reasonably recognizable by its competent authorities. The requirement to provide sufficient information shall not unreasonably deter recourse to these procedures.

21. Each Party shall provide that the competent authorities shall have the authority to require a right holder initiating procedures to suspend the release of suspected counterfeit or confusingly similar trademarked goods, or pirated copyright goods, to provide a reasonable security or equivalent assurance sufficient to protect the defendant and the competent authorities and to prevent abuse. Each Party shall provide that such security or equivalent assurance shall not unreasonably deter recourse to these procedures. Each Party may provide that such security may be in the form of a bond conditioned to hold the importer or owner of the imported merchandise harmless from any loss or damage resulting from any suspension of the release of goods in the event the competent authorities determine that the article is not an infringing good.

22. Where its competent authorities have made a determination that goods are counterfeit or pirated, a Party shall grant its competent authorities the authority to inform the right holder

²⁵ For purposes of paragraphs 20 through 25:

(a) **counterfeit trademark goods** means any goods, including packaging, bearing without authorization a trademark that is identical to the trademark validly registered in respect of such goods, or that cannot be distinguished in its essential aspects from such a trademark, and that thereby infringes the rights of the owner of the trademark in question under the law of the country of importation; and

(b) **pirated copyright goods** means any goods that are copies made without the consent of the right holder or person duly authorized by the right holder in the country of production and that are made directly or indirectly from an article where the making of that copy would have constituted an infringement of a copyright or a related right under the law of the country of importation.

of the names and addresses of the consignor, the importer, and the consignee, and of the quantity of the goods in question.

23. Each Party shall provide that its competent authorities may initiate border measures *ex officio* with respect to merchandise for importation, exportation, or in transit, without the need for a formal complaint from a private party or right holder. Such measures shall be used when there is reason to believe or suspect that such merchandise is counterfeit or pirated.

24. Each Party shall provide that goods that have been determined by its competent authorities to be pirated or counterfeit shall be destroyed, pursuant to a judicial order where required, unless the right holder consents to an alternate disposition. Counterfeit trademark goods may, in appropriate cases, be donated to charity for use outside the channels of commerce, when the removal of the trademark eliminates the infringing characteristic of the good and the good is no longer identifiable with the removed trademark. In regard to counterfeit trademark goods, the simple removal of the trademark unlawfully affixed shall not be sufficient to permit the release of the goods into the channels of commerce. In no event shall the competent authorities be authorized to permit the exportation of counterfeit or pirated goods, nor shall they be authorized to permit such goods to be subject to other customs procedures, except in exceptional circumstances.

25. When a Party establishes, in relation to border measures to obtain the enforcement of an intellectual property right, an application fee or merchandise storage fee, such fee shall not be set at an amount that unreasonably deters recourse to these measures.

Criminal Procedures and Remedies

26. Each Party shall provide for criminal procedures and penalties to be applied at least in cases of willful trademark counterfeiting or copyright or related rights piracy on a commercial scale. Willful copyright or related rights piracy on a commercial scale includes:

- (a) significant willful copyright or related rights infringements that have no direct or indirect motivation of financial gain; and
- (b) willful infringements for purposes of commercial advantage or private financial gain.

Each Party shall treat willful importation or exportation of counterfeit or pirated goods as unlawful activities subject to criminal penalties to the same extent as the trafficking or distribution of such goods in domestic commerce.

27. Specifically, each Party shall provide:

- (a) remedies that include sentences of imprisonment as well as monetary fines sufficient to provide a deterrent to future infringements, consistent with a policy of removing the monetary incentive of the infringer. Each Party shall encourage its judicial authorities to impose fines at levels sufficient to provide a deterrent to future infringements;²⁶
- (b) that its judicial authorities shall have the authority to order the seizure of suspected counterfeit or pirated goods, any related materials and implements that have been used in the commission of the offense, any assets traceable to the infringing activity,²⁷ and any documentary evidence relevant to the offense.

²⁶ For greater certainty, this provision is without prejudice to the autonomy of the judicial authorities.

²⁷ For greater certainty, each Party recognizes that such authority may be provided under its general domestic criminal law.

Each Party shall provide that items that are subject to seizure pursuant to any such judicial order need not be individually identified so long as they fall within general categories specified in the order;

- (c) that its judicial authorities have the authority to order, among other measures, the forfeiture of any assets traceable to the infringing activity²⁵ and shall, except in exceptional cases, order the forfeiture and destruction of all counterfeit or pirated goods, and, at least with respect to willful copyright or related rights piracy, order the forfeiture and destruction of materials and implements that have been used in the creation of infringing goods. Each Party shall further provide that such forfeiture and destruction shall occur without compensation of any kind to the defendant; and
- (d) that its authorities may initiate legal action *ex officio* with respect to the offenses described in this Chapter, without the need for a formal complaint by a private party or right holder.

28. Each Party shall also provide for criminal procedures and penalties to be applied in the following cases, even absent willful trademark counterfeiting or copyright piracy:

- (a) knowing trafficking in counterfeit labels affixed or designed to be affixed to a phonogram, a copy of a computer program, documentation or packaging for a computer program, or a copy of a motion picture or other audiovisual work; and
- (b) knowing trafficking in counterfeit documentation or packaging for a computer program.

Limitations on Liability for Service Providers

29. For the purpose of providing enforcement procedures that permit effective action against any act of copyright infringement covered under this Chapter, including expeditious remedies to prevent infringements and criminal and civil remedies, each Party shall provide, consistent with the framework set out in this Article:

- (a) legal incentives for service providers to cooperate with copyright²⁸ owners in deterring the unauthorized storage and transmission of copyrighted materials; and
- (b) limitations in its law regarding the scope of remedies available against service providers for copyright infringements that they do not control, initiate or direct, and that take place through systems or networks controlled or operated by them or on their behalf, as set forth in this subparagraph (b).²⁹
 - (i) These limitations shall preclude monetary relief and provide reasonable restrictions on court-ordered relief to compel or restrain certain actions for the following functions, and shall be confined to those functions:³⁰

²⁸ For purposes of this paragraph, “copyright” shall also include related rights.

²⁹ For greater certainty, the failure of a service provider to qualify for the limitations in subparagraph (b) does not itself result in liability. Furthermore, subparagraph (b) is without prejudice to the availability of defenses to copyright infringement that are of general applicability.

³⁰ Each Party may request consultations with another Party to consider how to address under this paragraph functions of a similar nature that a Party identifies after the date of entry into force of this Agreement.

- (A) transmitting, routing, or providing connections for material without modification of its content, or the intermediate and transient storage of such material in the course thereof;
 - (B) caching carried out through an automatic process;
 - (C) storage at the direction of a user of material residing on a system or network controlled or operated by or for the service provider; and
 - (D) referring or linking users to an online location by using information location tools, including hyperlinks and directories.
- (ii) These limitations shall apply only where the service provider does not initiate the chain of transmission of the material, and does not select the material or its recipients (except to the extent that a function described in clause (i)(D) in itself entails some form of selection).
- (iii) Qualification by a service provider for the limitations as to each function in clauses (i)(A) through (D) shall be considered separately from qualification for the limitations as to each other function, in accordance with the conditions for qualification set forth in clauses (iv) through (vii).
- (iv) With respect to functions referred to in clause (i)(B), the limitations shall be conditioned on the service provider:
- (A) permitting access to cached material in significant part only to users of its system or network who have met conditions on user access to that material;
 - (B) complying with rules concerning the refreshing, reloading, or other updating of the cached material when specified by the person making the material available online in accordance with a generally accepted industry standard data communications protocol for the system or network through which that person makes the material available;
 - (C) not interfering with technology consistent with industry standards accepted in the Party's territory used at the originating site to obtain information about the use of the material, and not modifying its content in transmission to subsequent users; and
 - (D) expeditiously removing or disabling access, on receipt of an effective notification of claimed infringement, to cached material that has been removed or access to which has been disabled at the originating site.
- (v) With respect to functions referred to in clauses (i)(C) and (D), the limitations shall be conditioned on the service provider:
- (A) not receiving a financial benefit directly attributable to the infringing activity, in circumstances where it has the right and ability to control such activity;

- (B) expeditiously removing or disabling access to the material residing on its system or network on obtaining actual knowledge of the infringement or becoming aware of facts or circumstances from which the infringement was apparent, such as through effective notifications of claimed infringement in accordance with clause (ix); and
 - (C) publicly designating a representative to receive such notifications.
- (vi) Eligibility for the limitations in this subparagraph shall be conditioned on the service provider:
- (A) adopting and reasonably implementing a policy that provides for termination in appropriate circumstances of the accounts of repeat infringers; and
 - (B) accommodating and not interfering with standard technical measures accepted in the Party's territory that protect and identify copyrighted material, that are developed through an open, voluntary process by a broad consensus of copyright owners and service providers, that are available on reasonable and nondiscriminatory terms, and that do not impose substantial costs on service providers or substantial burdens on their systems or networks.
- (vii) Eligibility for the limitations in this subparagraph may not be conditioned on the service provider monitoring its service, or affirmatively seeking facts indicating infringing activity, except to the extent consistent with such technical measures.
- (viii) If the service provider qualifies for the limitations with respect to the function referred to in clause (i)(A), court-ordered relief to compel or restrain certain actions shall be limited to terminating specified accounts, or to taking reasonable steps to block access to a specific, non-domestic online location. If the service provider qualifies for the limitations with respect to any other function in clause (i), court-ordered relief to compel or restrain certain actions shall be limited to removing or disabling access to the infringing material, terminating specified accounts, and other remedies that a court may find necessary, provided that such other remedies are the least burdensome to the service provider among comparably effective forms of relief. Each Party shall provide that any such relief shall be issued with due regard for the relative burden to the service provider and harm to the copyright owner, the technical feasibility and effectiveness of the remedy and whether less burdensome, comparably effective enforcement methods are available. Except for orders ensuring the preservation of evidence, or other orders having no material adverse effect on the operation of the service provider's communications network, each Party shall provide that such relief shall be available only where the service provider has received notice of the court order proceedings referred to in this subparagraph and an opportunity to appear before the judicial authority.
- (ix) For purposes of the notice and take down process for the functions referred to in clauses (i)(C) and (D), each Party shall establish appropriate procedures for effective notifications of claimed

infringement, and effective counter-notifications by those whose material is removed or disabled through mistake or misidentification. Each Party shall also provide for monetary remedies against any person who makes a knowing material misrepresentation in a notification or counter-notification that causes injury to any interested party as a result of a service provider relying on the misrepresentation.

- (x) If the service provider removes or disables access to material in good faith based on claimed or apparent infringement, each Party shall provide that the service provider shall be exempted from liability for any resulting claims, provided that, in the case of material residing on its system or network, it takes reasonable steps promptly to notify the person making the material available on its system or network that it has done so and, if such person makes an effective counter-notification and is subject to jurisdiction in an infringement suit, to restore the material online unless the person giving the original effective notification seeks judicial relief within a reasonable time.
- (xi) Each Party shall establish an administrative or judicial procedure enabling copyright owners who have given effective notification of claimed infringement to obtain expeditiously from a service provider information in its possession identifying the alleged infringer.
- (xii) For purposes of the function referred to in clause (i)(A), **service provider** means a provider of transmission, routing, or connections for digital online communications without modification of their content between or among points specified by the user of material of the user's choosing, and for purposes of the functions referred to in clauses (i)(B) through (D) **service provider** means a provider or operator of facilities for online services or network access.

Article 16.12: Promotion of Innovation and Technological Development

1. The Parties recognize the importance of promoting technological innovation, disseminating technological information, and building technological capacity, including, as appropriate, through collaborative scientific research projects between or among the Parties. Accordingly, the Parties will seek and encourage opportunities for science and technology cooperation and identify areas for such cooperation and, as appropriate, engage in collaborative scientific research projects.

2. The Parties shall give priority to collaborations that advance common goals in science, technology, and innovation and support partnerships between public and private research institutions and industry. Any such collaborative activities or transfer of technology shall be based on mutually agreed terms.

3. Each Party shall designate a contact point to facilitate the development of collaborative projects from the following offices responsible for science and technology cooperation, which shall review periodically the state of collaboration through mutually agreed means of communication:

- (a) in the case of Colombia, the *Instituto Colombiano para el Desarrollo de la Ciencia y la Tecnología "Francisco José de Caldas"* (COLCIENCIAS); and
- (b) in the case of the United States, Office of Science and Technology Cooperation, Bureau of Oceans, and International Environmental and Scientific Affairs, U.S. Department of State;

or their successors.

Article 16.13: Understandings Regarding Certain Public Health Measures

1. The Parties affirm their commitment to the Declaration on the TRIPS Agreement and Public Health (WT/MIN(01)/DEC/2).
2. The Parties have reached the following understandings regarding this Chapter.
 - (a) The obligations of this Chapter do not and should not prevent a Party from taking measures to protect public health by promoting access to medicines for all, in particular concerning cases such as HIV/AIDS, tuberculosis, malaria, and other epidemics as well as circumstances of extreme urgency or national emergency. Accordingly, while reiterating their commitment to this Chapter, the Parties affirm that this Chapter can and should be interpreted and implemented in a manner supportive of each Party's right to protect public health and, in particular, to promote access to medicines for all.
 - (b) In recognition of the commitment to access to medicines that are supplied in accordance with the Decision of the General Council of 30 August 2003 on the Implementation of Paragraph Six of the Doha Declaration on the TRIPS Agreement and Public Health (WT/L/540) and the WTO General Council Chairman's statement accompanying the Decision (JOB(03)/177, WT/GC/M/82) (collectively, the "TRIPS/health solution"), this Chapter does not and should not prevent the effective utilization of the TRIPS/health solution.
 - (c) With respect to the aforementioned matters, if an amendment of the TRIPS Agreement enters into force with respect to the Parties and a Party's application of a measure in conformity with that amendment violates this Chapter, the Parties shall immediately consult in order to adapt this Chapter as appropriate in the light of the amendment.

Article 16.14: Final Provisions

1. Except as otherwise provided in Annex 16.1 and Article 16.1.3 and 16.1.4, each Party shall give effect to this Chapter on the date of entry into force of this Agreement.
2. A Party may delay giving effect to certain provisions of this Chapter as specified in Annex 16.1.
3. The Parties shall periodically review the implementation and operation of this Chapter and shall have the opportunity to undertake further negotiations to modify any of its provisions, including, as appropriate, consideration of an improvement in a Party's level of economic development.

Annex 16.1

Colombia

1. Colombia shall ratify or accede to the *Protocol Relating to the Madrid Agreement Concerning the International Registration of Marks* (1989) by January 1, 2009.
2. Colombia may delay giving effect to certain provisions of this Chapter for no longer than the periods in this paragraph, beginning on the date of entry into force of this Agreement:

EXECUTIVE OFFICE OF THE PRESIDENT
DEPUTY UNITED STATES TRADE REPRESENTATIVE
WASHINGTON, D.C. 20508

November 22, 2006

The Honorable Jorge Humberto Botero
Minister of Commerce, Industry, and Tourism
Ministerio de Comercio, Industria y Turismo
Bogotá, Colombia

Dear Minister Botero:

In connection with the signing on this date of the United States – Colombia Trade Promotion Agreement (the “Agreement”), I have the honor to confirm the following understandings reached between the Governments of the United States of America and the Republic of Colombia during the course of the negotiation of Chapter Sixteen (Intellectual Property Rights) of the Agreement:

In meeting the obligations of Article 16.11.29(b)(ix), the United States shall apply the pertinent provisions of its law¹ and Colombia shall adopt requirements for: (a) effective written notice to service providers with respect to materials that are claimed to be infringing and (b) effective written counter-notification by those whose material is removed or disabled and who claim that it was removed or disabled through mistake or misidentification, as set forth below. Substantial compliance with the elements listed below shall be deemed to be effective written notice or counter-notification.

(a) *Model of an effective notice, by a copyright² owner or person authorized to act on behalf of an owner of an exclusive right, to a service provider's publicly designated representative³*

In order for a notice to a service provider to be compliant with Article 16.11.29(b)(ix), it must be a written or electronic communication that includes substantially the following items:

1. The identity, address, telephone number and electronic mail address of the complaining party (or its authorized agent).

² All references to copyright in this letter are understood to include related rights, and all references to works are understood to include the subject matter of related rights.

³ It is understood that a representative is publicly designated to receive notification on behalf of a service provider if the representative's name, physical and electronic address, and telephone number are posted on a publicly accessible portion of the service provider's website, and also in a public register publicly accessible through the Internet or such other form or manner appropriate for Colombia.

3. 4. Statement that the complaining party has a good faith belief that use of the material in the manner complained of is not authorized by the copyright owner, its agent or the law.
5. Statement that the information in the notice is accurate.

2. Identification of the material that has been removed or to which access has been disabled.

⁴ If multiple copyrighted works at, or linked to from, a single online site on a system or network controlled or operated by or for the service provider are covered by a single notification, a representative list of such works at, or linked to from, that site may be provided.

⁶ A signature transmitted as part of an electronic communication satisfies this requirement.

⁷ All references to "subscriber" in this letter refer to the person whose material has been removed or disabled by a service provider as a result of an effective notice described in paragraph (a) of this letter.

3. Location at which the material appeared before it was removed or access to it was disabled.
4. Statement with sufficient indicia of reliability (such as a statement under penalty of perjury or equivalent legal sanctions) that the subscriber is the supplier of the material and has a good faith belief that the material was removed or disabled as a result of mistake or misidentification of the material.

6. Statement that the subscriber will accept service of process in any such suit.

Las Partes reconocen que las medidas que implementen el Artículo 16.10.3 (a) y (b) operarán conjuntamente de manera tal que se evite la aprobación de un producto farmacéutico para que entre al mercado durante el término de una patente en el territorio de esa Parte como está dispuesto en ese Artículo.

Chapter Seventeen

Labor

Article 17.1: Statement of Shared Commitments

1. The Parties reaffirm their obligations as members of the International Labor Organization (ILO).

Article 17.2: Fundamental Labor Rights

1. Each Party shall adopt and maintain in its statutes and regulations, and practices thereunder, the following rights, as stated in the *ILO Declaration on Fundamental Principles and Rights at Work and its Follow-Up (1998)* (ILO Declaration):^{1 2}

- (a) freedom of association;
- (b) the effective recognition of the right to collective bargaining;
- (c) the elimination of all forms of compulsory or forced labor;
- (d) the effective abolition of child labor and, for purposes of this Agreement, a prohibition on the worst forms of child labor; and
- (e) the elimination of discrimination in respect of employment and occupation.

2. Neither Party shall waive or otherwise derogate from, or offer to waive or otherwise derogate from, its statutes or regulations implementing paragraph 1 in a manner affecting trade or investment between the Parties, where the waiver or derogation would be inconsistent with a fundamental right set out in that paragraph.

Article 17.3: Enforcement of Labor Laws

1. (a) A Party shall not fail to effectively enforce its labor laws, including those it adopts or maintains in accordance with Article 17.2.1, through a sustained or recurring course of action or inaction, in a manner affecting trade or investment between the Parties, after the date of entry into force of this Agreement.
- (b) A decision a Party makes on the distribution of enforcement resources shall not be a reason for not complying with the provisions of this Chapter. Each Party retains the right to the reasonable exercise of discretion and to *bona fide* decisions with regard to the allocation of resources between labor enforcement activities among the fundamental labor rights enumerated in Article 17.2.1, provided the exercise of such discretion and such decisions are not inconsistent with the obligations of this Chapter.³

¹ The obligations set out in Article 17.2, as they relate to the ILO, refer only to the ILO Declaration.

² To establish a violation of an obligation under Article 17.2.1 a Party must demonstrate that the other Party has failed to adopt or maintain a statute, regulation, or practice in a manner affecting trade or investment between the Parties.

³ For greater certainty, a Party retains the right to exercise reasonable enforcement discretion and to make *bona fide* decisions regarding the allocation of enforcement resources with respect to labor laws other than those relating to fundamental rights enumerated in Article 17.2.1.

2. Nothing in this Chapter shall be construed to empower a Party's authorities to undertake labor law enforcement activities in the territory of another Party.

Article 17.4: Procedural Guarantees and Public Awareness

1. Each Party shall ensure that persons with a legally recognized interest in a particular matter have appropriate access to tribunals for the enforcement of the Party's labor laws. Such tribunals may include administrative, quasi-judicial, judicial, or labor tribunals, as provided in the Party's law.

2. Each Party shall ensure that proceedings before such tribunals for the enforcement of its labor laws are fair, equitable, and transparent and, to this end, each Party shall ensure that:

- (a) such proceedings comply with due process of law;
- (b) any hearings in such proceedings are open to the public, except where the administration of justice otherwise requires;
- (c) the parties to such proceedings are entitled to support or defend their respective positions including by presenting information or evidence; and
- (d) such proceedings do not entail unreasonable charges, or time limits, or unwarranted delays.

3. Each Party shall provide that final decisions on the merits of the case in such proceedings are:

- (a) in writing and state the reasons on which the decisions are based;
- (b) made available without undue delay to the parties to the proceedings and, consistent with its law, to the public; and
- (c) based on information or evidence in respect of which the parties to the proceedings were offered the opportunity to be heard.

4. Each Party shall provide, as appropriate, that parties to such proceedings have the right to seek review and, where warranted, correction of final decisions issued in such proceedings.

5. Each Party shall ensure that tribunals that conduct or review such proceedings are impartial and independent and do not have any substantial interest in the outcome of the matter.

6. Each Party shall provide that the parties to such proceedings may seek remedies to ensure the enforcement of their rights under its labor laws. Such remedies may include measures such as orders, fines, penalties, or temporary workplace closures.

7. Each Party shall promote public awareness of its labor laws, including by:

- (a) ensuring the availability of public information related to its labor laws and enforcement and compliance procedures; and
- (b) encouraging education of the public regarding its labor laws.

Article 17.5: Institutional Arrangements

1. The Parties hereby establish a Labor Affairs Council (Council) comprising cabinet-level or equivalent representatives of the Parties, who may be represented on the Council by their deputies or high-level designees.
2. The Council shall meet within the first year after the date of entry into force of this Agreement and thereafter as often as it considers necessary. The Council shall:
 - (a) oversee the implementation of and review progress under this Chapter, including the activities of the Labor Cooperation and Capacity Building Mechanism established under Article 17.6;
 - (b) develop general guidelines for consideration of communications referred to in paragraph 5(c);
 - (c) prepare reports, as appropriate, on matters related to the implementation of this Chapter and make such reports available to the public;
 - (d) endeavor to resolve matters referred to it under Article 17.7.4; and
 - (e) perform any other functions as the Parties may agree.

Chapter Eighteen

Environment

Objectives

Recognizing that each Party has sovereign rights and responsibilities with respect to its natural resources, the objectives of this Chapter are to contribute to the Parties' efforts to ensure that trade and environmental policies are mutually supportive, to promote the optimal use of resources in accordance with the objective of sustainable development, and to strive to strengthen the links between the Parties' trade and environmental policies and practices, which may take place through environmental cooperation and collaboration.

Article 18.1: Levels of Protection

Recognizing the sovereign right of each Party to establish its own levels of domestic environmental protection and environmental development priorities, and to adopt or modify accordingly its environmental laws and policies, each Party shall strive to ensure that those laws and policies provide for and encourage high levels of environmental protection and shall strive to continue to improve its respective levels of environmental protection.

Article 18.2: Environmental Agreements¹

A Party shall adopt, maintain, and implement laws, regulations, and all other measures to fulfill its obligations under the multilateral environmental agreements listed in Annex 18.2 ("covered agreements").²

Article 18.3: Enforcement of Environmental Laws

1. (a) A Party shall not fail to effectively enforce its environmental laws, and its laws, regulations, and other measures to fulfill its obligations under the covered agreements, through a sustained or recurring course of action or inaction, in a manner affecting trade or investment between the Parties, after the date of entry into force of this Agreement.
- (b) (i) The Parties recognize that each Party retains the right to exercise prosecutorial discretion and to make decisions regarding the allocation of environmental enforcement resources with respect to other environmental laws determined to have higher priorities. Accordingly, the Parties understand that with respect to the enforcement of environmental laws and all laws, regulations, and other measures to fulfill a Party's obligations under the covered agreements, a Party is in compliance with subparagraph (a) where a course of action or inaction reflects a reasonable, articulable, *bona fide* exercise of such discretion, or results from a reasonable, articulable, *bona fide* decision regarding the allocation of such resources.

¹ To establish a violation of Article 18.2 a Party must demonstrate that the other Party has failed to adopt, maintain, or implement laws, regulations, or other measures to fulfill an obligation under a covered agreement in a manner affecting trade or investment between the Parties.

² For purposes of Article 18.2: (1) "covered agreements" shall encompass those existing or future protocols, amendments, annexes, and adjustments under the relevant agreement to which both Parties are party; and (2) a Party's "obligations" shall be interpreted to reflect, *inter alia*, existing and future reservations, exemptions, and exceptions applicable to it under the relevant agreement.

- (ii) The Parties recognize the importance of the covered agreements. Accordingly, where a course of action or inaction relates to laws, regulations, and other measures to fulfill its obligations under covered agreements, that shall be relevant to a determination under clause (i) regarding whether an allocation of resources is reasonable and *bona fide*.

2. The Parties recognize that it is inappropriate to encourage trade or investment by weakening or reducing the protections afforded in their respective environmental laws. Accordingly, a Party shall not waive or otherwise derogate from, or offer to waive or otherwise derogate from, such laws in a manner that weakens or reduces the protections afforded in those laws in a manner affecting trade or investment between the Parties.

3. Paragraph 2 shall not apply where a Party waives or derogates from an environmental law pursuant to a provision in law providing for waivers or derogations, provided that the waiver or derogation is not inconsistent with the Party's obligations under a covered agreement.

4. Nothing in this Chapter shall be construed to empower a Party's authorities to undertake environmental law enforcement activities in the territory of another Party.

Article 18.4: Procedural Matters

1. Each Party shall ensure that interested persons may request the Party's competent authorities to investigate alleged violations of its environmental laws, and that each Party's competent authorities shall give such requests due consideration in accordance with its law.

2. Each Party shall ensure that judicial, quasi-judicial, or administrative proceedings are available under its law to provide sanctions or remedies for violations of its environmental laws.

- (a) Such proceedings shall be fair, equitable, and transparent and, to this end, shall comply with due process of law, and be open to the public except where the administration of justice otherwise requires.

- (b) Tribunals that conduct or review such proceedings shall be impartial and independent and shall not have any substantial interest in the outcome of the matter.

3. Each Party shall ensure that persons with a legally recognized interest under its law in a particular matter shall have appropriate access to the proceedings referred to in paragraph 2.

4. Each Party shall provide persons with a legally recognized interest under its law in a particular matter appropriate and effective access to remedies for violations of that Party's environmental laws or for violations of a legal duty under that Party's law relating to the environment or environmental conditions affecting human health, which may include rights such as:

- (a) to sue another person under that Party's jurisdiction for damages under that Party's laws;

5. Each Party shall provide appropriate and effective sanctions or remedies for violations of that Party's environmental laws that:
- (a) take into consideration, as appropriate, the nature and gravity of the violation, any economic benefit the violator has derived from the violation, the economic condition of the violator, and other relevant factors; and
 - (b) may include administrative, civil, and criminal remedies and sanctions, such as compliance agreements, penalties, fines, imprisonment, injunctions, closure of facilities, or requirements to take remedial action or pay for the cost of containing or cleaning up pollution.

- (a) the maintenance, development, or improvement of performance goals and standards used in measuring environmental performance; and

- (b) flexible means to achieve such goals and meet such standards.

Article 18.6: Environmental Affairs Council

Each Party shall make such submissions and responses available to the public in a timely and easily accessible manner.

4. Each Party shall convene a new, or consult an existing, national consultative or advisory committee, comprising persons of the Party with relevant experience, including experience in business and environmental matters. Each Party shall solicit the committee's views on matters related to the implementation of this Chapter including, as appropriate, on issues raised in submissions the Party receives pursuant to this Article.

5. Each Party shall solicit public views on matters related to the implementation of this Chapter including, as appropriate, on issues raised in submissions it receives and shall make such views it receives in writing available to the public in a timely and easily accessible manner.

6. Each time it meets, the Council shall consider input received from each Party's consultative or advisory committee concerning implementation of this Chapter. After each meeting, the Council shall provide the public a written summary of its discussions on these matters and shall, as appropriate, provide recommendations to the Environmental Cooperation Commission on such matters.

1. Any person of a Party may file a submission asserting that a Party is failing to effectively enforce its environmental laws. Such submissions shall be filed with a secretariat or other appropriate body (secretariat) that the Parties designate.³

2. The secretariat may consider a submission under this Article if the secretariat finds that the submission:

- (a) is in writing in either English or Spanish;
- (b) clearly identifies the person making the submission;
- (c) provides sufficient information to allow the secretariat to review the submission, including any documentary evidence on which the submission may be based and identification of the environmental laws of which the failure to enforce is asserted;
- (d) appears to be aimed at promoting enforcement rather than at harassing industry;
- (e) indicates that the matter has been communicated in writing to the relevant authorities of the Party and indicates the Party's response, if any; and
- (f) is filed by a person of a Party, except as provided in paragraph 3.

³ The Parties shall designate the secretariat and provide for related arrangements through an exchange of letters or understanding between the Parties.

3. The Parties recognize that the *North American Agreement on Environmental Cooperation* (NAAEC) provides that a person or organization residing or established in the territory of the United States may file a submission under that agreement with the Secretariat of the NAAEC Commission for Environmental Cooperation asserting that the United States is failing to effectively enforce its environmental laws.⁴ In light of the availability of that procedure, a person of the United States who considers that the United States is failing to effectively enforce its environmental laws may not file a submission under this Article. For greater certainty, a person of a Party other than the United States who considers that the United States is failing to effectively enforce its environmental laws may file a submission with the secretariat.

4. Where the secretariat determines that a submission meets the criteria set out in paragraph 2, the secretariat shall determine whether the submission merits requesting a response from the Party. In deciding whether to request a response, the secretariat shall be guided by whether:

- (a) the submission is not frivolous and alleges harm to the person making the submission;
- (b) the submission, alone or in combination with other submissions, raises matters whose further study in this process would advance the goals of this Chapter and the ECA, taking into account guidance regarding those goals provided by the Council and the Environmental Cooperation Commission established under the ECA;
- (c) private remedies available under the Party's law have been pursued; and
- (d) the submission is drawn exclusively from mass media reports.

Where the secretariat makes such a request, it shall forward to the Party a copy of the submission and any supporting information provided with the submission.

5. The Party shall advise the secretariat within 45 days or, in exceptional circumstances and on notification to the secretariat, within 60 days of delivery of the request:

- (a) whether the precise matter at issue is the subject of a pending judicial or administrative proceeding, in which case the secretariat shall proceed no further; and
- (b) of any other information the Party wishes to submit, such as:
 - (i) whether the matter was previously the subject of a judicial or administrative proceeding,
 - (ii) whether private remedies in connection with the matter are available to the person making the submission and whether they have been pursued, or
 - (iii) information concerning relevant capacity-building activities under the ECA.

⁴ Arrangements will be made for the United States to make available in a timely manner to the other Parties all such submissions, U.S. written responses, and factual records developed in connection with those submissions. At the request of any Party, the Council shall discuss such documents.

Article 18.9: Factual Records and Related Cooperation

1. If the secretariat considers that the submission, in light of any response provided by the Party, warrants developing a factual record, the secretariat shall so inform the Council and provide its reasons.
2. The secretariat shall prepare a factual record if any member of the Council instructs it to do so.
3. The preparation of a factual record by the secretariat pursuant to this Article shall be without prejudice to any further steps that may be taken with respect to any submission.
4. In preparing a factual record, the secretariat shall consider any information furnished by a Party and may consider any relevant technical, scientific, or other information:
 - (a) that is publicly available;
 - (b) submitted by interested persons;
 - (c) submitted by national advisory or consultative committees;
 - (d) developed by independent experts; or
 - (e) developed under the ECA.
5. The secretariat shall submit a draft factual record to the Council. Any Party may provide comments on the accuracy of the draft within 45 days thereafter.
6. The secretariat shall incorporate, as appropriate, any such comments in the final factual record and submit it to the Council.

8. The Council shall consider the final factual record in light of the objectives of this Chapter and the ECA. The Council shall, as appropriate, provide recommendations to the Environmental Cooperation Commission related to matters addressed in the factual record, including recommendations related to the further development of the Party's mechanisms for monitoring its environmental enforcement.
9. The Council shall, after five years, review the implementation of this Article and Article 18.8 and report the results of its review, and any associated recommendations, to the Commission.

The Parties may make information publicly available about programs and activities, including cooperative programs, it undertakes related to the conservation and sustainable use of biological diversity.
5. To this end, the Parties will enhance their cooperative efforts on these matters, including through the ECA.

Article 18.12: Environmental Consultations and Panel Procedure

1. A Party may request consultations with another Party regarding any matter arising under this Chapter by delivering a written request to a contact point designated by the other Party for this purpose.
2. The consultations shall begin promptly after delivery of the request. The request shall contain information that is specific and sufficient to enable the Party receiving the request to respond.
3. The consulting Parties shall make every attempt to arrive at a mutually satisfactory resolution of the matter and may seek advice or assistance from any person or body they deem appropriate in order to fully examine the matter at issue. If the matter arises under Article 18.2, or under both that Article and another provision of this Chapter, and involves an issue related to a Party's obligations under a covered agreement, the Parties shall endeavor to address the matter through a mutually agreeable consultative or other procedure, if any, under

5. (a) The Council shall promptly convene and shall endeavor to resolve the matter expeditiously, including, where appropriate, by consulting governmental or outside experts and having recourse to such procedures as good offices, conciliation, or mediation.
- (b) When the matter arises under Article 18.2, or under both that Article and another provision of this Chapter, and involves an issue relating to a Party's obligations under a covered agreement, the Council shall:
- (i) through a mechanism that the Council establishes, consult fully with any entity authorized to address the issue under the relevant agreement; and
- (ii) defer to interpretative guidance on the issue under the agreement to the extent appropriate in light of its nature and status, including whether the Party's relevant laws, regulations, and other measures are in accordance with its obligations under the agreement.

6. If the consulting Parties have failed to resolve the matter within 60 days of a request under paragraph 1, the complaining Party may request consultations under Article 21.4 (Consultations) or a meeting of the Commission under Article 21.5 (Intervention of the Commission) and, as provided in Chapter Twenty-One (Dispute Settlement), thereafter have recourse to the other provisions of that Chapter. The Council may inform the Commission of how the Council has endeavored to resolve the matter through consultations.

7. No Party may have recourse to dispute settlement under this Agreement for a matter arising under this Chapter without first seeking to resolve the matter in accordance with paragraphs 1 through 5.

8. In a dispute arising under Article 18.2, or under both that Article and another provision of this Chapter, that involves an issue relating to a Party's obligations under a covered agreement, a panel convened under Chapter Twenty-One (Dispute Settlement) shall in making its findings and determination under Articles 21.13 (Initial Report) and 21.14 (Final Report):⁸

⁷ For purposes of paragraphs 4, 5, and 6, the Council shall consist of senior level officials with environmental responsibilities of the consulting Parties or their designees.

⁸ For greater certainty, the consultations and guidance in this paragraph are without prejudice to a panel's ability to seek information and technical guidance from any person or body consistent with Article 21.12 (Role of Experts).

Article 18.13: Relationship to Environmental Agreements

1. The Parties recognize that multilateral environmental agreements to which they are all party, play an important role globally and domestically in protecting the environment and that their respective implementation of these agreements is critical to achieving the environmental objectives thereof. The Parties further recognize that this Chapter and the ECA can contribute to realizing the goals of those agreements. Accordingly, the Parties shall continue to seek means to enhance the mutual supportiveness of multilateral environmental agreements to which they are all party and trade agreements to which they are all party.

2. To this end, the Parties shall consult, as appropriate, with respect to negotiations on environmental issues of mutual interest.

3. Each Party recognizes the importance to it of the multilateral environmental agreements to which it is a party.

4. In the event of any inconsistency between a Party's obligations under this Agreement and a covered agreement, the Party shall seek to balance its obligations under both agreements, but this shall not preclude the Party from taking a particular measure to comply with its obligations under the covered agreement, provided that the primary purpose of the measure is not to impose a disguised restriction on trade.¹⁰

Article 18.14: Definitions

³ For greater certainty, the phrase “the level of benefits that the Party proposes to suspend” refers to the level of concessions under the Agreement the suspension of which a complaining Party considers will have an effect equivalent to that of the disputed measure.

it may, within 30 days after the complaining Party provides notice under paragraph 2, request that the panel be reconvened to consider the matter. The Party complained against shall deliver its request in writing to the complaining Party. The panel shall reconvene as soon as possible after delivery of the request and shall present its determination to the disputing Parties within 90 days after it reconvenes to review a request under subparagraph (a) or (b), or within 120 days for a request under subparagraphs (a) and (b). If the panel determines that the level of benefits proposed to be suspended is manifestly excessive, it shall determine the level of benefits it considers to be of equivalent effect. In determining the level of benefits that may be suspended, the panel shall take into account any findings by the panel on the level of adverse trade effects if a request for such findings was made under Article 21.10.6.

4. The complaining Party may suspend benefits up to the level the panel has determined under paragraph 3 or, if the panel has not determined the level, the level the complaining Party has proposed to suspend under paragraph 2, unless the panel has determined that the Party complained against has eliminated the non-conformity or the nullification or impairment.

5. In considering what benefits to suspend pursuant to paragraph 2:

- (a) the complaining Party should first seek to suspend benefits in the same sector or sectors as that affected by the measure or other matter that the panel has found to be inconsistent with the obligations of this Agreement or to have caused nullification or impairment in the sense of Article 21.2; and
- (b) if the complaining Party considers that it is not practicable or effective to suspend benefits in the same sector or sectors, it may suspend benefits in other sectors.

6. The complaining Party may not suspend benefits if, within 30 days after it provides written notice of intent to suspend benefits or, if the panel is reconvened under paragraph 3, within 20 days after the panel provides its determination, the Party complained against provides written notice to the complaining Party that it will pay an annual monetary assessment. The disputing Parties shall consult, beginning no later than 10 days after the Party complained against provides notice, with a view to reaching agreement on the amount of the assessment. If the disputing Parties are unable to reach an agreement within 30 days after consultations begin, the amount of the assessment shall be set at a level, in U.S. dollars, equal to 50 percent of the level of the benefits the panel has determined under paragraph 3 to be of equivalent effect or, if the panel has not determined the level, 50 percent of the level that the complaining Party has proposed to suspend under paragraph 2.

7. Unless the Commission otherwise decides, a monetary assessment shall be paid to the complaining Party in U.S. dollars, or in an equivalent amount of the currency of the Party complained against, in equal, quarterly installments beginning 60 days after the Party complained against gives notice that it intends to pay an assessment. Where the circumstances warrant, the Commission may decide that an assessment shall be paid into a fund established by the Commission and expended at the direction of the Commission for appropriate initiatives to facilitate trade between the disputing Parties including by further reducing unreasonable trade barriers or by assisting a disputing Party in carrying out its obligations under this Agreement.

8. If the Party complained against fails to pay a monetary assessment, the complaining Party may suspend the application to the Party complained against of benefits in accordance with paragraph 4.

9. Compensation, the payment of monetary assessments, and the suspension of benefits are intended as temporary measures pending the elimination of any non-conformity or nullification or impairment that the panel has found.

Article 21.17: Compliance Review

1. Without prejudice to the procedures set out in Article 21.16.3, if the Party complained against considers that it has eliminated the non-conformity or the nullification or impairment that the panel has found, it may refer the matter to the panel by providing written notice to the complaining Party or Parties. The panel shall issue its report on the matter within 90 days after the Party complained against provides notice.
2. If the panel decides that the Party complained against has eliminated the non-conformity or the nullification or impairment, the complaining Party or Parties shall promptly reinstate any benefits that Party has or those Parties have suspended under Article 21.16 and the Party complained against shall no longer be required to pay any monetary assessment it has agreed to pay under Article 21.16.6.

Article 21.18: Five-Year Review

The Commission shall endeavor to agree on an appropriate response as expeditiously as possible.
2. The Party in whose territory the court or administrative body is located shall submit any agreed information on or interpretation of the Agreement received from the Commission to the court or administrative body in accordance with the rules of that forum.

The Act provides for the issuance of a certificate of review where the Secretary determines, and the Attorney General concurs, that the export conduct specified in an application will not have the anticompetitive effects proscribed by the Act. - (iii) the dispute settlement provisions of Articles 21.11 through 21.14 shall apply, *mutatis mutandis*, except that in lieu of Article 21.13.3, the panel shall, within 75 days after the last panelist is selected, present to the disputing Parties an initial report containing its determination.
- (d) If a tribunal established under paragraph 2 determines in its decision or award, that the measure does not satisfy all the conditions listed in paragraph 1(a) through (e), a Party may provide to Colombia a written request to enter into consultations with a view to developing mutually acceptable compensation to the extent that the measure would have been inconsistent with Article 10.3 but for this entry.

Obligations Concerned:	Market Access (Article 12.4)
Description:	Colombia reserves the right to adopt or maintain any measure requiring that financial institutions of another Party be constituted under the laws of Colombia. ⁵ Therefore, market access through branching is not permitted. This restriction is modified with respect to bank branches and insurance branches as provided in Colombia's Annex 12.15(B) and (C).

⁵ For greater certainty, the following measures, among others, currently limit juridical form for the establishment of financial institutions in the territory of Colombia: Estatuto Orgánico del Sistema Financiero, Art. 53, 44; Ley 510 de 1999, Art. 101; Decreto 656 de 1994, Art. 1 in accordance with Ley 100 de 1993, Art. 91(a); Ley 45 de 1990, Art. 1(a), 7; Ley 27 de 1990, Art. 2; Ley 9 de 1991, Art. 8; Res. 8 de 2000 de la Junta Directiva del Banco de la República, Art. 64(a); Decreto 2016 de 1992, Art. 1; Decreto 573 de 2002, Arts. 1-2; Decreto 437 de 1992, Art. 2; Decreto 384 de 1980, Art. 4; Decreto 1719 de 2001, Art. 1; Decreto 2080 de 2000, Arts. 26, 31.

 - (b) in Section A, pursuant to Article 12.9 (Non-Conforming Measures), the existing measures of the United States that do not conform with some or all of the obligations imposed by:
 - (i) Article 12.2 (National Treatment),
 - (ii) Article 12.3 (Most-Favored-Nation Treatment),
 - (iii) Article 12.4 (Market Access for Financial Institutions),
 - (iv) Article 12.5 (Cross-Border Trade), or
 - (v) Article 12.8 (Senior Management and Boards of Directors); and
 - (c) in Section B, pursuant to Article 12.9 (Non-Conforming Measures), the specific sectors, subsectors, or activities for which the United States may maintain existing, or adopt new or more restrictive, measures that do not conform with the obligations imposed by Article 12.2, 12.3, 12.4, 12.5, or 12.8.
2. Each entry in Section A sets out the following elements:
 - (a) **Sector** refers to the general sector for which the entry is made;
 - (b) **Subsector** refers to the specific sector for which the entry is made;
 - (c) **Obligations Concerned** specifies the article(s) referred to in paragraph 1(b) that, pursuant to Article 12.9.1(a), do not apply to the non-conforming aspects of the law, regulation, or other measure, as set out in paragraph 4;

 - (e) **Measures** identifies the laws, regulations, or other measures for which the entry is made. A measure cited in the **Measures** element:

- (i) means the measure as amended, continued, or renewed as of the date of entry into force of this Agreement, and
 - (ii) includes any subordinate measure adopted or maintained under the authority of and consistent with the measure; and
 - (f) **Description** provides a general, non-binding description of the measure for which the entry is made.
3. Each entry in Section B sets out the following elements:
- (a) **Sector** refers to the general sector for which the entry is made;
 - (b) **Subsector** refers to the specific sector for which the entry is made;
 - (c) **Obligations Concerned** specifies the article(s) referred to in paragraph 1(c) that, pursuant to Article 12.9.2, do not apply to the sectors, subsectors, or activities scheduled in the entry;

5. For entries in Section B, in accordance with Article 12.9.2, the articles of this Agreement specified in the **Obligations Concerned** element of an entry do not apply to the sectors, subsectors, and activities identified in the **Description** element of that entry.
6. Where the United States maintains a measure that requires that a service supplier be a citizen, permanent resident, or resident of its territory as a condition to the supply of a service in its territory, a Schedule entry for that measure taken with respect to Article 12.2, 12.3, 12.4, or 12.5 shall operate as a Schedule entry with respect to Article 10.3 (National Treatment), 10.4 (Most-Favored-Nation Treatment), or 10.8 (Performance Requirements) to the extent of that measure.

ANNEX III
Schedule of the United States

Headnotes

1. Commitments in these subsectors under the Agreement are undertaken subject to the limitations and conditions set forth in these headnotes and in the Schedule below.
2. National treatment commitments in these subsectors are subject to the following limitations:
 - (a) National treatment with respect to banking will be provided based upon the foreign bank's "home state" in the United States, as that term is defined under the International Banking Act, where that Act is applicable. A domestic bank subsidiary of a foreign firm will have its own "home state," and national treatment will be provided based upon the subsidiary's home state, as determined under applicable law.¹
 - (b) National treatment with respect to insurance financial institutions will be provided according to a non-U.S. insurance financial institution's state of domicile, where applicable, in the United States. State of domicile is defined by individual states, and is generally the state in which an insurer either is incorporated, is organized, or maintains its principal office in the United States.
3. To clarify the U.S. commitment with respect to Article 12.4 (Market Access for Financial Institutions), juridical persons supplying banking or other financial services (excluding insurance) and constituted under the laws of the United States are subject to non-discriminatory limitations on juridical form.²
4. The United States limits its commitments under Article 12.9.1(c) (Non-Conforming Measures) with respect to Article 12.4 (Market Access for Financial Institutions) in the following manner: with respect to banking and other financial services (excluding insurance), Article 12.9.1(c) shall apply only to non-conforming measures relating to Article 12.4(a) and not to those non-conforming measures relating to Article 12.4(b).

¹ Foreign banking organizations are generally subject to geographic and other limitations in the United States on a national treatment basis. Where such limitations do not conform to national treatment, they have been listed as non-conforming measures. For purposes of illustration, under this approach, the following situation does not accord national treatment and would therefore be listed as a non-conforming measure: a foreign bank from a particular home state is accorded less favorable treatment than that accorded to a domestic bank from that state with respect to expansion by branching.

² For example, partnerships and sole proprietorships are generally not acceptable juridical forms for depository financial institutions in the United States. This headnote is not itself intended to affect, or otherwise limit, a choice by an investor of another Party between branches or subsidiaries.

1 (C) the column 1 general rate of duty that

8 to in Annex 4.1 of the Agreement, except for goods
9 to which paragraph (4) applies, shall be calculated

11 on the basis of the build-down method described in
12 paragraph (2) or the build-up method described in
13 paragraph (3).

14 (2) BUILD-DOWN METHOD.—

15 (A) IN GENERAL.—The regional value-con-
16 tent of a good may be calculated on the basis
17 of the following build-down method:

$$\text{RVC} = \frac{\text{AV} - \text{VNM}}{\text{AV}} \times 100$$

1 (B) DEFINITIONS.—In subparagraph (A):

11 include the value of a material that is self-
12 produced.

13 (3) BUILD-UP METHOD.—

14 (A) IN GENERAL.—The regional value-con-
15 tent of a good may be calculated on the basis
16 of the following build-up method:

$$\text{RVC} = \frac{\text{VOM}}{\text{AV}} \times 100$$

17 (B) DEFINITIONS.—In subparagraph (A):

18 (i) RVC.—The term “RVC” means
19 the regional value-content of the good, ex-

5 (4) SPECIAL RULE FOR CERTAIN AUTOMOTIVE
6 GOODS.—

7 (A) IN GENERAL.—For purposes of sub-
8 section (b)(2), the regional value-content of an
9 automotive good referred to in Annex 4.1 of the
10 Agreement shall be calculated by the importer,
11 exporter, or producer of the good, on the basis
12 of the following net cost method:

$$\text{RVC} = \frac{\text{NC} - \text{VNM}}{\text{NC}} \times 100$$

13 (B) DEFINITIONS.—In subparagraph (A):

14 (i) AUTOMOTIVE GOOD.—The term
15 “automotive good” means a good provided
16 for in any of subheadings 8407.31 through

4 the production of the automotive good, but
5 does not include the value of a material
6 that is self-produced.

7 (C) MOTOR VEHICLES.—

8 (i) BASIS OF CALCULATION.—For
9 purposes of determining the regional value-
10 content under subparagraph (A) for an
11 automotive good that is a motor vehicle
12 provided for in any of headings 8701
13 through 8705, an importer, exporter, or
14 producer may average the amounts cal-
15 culated under the net cost formula con-
16 tained in subparagraph (A), over the pro-
17 ducer’s fiscal year—

18 (I) with respect to all motor vehi-
19 cles in any one of the categories de-
20 scribed in clause (ii); or

21 (II) with respect to all motor ve-
22 hicles in any such category that are
23 exported to the territory of the United
24 States or Colombia.

1 (ii) CATEGORIES.—A category is de-
2 scribed in this clause if it—

3 (I) is the same model line of
4 motor vehicles, is in the same class of
5 motor vehicles, and is produced in the
6 same plant in the territory of Colom-
7 bia or the United States, as the good
8 described in clause (i) for which re-
9 gional value-content is being cal-
10 culated;

11 (II) is the same class of motor
12 vehicles, and is produced in the same
13 plant in the territory of Colombia or
14 the United States, as the good de-
15 scribed in clause (i) for which regional
16 value-content is being calculated; or

17 (III) is the same model line of
18 motor vehicles produced in the terri-
19 tory of Colombia or the United States
20 as the good described in clause (i) for
21 which regional value-content is being
22 calculated.

23 (D) OTHER AUTOMOTIVE GOODS.—For
24 purposes of determining the regional value-con-
25 tent under subparagraph (A) for automotive

1 materials provided for in any of subheadings
2 8407.31 through 8407.34, in subheading
3 8408.20, or in heading 8409, 8706, 8707, or
4 8708, that are produced in the same plant, an
5 importer, exporter, or producer may—

6 (i) average the amounts calculated
7 under the net cost formula contained in
8 subparagraph (A) over—

9 (I) the fiscal year of the motor
10 vehicle producer to whom the auto-
11 motive goods are sold,

12 (II) any quarter or month, or

13 (III) the fiscal year of the pro-
14 ducer of such goods,

15 if the goods were produced during the fis-
16 cal year, quarter, or month that is the
17 basis for the calculation;

18 (ii) determine the average referred to
19 in clause (i) separately for such goods sold
20 to 1 or more motor vehicle producers; or

21 (iii) make a separate determination
22 under clause (i) or (ii) for such goods that
23 are exported to the territory of Colombia
24 or the United States.

1 (E) CALCULATING NET COST.—The im-
2 porter, exporter, or producer of an automotive
3 good shall, consistent with the provisions re-
4 garding allocation of costs provided for in gen-
5 erally accepted accounting principles, determine
6 the net cost of the automotive good under sub-
7 paragraph (B) by—

8 (i) calculating the total cost incurred
9 with respect to all goods produced by the
10 producer of the automotive good, sub-
11 tracting any sales promotion, marketing,
12 and after-sales service costs, royalties,
13 shipping and packing costs, and nonallow-
14 able interest costs that are included in the
15 total cost of all such goods, and then rea-
16 sonably allocating the resulting net cost of
17 those goods to the automotive good;

18 (ii) calculating the total cost incurred
19 with respect to all goods produced by that
20 producer, reasonably allocating the total
21 cost to the automotive good, and then sub-
22 tracting any sales promotion, marketing,
23 and after-sales service costs, royalties,
24 shipping and packing costs, and nonallow-
25 able interest costs that are included in the

1 portion of the total cost allocated to the
2 automotive good; or

3 (iii) reasonably allocating each cost
4 that forms part of the total cost incurred
5 with respect to the automotive good so that
6 the aggregate of these costs does not in-
7 clude any sales promotion, marketing, and
8 after-sales service costs, royalties, shipping
9 and packing costs, or nonallowable interest
10 costs.

11 (d) VALUE OF MATERIALS.—

12 (1) IN GENERAL.—For the purpose of calcu-
13 lating the regional value-content of a good under
14 subsection (c), and for purposes of applying the de
15 minimis rules under subsection (f), the value of a
16 material is—

17 (A) in the case of a material that is im-
18 ported by the producer of the good, the ad-
19 justed value of the material;

20 (B) in the case of a material acquired in
21 the territory in which the good is produced, the
22 value, determined in accordance with Articles 1
23 through 8, Article 15, and the corresponding in-
24 terpretive notes, of the Agreement on Imple-
25 mentation of Article VII of the General Agree-

1 tween the territory of Colombia, the United
2 States, or both, to the location of the pro-
3 ducer.

4 (ii) Duties, taxes, and customs broker-
5 age fees on the material paid in the terri-
6 tory of Colombia, the United States, or
7 both, other than duties or taxes that are
8 waived, refunded, refundable, or otherwise
9 recoverable, including credit against duty
10 or tax paid or payable.

11 (iii) The cost of waste and spoilage re-
12 sulting from the use of the material in the
13 production of the good, less the value of
14 renewable scrap or byproducts.

15 (B) NONORIGINATING MATERIAL.—The
16 following expenses, if included in the value of a
17 nonoriginating material calculated under para-
18 graph (1), may be deducted from the value of
19 the nonoriginating material:

20 (i) The costs of freight, insurance,
21 packing, and all other costs incurred in
22 transporting the material within or be-
23 tween the territory of Colombia, the United
24 States, or both, to the location of the pro-
25 ducer.

1 (ii) Duties, taxes, and customs broker-
2 age fees on the material paid in the terri-
3 tory of Colombia, the United States, or
4 both, other than duties or taxes that are
5 waived, refunded, refundable, or otherwise
6 recoverable, including credit against duty
7 or tax paid or payable.

8 (iii) The cost of waste and spoilage re-
9 sulting from the use of the material in the
10 production of the good, less the value of
11 renewable scrap or byproducts.

12 (iv) The cost of originating materials
13 used in the production of the nonorigi-
14 nating material in the territory of Colom-
15 bia, the United States, or both.

16 (e) ACCUMULATION.—

17 (1) ORIGINATING MATERIALS USED IN PRODUC-
18 TION OF GOODS OF THE OTHER COUNTRY.—Origi-
19 nating materials from the territory of Colombia or
20 the United States that are used in the production of
21 a good in the territory of the other country shall be
22 considered to originate in the territory of such other
23 country.

24 (2) MULTIPLE PRODUCERS.—A good that is
25 produced in the territory of Colombia, the United

1 States, or both, by 1 or more producers, is an origi-
2 nating good if the good satisfies the requirements of
3 subsection (b) and all other applicable requirements
4 of this section.

5 (f) DE MINIMIS AMOUNTS OF NONORIGINATING MA-
6 TERIALS.—

7 (1) IN GENERAL.—Except as provided in para-
8 graphs (2) and (3), a good that does not undergo a
9 change in tariff classification pursuant to Annex 4.1
10 of the Agreement is an originating good if—

11 (A)(i) the value of all nonoriginating mate-
12 rials that—

13 (I) are used in the production of the
14 good, and

16 change in tariff classification (set forth in
17 Annex 4.1 of the Agreement),

18 does not exceed 10 percent of the adjusted
19 value of the good;

20 (ii) the good meets all other applicable re-
21 quirements of this section; and

22 (iii) the value of such nonoriginating mate-
23 rials is included in the value of nonoriginating
24 materials for any applicable regional value-con-
25 tent requirement for the good; or

1 (B) the good meets the requirements set
2 forth in paragraph 2 of Annex 4.6 of the Agree-
3 ment.

4 (2) EXCEPTIONS.—Paragraph (1) does not
5 apply to the following:

12 essary to remedy or prevent serious damage
13 and to facilitate adjustment by the domestic in-
14 dustry to import competition; and

15 (B) there is evidence that the industry is
16 making a positive adjustment to import com-
17 petition.

1 (C) the column 1 general rate of duty that

11 on the basis of the build-down method described in
12 paragraph (2) or the build-up method described in
13 paragraph (3).

14 (2) BUILD-DOWN METHOD.—

15 (A) IN GENERAL.—The regional value-con-
16 tent of a good may be calculated on the basis
17 of the following build-down method:

$$\text{RVC} = \frac{\text{AV} - \text{VNM}}{\text{AV}} \times 100$$

1 (B) DEFINITIONS.—In subparagraph (A):

11 include the value of a material that is self-
12 produced.

13 (3) BUILD-UP METHOD.—

14 (A) IN GENERAL.—The regional value-con-
15 tent of a good may be calculated on the basis
16 of the following build-up method:

$$\text{RVC} = \frac{\text{VOM}}{\text{AV}} \times 100$$

17 (B) DEFINITIONS.—In subparagraph (A):

18 (i) RVC.—The term “RVC” means
19 the regional value-content of the good, ex-

5 (4) SPECIAL RULE FOR CERTAIN AUTOMOTIVE
6 GOODS.—

7 (A) IN GENERAL.—For purposes of sub-
8 section (b)(2), the regional value-content of an
9 automotive good referred to in Annex 4.1 of the
10 Agreement shall be calculated by the importer,
11 exporter, or producer of the good, on the basis
12 of the following net cost method:

$$\text{RVC} = \frac{\text{NC} - \text{VNM}}{\text{NC}} \times 100$$

13 (B) DEFINITIONS.—In subparagraph (A):

14 (i) AUTOMOTIVE GOOD.—The term
15 “automotive good” means a good provided
16 for in any of subheadings 8407.31 through

4 the production of the automotive good, but
5 does not include the value of a material
6 that is self-produced.

7 (C) MOTOR VEHICLES.—

8 (i) BASIS OF CALCULATION.—For
9 purposes of determining the regional value-
10 content under subparagraph (A) for an
11 automotive good that is a motor vehicle
12 provided for in any of headings 8701
13 through 8705, an importer, exporter, or
14 producer may average the amounts cal-
15 culated under the net cost formula con-
16 tained in subparagraph (A), over the pro-
17 ducer’s fiscal year—

18 (I) with respect to all motor vehi-
19 cles in any one of the categories de-
20 scribed in clause (ii); or

21 (II) with respect to all motor ve-
22 hicles in any such category that are
23 exported to the territory of the United
24 States or Colombia.

1 (ii) CATEGORIES.—A category is de-
2 scribed in this clause if it—

3 (I) is the same model line of
4 motor vehicles, is in the same class of
5 motor vehicles, and is produced in the
6 same plant in the territory of Colom-
7 bia or the United States, as the good
8 described in clause (i) for which re-
9 gional value-content is being cal-
10 culated;

11 (II) is the same class of motor
12 vehicles, and is produced in the same
13 plant in the territory of Colombia or
14 the United States, as the good de-
15 scribed in clause (i) for which regional
16 value-content is being calculated; or

17 (III) is the same model line of
18 motor vehicles produced in the terri-
19 tory of Colombia or the United States
20 as the good described in clause (i) for
21 which regional value-content is being
22 calculated.

23 (D) OTHER AUTOMOTIVE GOODS.—For
24 purposes of determining the regional value-con-
25 tent under subparagraph (A) for automotive

1 materials provided for in any of subheadings
2 8407.31 through 8407.34, in subheading
3 8408.20, or in heading 8409, 8706, 8707, or
4 8708, that are produced in the same plant, an
5 importer, exporter, or producer may—

6 (i) average the amounts calculated
7 under the net cost formula contained in
8 subparagraph (A) over—

9 (I) the fiscal year of the motor
10 vehicle producer to whom the auto-
11 motive goods are sold,

12 (II) any quarter or month, or

13 (III) the fiscal year of the pro-
14 ducer of such goods,

15 if the goods were produced during the fis-
16 cal year, quarter, or month that is the
17 basis for the calculation;

18 (ii) determine the average referred to
19 in clause (i) separately for such goods sold
20 to 1 or more motor vehicle producers; or

21 (iii) make a separate determination
22 under clause (i) or (ii) for such goods that
23 are exported to the territory of Colombia
24 or the United States.

1 (E) CALCULATING NET COST.—The im-
2 porter, exporter, or producer of an automotive
3 good shall, consistent with the provisions re-
4 garding allocation of costs provided for in gen-
5 erally accepted accounting principles, determine
6 the net cost of the automotive good under sub-
7 paragraph (B) by—

8 (i) calculating the total cost incurred
9 with respect to all goods produced by the
10 producer of the automotive good, sub-
11 tracting any sales promotion, marketing,
12 and after-sales service costs, royalties,
13 shipping and packing costs, and nonallow-
14 able interest costs that are included in the
15 total cost of all such goods, and then rea-
16 sonably allocating the resulting net cost of
17 those goods to the automotive good;

18 (ii) calculating the total cost incurred
19 with respect to all goods produced by that
20 producer, reasonably allocating the total
21 cost to the automotive good, and then sub-
22 tracting any sales promotion, marketing,
23 and after-sales service costs, royalties,
24 shipping and packing costs, and nonallow-
25 able interest costs that are included in the

1 portion of the total cost allocated to the
2 automotive good; or

3 (iii) reasonably allocating each cost
4 that forms part of the total cost incurred
5 with respect to the automotive good so that
6 the aggregate of these costs does not in-
7 clude any sales promotion, marketing, and
8 after-sales service costs, royalties, shipping
9 and packing costs, or nonallowable interest
10 costs.

11 (d) VALUE OF MATERIALS.—

12 (1) IN GENERAL.—For the purpose of calcu-
13 lating the regional value-content of a good under
14 subsection (c), and for purposes of applying the de
15 minimis rules under subsection (f), the value of a
16 material is—

17 (A) in the case of a material that is im-
18 ported by the producer of the good, the ad-
19 justed value of the material;

20 (B) in the case of a material acquired in
21 the territory in which the good is produced, the
22 value, determined in accordance with Articles 1
23 through 8, Article 15, and the corresponding in-
24 terpretive notes, of the Agreement on Imple-
25 mentation of Article VII of the General Agree-

1 tween the territory of Colombia, the United
2 States, or both, to the location of the pro-
3 ducer.

4 (ii) Duties, taxes, and customs broker-
5 age fees on the material paid in the terri-
6 tory of Colombia, the United States, or
7 both, other than duties or taxes that are
8 waived, refunded, refundable, or otherwise
9 recoverable, including credit against duty
10 or tax paid or payable.

11 (iii) The cost of waste and spoilage re-
12 sulting from the use of the material in the
13 production of the good, less the value of
14 renewable scrap or byproducts.

15 (B) NONORIGINATING MATERIAL.—The
16 following expenses, if included in the value of a
17 nonoriginating material calculated under para-
18 graph (1), may be deducted from the value of
19 the nonoriginating material:

20 (i) The costs of freight, insurance,
21 packing, and all other costs incurred in
22 transporting the material within or be-
23 tween the territory of Colombia, the United
24 States, or both, to the location of the pro-
25 ducer.

1 (ii) Duties, taxes, and customs broker-
2 age fees on the material paid in the terri-
3 tory of Colombia, the United States, or
4 both, other than duties or taxes that are
5 waived, refunded, refundable, or otherwise
6 recoverable, including credit against duty
7 or tax paid or payable.

8 (iii) The cost of waste and spoilage re-
9 sulting from the use of the material in the
10 production of the good, less the value of
11 renewable scrap or byproducts.

12 (iv) The cost of originating materials
13 used in the production of the nonorigi-
14 nating material in the territory of Colom-
15 bia, the United States, or both.

16 (e) ACCUMULATION.—

17 (1) ORIGINATING MATERIALS USED IN PRODUC-
18 TION OF GOODS OF THE OTHER COUNTRY.—Origi-
19 nating materials from the territory of Colombia or
20 the United States that are used in the production of
21 a good in the territory of the other country shall be
22 considered to originate in the territory of such other
23 country.

24 (2) MULTIPLE PRODUCERS.—A good that is
25 produced in the territory of Colombia, the United

1 States, or both, by 1 or more producers, is an origi-
2 nating good if the good satisfies the requirements of
3 subsection (b) and all other applicable requirements
4 of this section.

5 (f) DE MINIMIS AMOUNTS OF NONORIGINATING MA-
6 TERIALS.—

7 (1) IN GENERAL.—Except as provided in para-
8 graphs (2) and (3), a good that does not undergo a
9 change in tariff classification pursuant to Annex 4.1
10 of the Agreement is an originating good if—

11 (A)(i) the value of all nonoriginating mate-
12 rials that—

13 (I) are used in the production of the
14 good, and

21 quirements of this section; and

22 (iii) the value of such nonoriginating mate-
23 rials is included in the value of nonoriginating
24 materials for any applicable regional value-con-
25 tent requirement for the good; or

1 (B) the good meets the requirements set
2 forth in paragraph 2 of Annex 4.6 of the Agree-
3 ment.

4 (2) EXCEPTIONS.—Paragraph (1) does not

8 **SEC. 314. TERMINATION OF RELIEF AUTHORITY.**

9 (a) **GENERAL RULE.**—Subject to subsection (b), no
10 import relief may be provided under this subtitle after the
11 date that is 10 years after the date on which the Agree-
12 ment enters into force.

13 (b) **EXCEPTION.**—If an article for which relief is pro-
14 vided under this subtitle is an article for which the period
15 for tariff elimination, set forth in the Schedule of the
16 United States to Annex 2.3 of the Agreement, is greater
17 than 10 years, no relief under this subtitle may be pro-
18 vided for that article after the date on which that period
19 ends.

20 **SEC. 315. COMPENSATION AUTHORITY.**

21 For purposes of section 123 of the Trade Act of 1974
22 (19 U.S.C. 2133), any import relief provided by the Presi-

10 **SEC. 321. COMMENCEMENT OF ACTION FOR RELIEF.**

11 (a) **IN GENERAL.**—A request for action under this
12 subtitle for the purpose of adjusting to the obligations of
13 the United States under the Agreement may be filed with
14 the President by an interested party. Upon the filing of
15 a request, the President shall review the request to deter-
16 mine, from information presented in the request, whether
17 to commence consideration of the request.

18 (b) **PUBLICATION OF REQUEST.**—If the President de-
19 termines that the request under subsection (a) provides
20 the information necessary for the request to be considered,
21 the President shall publish in the Federal Register a no-
22 tice of commencement of consideration of the request, and
23 notice seeking public comments regarding the request. The
24 notice shall include a summary of the request and the
25 dates by which comments and rebuttals must be received.

1 **SEC. 322. DETERMINATION AND PROVISION OF RELIEF.**

2 (a) DETERMINATION.—

3 (1) IN GENERAL.—If a positive determination is
4 made under section 321(b), the President shall de-
5 termine whether, as a result of the elimination of a
6 duty under the Agreement, a Colombian textile or
7 apparel article is being imported into the United
8 States in such increased quantities, in absolute
9 terms or relative to the domestic market for that ar-
10 ticle, and under such conditions as to cause serious
11 damage, or actual threat thereof, to a domestic in-
12 dustry producing an article that is like, or directly
13 competitive with, the imported article.

14 (2) SERIOUS DAMAGE.—In making a deter-
15 mination under paragraph (1), the President—

16 (A) shall examine the effect of increased
17 imports on the domestic industry, as reflected
18 in changes in such relevant economic factors as
19 output, productivity, utilization of capacity, in-
20 ventories, market share, exports, wages, em-
21 ployment, domestic prices, profits and losses,
22 and investment, no one of which is necessarily
23 decisive; and

24 (B) shall not consider changes in consumer
25 preference or changes in technology in the
26 United States as factors supporting a deter-

1 mination of serious damage or actual threat
2 thereof.

3 (b) PROVISION OF RELIEF.—

4 (1) IN GENERAL.—If a determination under
5 subsection (a) is affirmative, the President may pro-
6 vide relief from imports of the article that is the
7 subject of such determination, as provided in para-
8 graph (2), to the extent that the President deter-
9 mines necessary to remedy or prevent the serious
10 damage and to facilitate adjustment by the domestic
11 industry.

12 (2) NATURE OF RELIEF.—The relief that the
13 President is authorized to provide under this sub-
14 section with respect to imports of an article is an in-
15 crease in the rate of duty imposed on the article to
16 a level that does not exceed the lesser of—

17 (A) the column 1 general rate of duty im-
18 posed under the HTS on like articles at the
19 time the import relief is provided; or

20 (B) the column 1 general rate of duty im-
21 posed under the HTS on like articles on the
22 day before the date on which the Agreement en-
23 ters into force.

1 **SEC. 323. PERIOD OF RELIEF.**

2 (a) IN GENERAL.—Subject to subsection (b), the im-
3 port relief that the President provides under section
4 322(b) may not be in effect for more than 2 years.

5 (b) EXTENSION.—

6 (1) IN GENERAL.—Subject to paragraph (2),
7 the President may extend the effective period of any
8 import relief provided under this subtitle for a pe-
9 riod of not more than 1 year, if the President deter-
10 mines that—

11 (A) the import relief continues to be nec-
12 essary to remedy or prevent serious damage
13 and to facilitate adjustment by the domestic in-
14 dustry to import competition; and

15 (B) there is evidence that the industry is
16 making a positive adjustment to import com-
17 petition.

18 (2) LIMITATION.—Any relief provided under
19 this subtitle, including any extensions thereof, may
20 not, in the aggregate, be in effect for more than 3
21 years.

22 **SEC. 324. ARTICLES EXEMPT FROM RELIEF.**

23 The President may not provide import relief under
24 this subtitle with respect to an article if—

25 (1) import relief previously has been provided
26 under this subtitle with respect to that article; or

1 (2) the article is subject to import relief
2 under—

3 (A) subtitle A; or

4 (B) chapter 1 of title II of the Trade Act
5 of 1974 (19 U.S.C. 2251 et seq.).

6 **SEC. 325. RATE AFTER TERMINATION OF IMPORT RELIEF.**

7 On the date on which import relief under this subtitle
8 is terminated with respect to an article, the rate of duty
9 on that article shall be the rate that would have been in
10 effect but for the provision of such relief.

11 **SEC. 326. TERMINATION OF RELIEF AUTHORITY.**

12 No import relief may be provided under this subtitle
13 with respect to any article after the date that is 5 years
14 after the date on which the Agreement enters into force.

15 **SEC. 327. COMPENSATION AUTHORITY.**

16 For purposes of section 123 of the Trade Act of 1974
17 (19 U.S.C. 2133), any import relief provided by the Presi-
18 dent under this subtitle shall be treated as action taken
19 under chapter 1 of title II of such Act (19 U.S.C. 2251
20 et seq.).

21 **SEC. 328. CONFIDENTIAL BUSINESS INFORMATION.**

22 The President may not release information received
23 in connection with an investigation or determination under
24 this subtitle which the President considers to be confiden-
25 tial business information unless the party submitting the

1 confidential business information had notice, at the time
2 of submission, that such information would be released by
3 the President, or such party subsequently consents to the
4 release of the information. To the extent a party submits
5 confidential business information, the party shall also pro-
6 vide a nonconfidential version of the information in which
7 the confidential business information is summarized or, if
8 necessary, deleted.

14 initiated under chapter 1 of title II of the Trade Act of
15 1974 (19 U.S.C. 2251 et seq.), the Commission makes an
16 affirmative determination (or a determination which the
17 President may treat as an affirmative determination under
18 such chapter by reason of section 330(d) of the Tariff Act
19 of 1930 (19 U.S.C. 1330(d)), the Commission shall also
20 find (and report to the President at the time such injury
21 determination is submitted to the President) whether im-
22 ports of the Colombian article are a substantial cause of
23 serious injury or threat thereof.

24 (b) PRESIDENTIAL DETERMINATION REGARDING CO-
25 LOMBIAN ARTICLES.—In determining the nature and ex-

1 tent of action to be taken under chapter 1 of title II of
2 the Trade Act of 1974 (19 U.S.C. 2251 et seq.), the Presi-
3 dent may exclude from the action Colombian articles with
4 respect to which the Commission has made a negative

THE UNITED STATES – COLOMBIA TRADE PROMOTION AGREEMENT IMPLEMENTATION ACT

STATEMENT OF ADMINISTRATIVE ACTION

This Statement of Administrative Action (“Statement”) is submitted to the Congress in compliance with section 2105(a)(1)(C)(ii) of the Bipartisan Trade Promotion Authority Act of 2002 (“TPA Act”) and accompanies the implementing bill for the free trade agreement (“Agreement”) that the United States has concluded with Colombia. The bill approves and makes statutory changes necessary or appropriate to implement the Agreement, which the Deputy United States Trade Representative signed in Washington, D.C. on November 22, 2006, as amended through a Protocol signed by the United States Trade Representative in Washington, D.C. on June 28, 2007.

As is the case with Statements of Administrative Action submitted to the Congress in connection with earlier trade agreements, this Statement represents an authoritative expression by the Administration concerning its views regarding the interpretation and application of the Agreement, both for purposes of U.S. international obligations and domestic law. The Administration understands that it is the expectation of the Congress that future administrations will observe and apply the interpretations and commitments set out in this Statement. In addition, since this Statement will be approved by the Congress at the time it approves the implementing bill for this Agreement, the interpretation of the Agreement included in this Statement carries particular authority.

This Statement describes significant administrative actions proposed to implement U.S. obligations under the Agreement. The Statement also describes the pertinent provisions of the implementing bill, explaining how the bill changes or affects existing law, and stating why those provisions are necessary or appropriate to implement the Agreement.

In addition, incorporated into this Statement are two other statements required under section 2105(a) of the TPA Act: (1) an explanation of how the implementing bill and proposed administrative action will change or affect existing law; and (2) a statement setting forth the reasons why the implementing bill and proposed administrative action are necessary or appropriate to carry out the Agreement. The Agreement does not change the provisions of any agreement the United States has previously negotiated with Colombia.

For ease of reference, this Statement generally follows the organization of the Agreement, with the exception of grouping the general provisions of the Agreement (Chapters One and Nineteen through Twenty-Three) at the beginning of the discussion.

For each chapter of the Agreement, the Statement describes the pertinent provisions of the implementing bill, explaining how the bill changes or affects existing law, and stating why those provisions are necessary or appropriate to implement the Agreement. The Statement then

describes the administrative action proposed to implement the particular chapter of the Agreement, explaining how the proposed action changes existing administrative practice or authorizes further action and stating why such actions are necessary or appropriate to implement the Agreement.

The Statement then describes provisions to extend the Andean Trade Preference Act, which are necessary or appropriate to implement the Agreement.

It should be noted that this Statement does not, for the most part, discuss those many instances in which U.S. law or administrative practice will remain unchanged under the Agreement. In many cases, U.S. laws and regulations are already in conformity with the obligations assumed under the Agreement.

Finally, references in this Statement to particular sections of U.S. statutes are based on those statutes in effect as of the date this Statement was submitted to Congress.

1. Implementing Bill

a. Congressional Approval

Section 101(a) of the implementing bill provides Congressional approval for the Agreement and this Statement, as required by sections 2103(b)(3) and 2105(a)(1) of the TPA Act.

b. Entry into Force

Article 23.4 of the Agreement requires the United States and Colombia to exchange written notifications that their respective legal requirements for the entry into force of the Agreement have been fulfilled. The exchange of notifications is a necessary condition for the Agreement's entry into force. Section 101(b) of the implementing bill authorizes the President to exchange notes with Colombia to provide for the Agreement to enter into force for the United States on or after January 1, 2012. The exchange of notes is conditioned on a determination by the President that Colombia has taken measures necessary to comply with those of its obligations that are to take effect at the time the Agreement enters into force.

Certain provisions of the Agreement become effective after the Agreement enters into force. For example, the Agreement provides Colombia up to three years to comply with certain provisions relating to customs administration. In addition, certain provisions relating to intellectual property rights apply to Colombia at prescribed times after the Agreement enters into force.

c. Relationship to Federal Law

Section 102(a) of the bill establishes the relationship between the Agreement and U.S. law. The implementing bill, including the authority granted to federal agencies to promulgate implementing regulations, is intended to bring U.S. law fully into compliance with U.S. obligations under the Agreement and to make other changes that are necessary or appropriate to implement the Agreement. The bill accomplishes those objectives with respect to federal legislation by amending existing federal statutes that would otherwise be inconsistent with the Agreement, amending existing federal laws that are necessary or appropriate to implement the Agreement, and, in certain instances, by creating entirely new provisions of law.

Section 102(a) clarifies that no provision of the Agreement will be given effect under domestic law if it is inconsistent with federal law, including provisions of federal law enacted or amended by the bill. Section 102(a) will not prevent implementation of federal statutes consistent with the Agreement, where permissible under the terms of such statutes. Rather, the section reflects the Congressional view that necessary changes in federal statutes should be specifically enacted rather than provided for in a blanket preemption of federal statutes by the Agreement.

The Administration has made every effort to include all laws in the implementing bill and to identify all administrative actions in this Statement that must be changed in order to conform with the new U.S. rights and obligations arising from the Agreement. Those include both regulations resulting from statutory changes in the bill itself and changes in laws, regulations, rules, and orders that can be implemented without a change in the underlying U.S. statute.

Accordingly, at this time it is the expectation of the Administration that no changes in existing federal law, rules, regulations, or orders other than those specifically indicated in the implementing bill and this Statement will be required to implement the new international obligations that the United States will assume under the Agreement. This is without prejudice to the President's continuing responsibility and authority to carry out U.S. law and agreements. As experience under the Agreement is gained over time, other or different administrative actions may be taken in accordance with applicable law to implement the Agreement. If additional action is called for, the Administration will seek legislation from Congress or, if a change in regulation is required, follow normal agency procedures for amending regulations.

d. Relationship to State Law

The Agreement's rules generally cover state and local laws and regulations, as well as those at the federal level. There are a number of exceptions to, or limitations on, this general rule, however, particularly in the areas of government procurement, labor, environment, investment, and cross-border trade in services and financial services.

The Agreement does not automatically "preempt" or invalidate state laws that do not conform to the Agreement's rules, even if a dispute settlement panel were to find a state measure inconsistent with the Agreement. The United States is free under the Agreement to determine how it will conform with the Agreement's rules at the federal and non-federal level. The Administration is committed to carrying out U.S. obligations under the Agreement, as they apply to the states, through the greatest possible degree of state-federal consultation and cooperation.

Section 102(b)(1) of the bill makes clear that only the United States is entitled to bring an action in court in the event that there is an unresolved conflict between a state law, or the application of a state law, and the Agreement. The authority conferred on the United States under this paragraph is intended to be used only as a "last resort," in the unlikely event that efforts to achieve consistency through consultations have not succeeded.

The reference in section 102(b)(2) of the bill to the business of insurance is required by virtue of section 2 of the McCarran-Ferguson Act (15 U.S.C. 1012). That section states that no federal statute shall be construed to supersede any state law regulating or taxing the business of insurance unless the federal statute “specifically relates to the business of insurance.” Certain provisions of the Agreement (for example, Chapter Twelve, relating to financial services) do apply to state measures regulating the insurance business, although “grandfathering” provisions in Chapter Twelve exempt existing inconsistent (*i.e.*, “non-conforming”) measures.

Given section 2 of the McCarran-Ferguson Act, the implementing act must make specific reference to the business of insurance in order for the Agreement’s provisions covering the insurance business to be given effect with respect to state insurance law. Insurance is otherwise treated in the same manner under the Agreement and the implementing bill as other financial services under the Agreement.

e. Private Lawsuits

Section 102(c) of the implementing bill precludes any private right of action or remedy against the federal government, a state or local government, or a private party based on the provisions of the Agreement. A private party thus could not sue (or defend a suit against) the United States, a state, or a private party on grounds of consistency (or inconsistency) with the Agreement. The provision also precludes a private right of action attempting to require, preclude, or modify federal or state action on grounds such as an allegation that the government is required to exercise discretionary authority or general “public interest” authority under other provisions of law in conformity with the Agreement.

With respect to the states, section 102(c) represents a determination by the Congress and the Administration that private lawsuits are not an appropriate means for ensuring state compliance with the Agreement. Suits of this nature may interfere with the Administration’s conduct of trade and foreign relations and with suitable resolution of disagreements or disputes under the Agreement.

Section 102(c) does not preclude a private party from submitting a claim against the United States to arbitration under Chapter Ten (Investment) of the Agreement or seeking to enforce an award against the United States issued pursuant to such arbitration. The provision also would not preclude any agency of government from considering, or entertaining argument on, whether its action or proposed action is consistent with the Agreement, although any change in agency action would have to be consistent with domestic law.

f. Implementing Regulations

Section 103(a) of the bill provides the authority for new or amended regulations to be issued, and for the President to proclaim actions implementing the provisions of the Agreement, as of the date the Agreement enters into force. Section 103(b) of the bill requires that, whenever possible, all federal regulations required or authorized under the bill and those proposed in this

Statement as necessary or appropriate to implement immediately applicable U.S. obligations under the Agreement are to be developed and promulgated within one year of the Agreement's entry into force. In practice, the Administration intends, wherever possible, to amend or issue the other regulations required to implement U.S. obligations under the Agreement at the time the Agreement enters into force. The process for issuing regulations pursuant to this authority will comply with the requirements of the Administrative Procedures Act, including requirements to provide notice of and an opportunity for public comment on such regulations. If issuance of any regulation will occur more than one year after the date provided in section 103(b), the officer responsible for issuing such regulation will notify the relevant committees of both Houses of Congress of the delay, the reasons for such delay, and the expected date for issuance of the regulation. Such notice will be provided at least 30 days prior to the end of the one-year period.

g. Dispute Settlement

Section 105(a) of the bill authorizes the President to establish within the Department of Commerce an office responsible for providing administrative assistance to dispute settlement panels established under Chapter Twenty-One of the Agreement. This provision enables the United States to implement its obligations under Article 20.3.1 of the Agreement. This office will not be an "agency" within the meaning of 5 U.S.C. 552, consistent with treatment provided under other U.S. free trade agreements, including the North American Free Trade Agreement ("NAFTA") and free trade agreements with Australia, Bahrain, Chile, Singapore, Morocco, the Dominican Republic and Central America, Oman, and Peru. Thus, for example, the office will not be subject to the Freedom of Information Act or the Government in the Sunshine Act. Since they are international bodies, panels established under Chapter Twenty-One are not subject to those acts.

Section 105(b) of the bill authorizes the appropriation of funds to support the office established pursuant to section 105(a).

h. Effective Dates

Section 107(b)(1) of the bill provides that the first three sections of the bill as well as Title I and Title VI of the bill go into effect on the date of enactment of the bill. Section 107(b)(2) provides that certain amendments made by the bill take effect upon enactment, but will only apply with respect to Colombia only when the Agreement enters into force.

Section 107(a) of the bill provides that the other provisions of the bill and the amendments to other statutes made by the bill take effect on the date on which the Agreement enters into force. Section 107(c) of the bill provides that the provisions of the bill (other than section 107(c) itself, Title V, and Title VI) and the amendments to other statutes made by the bill (except the amendments made by Title V and Title VI) will cease to have effect on the date on which the Agreement terminates.

2. Administrative Action

No administrative changes will be necessary to implement Chapters One, Twenty, Twenty-Two, and Twenty-Three.

Article 19.1.1 of the Agreement requires each government to designate a contact point to facilitate communications regarding the Agreement. The Office of the United States Trade Representative (“USTR”) will serve as the U.S. contact point for this purpose. In addition, Article 20.1 of the Agreement establishes a Free Trade Commission to oversee the implementation of the Agreement and the work of committees and other bodies established under the Agreement. The U.S. Trade Representative, or his or her designee, will represent the United States on the Free Trade Commission.

Article 21.7 of the Agreement calls for the United States and Colombia to develop a roster of independent experts willing to serve as panelists to settle disputes between the parties that may arise under the Agreement. USTR will consult with the Committee on Ways and Means of the House of Representatives and the Committee on Finance of the Senate (“Trade Committees”) as it develops the roster of panelists. USTR will provide the Trade Committees with the names of the experts it is considering, and detailed background information on each, at least 30 days before submitting the names of any nominees to Colombia.

Chapter Two (National Treatment and Market Access for Goods)

1. Implementing Bill

a. Proclamation Authority

Section 201(a)(1) of the bill grants the President authority to implement by proclamation U.S. rights and obligations under Chapter Two of the Agreement through the application or elimination of customs duties and tariff-rate quotas (“TRQs”). Section 201(a)(1) authorizes the President to:

- modify or continue any duty;
- keep in place duty-free or excise treatment; or
- impose any duty

that the President determines to be necessary or appropriate to carry out or apply Articles 2.3, 2.5, 2.6, and 3.3.13, and Annex 2.3 of the Agreement.

The proclamation authority with respect to Article 2.3 of the Agreement authorizes the President to provide for the continuation, phase-out, and elimination, according to the Schedule of the United States to Annex 2.3 of the Agreement, of customs duties on imports from Colombia that meet the Agreement's rules of origin.

The proclamation authority with respect to Articles 2.5 and 2.6 of the Agreement authorizes the President to provide for the elimination of duties on particular categories of imports from Colombia. Article 2.5 pertains to the temporary admission of certain goods, such as commercial samples, goods intended for display at an exhibition, and goods necessary for carrying out the business activity of a person who qualifies for temporary entry into the United States. Article 2.6 pertains to the importation of goods: (i) returned to the United States after undergoing repair or alteration in Colombia; or (ii) sent from Colombia for repair or alteration in the United States.

Section 201(a)(2) of the bill requires the President to withdraw beneficiary country status under the Generalized System of Preferences ("GSP") from Colombia on the date the Agreement takes effect. Section 201(a)(3) of the bill requires the President to withdraw beneficiary country status under the Andean Trade Preference Act from Colombia on the date the Agreement takes effect.

Section 201(b) of the bill authorizes the President, subject to the consultation and layover provisions of section 104 of the bill, to:

- modify or continue any duty;
- modify the staging of any duty elimination set out in Annex 2.3 of the Agreement, pursuant to an agreement with Colombia under Article 2.3.4 of the Agreement;
- keep in place duty-free or excise treatment; or
- impose any duty

by proclamation whenever the President determines it to be necessary or appropriate to maintain the general level of reciprocal and mutually advantageous concessions with respect to Colombia provided by the Agreement.

Section 104 of the bill sets forth consultation and layover steps that must precede the President's implementation by proclamation of any duty modification. This would include, for example, modifications of duties under section 201(b) of the bill. Under the consultation and layover provisions, the President must obtain the advice of the appropriate private sector advisory committees (pursuant to section 135 of the Trade Act of 1974) and the ITC on the proposed action. The President must submit a report to the Trade Committees setting forth the

action proposed, the reasons for the proposed action, and the advice of the private sector and the ITC. The bill sets aside a 60-day period following the date of transmittal of the report for the President to consult with the Trade Committees on the action. Following the expiration of the 60-day period, the President may proclaim the action.

The President may initiate the consultation and layover process under section 104 of the bill on enactment of the bill. However, under section 103(a) of the bill, any modifying proclamation cannot take effect until the Agreement enters into force. In addition to modifications of customs duties, these provisions apply to other Presidential proclamation authority provided in the bill that is subject to consultation and layover, such as authority to implement a proposal to modify the Agreement's specific rules of origin pursuant to an agreement with Colombia under Article 4.14 of the Agreement.

Section 201(c) of the bill provides for the conversion of existing specific or compound rates of duty for various goods to *ad valorem* rates for purposes of implementing the Agreement's customs duty reductions. (A compound rate of duty for a good would be a rate of duty stated, for example, as the sum of X dollars per kilogram plus Y percent of the value of the good.)

Section 201(d) of the bill directs the President to take such action as may be necessary to ensure that imports of goods subject to TRQs do not disrupt the orderly marketing of commodities in the United States. This provision will be implemented consistent with Article 2.15 of the Agreement. Any agency action pursuant to this provision will be taken in accordance with regulations promulgated after providing notice and opportunity for public comment.

b. Agricultural Safeguard

Section 202 of the bill implements the agricultural safeguard provisions of Article 2.18 and Annex 2.18 of the Agreement. Article 2.18 permits the United States to impose an "agricultural safeguard measure," in the form of additional duties, on imports of certain goods of Colombia specified in the Schedule of the United States to Annex 2.18 of the Agreement that exceed the volume thresholds set out in that annex.

Section 202(a) of the bill provides the overall contour of the agricultural safeguard rules, including definitions of terms used in the agricultural safeguard provisions. Section 202(a)(1) defines the applicable normal trade relations (most-favored-nation) ("NTR (MFN)") rate of duty for purposes of the agricultural safeguard. Under the Agreement, the sum of the duties assessed under an agricultural safeguard and the applicable rate of duty in the Schedule of the United States to Annex 2.3 of the Agreement may not exceed the general NTR (MFN) rate of duty.

Section 202(a)(2) of the bill defines the "schedule rate of duty" for purposes of the agricultural safeguard as the rate of duty for a good set out in the Schedule of the United States to Annex 2.3 of the Agreement.

Section 202(a)(3) of the bill specifies the products that may be subject to an agricultural safeguard measure. These goods must qualify as originating goods under section 203 of the bill, except that operations performed in or material obtained from the United States will be considered as if the operations were performed in, and the material was obtained from, a country that is not a party to the Agreement.

Section 202(b) of the bill provides for the Secretary of the Treasury (the “Secretary”) to impose agricultural safeguard duties and explains how the additional duties are to be calculated. The additional duties are triggered in any year when the volume of imports of the good from Colombia exceeds 140 percent of the in-quota quantity allocated to Colombia for the good in that calendar year in Appendix I of the General Notes to the Schedule of the United States to Annex 2.3 of the Agreement. (The in-quota quantities for goods are set out in the Schedule of the United States to Annex 2.3 of the Agreement on a calendar-year basis beginning with “year one.” Year one refers to the calendar year in which the Agreement enters into force.) The additional duties remain in effect only until the end of the calendar year in which they are imposed.

Section 202(b)(3) of the bill implements Article 2.18.6 of the Agreement by directing the Secretary within 60 days of the date on which the Secretary first assesses an agricultural safeguard duty on a good to notify Colombia and provide it with supporting data.

Section 202(c) of the bill implements Article 2.18.4 of the Agreement by establishing that no additional duty may be applied on a good if, at the time of entry, the good is subject to a safeguard measure under the procedures set out in Subtitle A of Title III of the bill or under the safeguard procedures set out in chapter 1 of Title II of the Trade Act of 1974.

Section 202(d) of the bill provides that the agricultural safeguard provision ceases to apply with respect to a good on the date on which duty-free treatment must be provided to that good under the Schedule of the United States to Annex 2.3 of the Agreement.

c. Customs User Fees

Section 204 of the bill implements U.S. commitments under Article 2.10.4 of the Agreement, regarding customs user fees on originating goods, by amending section 13031(b) of the Consolidated Omnibus Budget Reconciliation Act of 1985 (19 U.S.C. 58c(b)). The amendment provides for the immediate elimination of the merchandise processing fee for goods qualifying as originating goods under Article 3.3, Annex 3-A or Chapter Four of the Agreement. Customs processing of goods qualifying as originating goods under the Agreement will be financed by money from the General Fund of the Treasury. This is necessary to ensure that the United States complies with obligations under the General Agreement on Tariffs and Trade 1994 by limiting fees charged for the processing of non-originating imports to amounts commensurate with the processing services provided. That is, fees charged on such non-originating imports will not be used to finance the processing of originating imports.

2. Administrative Action

a. Temporary Admission of Goods and Goods Entered After Repair or Alteration

As discussed above, section 201(a)(1) of the bill authorizes the President to proclaim duty-free treatment for certain goods to carry out Article 2.5 (temporary admission of certain goods) and Article 2.6 (repair or alteration of certain goods) of the Agreement. The Secretary will issue regulations to carry out this portion of the proclamation.

b. Agricultural Safeguard

The Secretary will issue regulations implementing the agricultural safeguard provisions of section 202 of the bill. It is the Administration's intent that agricultural safeguard measures will be applied whenever the volume thresholds specified in the Agreement have been met.

Chapter Three (Textiles and Apparel)

1. Implementing Bill

a. Handloomed, Handmade, or Folklore Articles

The proclamation authority granted to the President under section 201(a)(1) of the bill includes authority to implement Article 3.3.13 of the Agreement by providing duty-free treatment for Colombian textile or apparel articles that the United States and Colombia agree are handloomed, handmade, or folklore articles, and which are certified as such by Colombia's competent authority.

b. Textile or Apparel Safeguard

Article 3.1 of the Agreement makes remedies available to domestic textile and apparel industries that have sustained or are threatened by serious damage from imports of textile or apparel goods for which duties have been reduced or eliminated under the Agreement. Article 3.1 also sets forth procedures for obtaining such remedies. The Administration does not anticipate that the Agreement will result in injurious increases in textile or apparel imports from Colombia. Nevertheless, the Agreement's textile or apparel safeguard procedure will ensure that relief is available if needed.

The safeguard mechanism applies when, as a result of the reduction or elimination of a customs duty under the Agreement, textile or apparel goods of Colombia are being imported into the United States in such increased quantities, in absolute or relative terms, and under such conditions as to cause serious damage or actual threat thereof to a U.S. industry producing like or directly competitive goods. In these circumstances, Article 3. permits the United States to

increase duties on the imported goods to a level that does not exceed the lesser of the prevailing U.S. NTR (MFN) duty rate for the good or the U.S. NTR (MFN) duty rate in effect at the time the Agreement entered into force.

Subtitle B of Title III of the bill (sections 321 through 328) implements the Agreement's textile and apparel safeguard.

Section 321(a) of the bill establishes that an interested party may file a request for a textile or apparel safeguard measure with the President, who must review the request to determine whether to commence consideration of the request on its merits. Under section 321(b) of the bill, if the President determines that the request contains information necessary to warrant consideration on the merits, the President must provide notice in the *Federal Register* stating that the request will be considered and seeking public comments on the request. The notice will contain a summary of the request itself and the dates by which comments and rebuttals must be received. Subject to protection of confidential business information, if any, the full text of the request will be made available on the Department of Commerce, International Trade Administration's website.

Section 322 of the bill sets out the procedures to be followed in considering the request. Section 322(a)(1) of the bill provides for the President to determine whether, as a result of the reduction or elimination of a duty provided for under the Agreement, a "Colombian textile or apparel article" is being imported into the United States in such increased quantities, in absolute terms or relative to the domestic market for that article, and under such conditions that imports of the article cause serious damage, or actual threat thereof, to a domestic industry producing an article that is like, or directly competitive with, the imported article. Section 301(2) of the bill defines "Colombian textile or apparel article" to mean an article listed in the Annex to the World Trade Organization ("WTO") Agreement on Textiles and Clothing (other than a good listed in Annex 3-C of the Agreement) that qualifies as an originating good under section 203(b) of the bill. The President's determination corresponds to the determination required under Article 3.1 of the Agreement. Section 322(a)(2) of the bill includes criteria for determining serious damage or actual threat thereof, consistent with Article 3.1.2 of the Agreement.

Section 322(b) of the bill identifies the relief that the President may provide to a U.S. industry that the President determines is facing serious damage or actual threat thereof. Such relief may consist of an increase in tariffs to the lesser of: (i) the NTR (MFN) duty rate in place for the textile or apparel article at the time the relief is granted; or (ii) the NTR (MFN) duty rate for that article on the day before the Agreement entered into force.

Section 323 of the bill provides that the maximum period of relief under the textile or apparel safeguard shall be three years in the aggregate. The initial period of import relief may be up to two years. The President may extend the relief for up to one year, however, if he determines that continuation is necessary to remedy or prevent serious damage and to facilitate adjustment, and that the domestic industry is, in fact, adjusting to import competition.

Section 324 of the bill provides that relief may not be granted to an article under the textile and apparel safeguard if: (i) relief previously has been granted to that article under the textile and apparel safeguard; or (ii) the article is subject, or becomes subject, to a safeguard measure under (a) Section A of Chapter Eight of the Agreement (corresponding to Subtitle A of Title III of the bill), or (b) chapter 1 of Title II of the Trade Act of 1974.

Section 325 of the bill provides that on the date import relief terminates, imports of the textile or apparel article that was subject to the safeguard action will be subject to the rate of duty that would have been in effect on that date in the absence of the relief.

Section 326 of the bill provides that authority to provide relief under the textile and apparel safeguard will expire five years after the date on which the Agreement enters into force.

Under Article 3.1.7 of the Agreement, if the United States provides relief to a domestic industry under the textile and apparel safeguard, it must provide Colombia “mutually agreed trade liberalizing compensation in the form of concessions having substantially equivalent trade effects or equivalent to the value of the additional duties expected to result from the [safeguard].” Under Article 3.1.8, if the United States and Colombia are unable to agree on trade liberalizing compensation, Colombia may increase tariffs equivalently on U.S. goods. The obligation to provide compensation (and the right to increase tariffs absent agreement on compensation) terminates when the safeguard relief ends.

Section 123 of the Trade Act of 1974 (19 U.S.C. 2133), as amended, authorizes the President to provide trade compensation for global safeguard measures taken pursuant to chapter 1 of title II of the Trade Act of 1974. Section 327 of the implementing bill extends that authority to measures taken pursuant to the Agreement’s textile or apparel safeguard provisions.

Finally, section 328 of the bill provides that confidential business information submitted in the course of consideration of a request for a textile or apparel safeguard may not be released absent the consent of the party providing the information. It also provides that a party submitting confidential business information in a textile or apparel safeguard proceeding must submit a non-confidential version of the information or a summary of the information.

c. Enforcement of Textile and Apparel Rules of Origin

In addition to lowering barriers to trade in textile and apparel goods, the Agreement includes anti-circumvention provisions designed to ensure the accuracy of claims of origin and to prevent circumvention of laws, regulations, and procedures affecting such trade. Article 3.2 of the Agreement provides for verifications to determine the accuracy of claims of origin for textile or apparel goods, and to determine that exporters and producers are complying with applicable laws, regulations, and procedures regarding trade in textile or apparel goods.

Under Articles 3.2.3 and 3.2.4 of the Agreement, at the request of the United States, the government of Colombia must conduct a verification. The object of a verification under Article

3.2.3(a)(i) is to determine whether a claim of origin for a textile or apparel good is accurate. The object of a verification under Article 3.2.3(a)(ii) is to determine whether an exporter or producer is complying with applicable customs laws, regulations, and procedures regarding trade in textile or apparel goods, including those implementing international agreements. The United States may assist in the verification or, at the request of the government of Colombia, conduct the verification itself. A verification may entail visits by officials of Colombia and the United States to the premises of a textile or apparel exporter or producer in Colombia.

Pursuant to Article 3.2.7 of the Agreement, the United States may take appropriate action during and after a verification, including, depending on the nature of the verification, by suspending or denying preferential tariff treatment for textile or apparel goods exported or produced by the person subject to the verification, detaining the goods, or denying them entry into the United States.

Section 208 of the bill implements Article 3.2 of the Agreement. Under section 208(a), the President may direct the Secretary to take “appropriate action” while a verification that the Secretary has requested is being conducted. Section 208(b) provides that, depending on the nature of the verification, the action may include: (i) suspending preferential tariff treatment for textile or apparel goods that the person subject to the verification has produced or exported if the Secretary determines there is insufficient information to sustain a claim for such treatment; (ii) denying preferential tariff treatment to such goods if the Secretary determines that a person has provided incorrect information to support a claim for such treatment; (iii) detaining such goods if the Secretary determines there is not enough information to determine their country of origin; and (iv) denying entry to such goods if the Secretary determines that a person has provided incorrect information on their origin.

Under section 208(c), the President may also direct the Secretary to take “appropriate action” after a verification has been completed. Under section 208(d), depending on the nature of the verification, the action may include: (i) denying preferential tariff treatment under the Agreement to textile or apparel goods that the person subject to the verification has exported or produced if the Secretary determines there is insufficient information to support a claim for such treatment or determines that a person has provided incorrect information to support a claim for such treatment; and (ii) denying entry to such goods if the Secretary determines that a person has provided incorrect information regarding their origin or that there is insufficient information to determine their origin. Unless the President sets an earlier date, any such action may remain in place until the Secretary obtains enough information to decide whether the exporter or producer that was subject to the verification is complying with applicable customs rules or whether a claim that the goods qualify for preferential tariff treatment or originate in Colombia is accurate.

Under section 208(e), the Secretary may publish the name of a person that the Secretary has determined: (i) is engaged in circumvention of applicable laws, regulations, or procedures affecting trade in textile or apparel goods; or (ii) has failed to demonstrate that it produces, or is capable of producing, textile or apparel goods.

d. Fabrics, Yarns, or Fibers Not Available in Commercial Quantities

Under the specific rules of origin for textile and apparel goods set out in Annex 3-A of the Agreement, fabrics, yarns, or fibers that are not available in commercial quantities in a timely manner in the United States and Colombia are treated as if they originate in the United States or Colombia, regardless of their actual origin, when used as inputs in the production of textile or apparel goods. Annex 3-B of the Agreement lists certain fabrics, yarns, and fibers that the governments of the United States and Colombia have agreed are unavailable in the region.

In addition, Article 3.3.5 of the Agreement provides that the United States may add fabrics, yarns, or fibers to the list in certain circumstances. First, Article 3.3.5(e) of the Agreement provides that the United States may, after consultations with Colombia, add any fabrics or yarns that it has determined under its regional trade preference programs before the Agreement enters into force to be unavailable in the United States in commercial quantities in a timely manner. These regional trade preference program provisions are set out in: section 112(b)(5)(B) of the African Growth and Opportunity Act (19 U.S.C. 3721(b)), section 204(b)(3)(B)(ii) of the Andean Trade Preference Act (19 U.S.C. 3203(b)(3)(B)(ii)), and section 213(b)(2)(A)(v)(II) of the Caribbean Basin Economic Recovery Act (19 U.S.C. 2703(b)(2)(A)(v)(II)).

Second, if the United States determines, at the request of an “interested entity” (a potential or actual purchaser or seller, or the government of Colombia), that a fabric, yarn, or fiber is unavailable in commercial quantities in a timely manner in Colombia and the United States, or if it determines that no interested entity objects to the request, the United States will add the material to the list – in a restricted or unrestricted quantity. In addition, within six months of adding a material to the list in Annex 3-B of the Agreement, the United States may remove any restriction it has imposed on the product.

Article 3.3.6 of the Agreement authorizes the United States, in response to a request from an interested entity, either to remove a material from the list or impose a restriction on any material it has added to the list in an unrestricted quantity. The United States may take this action beginning six months after it determines, in response to a request, that the material has become commercially available in Colombia or the United States.

Section 203(o)(2) of the bill provides authority for the President to carry out the provision in Article 3.3.5(e) of the Agreement pursuant to which the United States may, after consultations with Colombia, add materials to the list that it has determined are unavailable in commercial quantities in a timely manner in the United States under its regional trade preference programs (the African Growth and Opportunity Act, the Andean Trade Preference Act, and the Caribbean Basin Economic Recovery Act) before the Agreement enters into force.

Section 203(o)(4) of the bill implements those provisions of Article 3.3 of the Agreement that provide for the United States to modify the list of materials in Annex 3-B of the Agreement after the Agreement enters into force.

Specifically, subparagraph (C)(i) of section 203(o)(4) provides that an interested entity may request the President to determine that a fabric, yarn, or fiber is not available in commercial quantities in Colombia and the United States and to proclaim that the material is included in the list in Annex 3-B of the Agreement.

Subparagraph (C)(ii) of section 203(o)(4) authorizes the President to determine whether the material is commercially available in a timely manner in Colombia or the United States. Subparagraph (C)(iii) provides that if the President determines that the material is not commercially available in a timely manner in Colombia and the United States, or if no interested entity has objected, he may issue a proclamation adding the fabric, yarn, or fiber to the list in Annex 3-B of the Agreement in a restricted or unrestricted quantity. The President normally must issue the proclamation within 30 business days of receiving a request. However, subparagraph (C)(iv)(II) of section 203(o)(4) provides that the President may take up to 44 business days if the President decides he lacks sufficient information to make the determination within 30 business days. Subparagraph (C)(v) provides for proclamations to take effect when published in the *Federal Register*.

Subparagraph (C)(vi) of section 203(o)(4) provides that within six months after adding a fabric, yarn, or fiber to the list in Annex 3-B of the Agreement in a restricted quantity, the President may eliminate the restriction if he determines that the fabric, yarn, or fiber is not available in commercial quantities in a timely manner in Colombia and the United States.

Subparagraph (D) of section 203(o)(4) of the bill implements Article 3.3.5(c) of the Agreement. It provides that in the unlikely event that the President takes no action in response to a request to add a material to the list, the material is automatically added in an unrestricted quantity beginning 45 business days after the request was submitted, or 60 days after the request was submitted if the President has determined under subparagraph (C)(iv) that he lacks sufficient information to make the determination within 30 business days.

Under subparagraph (E)(i) of section 203(o)(4), an interested entity may request the President to limit the amount of any fabric, yarn, or fiber that the United States has included on the list in Annex 3-B in an unrestricted quantity, or to remove such a material from the list entirely. Under subparagraph (E)(ii), an interested entity may submit such a request beginning six months after the product was placed on the list in an unrestricted amount. Subparagraph (E)(iii) provides for the President to issue a proclamation carrying out a request if he determines within 30 business days after the request is submitted that the material is available in commercial quantities in a timely manner in Colombia or the United States. Subparagraph (E)(iv) provides that this type of proclamation may take effect no earlier than six months after it is published in the *Federal Register*.

Subparagraph (F) of section 203(o)(4) calls for the President to establish procedures for interested entities to submit requests for changes in the Annex 3-B list and to submit comments and supporting evidence before the President determines whether to change the list.

2. Administrative Action

a. Handloomed, Handmade, or Folklore Articles

The President will authorize the Committee for the Implementation of Textile Agreements (“CITA”) to consult with Colombia to determine which, if any, textile or apparel goods from Colombia will be treated as handloomed, handmade, or folklore articles. CITA is an interagency entity created by Executive Order 11651 that carries out U.S. textile trade policies, as directed by the President. The President will delegate to CITA his authority under the bill to provide duty-free treatment for these articles.

b. Textile and Apparel Safeguard

CITA will perform the function of receiving requests for textile or apparel safeguard measures under section 321 of the bill, making determinations of serious damage or actual threat thereof under section 322(a) of the bill, and providing relief under section 322(b). CITA will issue procedures for requesting such safeguard measures, for making its determinations under section 322(a), and for providing relief under section 322(b) of the bill. CITA will perform these functions pursuant to a delegation of the President’s authority under the bill.

c. Enforcement of Textile and Apparel Rules of Origin

Section 208 of the bill provides that the Secretary may request Colombia to initiate verifications in order to determine whether claims of origin for textile or apparel goods are accurate or whether exporters and producers are complying with applicable laws, regulations, and procedures regarding trade in textile or apparel goods. The President will delegate to CITA his authority under the bill to direct appropriate U.S. officials to take an action described in section 208(b) of the bill while such a verification is being conducted. The President will also authorize CITA to direct pertinent U.S. officials to take an action described in section 208(d) of the bill after a verification is completed. If CITA decides that it is appropriate to deny preferential tariff treatment or deny entry to particular goods, CITA will issue an appropriate directive to U.S. Customs and Border Protection (CBP).

Section 208 of the bill provides the exclusive basis in U.S. law for CITA to direct appropriate action implementing Article 3.2 of the Agreement.

d. Fabrics, Yarns, or Fibers Not Available in Commercial Quantities

The President will delegate to CITA his authority under section 203(o)(4) of the bill, which establishes procedures for changing the list of fabrics, yarns, or fibers not available in commercial quantities in a timely manner in Agreement countries set out in Annex 3-B of the Agreement.

CITA will publish procedures under which interested entities may request that CITA: (i) add a fabric, yarn, or fiber to the list in Annex 3-B of the Agreement; (ii) eliminate a restriction on a fabric, yarn, or fiber within six months after the item was added to the list in a restricted quantity; (iii) remove a fabric, yarn, or fiber from the list; or (iv) restrict the quantity of a fabric, yarn, or fiber that was added to the list in an unrestricted quantity or with respect to which CITA previously eliminated a restriction. These procedures will set out the information required to be submitted with a request. CITA will publish notice of requests that meet these requirements. CITA will provide an opportunity for interested entities to submit comments and evidence regarding a request, and to rebut evidence that other interested entities have submitted, before CITA makes a determination.

CITA will make determinations under section 203(o)(4) of the bill on a case-by-case basis taking into account factors relevant to the request. Such factors ordinarily would include the physical and technical specifications of the fabric, yarn, or fiber that is the subject of the request, as well as evidence demonstrating the extent to which manufacturers in Colombia or the United States are able to supply the item in commercial quantities in a timely manner. CITA will provide public notice of its determinations.

Chapter Four (Rules of Origin)

1. Implementing Bill

a. General

Section 203 of the implementing bill codifies the general rules of origin set forth in Chapter Four of the Agreement. These rules apply only for the purposes of this bill and for the purposes of implementing the customs duty treatment provided under the Agreement. An originating good for the purposes of this bill would not necessarily be a good of or import from Colombia for the purposes of other U.S. laws or regulations.

Under the general rules, there are three basic ways for a good of Colombia to qualify as an “originating” good and, therefore, be eligible for preferential treatment when it is imported into the United States. First, a good is originating if it is “wholly obtained or produced entirely in the territory of Colombia, the United States, or both.” The term “good wholly obtained or produced entirely in the territory of Colombia, the United States, or both” is defined in section 203(n)(5) of the bill and includes, for example, minerals extracted from the territory of Colombia, the United States, or both; animals born and raised in the territory of Colombia, the United States, or both; and waste and scrap derived from production of goods that takes place in the territory of Colombia, the United States, or both.

The term “good wholly obtained or produced entirely in the territory of Colombia, the United States, or both” includes “recovered goods.” These are parts resulting from the disassembly of used goods that are brought into good working condition in order to be combined

with other recovered goods and other materials to form a “remanufactured good.” The term “remanufactured good” is separately defined in section 203(n)(20) of the bill to mean an industrial good assembled in the territory of Colombia or the United States, or both, and falling within Chapter 84, 85, 87 or 90 of the HTS or heading 9402 (with the exception of goods under heading 8418 or 8516) that: (i) is entirely or partially comprised of recovered goods; and (ii) has a similar life expectancy and enjoys a factory warranty similar to such a good that is new.

Second, the general rules of origin provide that a good is “originating” if the good is produced in the territory of Colombia, the United States, or both, and the materials used to produce the good that are not themselves originating goods are transformed in such a way as to cause their tariff classification to change and to meet other requirements, as specified in Annex 3-A or Annex 4.1 of the Agreement. Such additional requirements include, for example, performing certain processes or operations related to textile or apparel goods in the territory of Colombia, the United States, or both, or meeting regional value content requirements, sometimes in conjunction with changes in tariff classification.

Third, the general rules of origin provide that a good is “originating” if the good is produced entirely in the territory of Colombia, the United States, or both, exclusively from materials that themselves qualify as originating goods.

As is the case for all goods exported to the United States, “originating goods” must comply with applicable U.S. laws and regulations, including import prohibitions, sanctions, and licensing requirements, in order to be admitted into the territory of the United States.

The remainder of section 203 of the implementing bill sets forth specific rules related to determining whether a good meets the Agreement’s specific requirements to qualify as an originating good. For example, section 203(c) implements provisions in Annex 4.1 of the Agreement that require certain goods to have at least a specified percentage of “regional value content” to qualify as originating goods. It prescribes alternative methods for calculating regional value content, as well as a specific method that must be used in the case of certain automotive goods. Section 203(f) provides that a good is not disqualified as an originating good if it contains *de minimis* quantities of non-originating materials that do not undergo a change in tariff classification. In defining an exception to that rule, section 203(f)(3)(B) specifies that certain textile or apparel goods containing elastomeric yarns in the component of the good that determines the tariff classification will be considered an originating good only if such yarns are “wholly formed” in the territory of Colombia, the United States, or both. Article 3.3.9 of the Agreement, read together with footnote 5, makes clear that “wholly formed” means that all production processes and finishing operations must take place in the territory of a Party. The United States – Peru Trade Promotion Agreement and the Dominican Republic – Central America – United States Free Trade Agreement contain the same clarification, set out in footnotes to Article 3.3.9 and Article 3.25.8, respectively, namely that both finishing operations and production processes are included within the term “wholly formed” as used in those agreements. Other provisions in section 203 of the bill address how materials are to be valued, how to determine whether fungible goods and materials qualify as originating or non-originating,

as well as a variety of other matters.

Section 203(l) allows a good to be shipped through a third country without losing its status as an originating good, provided certain conditions are met. While in a third country, the good may not be further produced, except that it may be unloaded, reloaded, or preserved, if necessary. Whether the good is unloaded, reloaded, or preserved in a third country, or is simply shipped through the third country, the good must, while in that country, remain under customs control.

Section 203(l) recognizes that, in modern commerce, a good may not be directly shipped from Colombia to the United States, or vice versa; for example, shipments may be consolidated at an interim port. At the same time, in order to ensure that the preferential tariff treatment under the Agreement inures to producers in Colombia and the United States, rather than producers in third countries, an originating good may not be further produced in a country that is not a party to the Agreement. Requiring the good to remain under customs control provides greater traceability of the good to ensure that no further production occurred.

b. Proclamation Authority

Section 203(o)(1) of the bill authorizes the President to proclaim the specific rules of origin in Annex 3-A and Annex 4.1 of the Agreement, as well as any additional subordinate rules necessary to carry out the customs duty provisions of the bill consistent with the Agreement. In addition, section 203(o)(3) gives authority to the President to modify certain of the Agreement's specific origin rules by proclamation, subject to the consultation and layover provisions of section 104 of the bill. (See item 1.a of Chapter Two, above.)

Various provisions of the Agreement expressly contemplate that Colombia and the United States may agree to modify the Agreement's rules of origin. Article 4.14 of the Agreement calls for the two governments to consult regularly after the Agreement's entry into force to discuss proposed modifications to Annex 4.1 of the Agreement. Article 20.1.3(b) of the Agreement authorizes the Free Trade Commission to approve proposed modifications to any of the Agreement's origin rules. Such modifications are to be implemented in accordance with each country's applicable legal procedures. In addition, Article 3.3.2 of the Agreement calls for the Parties to consult at either Party's request to consider whether rules of origin for particular textile or apparel goods should be modified.

Section 203(o)(3) of the bill expressly limits the President's authority to modify by proclamation specific rules of origin pertaining to textile or apparel goods (listed in Chapters 50 through 63 of the HTS and identified in Annex 3-A of the Agreement). Those rules of origin may be modified by proclamation within one year of entry into force of the Agreement, to correct typographical, clerical, or other non-substantive technical errors. However, Section 203(o)(4) of the bill, discussed above, provides the President with authority to proclaim modifications to the rules of origin limited to fabrics, yarns, or fibers that are not available in commercial quantities in the United States and Colombia.

c. Disclosure of Incorrect Information and Denial of Preferential Treatment

Article 4.19.3 of the Agreement provides that a Party may not impose a penalty on an importer who makes an invalid claim for preferential tariff treatment under the Agreement if the importer did not engage in negligence, gross negligence, or fraud in making the claim or, after discovering that the claim is invalid, promptly and voluntarily corrects the claim and pays any customs duty owing. Article 4.18.5 of the Agreement provides if an importing country determines through verification that an importer, exporter, or producer has engaged in a pattern of conduct in providing false or unsupported certifications or other representations that a good qualifies as originating, it may suspend preferential tariff treatment under the Agreement for identical goods covered by any subsequent certifications or other representations that that person may make. The suspension may continue until the importing country determines that the importer, exporter, or producer is in compliance with applicable laws and regulations governing claims for preferential tariff treatment under the Agreement.

Section 205(a) of the bill implements Article 4.19.3 of the Agreement for the United States by amending section 592(c) of the Tariff Act of 1930 (19 U.S.C. 1592(c)). Section 205(b) of the bill implements Article 4.18.5 of the Agreement for the United States by amending section 514 of the Tariff Act of 1930 (19 U.S.C. 1514).

d. Claims for Preferential Tariff Treatment

Article 4.19.5 of the Agreement provides that an importer may claim preferential tariff treatment for an originating good within one year of importation, even if no such claim was made at the time of importation. In seeking a refund for excess duties paid, the importer must provide to the customs authorities information substantiating that the good was in fact an originating good at the time of importation.

Section 206 of the bill implements U.S. obligations under Article 4.19.5 of the Agreement by amending section 520(d) of the Tariff Act of 1930 (19 U.S.C. 1520(d)) to allow an importer to claim preferential tariff treatment for originating goods within one year of their importation.

e. Exporter and Producer Certifications

Article 4.15 of the Agreement provides that an importer may base a claim for preferential tariff treatment on either (i) a written or electronic certification by the importer, exporter, or producer, or (ii) the importer's knowledge that the good is an originating good, including through reasonable reliance on information in the importer's possession that the good is an originating good. (The Agreement allows certain exceptions, for example, for goods with a customs value less than or equal to \$1,500.) If an exporter issues a certification, it must either be based on the person's knowledge that the good is originating or supported by a separate certification issued by the producer.

Article 4.20 of the Agreement sets out rules governing incorrect certifications of origin issued by exporters or producers. Where an exporter or producer becomes aware that a certification of origin contains or is based on incorrect information, it must promptly and voluntarily notify in writing every person to whom the exporter or producer issued the certification of any change that could affect the accuracy or validity of the certification. If it does so, the United States may not impose a penalty.

Section 205(a) of the bill implements U.S. obligations under Article 4.20 of the Agreement by amending section 592 of the Tariff Act of 1930 (19 U.S.C. 1592). New subsection (k) of section 592, as added by section 205(a) of the bill, imposes penalties on exporters and producers that issue false CTPA certifications of origin through fraud, gross negligence, or negligence. These penalties do not apply where an exporter or producer corrects an error in the manner described above.

f. Recordkeeping Requirements

Article 4.17 of the Agreement sets forth recordkeeping requirements that each government must apply to its importers. U.S. obligations under Article 4.17 regarding importers are satisfied by current law, including the record keeping provisions in section 508 of the Tariff Act of 1930 (19 U.S.C. 1508).

Article 4.17 also sets forth recordkeeping requirements that each government must apply to exporters and producers issuing certifications of origin for goods exported under the Agreement. Section 207 of the bill implements Article 4.17 of the Agreement for the United States by amending the customs recordkeeping statute (section 508 of the Tariff Act of 1930).

As added by section 207 of the bill, subsection (j) of section 508 of the Tariff Act of 1930 defines the terms “CTPA certification of origin” and “records and supporting documents.” It then provides that a U.S. exporter or producer that issues a CTPA certification of origin must make, keep, and, if requested pursuant to rules and regulations promulgated by the Secretary, render for examination and inspection a copy of the certification and such records and supporting documents. The exporter or producer must keep these records and supporting documents for five years from the date it issues the certification. New subsection (k) of section 508 of the Tariff Act of 1930 sets forth penalties for violations of this recordkeeping requirement.

2. Administrative Action

The rules of origin in Chapter Four of the Agreement are intended to direct the benefits of customs duty elimination under the Agreement principally to firms producing or manufacturing goods in Colombia and the United States, not third countries. For this reason, the rules ensure that, in general, a good is eligible for benefits under the Agreement only if it is: (i) wholly produced or obtained in the territory of Colombia, the United States, or both; or (ii) undergoes substantial processing in the territory of Colombia, the United States, or both.

a. Claims for Preferential Treatment

Section 209 of the bill authorizes the Secretary to prescribe regulations necessary to carry out the tariff-related provisions of the bill, including the rules of origin and customs user fee provisions. The Secretary will use this authority in part to promulgate any regulations necessary to implement the Agreement’s provisions governing claims for preferential treatment. Under Article 4.15 of the Agreement, an importer may claim preferential treatment for a good based on either (i) a written or electronic certification by the importer, exporter, or producer, or (ii) the importer’s knowledge, including through reasonable reliance on information in the importer’s possession, that the good is originating. A certification need not be in a prescribed format, but must include the elements set out in Article 4.15.2 of the Agreement. Under Article 4.19 of the Agreement, an importing Party must grant a claim for preferential tariff treatment made in accordance with Chapter Four of the Agreement, unless its customs officials issue a written determination that the claim is invalid as a matter of law or fact.

b. Verification

Under Article 4.18 of the Agreement, customs officials may use a variety of methods to verify claims that goods imported from the other Party satisfy the Agreement’s rules of origin. Article 3.2 of the Agreement sets out special procedures for verifying claims that textile or apparel goods imported from the other Party meet the Agreement’s origin rules. (See item 1.c of Chapter Three, above.) U.S. officials will carry out verifications under Articles 4.18 and 3.2 of the Agreement pursuant to authorities under current law. For example, section 509 of the Tariff Act of 1930 (19 U.S.C. 1509) provides authority to examine records and issue summonses to determine liability for duty and ensure compliance with U.S. customs laws.

Chapter Five (Customs Administration and Trade Facilitation)

1. Implementing Bill

No statutory changes will be required to implement Chapter Five.

2. Administrative Action

a. Inquiry Point

Article 5.1.2 of the Agreement requires each government to designate an inquiry point for inquiries from interested persons on customs matters. CBP will serve as the U.S. inquiry point for this purpose. Consistent with Article 5.1.2, CBP will post information on the Internet at “www.cbp.gov” on how interested persons can make customs-related inquiries.

b. Advance Rulings

Treasury regulations for advance rulings under Article 5.10 of the Agreement (including on classification, valuation, origin, and qualification as an originating good) will parallel in most respects existing regulations in Part 177 of the Customs Regulations for obtaining advance rulings. For example, a ruling may be relied on provided that the facts and circumstances represented in the ruling are complete and do not change. The regulations will make provision for modifications and revocations as well as for delaying the effective date of a modification where the firm in question has relied on an existing ruling. Advance rulings under the Agreement will be issued within 150 days of receipt of all information reasonably required to process the application for the ruling.

Chapter Six (Sanitary and Phytosanitary Measures)

No statutory or administrative changes will be required to implement Chapter Six.

Chapter Seven (Technical Barriers to Trade)

1. Implementing Bill

No statutory changes will be required to implement Chapter Seven.

2. Administrative Action

Article 7.7 of the Agreement establishes an inter-governmental Committee on Technical Barriers to Trade (“TBT”). A USTR official responsible for TBT matters or trade relations with Colombia will serve as the U.S. coordinator for the committee.

Chapter Eight (Trade Remedies)

1. Implementing Bill

Subtitle A of Title III of the bill implements in U.S. law the safeguard provisions set out in Chapter Eight of the Agreement. Subtitle C of Title III of the bill implements the global safeguard provisions set out in Chapter Eight of the Agreement. (As discussed under Chapter Three, above, Subtitle B of Title III of the bill implements the textile or apparel safeguard provisions of the Agreement.)

a. Safeguard Measures

Subtitle A of Title III of the bill, sections 311 through 316, authorizes the President, after an investigation and affirmative determination by the ITC (or a determination that the President may consider to be an affirmative determination), to suspend duty reductions or impose duties temporarily up to NTR (MFN) rates on a “Colombian article” when, as a result of the reduction or elimination of a duty under the Agreement, the article is being imported into the United States in such increased quantities and under such conditions as to be a substantial cause of serious injury or threat of serious injury to a domestic industry that produces a like or directly competitive good. The standards and procedures set out in these provisions closely parallel the procedures set forth in sections 201 through 204 of the Trade Act of 1974 (19 U.S.C. 2251 – 2254).

Section 301(1) of the bill defines the term “Colombian article” to mean a good that qualifies as an originating good under section 203(b) of the bill.

Section 311 of the bill provides for the filing of petitions with the ITC and for the ITC to conduct safeguard investigations initiated under Subtitle A. Section 311(a) of the bill provides that a petition requesting a safeguard action may be filed with the ITC by an entity that is “representative of an industry.” As under section 202(a)(1) of the Trade Act of 1974, the term “entity” is defined to include a trade association, firm, certified or recognized union, or a group of workers.

Section 311(b) of the bill sets out the standard to be used by the ITC in undertaking an investigation and making a determination in Subtitle A safeguard proceedings.

Section 311(c) of the bill makes applicable by reference several provisions of the Trade Act of 1974. These are the definition of “substantial cause” in section 202(b)(1)(B) of that act, the factors listed in section 202(c) applied in making determinations, the hearing requirement of section 202(b)(3), and the provisions of section 202(i) permitting confidential business information to be made available under protective order to authorized representatives of parties to a safeguard investigation.

Section 311(d) of the bill exempts from investigation under this section Colombian articles that have previously been the basis for according relief under Subtitle A to a domestic industry.

Section 312(a) of the bill establishes deadlines for ITC determinations following an investigation under section 311(b). The ITC must make its injury determination within 120 days of the date on which it initiates an investigation.

Section 312(b) of the bill makes applicable the provisions of section 330(d) of the Tariff Act of 1930, which will apply when the ITC Commissioners are equally divided on the question of injury or remedy.

Under section 312(c) of the bill, if the ITC makes an affirmative determination, or a determination that the President may consider to be an affirmative determination, under section 312(a), it must find and recommend to the President the amount of import relief that is necessary to remedy or prevent the serious injury and to facilitate the efforts of the domestic industry to make a positive adjustment to import competition. The relief that the ITC may recommend is limited to that authorized in section 313(c) of the bill. Similar to procedures under the global safeguards provisions in current law, section 312(c) of the bill provides that only those members of the ITC who agreed to the affirmative determination under section 312(a) may vote on the recommendation of relief under section 312(c).

Under section 312(d) of the bill, the ITC is required to transmit a report to the President not later than 30 days after making its injury determination. The ITC's report must include: (i) the ITC's determination(s) under section 312(a) and the reasons supporting the determination(s); (ii) if the determination under section 312(a) is affirmative or may be considered to be affirmative by the President, any findings and recommendations for import relief and an explanation of the basis for each recommendation; and (iii) any dissenting or separate views of ITC Commissioners. Section 312(e) of the bill requires the ITC to make public its report promptly and to publish a summary of the report in the *Federal Register*.

Section 313(a) of the bill directs the President, subject to section 313(b) of the bill, to take action not later than 30 days after receiving a report from the ITC containing an affirmative determination or a determination that the President may consider to be an affirmative determination. The President must provide import relief to the extent that the President determines is necessary to remedy or prevent the injury the ITC has found and to facilitate the efforts of the domestic industry to make a positive adjustment to import competition. Under section 313(b), the President is not required to provide import relief if the President determines that the relief will not provide greater economic and social benefits than costs.

Section 313(c)(1) of the bill sets forth the nature of the relief that the President may provide. In general, the President may take action in the form of:

- a suspension of further reductions in the rate of duty to be applied to the articles in question; or
- an increase in the rate of duty on the articles in question to a level that does not exceed the lesser of the existing NTR (MFN) rate or the NTR (MFN) rate of duty imposed on the day before the Agreement entered into force.

Under section 313(c)(2), if the relief the President provides has a duration greater than one year, the relief must be subject to progressive liberalization at regular intervals over the course of its application.

Section 313(d) of the bill provides that the period for import relief under a Subtitle A safeguard may not exceed four years in the aggregate. The initial period of import relief may be of up to two years. The President may extend the period of import relief provided by up to two years, however, if he determines that continuation of relief is necessary to remedy or prevent serious injury and to facilitate adjustment to import competition, and that there is evidence that the industry is making a positive adjustment to import competition. That determination must follow an affirmative determination (or a determination that the President may consider to be an affirmative determination) by the ITC to the same effect.

Section 313(e) of the bill specifies the duty rate to be applied to Colombian articles after termination of a safeguard action. On the termination of relief, the rate of duty for the remainder of the calendar year is to be the rate that was scheduled to have been in effect one year after the initial provision of import relief. For the rest of the duty phase-out period, the President may set the duty:

- at the rate called for under the Schedule of the United States to Annex 2.3 of the Agreement; or
- in a manner that eliminates the duty in equal annual stages ending on the date set out in that Schedule.

Section 313(f) of the bill exempts from relief any article that is: (i) subject to import relief under the global safeguard provisions in U.S. law (chapter 1 of Title II of the Trade Act of 1974); (ii) subject to import relief under subtitle B; or (iii) subject to an assessment of additional duty under subsection (b) of section 202 of the bill.

Section 314 of the bill provides that the President's authority to take action under Subtitle A expires ten years after the date on which the Agreement enters into force, unless the period for elimination of duties on a good exceeds ten years. In such case, relief may be provided until the expiration of the period for elimination of duties.

Section 315 of the bill allows the President to provide trade compensation to Colombia, as required under Article 8.5 of the Agreement, when the United States imposes relief through a Subtitle A safeguard action. Section 315 provides that for purposes of section 123 of the Trade Act of 1974, which allows the President to provide compensation for global safeguards, any relief provided under section 313 of the bill will be treated as an action taken under the global safeguard provisions of U.S. law (sections 201 through 204 of the Trade Act of 1974).

Section 316 of the bill amends section 202(a) of the Trade Act of 1974 to provide that the procedures in section 332(g) of the Tariff Act of 1930 with respect to the release of confidential business information are to apply to Subtitle A safeguard investigations.

The Administration has not provided classified information to the ITC in past safeguard proceedings and does not expect to provide such information in future proceedings. In the

unlikely event that the Administration provides classified information to the ITC in such proceedings, that information would be protected from publication in accordance with Executive Order 12958.

b. Global Safeguard Measures

Section 331 of the bill implements the global safeguard provisions of Article 8.6.2 of the Agreement. It authorizes the President, in granting global import relief under sections 201 through 204 of the Trade Act of 1974, to exclude imports of originating articles from the relief when certain conditions are present.

Specifically, section 331(a) of the bill provides that if the ITC makes an affirmative determination, or a determination that the President may consider to be an affirmative determination, in a global safeguard investigation under section 202(b) of the Trade Act of 1974, the ITC must find and report to the President whether imports of the article from Colombia considered individually that qualify as originating goods under section 203(b) of the bill are a substantial cause of serious injury or threat thereof. Under section 331(b) of the bill, if the ITC makes a negative finding under section 331(a) the President may exclude any imports that are covered by the ITC's finding from the global safeguard action.

2. Administrative Action

No administrative changes will be required to implement Chapter Eight.

Chapter Nine (Government Procurement)

1. Implementing Bill

Chapter Nine of the Agreement establishes rules that certain government entities, listed in Annex 9.1 of the Agreement, must follow in procuring goods and services. The Chapter's rules will apply whenever these entities undertake procurements valued above thresholds specified in Annex 9.1.

In order to comply with its obligations under Chapter Nine, the United States must waive the application of certain federal laws, regulations, procedures and practices that ordinarily treat foreign goods and services and suppliers of such goods and services less favorably than U.S. goods, services, and suppliers. Section 301(a) of the Trade Agreements Act of 1979 (19 U.S.C. 2511(a)) authorizes the President to waive the application of such laws, regulations, procedures, and practices with respect to "eligible products" of a foreign country designated under section 301(b) of that Act. By virtue of taking on the procurement-related obligations in Chapter Nine, Colombia is eligible to be designated under section 301(b) of the Trade Agreements Act and will be so designated.

The term “eligible product” in section 301(a) of the Trade Agreements Act is defined in section 308(4)(A) of that Act for goods and services of countries and instrumentalities that are parties to the WTO Agreement on Government Procurement and countries that are parties to the NAFTA and other recent free trade agreements. Section 401 of the bill amends the definition of “eligible product” in section 308(4)(A) of the Trade Agreements Act. As amended, section 308(4)(A) will provide that, for Colombia, an “eligible product” means a product or service of Colombia that is covered under the Agreement for procurement by the United States. This amended definition, coupled with the President’s exercise of his authority under section 301(a) of the Trade Agreements Act, will allow U.S. government entities covered by the Agreement to purchase products and services from Colombia.

2. Administrative Action

As noted above, Annex 9.1 of the Agreement provides that U.S. government entities subject to Chapter Nine must apply the Chapter’s rules to goods and services from Colombia when they make purchases valued above certain dollar thresholds. USTR will notify the Federal Acquisition Regulatory Council (“FAR Council”) of the thresholds that pertain to Colombia under the Agreement. The FAR Council will then incorporate those thresholds into the Federal Acquisition Regulation in accordance with applicable procedures under the Office of Federal Procurement Policy Act.

Article 9.6.7 of the Agreement clarifies that a procuring entity is not precluded from preparing, adopting, or applying “technical specifications” to promote the conservation of natural resources and the environment, or to require a supplier to comply with generally applicable laws regarding fundamental principles and rights at work and acceptable conditions of work with respect to minimum wages, hours of work, and occupational safety and health, in the territory in which the good is produced or the service is performed. Thus, for example, a procuring entity is permitted to require a foreign producer to comply with laws guaranteeing freedom of association and protecting collective bargaining rights that generally apply in the territory in which the good is produced, even if that law does not apply to that foreign producer based on its location in an export processing zone.

Finally, neither this provision nor any other provision of Chapter Nine will affect application of the Davis-Bacon Act and related Acts (40 U.S.C. 3141 - 48 and 29 C.F.R. 5.1).

Chapter Ten (Investment)

1. Implementing Bill

Section 106 of the bill authorizes the United States to use binding arbitration to resolve claims by investors of Colombia under Article 10.16.1(a)(i)(C) or Article 10.16.1(b)(i)(C) of the Agreement. Those articles concern disputes over certain types of government contracts, and section 106 of the bill clarifies that the United States consents to the arbitration of such disputes.

No statutory authorization is required for the United States to engage in binding arbitration for other claims covered by Article 10.16 of the Agreement. Provisions allowing arbitration of certain contract claims have regularly been included in U.S. bilateral investment treaties over recent decades, and were included in the free trade agreements with Chile, Singapore, Morocco, Central America and the Dominican Republic, Oman, and Peru.

2. **Administrative Action**

No administrative changes will be required to implement Chapter Ten.

Chapter Eleven (Cross-Border Trade in Services)

No statutory or administrative changes will be required to implement Chapter Eleven.

Chapter Twelve (Financial Services)

No statutory or administrative changes will be required to implement Chapter Twelve.

Chapter Thirteen (Competition Policy, Designated Monopolies, and State Enterprises)

No statutory or administrative changes will be required to implement Chapter Thirteen.

Chapter Fourteen (Telecommunications)

No statutory or administrative changes will be required to implement Chapter Fourteen.

Chapter Fifteen (Electronic Commerce)

No statutory or administrative changes will be required to implement Chapter Fifteen.

Chapter Sixteen (Intellectual Property Rights)

No statutory or administrative changes will be required to implement Chapter Sixteen.

For pharmaceutical products, Article 16.10.2(e)(i) of the Agreement provides an exception to the data exclusivity obligations for measures to protect public health in accordance with the Declaration on the TRIPS Agreement and Public Health (WT/MIN(01)/DEC/2) (the

“Doha Declaration”). Thus, where a Party issues a compulsory license in accordance with Article 31 of the TRIPS Agreement and the Doha Declaration, the data exclusivity obligations in Chapter Sixteen of the Agreement will not prevent the adoption or implementation of such a public health measure. In addition, in a case in which there is no patent on the pharmaceutical product, and, therefore, no need to issue a compulsory license, the data exclusivity obligations in Chapter Sixteen will not prevent the adoption or implementation of such a measure.

Chapter Seventeen (Labor)

1. Implementing Bill

No statutory changes will be required to implement Chapter Seventeen-

2. Administrative Action

Article 17.5.1 of the Agreement establishes a Labor Affairs Council comprising cabinet-level officials from each Party. Article 17.5.5 of the Agreement calls for each government to designate an office to serve as a contact point with the other country and the public and to assist the Council in carrying out the Agreement’s Labor Cooperation and Capacity Building Mechanism. The Department of Labor’s Bureau of International Labor Affairs (ILAB) will serve as the U.S. contact point for these purposes, and will consult with USTR in carrying out this function.

Chapter Eighteen (Environment)

1. Implementing Bill

No statutory changes will be required to implement Chapter Eighteen.

2. Administrative Action

Article 18.6.1 of the Agreement establishes an Environmental Affairs Council, comprising senior-level officials with environmental responsibilities from each Party, and provides that each government will designate a contact point for carrying out the Council’s work. The Department of State (Oceans, Environment and Science Bureau) and USTR will serve as the U.S. contact points for this purpose.

TITLE V – EXTENSION OF THE ANDEAN TRADE PREFERENCE ACT

1. Implementing Bill

Title V of the implementing bill provides for extension of benefits under the Andean Trade Preference Act (ATPA).

These provisions are “necessary or appropriate” to implement the Agreement, as required by Trade Promotion Authority and predecessor legislation. The “necessary or appropriate” standard has applied to virtually every trade agreement considered by Congress since 1974, creating an extensive history of legislative practice. Based on this practice, the extension of ATPA is well within the boundaries of the “necessary or appropriate” standard.

Specifically, the Uruguay Round Agreements Act of 1994 included provisions to extend the Generalized System of Preferences (GSP), which like ATPA extends duty-free treatment to imports from certain developing countries. In addition, the Trade Agreements Act of 1979, which implemented the Tokyo Round of the General Agreement on Tariffs and Trade, included provisions that made several policy changes affecting the operation of GSP. Neither the Uruguay Round nor the Tokyo Round required extension of or changes to GSP. But these provisions were considered “necessary or appropriate” to implement those agreements. The ATPA provisions of this bill are likewise necessary or appropriate to implement this Agreement.

Section 501 of the implementing bill provides for an extension of benefits under ATPA until July 31, 2013. Colombia’s benefits under GSP expired on February 12, 2011, the date on which benefits for ATPA beneficiary countries expired. Although Colombia’s designation as a beneficiary country under ATPA will terminate on the date the Agreement enters into force, this extension will allow imports from Colombia to continue to benefit under the program until the earlier of such entry into force date or July 31, 2013. Section 501(a)(2) provides for an extension of ATPA benefits with respect to Ecuador until July 31, 2013. Section 501(b) provides for consequential time period adjustments. Section 501(c) provides for the retroactive application of duty free treatment for entries made after February 12, 2011, and before the 15th day after the date of enactment of the Act (the effective date of the extension), if those entries would have qualified for duty free treatment if they had been made on February 12, 2011.

2. Administrative Action

No administrative action is required.

TITLE VI – OFFSETS

Passenger Processing Fee

Section 601 of the bill amends section 13031 of the Consolidated Omnibus Budget Reconciliation Act of 1985 (COBRA) to eliminate the current exemption from customs user fees for air and sea passengers arriving from Canada, Mexico, and the Caribbean. The amendment leaves in place the exemption for travelers arriving from U.S. territories and possessions.

Customs User Fee Extension

Section 602 of the bill amends section 13031 of COBRA to extend from August 3, 2021 until September 30, 2021 the merchandise processing fees and from December 9, 2020 until August 31, 2021 the passenger and conveyance processing fees authorized under that act.

Timing of Estimated Corporate Tax Payments

Section 603 of the bill increases the amount of the required installment of estimated tax otherwise due from a corporation with at least \$1 billion in assets in July, August, or September 2016 by .50 percent. The bill reduces the next required installment to reflect the prior increase.

**STATEMENT ON HOW
THE UNITED STATES – COLOMBIA TRADE PROMOTION AGREEMENT
MAKES PROGRESS IN ACHIEVING
U.S. PURPOSES, POLICIES, OBJECTIVES, AND PRIORITIES**

A. INTRODUCTION

The United States – Colombia Trade Promotion Agreement (“Agreement”) makes progress in achieving the applicable purposes, policies, objectives, and priorities of the Bipartisan Trade Promotion Authority Act of 2002 (“TPA Act”). In addition, the Agreement reflects the May 10, 2007 bipartisan Congressional-Executive agreement on trade. This Statement describes how and to what extent the Agreement makes progress in achieving the applicable purposes, policies, objectives, and priorities.

The Agreement marks the beginning of a new chapter in our commercial partnership with Colombia. Since 1991, the U.S. commercial relationship with Colombia has been driven by the unilateral preferences the United States has provided under the Andean Trade Preference Act. Colombia has benefited significantly from this program, which was designed to promote broad-based economic development and provide sustainable economic alternatives to drug-crop production in the Andean region. The Agreement will make preferential access to the U.S. market for Colombian goods permanent. At the same time, however, it will make trade between the two countries a two-way street.

The Agreement will create significant new opportunities for American workers, farmers, businesses, and consumers by eliminating barriers to trade with Colombia. As detailed below, over 80 percent, by value, of U.S. exports of industrial and consumer goods (not including petroleum) will become duty-free immediately when the Agreement enters into force. An additional six percent will be duty-free within five years. All remaining tariffs on consumer and industrial goods will be eliminated within ten years. In particular, trade in all textile and apparel goods meeting the Agreement’s origin requirements will become duty-free immediately, providing new opportunities for U.S. fiber, yarn, fabric, and apparel exporters. Other key sectors that will benefit from duty elimination under the Agreement are information technology products, agricultural and construction equipment, auto parts, fertilizers and agro-chemicals, and medical and scientific equipment.

By value, almost 70 percent of current U.S. farm exports to Colombia will become duty-free immediately when the Agreement takes effect. Tariffs on more than 90 percent of the remaining trade in U.S. farm products will be phased out over 12 years or less, with all agricultural tariffs eliminated within 19 years. U.S. farm products that will benefit from improved market access include beef, pork, and poultry; wheat, corn, and rice; fruits and vegetables; and dairy and processed products. The Agreement addresses duty treatment for

imports of sensitive products into the United States, including through transition periods and the use of tariff-rate quotas (TRQs).

Colombia will substantially reduce barriers to bilateral trade in services and investment. The Agreement also includes high-standard provisions in such key chapters as intellectual property rights, electronic commerce, customs and trade facilitation, dispute settlement, and labor and environmental protection.

The Agreement forms an integral part of the Administration's larger strategy of opening markets around the world through negotiating and concluding global, regional, and bilateral trade agreements. The Agreement provides the opportunity to strengthen our economic and political ties with the region, and underpins U.S. support for democracy and fundamental values, such as respect for internationally recognized worker rights and the elimination of the worst forms of child labor.

The Agreement makes progress in achieving the applicable purposes, policies, objectives, and priorities that the Congress spelled out in the TPA Act. Accordingly, the President strongly believes that the Congress should approve the Agreement and enact the legislation needed to implement it.

B. OVERALL TRADE NEGOTIATING OBJECTIVES

The TPA Act sets out a variety of "overall trade negotiating objectives" that call for future U.S. trade agreements to: (1) open markets by eliminating or reducing barriers to and distortions of trade and creating reciprocal market opportunities, in particular for small businesses; (2) further strengthen international trading disciplines; (3) foster economic growth in the United States and globally; and (4) promote environmental and worker rights policies in the context of trade. The Agreement builds on the foundation of existing trade agreements to make substantial progress in achieving each of these objectives and, in addition, reflects the May 10, 2007 bipartisan Congressional-Executive agreement on trade.

1. Market Opening

The Agreement is comprehensive in scope. Each Party has agreed to liberalize trade in all goods, and to make significant market openings in services and government procurement.

Consumer/Industrial Goods. More than 80 percent of U.S. exports of industrial and consumer goods (not including petroleum) will enter Colombia duty-free when the Agreement enters into force. An additional six percent will be duty-free within five years. All remaining tariffs on consumer and industrial goods will be eliminated within ten years. Colombian tariffs on certain products of export interest to U.S. firms are as high as 35 percent.

Textiles and Apparel. The Agreement adopts a “yarn forward” origin rule, meaning that, generally, apparel using yarn and fabric from the United States and Colombia will qualify for preferential tariff treatment. All trade in textile and apparel goods that satisfy the Agreement’s rules of origin will be duty-free immediately.

Agriculture. Colombia’s bound tariffs on agricultural products under their World Trade Organization (“WTO”) commitments range from 15 percent to 388 percent. In contrast, the U.S. market has been largely open (through our unilateral preference programs) to agricultural imports from Colombia, with close to 100 percent of the value of Colombian exports entering the United States duty-free until the recent expiration of the Andean Trade Preference and the Generalized System of Preferences programs. Under the Agreement, almost 70 percent by value of our current agricultural exports to Colombia will be duty-free when the Agreement enters into force, including important export priorities such as high quality beef, cotton, wheat, soybeans, soybean meal, almonds, apples, peaches, pears, cherries, and many processed food products including frozen french fries and cookies. Tariffs on most other U.S. agricultural goods will be phased out within 12 years or less. For the most sensitive agricultural goods, tariffs will be eliminated within 19 years. For these goods, liberalization will be achieved through TRQs with zero-duty in-quota quantities that will increase over time, while over-quota tariffs are reduced to zero.

Services/Financial Services/Telecommunications. The Agreement will provide additional market opening in a broad range of service sectors, including express mail delivery, construction and engineering, computer and related services, advertising, professional services, distribution services, insurance, banking, and other financial services, and telecommunications.

Government Procurement. The Agreement will open Colombia’s government procurement market to U.S. suppliers for the first time, on transparent and non-discriminatory terms. Since Colombia is not a signatory to the WTO Agreement on Government Procurement, this will constitute a major benefit of the Agreement.

Regarding the reduction or elimination of barriers for small business, in 2009, U.S. small- and medium-sized enterprises (SMEs) exported \$3.1 billion in merchandise to Colombia, representing 34.4 percent of U.S. merchandise exports to Colombia. U.S. SMEs should benefit from the significant tariff cuts under the Agreement. In 2009, almost 88 percent of U.S. businesses exported to Colombia were SMEs.

2. Stronger International Trade Disciplines

The Agreement includes high-standard commitments to promote trade in digital products such as software, music, images, videos, and text. It draws from traditional trade principles to fashion customized nondiscrimination rules that will apply specifically to electronic commerce.

The Parties will not impose tariffs on digital products that are delivered over the Internet, and will determine the customs value of an imported carrier medium bearing a digital product based on the value of the carrier medium alone, regardless of the value of the digital product stored in the carrier medium.

The Agreement seeks to ensure that workers and firms can fully realize the Agreement's market-opening potential by building on disciplines currently in place through other agreements. Thus, the Agreement sets out rules on intellectual property rights ("IPR") that clarify and build on those in the WTO Agreement on Trade-Related Aspects of Intellectual Property Rights (TRIPS Agreement) and provide for implementation of more recent World Intellectual Property Organization treaties on protection of copyright and rights of performers and producers to strengthen enforcement and enhance IPR rules.

The Agreement also includes detailed rules governing telecommunications services, under which the Parties will apply market-opening disciplines that extend beyond those in effect under the WTO. In addition, the Agreement contains innovative procedures for settling disputes that may arise under the Agreement, including provisions for monetary assessments to back up dispute panel decisions.

3. Foster Economic Growth

According to the U.S. International Trade Commission (ITC), the agreement will boost U.S. GDP by more than \$2.5 billion. The ITC estimated that U.S. exports to Colombia would increase by \$1.1 billion. Formal models, such as the ITC model, however, tend to underestimate the benefits of trade agreements because their scope is limited (*e.g.*, they fail to assess the impact of rules changes such as improved IPR protection and group many industries and products into a limited number of categories for analysis) and because not all the expected effects of the Agreement are necessarily measured (*e.g.*, they fail to estimate or fully estimate dynamic or intermediate growth gains from trade liberalization). The ITC model, specifically, also did not reflect the removal of barriers to trade in services. It is clear, therefore, that the Agreement will produce economic gains beyond those accounted for by the ITC.

4. Labor Rights and Environmental Protection

Trade agreements can, and should, complement efforts to protect worker rights and enhance environmental protection. Accordingly, the Agreement includes meaningful commitments by each country on labor and environmental protection. The set of commitments included in the Agreement reflects the May 10, 2007 bipartisan Congressional-Executive agreement on trade.

The Parties reaffirm their obligations as members of the International Labor Organization ("ILO"). The Agreement is one of the first U.S. trade agreements to include a provision requiring each Party to adopt and maintain in its statutes and regulations, and practice thereunder,

fundamental labor rights, as stated in the 1998 ILO *Declaration on Fundamental Principles and Rights at Work and its Follow-up*, including for purposes of the Agreement's Labor Chapter a prohibition on the worst forms of child labor. To establish a violation of this obligation a Party must demonstrate that the other Party has failed to comply with its terms in a manner affecting bilateral trade or investment. The Agreement also provides that neither Party will waive or derogate from the statutes and regulations that implement this obligation in a manner affecting trade or investment between the Parties.

Each Party also agrees that it will not fail to effectively enforce its labor laws on a sustained or recurring basis in a manner affecting bilateral trade or investment. The chapter defines "labor laws" to include laws directly related to the labor rights as stated in the ILO Declaration, laws providing for acceptable conditions of work with respect to minimum wages, hours of work, and occupational safety and health, and laws providing labor protections for children and minors, including the effective abolition of child labor and a prohibition on the worst forms of child labor. All obligations set out in the Labor Chapter will be subject to enforcement through the same dispute settlement procedures and remedies as the Agreement's commercial obligations. The Parties will also create a labor cooperation and capacity building mechanism through which they will work together to enhance opportunities to improve labor standards and to further advance common commitments regarding labor matters.

The Agreement's Environment Chapter commits each Party to strive to ensure that its laws and policies provide for and encourage high levels of environmental protection and to continue to improve those laws and policies. The Agreement is also one of the first U.S. trade agreements to require each Party to adopt, maintain, and implement laws, regulations, and all other measures to fulfill its obligations under listed multilateral environmental agreements ("covered agreements") to which both governments are parties. To establish a violation of this obligation a Party must demonstrate that the other Party has failed to comply in a manner affecting bilateral trade or investment.

The Environment Chapter will also require each Party not to fail to effectively enforce its domestic environmental laws, and its laws, regulations, and other measures to fulfill its obligations under the covered agreements, on a sustained or recurring basis in a manner affecting bilateral trade or investment. The Environment Chapter also provides that neither Party may waive or derogate from its environmental laws in a manner affecting trade or investment between the Parties other than pursuant to the waiver provisions of those laws. Further, the Chapter contains provisions to enhance the mutual supportiveness of trade and environmental policies. As is the case for the Agreement's Labor Chapter, all obligations under the Environment Chapter will be subject to enforcement through the same dispute settlement procedures and remedies as those applicable to the Agreement's commercial obligations. The Parties have also negotiated a separate Environmental Cooperation Agreement to facilitate bilateral cooperation on environmental matters.

The Agreement's government procurement chapter clarifies that government agencies

may include technical specifications in their procurements to promote environmental protection. In addition, the Agreement's chapter on government procurement clarifies that in procurements subject to the Agreement, a government agency may adopt technical specifications that require suppliers to comply with generally applicable laws regarding fundamental principles and rights at work and acceptable conditions of work in the territory where the suppliers make the product or perform the service that the agency will purchase.

C. PRINCIPAL TRADE NEGOTIATING OBJECTIVES

The TPA Act establishes a variety of "principal trade negotiating objectives." The Agreement makes substantial progress toward each of the applicable goals set out in the Act.

1. Opening Markets for U.S. Goods

Under the Agreement, U.S. exporters will enjoy increased market opportunities and greater certainty regarding the terms for access to markets in Colombia. For example, in addition to cutting tariffs on agricultural goods, the United States and Colombia will work together on sanitary and phytosanitary ("SPS") matters, with a view to facilitating bilateral trade, while appropriately protecting human, animal, and plant life and health. To that end, the Parties will create an SPS Standing Committee to address SPS issues. The Parties will also enhance cooperation on technical regulations, standards, and conformity assessment procedures, which will help to prevent unnecessary technical barriers to trade ("TBT") that hinder U.S. companies from taking advantage of the Colombian market.

2. Opening Markets for U.S. Services

The Agreement will create new market opportunities in Colombia for a range of key U.S. services suppliers and will lock in access in sectors where Colombia's services markets are already open. The Agreement includes a market-opening services framework based in substantial part on a trade-liberalizing "negative list" approach. This means that all services sectors will be subject to the Agreement's rules unless a country negotiated a specific exemption.

The Agreement will either open or lock in existing access to Colombia's services markets in such priority U.S. services sectors as financial services, telecommunications, computer and related services, distribution services, professional services, advertising, audiovisual services, education and training, tourism, construction and engineering, energy services, and environmental services. The Agreement's market-opening provisions are complemented by high-standard rules governing regulatory transparency – rules that are especially important given the highly regulated nature of many services industries.

Under the Agreement, Colombia will enhance access for U.S. suppliers in another key services market – express delivery. The Agreement includes a comprehensive definition of express delivery services that requires Colombia to provide national treatment, normal trade relations (most-favored-nation) ("NTR (MFN)") treatment, and additional market access to U.S.

express delivery service suppliers. The Agreement also addresses the issue of postal monopolies directing revenues derived from monopoly postal services to confer an advantage on express delivery services.

3. Opening Markets for U.S. Investment

Under the Agreement, Colombia will provide a strong and predictable legal framework for U.S. investors. Investments covered by the Agreement will include companies, real estate, intellectual property rights, concessions, permits, and certain debt instruments in Colombia. With limited exceptions, the Agreement will give U.S. investors the opportunity to establish, acquire, and operate investments in Colombia on the same basis as Colombia's own investors or other foreign investors. Under the Agreement, the United States will continue to provide Colombian investors a high level of protection and due process, but, consistent with TPA negotiating objectives, the Agreement does not require the United States to give Colombian investors greater substantive rights than U.S. companies already enjoy in the United States.

Under the Agreement, Colombia will provide U.S. investors substantive protections and due process rights that are consistent with U.S. legal principles and practice. For example, the Agreement includes protection against denials of justice in accordance with the principle of due process embodied in the principal legal systems of the world. The expropriation provisions of the Agreement draw heavily from principles developed in U.S. takings law under the Fifth Amendment of the U.S. Constitution. Colombia may expropriate an investment only for a public purpose and only if it acts in a non-discriminatory manner, affords an affected investor due process, and pays prompt, adequate, and effective compensation. The Agreement also clarifies that expropriation claims are limited to property rights and property interests, not other types of interests, and incorporates tests used by the U.S. Supreme Court to determine whether a regulatory taking has occurred. The expropriation provisions also recognize that, as has been the case in U.S. practice, nondiscriminatory regulatory actions designed and applied to protect legitimate public welfare objectives only rarely constitute an expropriation.

The Agreement will also prohibit Colombia from burdening investors with protectionist "performance requirements" – such as rules requiring investors to buy local products – and will ensure that Colombia allows U.S. investors to transfer funds related to their investments into and out of Colombia.

The Agreement establishes a dispute settlement mechanism that will allow an investor from one Party who invests in the other Party to pursue a damages claim under the Agreement against the host government through binding international arbitration. The investor may assert that the Party has breached a substantive obligation of the Investment Chapter or that the Party has breached an investment agreement with, or an investment authorization granted to, the investor or its investment. Key provisions afford public access to information on investor-State dispute settlement proceedings. For example, the Agreement will require the Parties to make key documents available to the public and to open arbitral hearings to the public, with limited

exceptions for business and other legally confidential information. The Agreement also authorizes arbitral tribunals to accept *amicus* submissions from the public. In addition, the Agreement includes provisions, based on those used in U.S. courts, to dispose quickly of frivolous claims.

Finally, the Agreement calls on the Parties, within three years after the Agreement enters into force, to consider whether to establish an appellate body or similar mechanism to review arbitral awards rendered by tribunals under the Investment Chapter.

4. Intellectual Property Rights

The Agreement will clarify and build on existing international standards for the protection and enforcement of intellectual property rights, with an emphasis on new and emerging technologies. The Agreement ensures that Colombia will provide a high level of IPR protection, similar to that provided under U.S. law. Key provisions of the Agreement, such as those on preventing circumvention of anti-piracy devices and establishing the scope of liability for copying works on the Internet, are modeled on U.S. statutes.

The Agreement includes state-of-the-art protection for trademarks and copyrights as well as expanded protection for patents and undisclosed information.

The Agreement will require Colombia to accede to certain international Internet treaties and to extend its term of protection for copyrighted works. The Agreement also provides enhancements of the rights of copyright owners over digital copies of their works. Each Party must require that its government agencies use only legitimate computer software, thus setting a positive example for private users. To prevent piracy of satellite television broadcasts, the Agreement will also require Colombia to protect program-carrying encrypted satellite signals as well as the programming those signals carry.

Under the Agreement, Colombia will commit to make patent rights available for inventions, with certain limited exceptions. Colombia also will commit to make best efforts to process patent applications and marketing approval applications expeditiously. With respect to most products, Colombia must provide adjustments to the patent term to compensate for unreasonable delays that occur while granting a patent; Colombia may also make such adjustments available with respect to pharmaceutical products that are subject to unreasonable delays in the issuance of a patent or in the granting of marketing approval. In addition, Colombia will commit to protect test data and other information that pharmaceutical and agricultural chemical companies submit to government regulators in order to secure regulatory approval for their patented products. Colombia will protect such information generated in connection with pharmaceutical and agricultural chemical product approvals for specific periods of time - normally five years for pharmaceuticals and ten years for agricultural chemicals. When relying on the United States' previous approval of a pharmaceutical product, and upon meeting certain

other conditions for expeditious approval, the period of protection for test and other data in Colombia will be counted from the date of approval of that product in the United States.

These standards of IPR protection are made more meaningful through requirements for tough enforcement measures and remedies to combat piracy and counterfeiting, including procedures in civil cases for seizure and destruction of pirated and counterfeit products, and the equipment used to produce these products. Colombia also will commit to ensure that its judicial authorities are empowered to issue remedies including imprisonment and deterrent level sentences. Colombia must also authorize its enforcement officials to act on their own against counterfeit and pirated goods, either by stopping them at the border or initiating criminal cases, without receiving a formal complaint from rights holders, thus providing more effective enforcement against these products.

The text of the Agreement includes an understanding regarding public health and reaffirms the commitment of the Parties to the *Doha Declaration on the TRIPS Agreement and Public Health*.

5. Transparency

Without a high standard of regulatory transparency, the benefits of market-opening trade commitments can be lost through arbitrary or unfair government regulations. Accordingly, the Agreement includes provisions that will ensure that Colombia observes fundamental principles of regulatory transparency. Those provisions are set out in a specific Chapter of the Agreement dealing with regulatory transparency as well as in provisions of the Agreement addressing customs administration, TBT, government procurement, investment, cross-border trade in services, financial services, telecommunications, and dispute settlement. The Agreement's principal transparency rules are based on U.S. practice under the Administrative Procedures Act.

Increased transparency is an effective tool in addressing government corruption in international trade. The Agreement contains innovative provisions on combating bribery and corruption. Under the Agreement, Colombia must adopt or maintain prohibitions on bribery of public officials in matters affecting international trade and investment, including bribery of foreign officials, and establish criminal penalties for such offenses. In addition, Colombia must strive to adopt appropriate measures to protect those who, in good faith, report acts of bribery. Furthermore, under the Agreement the United States and Colombia will affirm their commitment to prevent and combat corruption in international trade and agree to work jointly to support appropriate initiatives in international fora.

6. Regulatory Practices

The Agreement addresses regulatory issues directly linked to the Agreement's market-opening provisions. This includes specific provisions in almost all Chapters, including those on customs administration, SPS, TBT, government procurement, cross-border trade in services, and

telecommunications. In addition, the Agreement includes commitments on transparency, rights of appeal of administrative decisions, and access to information.

7. Electronic Commerce

Under the Agreement, the Parties must apply the principles of national treatment and NTR (MFN) treatment to trade in electronically transmitted digital products (*e.g.*, computer programs, video, images, and sound recordings). The Agreement includes rules prohibiting duties on electronically transmitted digital products and limiting duties on digital products stored on a carrier medium to a duty based on the value of the carrier medium alone. In so doing, the Agreement will create a strong foundation for wider efforts to bar duties and discriminatory treatment of digital products. The Agreement also includes provisions relating to the authentication of electronic transactions, online consumer protection, and the acceptance of electronically transmitted trade administration documents.

8. Trade in Agricultural Products

As described above, the Agreement will cut Colombian tariffs on U.S. agricultural products, with immediate duty-free access across a wide variety of U.S. farm and ranch products. The Agreement includes several provisions designed to eliminate barriers to trade in agricultural products, while providing reasonable adjustment periods, TRQs, and other mechanisms for producers of import-sensitive agricultural goods. In addition, the Agreement will commit the United States and Colombia to work together toward a multilateral agreement in the WTO to eliminate agricultural export subsidies and prevent their reintroduction in any form.

Under the Agreement, each Party will eliminate export subsidies on agricultural goods destined for the other Party. If a third country subsidizes exports to a Party, the other Party may initiate consultations with the importing Party to develop measures the importing Party may adopt to counteract such subsidies. If the importing Party agrees to such measures, the exporting Party must refrain from applying export subsidies to its exports of the good to the importing Party.

The Agreement also includes a safeguard procedure for certain agricultural goods to aid domestic industries that face imports above a specified quantitative threshold for such goods.

9. Labor Rights and Environmental Protection

As described earlier, the Agreement is one of the first U.S. trade agreements to include a commitment by each Party to implement in its law and practice the fundamental labor rights as stated in the ILO Declaration, reflecting a key element of the May 10, 2007 bipartisan Congressional-Executive agreement on trade. Moreover, a key element of the Agreement's Labor Chapter is a commitment by each country not to fail to effectively enforce its labor laws, including its laws embodying fundamental labor rights as stated in the ILO Declaration, through

a sustained or recurring course of action or inaction in a manner affecting bilateral trade or investment. In addition, all of the Agreement's labor obligations will be enforceable through the same dispute settlement procedures and remedies that apply to the Agreement's commercial obligations. The United States and Colombia also will commit to cooperate on labor issues, in part through the Labor Cooperation and Capacity Building Mechanism described in an annex to the Labor Chapter.

The Agreement is also one of the first U.S. trade agreements to call for each Party to adopt, maintain, and implement laws, regulations, and all other measures to fulfill its obligations under certain multilateral environmental agreements (MEAs) to which both governments are parties. Similar to a provision in the Agreement's labor chapter, a key component of the Agreement's environmental provisions is a commitment by each Party that it will not fail to effectively enforce its environmental laws and its measures to fulfill its obligations under the specified MEAs through a sustained or recurring course of action or inaction in a manner affecting bilateral trade or investment. The Agreement also will prohibit each Party from waiving or otherwise derogating from its environmental laws in a manner affecting bilateral trade or investment other than pursuant to the waiver provisions of those laws. Each of the obligations set out in the Agreement's Environment Chapter will be enforceable through the same dispute settlement procedures and remedies as those available to enforce the Agreement's commercial obligations.

In addition, the Agreement includes a public submissions mechanism that will allow persons of a Party to raise concerns about a Party's enforcement of its environmental laws. The Parties will designate an independent secretariat to receive and consider such submissions and, in appropriate cases, the secretariat will develop a factual record related to the submission for consideration by the Agreement's Environmental Affairs Council. The Agreement also recognizes that the Parties negotiated an Environmental Cooperation Agreement under which they will engage in priority cooperation activities.

10. Dispute Settlement

The Agreement includes detailed procedures for settling disputes that may arise between the Parties over its implementation. The Agreement's dispute settlement remedies and procedures will be available for all of its enforceable obligations, including the Agreement's commercial, environmental, and labor provisions.

The Agreement's dispute settlement procedures will rely principally on consultations and compliance rather than on imposition of trade sanctions or penalties. The procedures will set high standards of openness and transparency. The Agreement requires dispute settlement proceedings to be open to the public, the disputing Parties to release their legal briefs and other filings to the public (except for confidential information), and dispute settlement panels to have the authority to receive submissions from interested non-governmental groups.

If a panel finds that a Party has violated an obligation under the Agreement, the Parties must seek to agree on a resolution to the dispute. If the Parties cannot agree on a resolution, they must try to agree on acceptable trade compensation. If they cannot agree on compensation, or if the complaining Party believes the defending Party has failed to implement an agreed resolution, the complaining Party may provide notice that it intends to suspend trade benefits equivalent in effect to those impaired as a result of the disputed measure. The complaining Party cannot suspend benefits, however, if the defending Party provides notice that it will pay an annual monetary assessment to the other Party. The Parties must seek to agree on the amount of the assessment. If they cannot, the assessment will be set at 50 percent of the level of trade concessions the complaining Party is authorized to suspend. This mechanism meets the objectives of encouraging the provision of trade-expanding compensation as well as the imposition of penalties to encourage compliance.

11. Trade Remedies

The Agreement includes a safeguard procedure, similar to the procedures in other U.S. trade agreements, which will be available to aid domestic industries, in the unlikely event that an industry sustains or is threatened with serious injury due to increased imports resulting from the reduction or elimination of U.S. import duties under the Agreement. The Agreement also includes a special safeguard mechanism to address the possibility that duty reduction or elimination under the Agreement could result in damaging levels of textile or apparel imports.

The Agreement will not affect U.S. rights to take safeguard actions under section 201 of the Trade Act of 1974, which implements the WTO Safeguards Agreement and the General Agreement on Tariffs and Trade (“GATT”) 1994. Under the Agreement, the President may, but will not be required to, exempt imports of goods from Colombia from a WTO safeguard measure, if the goods are not a substantial cause of serious injury or threat thereof.

The Agreement provides that each country will retain its rights and obligations under the WTO agreements relating to antidumping and countervailing duties. Thus, the Agreement will not affect U.S. rights and obligations regarding these trade remedies as they currently exist under the WTO. In addition, the Agreement provides that nothing in it shall be construed to impose any rights or obligations on the Parties with respect to antidumping and countervailing duty measures.

D. PRIORITIES FOR MAINTAINING GLOBAL COMPETITIVENESS

The TPA Act also calls for the President to promote certain priorities to address and maintain U.S. competitiveness in the global economy. The Agreement makes progress in promoting each of these priorities.

1. Labor Cooperation

The United States and Colombia are members of the ILO and have a longstanding cooperative relationship on labor issues. During the negotiations, government labor experts from the two countries consulted on their labor laws and how their respective systems operate. The Agreement includes a labor cooperation and capacity building mechanism to enhance opportunities to improve labor standards, including the principles embodied in the ILO *Declaration on Fundamental Principles and Rights at Work and its Follow-up* and ILO *Convention 182 Concerning the Prohibition and Immediate Action for the Elimination of the Worst Forms of Child Labour*. The Agreement will establish a framework for the labor cooperation and capacity building mechanism, including a range of possible labor cooperation activities. Officials of the U.S. Department of Labor and Colombia's labor ministry and other appropriate agencies will serve as contact points under the Agreement and participate in this mechanism.

2. Domestic Policy Objectives

The Agreement fully takes into account critical U.S. domestic policy objectives, such as the need to maintain flexibility in addressing U.S. national security and public health, safety, and consumer interests. The Agreement will include a broad set of general policy exceptions for measures governing trade in both goods and services to ensure that the United States remains fully free to safeguard the national and public interest, including specific exceptions for national security, public health and morals, conservation, taxation, and protection of confidential information. Consistent with the May 10, 2007 bipartisan Congressional-Executive agreement on trade, the Agreement includes language clarifying that an arbitral tribunal or panel must apply the Agreement's "essential security" exception if a Party invokes it in a proceeding. The Agreement also avoids disturbing existing state and local governmental measures by including "grandfather" clauses that will exempt those measures from challenge under the Agreement.

3. Relationship between Covered MEAs and the Agreement

As noted in the Administration's environmental review of the Agreement, the environment and sustainable development are important concerns for both the United States and Colombia. The Agreement's Environment Chapter will obligate each Party to adopt and maintain laws, regulations, and all other measures to fulfill its obligations under certain MEAs to which the United States and Colombia are both parties. In addition, the Parties expressly recognize that MEAs play an important role in protecting the environment and that the Environment Chapter and the Environmental Cooperation Agreement can contribute to realizing the objectives of those MEAs. The Agreement, therefore, will commit the Parties to continue to seek means to enhance the mutual supportiveness of MEAs and trade agreements to which they are both parties. In the event of any inconsistency between a Party's obligations under the Agreement and one of the specified MEAs, the Agreement provides that the Party shall seek to balance its obligations under both agreements, but this will not preclude the Party from taking a

measure to comply with the MEA as long as the measure's primary purpose is not to impose a disguised restriction on trade.

4. Currency and Exchange Rate Manipulation

Section 2102(c)(12) of the TPA Act states that “[i]n order to address and maintain United States competitiveness in the global economy, the President shall ... seek to establish consultative mechanisms among parties to trade agreements to examine the trade consequences of significant and unanticipated currency movements and to scrutinize whether a foreign government engaged in a pattern of manipulating its currency to promote a competitive advantage in international trade.”

The Investment, Cross-Border Trade in Services, and Financial Services chapters of the Agreement will promote and protect the freer international movement of capital and consequently make it more difficult to manipulate exchange rates to achieve levels inconsistent with levels set by market forces.

The currency movements mentioned in section 2102(c)(12) can arise from many conditions, particularly from macroeconomic developments, macroeconomic policy changes or the appearance of new information on fundamental economic conditions. The determination of whether any such movement reflects currency manipulation to promote a competitive advantage in international trade must therefore take into account a broad range of issues, institutions and market developments which will require a review mechanism with a larger scope than any specific trade agreement.

The Secretary of the Treasury, under the Omnibus Trade and Competitiveness Act of 1988, provides semiannual reports on the international economic and exchange rate policies of the major trading partners of the United States after having consulted with the Board of Governors of the Federal Reserve System and with the International Monetary Fund (“IMF”) management and staff. These reports consider whether countries manipulate the rate of exchange between their currency and the United States dollar for purposes of preventing effective balance of payments adjustments or gaining an unfair competitive advantage in international trade. Each member of the IMF is obligated, under Article IV of the IMF Articles of Agreement, to avoid manipulation of exchange rates for such purposes.

In its analysis of exchange rate policies of foreign countries and in consultations with the IMF concerning these policies, the Department of the Treasury will ensure that currency movements mentioned in section 2102(c)(12) are examined. The Department of the Treasury will seek to resolve problems of currencies that are considered to be manipulated in the sense of section 2102(c)(12) through discussions with the foreign authorities responsible for foreign exchange rate policies.

5. Reporting Requirements

As required under the TPA Act, the Administration has provided a report to the Congress describing Colombia's laws governing exploitative child labor. In addition, the Administration has reported to the appropriate Congressional committees as required under the TPA Act on: (1) the Administration's environmental review of the Agreement; and (2) its review of the Agreement's impact on U.S. employment. The Administration has also provided a labor rights report on Colombia, which will be made available to the public. Finally, the Administration has reported, as specified in the TPA Act, on U.S. efforts to establish consultative mechanisms to strengthen Colombia's capacity to promote respect for core labor standards and to develop and implement standards for the protection of the environment and human health based on science.

STATEMENT OF WHY THE U.S. – COLOMBIA TRADE PROMOTION AGREEMENT IS IN THE INTERESTS OF U.S. COMMERCE

INTRODUCTION

The United States – Colombia Trade Promotion Agreement (U.S. – Colombia TPA or Agreement) provides for reciprocal trade liberalization between the United States and Colombia. The U.S. – Colombia TPA is a comprehensive, trade opening agreement that will eliminate tariffs and other barriers to trade, open Colombia's market for service providers, and promote investment. By promoting economic growth in Colombia, the U.S. – Colombia TPA will expand U.S. opportunities in an important regional market and further U.S. commercial interests. The Colombia TPA will also support the President's National Export Initiative goal of doubling exports by the end of 2014.

In May 2004, the United States initiated trade negotiations with Colombia, Ecuador and Peru. Negotiations with Colombia were completed February 27, 2006, and the U.S. – Colombia TPA was signed on November 22, 2006. The Agreement was amended on June 28, 2007.

WHY A COLOMBIA TRADE PROMOTION AGREEMENT?

Colombia is one of many developing countries that has enjoyed duty-free access to the U.S. market for the majority of its exports through trade preference programs. Developing countries often have high tariff and non-tariff barriers to U.S. exports and impose restrictions on U.S. businesses. Trade agreements like the U.S. – Colombia TPA not only reduce barriers to U.S. trade, but also require important reforms to the domestic legal and business environments that are key to encouraging business development and investment. Such reforms include providing greater transparency for government actions such as rule making, implementing anti-corruption measures and otherwise strengthening the rule of law, improving the protection and enforcement of intellectual property rights, and providing clear guidance on customs matters.

Moves the Trade Relationship to Full Partnership

Over 90 percent of imports from Colombia into the United States have benefitted from duty-free treatment either on a Normal Trade Relations/Most Favored Nation (NTR/MFN) basis or through U.S. unilateral preference programs such as the Andean Trade Preferences Act (ATPA) and the Generalized System of Preferences (GSP). Colombia's tariffs on U.S. goods average over 9 percent.

The U.S. – Colombia TPA moves beyond one-way preferences to full partnership and reciprocal commitments under which U.S. exports also benefit from duty-free treatment.

Expanding Economic Opportunities for U.S. Manufacturers, Workers, and Farmers

Colombia is a free market economy with growing commercial and investment ties to the United States. Between 2006 and 2010, U.S. exports to Colombia grew 80 percent from

\$6.7 billion in 2006 to \$12 billion in 2010¹, outperforming overall U.S. export growth, which was 25 percent for the same period.² The market access and trade disciplines provided by the Agreement offer an opportunity to further expand U.S. exports to a region that is already seeing high export growth rates. In 2010, U.S.- Colombia total trade amounted to \$27.7 billion and Colombia was our 20th largest export market.³ In Latin America, Colombia is the United States' fourth largest trading partner, behind Mexico, Brazil and Venezuela. Colombia is the second largest export market for U.S. farm goods in South America.⁴ A U.S. International Trade Commission study estimates that U.S. exports to Colombia will be \$1.1 billion higher once the U.S. – Colombia TPA is fully implemented.⁵

Just as bilateral trade is poised to grow under the U.S. – Colombia TPA, so is U.S. investment in the Colombian market. The stock of U.S. foreign direct investment (FDI) in Colombia in 2009 was approximately \$6.7 billion⁶, mainly in the natural gas, coal mining, chemical, and manufacturing industries. This represents a significant jump from \$3.8 billion in U.S. FDI in Colombia in 2006.

Unlike many of its neighbors, Colombia has not suffered any dramatic economic collapses in recent years. In fact, Colombia's economy grew 4.3 percent in 2010⁷ and Standard & Poor's boosted Colombia's credit rating to investment grade in March 2011, citing the country's resilience against external shocks and favorable growth prospects.⁸

In a region that suffers from frequent instability, the Government of Colombia has demonstrated a commitment to steady economic growth, democratic principles and close cooperation with the United States on counter-narcotics enforcement. With the U.S. – Colombia TPA, Colombia will offer a more stable investment climate, more reliable access to international arbitration if disputes do arise, and a vibrant market for U.S. exports for years to come.

Leveling the Playing Field

The U.S. – Colombia TPA will level the playing field for U.S. businesses that sell to Colombia. In 2010, over 90 percent of U.S. imports from Colombia entered duty-free on an MFN basis or under unilateral U.S. trade preference programs, such as the Andean Trade Preference Act (ATPA) and the Generalized System of Preferences (GSP).⁹ The ATPA has been effective in expanding and enhancing the U.S.-Colombia commercial relationship, providing the U.S. government a vehicle through which to address problems, as well as encouraging economic growth in Colombia and discouraging illicit drug production. However, the ATPA offers U.S. exporters no equivalent access to the Colombian market. The U.S. – Colombia TPA levels the playing field, and enhances competition by moving the U.S. – Colombia commercial relationship beyond one-way preferences to full partnership and reciprocal commitments.

The U.S. – Colombia TPA is essential to ensuring U.S. competitiveness in Colombia, a fast-growing regional market of 45 million consumers. In 1999, the United States provided 36 percent of all Colombian imports; in 2010 our market share fell to 26

percent¹⁰. Implementing the U.S. – Colombia TPA can help U.S. businesses and their workers stem this downward slide by making U.S. goods more competitive in the Colombian market. Colombia is well on its way to completing its goal of 11 trade accords with more than 40 countries.¹¹ Since the signing of the U.S. – Colombia TPA in 2006, Colombia has implemented trade accords with Guatemala, El Salvador, Honduras, and Chile; signed agreements with Canada, the European Union, and EFTA (Norway, Liechtenstein, Iceland, Switzerland); expanded its trade accord with Mexico; and initiated trade negotiations with South Korea and Panama. Negotiations on a Colombia-Japan trade agreement are expected to continue in 2011 and talks with Turkey are scheduled to begin in 2011.¹² In addition, through the Andean Community Colombia is party to an economic complementation agreement with the MERCOSUR countries, which include Brazil and Argentina. Should the United States not implement the U.S. – Colombia TPA, the U.S. share of Colombia's imports will likely erode as Colombia's trade agreements with competitor countries take hold, leaving U.S. exporters in an increasingly disadvantaged position.

Advancing the U.S. Trade Agenda

The U.S. – Colombia TPA is a key part of the Administration's regional and global efforts to open markets and enable U.S. businesses to sell goods and services around the world. It signals that Colombia is ready to join the United States, Mexico, Canada, Chile, Central America, the Dominican Republic and Peru as free trade leaders in the hemisphere. As these countries' stake in the trading system expands, the United States and Colombia will look for new opportunities to work together in other multilateral fora such as the World Trade Organization (WTO). The common disciplines and trade objectives developed through the U.S. – Colombia TPA will enhance our ability to forge consensus on the global trading level.

Supporting Democracy, Economic Reform and Regional Integration

Like the ATPA, the U.S. – Colombia TPA promotes close cooperation between the United States and Colombia on a number of important regional issues such as counter-narcotics, economic development and support for democracy. In the early 1990s, Colombia unilaterally initiated economic liberalization or "apertura" which included tariff reductions, financial deregulation, privatization of state-owned enterprises and the adoption of a more liberal foreign exchange regime. The United States has supported this transition to democratic institutions and enhanced economic growth through a number of programs including the ATPA.

The U.S. – Colombia TPA commits Colombia to adopt more open and transparent procedures that should strengthen civil society and the rule of law in the region, as well as reinforce market reforms. These reforms, coupled with increased trade and investment flows, should promote expanded growth and openness in the region, as well as support common efforts to achieve stronger labor and environmental protection.

U.S. SMALL AND MEDIUM-SIZED ENTERPRISES: KEY EXPORTERS TO COLOMBIA

The U.S. – Colombia TPA will be of particular benefit to U.S. small and medium-sized enterprises (SMEs), those enterprises with fewer than 500 employees. In 2009, U.S. SMEs exported \$3.1 billion in merchandise to Colombia. This represented 34.4 percent of known U.S. merchandise exports to Colombia -- above the 32.8 percent SME share of U.S. exports to the world.¹³ Of the 13,177 U.S. firms that exported to Colombia in 2009, 11,562, or 87.7 percent, were SMEs.

U.S. SMEs particularly benefit from the tariff eliminating provisions of trade agreements, and should benefit from the significant tariff cuts under the U.S. – Colombia TPA. Trade agreements also help U.S. small businesses seeking to export by improving intellectual property protections; reducing non tariff barriers; easing customs administration; targeting services barriers which are especially difficult for small businesses, such as requirements for staffing an office in the foreign market; and increasing public online access to information about foreign governments laws and regulations.

Eighty-eight percent of U.S. businesses exporting to Colombia in 2009 were small and medium-sized enterprises.

The transparency obligations, particularly those contained in the customs chapter, are also very important to U.S. SMEs, which may not have the resources to navigate customs and regulatory red tape.

Trade is important to U.S. SMEs

- U.S. SMEs are already taking advantage of U.S. efforts to open markets throughout the world. In 2009, SMEs represented nearly 96 percent of companies exporting to our NAFTA partners.
- SMEs represent a majority of U.S. exporting companies to our other trade agreement partners, including Australia (91 percent), Singapore (90 percent), and Chile (87 percent), and Morocco (75 percent)¹⁴.
- U.S. SMEs represented at least 80 percent of all U.S. exporters to the individual Dominican Republic-Central America Free Trade Agreement partner countries (Costa Rica, the Dominican Republic, El Salvador, Guatemala, Honduras, and Nicaragua) in 2008.

ENHANCED MARKET ACCESS TO COLOMBIA

Over 80 percent¹⁵ of U.S. exports of consumer and industrial goods to Colombia will be duty-free immediately upon entry into force of the Agreement, with remaining tariffs phased out over ten years. Within each of the following key industrial sectors, almost all goods will gain immediate duty-free access to the Colombian market: agriculture and

construction equipment, aircraft and parts, auto parts, fertilizers and agro-chemicals, information technology equipment, and medical and scientific equipment. Key U.S. agriculture exports such as cotton, wheat, soybeans, high quality beef, apples, pears, peaches, cherries and almonds, will receive immediate duty-free treatment.

Best Prospects for Increased Market Growth for Non-Textile Industrial Goods

Information Technology Goods

More than 95 percent of information and communications technology goods will be duty-free upon entry into force of the Agreement. Despite tariffs that average 8.5 percent and range up to 20 percent, U.S. exports of information technology goods amounted to \$788 million in 2010, accounting for 8.3 percent of total U.S. industrial exports to Colombia.¹⁶ With the immediate removal of most tariffs, U.S. exports will become much more competitive and affordable to Colombians.

<i>Average Colombian Tariffs on Imports of Industrial Goods from the United States</i>	
Autos and Auto parts	17.4%
Building Products	13.2%
Chemicals	7.6%
Consumer Goods	15%
Information & Communications Technology	8.5%
Machinery	9.4%
Metals and Ores	9.2%
Paper and Paper Products	12.5%
Transportation Equipment	9.3%

Colombia also agreed to join the WTO Information Technology Agreement (ITA). U.S. exporters of information technology goods will all benefit from this provision.

Agriculture and Construction Equipment, Machinery

Approximately 97 percent of U.S. exports of agricultural equipment and over 98 percent of U.S. exports of construction equipment to Colombia will be duty-free immediately upon entry into force of the Agreement. Together, U.S. exports of these capital goods to Colombia were valued at \$806 million in 2010¹⁷.

Over 66 percent of U.S. machinery exports to Colombia will be duty-free upon entry into force of the U.S. – Colombia TPA. U.S. exports of machinery to Colombia were valued at almost \$1.3 billion in 2010.

U.S. exporters of agricultural and construction equipment, food processing, storage and packing equipment and heating and cooling equipment will benefit significantly from the Agreement. With the immediate elimination of most industrial machinery tariffs, and phase-out of all remaining tariffs, U.S. exports will be much more competitive compared to goods from other countries.

Colombia’s national strategy to boost public infrastructure spending, combined with rapidly growing investment in the energy and construction sectors, will continue to fuel

demand for specialized machinery. Colombia's recent efforts to increase oil and gas exploration and extraction include very attractive contractual terms and incentives for new entrants in the market, creating additional demand for equipment. The Agreement's provisions will give U.S. exporters a strong competitive advantage over European and Asian suppliers.

Chemicals

Chemicals accounted for over 28 percent of U.S. industrial exports to Colombia in 2010, totaling \$2.7 billion. Current tariffs of up to 20 percent will fall to zero on 86 percent of chemical exports immediately upon implementation of the Agreement. The remaining tariffs will phase out over ten years. Best prospects in this sector include organic chemicals, medications, polymers and resins, and fertilizers. Tariffs on all fertilizers and agrochemical exports will be eliminated immediately upon entry into force of the Agreement.

Remanufactured Equipment

Under the Agreement, U.S. exporters will for the first time be able to sell high-quality remanufactured equipment in Colombia. Currently, these goods face an import ban. Upon implementation of the Agreement, U.S. remanufacturers of many goods, such as engines, radiators, and alternators for construction equipment and transportation machinery, will be able to export their goods to Colombia without being subject to any prohibitions or restrictions. Remanufacturing is a labor-intensive activity that allows the recycling of discarded or used "cores," which are normally the heaviest basic parts, such as an engine or radiator. The industry employs tens of thousands of U.S. workers. Under the U.S. – Colombia TPA, tariffs on most remanufactured goods will be eliminated immediately and tariffs on a small number of goods will be phased out over ten years. This is an excellent opportunity for U.S. exporters of remanufactured equipment, including computers, cellular telephones, construction and medical equipment, and auto parts.

Medical Equipment

Nearly 98 percent of U.S. medical equipment exports to Colombia will receive duty-free access immediately upon entry into force of the Agreement. Medical equipment accounted for 2.8 percent of total U.S. industrial exports to Colombia in 2010, totaling \$262 million. The top U.S. exports in this sector include electro-medical instruments, electro-diagnostic apparatus, diagnostic reagents, and medical supplies. A recent Colombian Government initiative to encourage the upgrading of radiology equipment, coupled with a recent Universal Coverage law, will boost demand and provide additional opportunity for U.S. suppliers. U.S. – Colombia TPA provisions for remanufactured goods will also boost opportunities for U.S. companies who export refurbished goods such as medical imaging equipment.

Electrical Power Generation and Distribution Equipment

Tariffs on 52 percent of U.S. energy equipment exports will be eliminated immediately upon entry into force of the Agreement with the remaining tariffs phased out over ten years. The outlook for the Colombian electricity sector is promising, as the government plans to develop several new generation projects to accommodate increased demand. Additionally, Colombia intends to become a major exporter of electricity to its Andean neighbors and Central America.

Aircraft and Related Parts

Nearly 100 percent of U.S. aircraft and related parts exports to Colombia will receive duty-free access immediately upon entry into force of the Agreement. In 2010, U.S. companies exported \$671 million in such goods to Colombia, including airplanes, helicopters, and aircraft engines.

Colombia is in the process of privatizing its Bogotá international airport, and soon will do the same for five additional regional and international airports. The U.S. – Colombia TPA will give U.S. exporters a competitive edge in a sector where competition with European goods and services is fierce.

TEXTILES

Under the ATPA, as expanded by the Andean Trade Promotion and Drug Eradication Act (ATPDEA) in 2002, Colombia became an important export market for U.S. yarn and fabric manufacturers. The textiles provisions of the U.S. – Colombia TPA were crafted to create opportunities for U.S. yarn and fabric exports.

The foundation of the textile and apparel trade with Colombia is based upon the ATPDEA. The ATPDEA allowed Colombian apparel manufacturers to buy U.S. fibers, yarns, and fabrics, assemble garments, and ship to the U.S. market, duty-free. With the strengthening of apparel manufacturing in Colombia under the ATPDEA, U.S. exports of textile goods to Colombia grew to \$124 million in 2010.

Currently, U.S. textile and apparel goods exported to Colombia normally pay full duty. Under the U.S.-Colombia TPA, Colombian tariffs on qualifying U.S. fibers, yarns, fabrics, and apparel will be eliminated, improving sales opportunities for U.S. exporters in the Colombian market.

Key benefits to U.S. yarn and textile manufacturers include:

- ***Yarn-forward rule of origin*** – The U.S. – Colombia TPA adheres to a yarn-forward rule of origin, meaning that in order to enter the U.S. market duty-free, textile and apparel goods must be made using U.S. or Colombian yarns and fabrics. Goods that meet the rule of origin qualify for immediate duty-free market access upon entry into force.

- ***Regional Elastomeric Requirement*** – Consistent with other free trade agreements, elastomeric yarns must be sourced from the United States or Colombia for textile and apparel goods to qualify for duty-free entry.
- ***Strong Customs Enforcement Provisions*** – Specific textile customs cooperation language will help prevent transshipment and circumvention of the rules of origin of the Agreement.
- ***Streamlined Short Supply Processes*** – The Agreement’s commercial availability (short supply) provisions allow manufacturers in the United States and Colombia to utilize fibers, yarns and fabrics from outside the FTA region if those inputs are deemed not commercially available in the United States and Colombia to produce goods which still qualify for duty-free treatment under the Agreement. Additionally, the streamlined commercial availability determination processes will allow new items to be added to the short supply list, ensuring future flexibility to adjust to changing market conditions.
- ***Safeguards*** - A special textile safeguard mechanism will provide for temporary MFN tariffs, if a surge in imports under the U.S. – Colombia TPA is shown to be causing or threatening to cause serious damage to domestic industry.

AGRICULTURE

The Agreement is a key building block in advancing agricultural trade within the Western Hemisphere. The U.S. – Colombia TPA also levels the playing field with respect to third-country competitors in the Colombian market.

Upon implementation of the Agreement, U.S. exporters will receive immediate duty-free treatment on almost 70 percent of current agricultural trade. Currently, no U.S. agricultural exports enjoy duty-free access to Colombia. Most Colombian applied tariffs range from 5 percent to 20 percent for agricultural goods. In many cases, these tariffs restrict U.S. exports. Moreover, there is no assurance that Colombia will not raise tariffs to its permitted WTO limits (or tariff bindings), which range from 15 percent to 388 percent.

Key Elements of the Agreement

Market Access. No goods are excluded from the Agreement. Under the Colombia TPA, tariff phase-outs range from immediate duty-free access to a maximum phase out of 19 years. Tariffs on 77 percent of all agricultural tariff lines will be eliminated when the Agreement enters into force. As a general rule, virtually all tariffs will be reduced in equal annual installments over the agreed phase-out period, with the first tariff cut made on the Agreement’s entry into force. For some goods with longer tariff phase-outs, immediate duty-free market access will be provided through the creation and annual

expansion of TRQs (providing duty-free access for a specified quantity of imports). Annual TRQ growth is on a compound basis for U.S. agricultural exports.

The Agreement requires that, upon its entry into force, Colombia stop applying the price band system with respect to goods imported from the United States. The price band system requires the imposition of variable tariffs on imported goods when the price of the good is below an established minimum price. This can lead to tariffs as high as 160 percent being applied on goods. The Colombian price band system affects more than 150 goods, including corn, rice, wheat, oilseeds and goods, dairy, pork, poultry, and sugar. The United States will receive equal or preferential treatment vis-à-vis third-party competitors on all key goods under the Agreement.

Safeguards. The Agreement includes volume-based agricultural safeguards for a limited number of goods covered by TRQs. The safeguard triggers are set as a percentage of the growing TRQ quantities. Increased tariffs resulting from the triggering of a safeguard can only be maintained for the remainder of the year they are invoked. The availability of using an agricultural safeguard expires when the tariff for that good has been phased out.

Export Subsidies. The Parties agreed not to use export subsidies on goods shipped into each other's market except to compete with third-party export subsidies.

Specific Goods

Beef. In 2010, the United States exported approximately \$2 million of beef and beef products to Colombia. Under the Agreement, the United States secures immediate duty-free treatment on goods most important to the U.S. beef industry: high-quality USDA Prime and Choice beef cuts. All other tariffs on beef and beef products will be eliminated within 15 years and earlier in a number of cases. For standard quality beef cuts, the Agreement provides for immediate duty-free access through a 2,100-metric ton TRQ with 5-percent annual growth. Colombia will phase out the 80-percent out-of-quota tariff over 10 years after a 37.5-percent cut at the beginning of the first year of implementation. Additionally, the Agreement establishes a 4,642- metric ton duty-free TRQ for beef variety meats (offals) with 5.5-percent annual growth. Colombia will phase out the 80-percent out-of-quota tariff over 10 years with a 37.5-percent cut immediately upon entry into force of the Agreement. If imports surge, Colombia will have the right to use safeguards during the implementation period on standard quality beef only.

Pork. In 2010, the United States exported \$18 million of pork and pork products to Colombia. The Agreement provides for tariff phase-outs on most key pork products within 5 years, including immediate tariff elimination for bacon and pork skin. All other pork tariffs will be eliminated within 10 years.

Poultry. In 2010, the United States exported \$22 million of poultry and poultry products to Colombia. The United States secured a 27,040-ton TRQ at zero duty with 4-percent annual growth for chicken leg quarters. Colombia will phase out the out-of-quota tariff

of 164.4 percent for fresh, chilled, and frozen chicken leg quarters, as well as the 70 percent out-of-quota tariff for processed chicken leg quarters over 18 years with a grace period during the first 6 years. Colombia will have access to a safeguard on chicken leg quarters in the event of an annual import surge during the 18-year tariff phase-out period.

Colombia will also establish a zero-duty, 412-ton TRQ with 3-percent annual growth for “spent fowl,” typically post-production layers. The 45-percent above-quota tariff on spent fowl will be phased out over 18 years. Colombia will have access to a safeguard on spent fowl in the event of an annual import surge during the 18-year implementation period.

The Agreement immediately eliminates tariffs on most other poultry products and on all within 10 years.

Dairy. In 2010, the United States exported \$6 million of dairy and dairy products to Colombia. Two tariff lines for whey will be eliminated upon entry into force, while a third covering other milk protein concentrates will be phased out over 3 years. Additionally, U.S. exporters will have access to six product-specific dairy TRQs, all at zero duty. All of the dairy TRQs will have duty-free quantities growing at a 10-percent annual growth rate over the transition period. A 5,500-ton TRQ is established for milk powder with an out-of-quota base tariff of 33 percent, phased out over 15 years. A 2,310-ton TRQ for various cheeses has out-of-quota tariffs of 20 and 33 percent, with these tariffs phased out over 15 years. Colombia will provide duty-free access for butter through a 550-ton TRQ and for ice cream through a 330-ton TRQ. Colombia will phase out the butter out-of-quota tariff of 33 percent and the ice cream out-of-quota tariff of 20 percent over 11 years. Colombia will establish a 110-ton yogurt TRQ and phase out the 20-percent tariff over 15 years. Finally, Colombia will establish a 1,100-ton processed dairy product TRQ and will phase out the 20-percent tariff over 15 years. Colombia will immediately eliminate or phase out over 5 years all other dairy tariffs.

Vegetables. In 2010, the United States exported \$15 million of fresh and processed vegetables and products to Colombia. The Agreement provides for immediate duty-free access on most U.S. vegetables and vegetable products, with tariffs for almost all others phased out over 5 years.

Dry Peas, Beans, and Lentils. In 2010, the United States exported \$7 million of dry peas, beans, and lentils to Colombia. Colombia will immediately eliminate tariffs on dried peas and dried lentils. It will also provide immediate duty-free access for dried beans through a 15,750-ton TRQ with 5-percent compound annual growth. Colombia will phase out the out-of-quota tariff of 60 percent over 10 years using a non-linear staging formula that includes a 33-percent cut at the beginning of the first year.

Potatoes and Potato Products. In 2010, the United States exported \$3 million of potatoes and potato products to Colombia. All fresh potato tariff lines and almost all processed potato lines, including frozen fries, potato flakes, and potato chips, will receive immediate duty-free access to Colombia upon entry into force of the Agreement.

Fruits, Juices, and Tree Nuts. In 2010, the United States exported \$34 million of fruits and tree nuts to Colombia. The Agreement provides immediate duty-free access to Colombia for all U.S. fresh and processed fruits, including apples, grapes, cherries, pears, stone fruit, and citrus, as well as all fresh and processed tree nuts, such as almonds and pistachios.

Wheat and Barley. In 2010, the United States exported \$164 million of wheat and barley to Colombia. Colombia's tariffs on all wheat and wheat products, as well as all barley and barley products, except feed barley, will be immediately eliminated. Tariffs on feed barley will be eliminated upon entry into force of the Agreement.

Feed Grains.

Yellow Corn. In 2010, the United States exported \$98 million of yellow corn to Colombia. Under the Agreement, Colombia will provide immediate duty-free access through a 2.1-million ton TRQ with 5-percent annual growth. Colombia will phase out the out-of-quota tariff of 25 percent over 12 years.

White Corn. In 2010, the United States exported \$20 million of white corn to Colombia. Under the Agreement, Colombia will provide immediate duty-free access through a 136,500-ton TRQ with 5-percent annual growth. Colombia will phase out the out-of-quota tariff of 20 percent over 12 years.

Sorghum. In 2010, the United States did not export sorghum to Colombia. Under the Agreement, Colombia will provide immediate duty-free access through a 21,000-ton TRQ with 5-percent annual growth. Colombia will phase out the out-of-quota tariff of 25 percent over 12 years.

Animal Feeds and Fodders. In 2010, the United States exported nearly \$57 million of animal feeds to Colombia. Under the Agreement, Colombia will provide immediate duty-free access for various animal feeds through a 194,250-ton TRQ with 5-percent annual growth. The out-of-quota tariffs for these animal feeds are either 10 or 25 percent. They will be phased out over 12 years.

Rice. In 2010, the United States exported \$6 million of rice to Colombia. Under the Agreement, Colombia will provide immediate duty-free access on rice through a 79,000-ton TRQ (milled rice equivalent basis) with 4.5-percent annual growth. Colombia will phase out the 80-percent out-of-quota tariff for rice over 19 years with a grace period during the first 6 years. A safeguard on rice will be available in the event of an annual import surge. The rice flour tariff and tariffs for bran, sharps, and other milled rice residues will be phased out over 5 years.

Soybeans and Soybean Products. In 2010, the United States exported \$103 million of soybeans and soybean products to Colombia. Under the Agreement, Colombia will immediately eliminate tariffs on soybeans and soy meal and flour. Colombia will provide

immediate duty-free access for crude soybean oil through a 31,200-ton TRQ with 4-percent annual growth. Colombia will phase out the out-of-quota tariff of 24 percent for crude soybean oil over 10 years. Colombia will phase out its 24-percent tariff for refined soybean oil over 5 years.

Peanuts and Peanut Products. In 2010, the United States exported \$170,000 of peanuts and peanut products to Colombia. Under the Agreement, Colombia will immediately eliminate tariffs on peanuts, peanut oil, and peanut products.

Sugar and Sweeteners. In 2010, the United States exported \$6 million of sugar and sweeteners to Colombia. Under the Agreement, Colombia will provide immediate duty-free access for glucose through a 10,500-ton TRQ with 5-percent annual growth. Colombia will phase out the out-of-quota tariff for glucose of 28 percent over 10 years. Colombia will phase out all other tariffs on sugar and sweeteners within 15 years, and in many cases less, including 9 years for high-fructose corn syrup.

Processed Products. In 2010, the United States exported \$202 million of processed products, including pet foods, to Colombia. Under the Agreement, most processed products will enter Colombia duty-free immediately. All others will become duty-free in 10 years or less. Additionally, Colombia will provide immediate duty-free access for pet food through an 8,640-ton TRQ with 8-percent annual growth. Colombia will set the out-of-quota pet food tariff at 28 percent with an 8-year phase out.

Cotton. In 2010, the United States exported \$100 million of cotton to Colombia. Under the Agreement, Colombia will immediately eliminate tariffs on cotton.

SERVICES

With the implementation of the U.S. – Colombia TPA, U.S. service providers will gain improved access to Colombia’s \$166 billion services market and will benefit from a more open and transparent regulatory system. Colombia has made very substantial commitments to liberalize services trade, including telecommunications and financial services. These commitments significantly improve upon Colombia’s WTO commitments in terms of sectors covered and elimination of restrictions. The U.S. – Colombia TPA establishes a solid framework for trade in services by providing for the elimination of barriers such as nationality requirements and restrictions on investing in most service sectors and for improved regulatory transparency.

Why do services commitments matter?

The services sector accounts for the majority of private sector jobs in the United States – over 89 million U.S. jobs in 2010, or roughly 83 percent of total non-farm employment. U.S. services exports are a vital part of this picture, and U.S. exports continue to grow. In 2010, services exports of nearly \$546 billion accounted for 30 percent of total U.S. exports, generating a services trade surplus of \$151 billion. In addition, in recent years

foreign affiliate trade in services has been approximately twice that of cross-border services.

U.S. services firms are well positioned to take advantage of trade agreements. The intensity and vigor of the U.S. market give rise to extremely competitive companies prepared to meet stringent demands at home and enable them to compete abroad. Consumers in Colombia value services that help boost their own productivity and enhance their lives and look to the United States as a model in terms of providing high-quality and cutting-edge services and technologies.

U.S. – Colombia TPA Allows Service Providers to Choose Mode of Delivery – a Key Provision for SMEs

Colombia's commitments in services cover both the supply of services across the border (such as supplying a service from one country to another through electronic means, or through the travel of nationals), as well as the supply of services through investment and a local presence. The Colombian government committed to not require U.S. companies to incorporate or maintain a representative office in Colombia in order to supply services on a cross-border basis. In other words, a U.S. company wishing to provide its service in Colombia is not required to have any formal presence there (with very few exceptions). This is a benefit for U.S. service providers, especially SMEs, for whom the nature or volume of their business in Colombia would not justify staffing an office there.

The freedom for service providers to choose their mode of delivery becomes increasingly important as technology makes distance less of a service barrier. Colombia is one of the Andean region's leaders in Internet use and an innovator in technology applications. Major new investments in telecommunications and information systems that are likely to result from the U.S. – Colombia TPA will dramatically improve access to IT, benefiting all "e-service" providers.

Barriers to Foreign Service Suppliers Lifted

In the U.S. – Colombia TPA, Colombia committed to eliminating a number of barriers to U.S. service suppliers. Removal of these barriers will allow increased access and streamlining of operations for U.S. companies. For example, upon implementation of this Agreement, Colombia will eliminate a requirement that U.S. firms located in Colombia hire nationals rather than U.S. citizens to provide professional services. Additionally, upon implementation of the Agreement, U.S. companies providing a service under concession to the Colombian government will be free to purchase on the basis of price and quality, not on the basis of nationality of the goods in these sectors. Currently, such companies, which typically operate in the transportation, energy and mining sectors, are required to buy locally.

Sector-Specific Benefits for the Service Sector

Colombia's coverage of services sectors in the U.S. – Colombia TPA is significantly broader than the commitments it undertook in the WTO General Agreement on Trade in Services (GATS). The U.S. – Colombia TPA uses a “negative list” approach, which means that commitments made in the Agreement apply to all sectors unless an exception is listed, and trade disciplines will be extended to services that have yet to be created or brought to market. Inclusion of new services is especially important to industries where market development, technological advances and innovation continuously result in new service offerings and means of delivery, including sectors such as communications, express delivery, financial, and computer related services. The GATS uses a “positive list,” which means that only those sectors that a country expressly lists are covered by the GATS national treatment and market access obligations. Colombia's GATS commitments are fairly limited, with relatively few of the possible 150 different sectors and sub-sectors listed.

U.S. service providers should benefit from U.S. – Colombia TPA commitments in a number of key areas. Some examples are provided below.

Financial Services

Colombia will open its financial service sector and will allow U.S. providers to have the same rights as Colombian providers to establish subsidiaries or branches for banks or insurance providers.

U.S.-based firms will be able to supply insurance on a cross-border basis, including through electronic means for key markets, including reinsurance and reinsurance brokerage upon entry into force, and marine, aviation and transport (MAT) insurance and brokerage within four years of implementation. U.S.-based banking and other non-insurance firms will be able to offer services cross-border in areas such as provision and transfer of financial information; and financial data processing and related software; and the provision of advisory and other auxiliary financial services, excluding intermediation.

U.S.-based asset managers, including insurance companies, will be able to provide investment advice and portfolio management services to collective investment schemes established in Colombia.

Advertising

Colombia committed to opening this important sector to U.S. providers, with a limited exception. This goes beyond Colombia's GATS commitments.

Construction and Engineering Services

In the U.S. – Colombia TPA, Colombia agreed to provide full market access for U.S. construction and engineering services, a significant improvement on its GATS commitments. In addition, improved regulatory regimes and strong investment

environments will stimulate growth opportunities for construction consultants and engineers.

Distribution Services, Including Retail and Wholesale Services, Direct Marketing, and Direct Selling

Retailers will benefit from the removal of barriers that inhibit the movement of goods among manufacturers, wholesalers, retailers, and consumers. Intellectual property rights provisions will ensure the concept brands of the franchise companies are protected. Retailers working with transportation, telecommunications, financial, computer and other service providers may be able to improve and streamline the supply chain to better serve consumers in the United States and throughout the hemisphere. Direct marketers should benefit from improved wireless telecommunication services and Internet service that are likely to result from the U.S. – Colombia TPA, and from Colombia's commitments to open specific services sectors that are important to direct marketers, such as travel and tourism. Colombia has no GATS commitments for distribution.

Franchising

In the U.S. – Colombia TPA, Colombia agreed to provide full market access for U.S. franchisers in Colombia, a commitment that Colombia has not made in the GATS. Furthermore, commitments in other areas of the U.S. – Colombia TPA will benefit U.S. franchisers. Trademark provisions will protect the franchiser name, and tariff liberalization will allow the lower-cost import of key equipment needed to supply the franchisee.

Entertainment, Including Audiovisual and Broadcasting

In the U.S. – Colombia TPA, Colombia agreed to provide market access for U.S. films and television programs over a variety of media including cable, satellite, and the Internet with certain limited exceptions. This market opening is in stark contrast with the GATS, where Colombia has made no commitments in this area. Additionally, the Agreement provides state-of-the-art intellectual property protection and mandates that each Party criminalize the willful unauthorized receipt or distribution of encrypted satellite signals, thus preventing piracy of satellite television programming. The Agreement also requires non-discriminatory treatment for digital products, such as U.S. software, music, text, and videos.

Express Delivery Services

The Chapter on Services includes an expansive definition of express delivery services, and a commitment from both Parties to prevent cross-subsidization from a postal monopoly. This is in contrast with the GATS, where Colombia has not made commitments in either postal/courier services or in express delivery. The U.S. – Colombia TPA provisions on customs and trade facilitation will help express delivery service companies provide better services to customers who are seeking to enhance their

competitiveness in the hemisphere and global market place. Express delivery services are in demand from a wide range of companies--from high-tech to agriculture, and auto manufacturing to retail services. Speed-to-market, just-in-time inventory processes and total quality management are critical to success in today's economy. Commitments in this sector will facilitate U.S. commercial interests in Colombia.

Energy Services

The Agreement's extensive obligations on regulatory transparency and investment provide a framework that can yield opportunities for U.S. energy services firms and facilitate the provision of energy services between the United States and Colombia. Energy demand in Colombia is increasing and its coal and oil reserves are the second and fifth largest in South America.¹⁸ As the Andean countries pursue their goal of a common electricity market, there will be opportunities for U.S. energy services providers. The U.S. – Colombia TPA better positions U.S. companies to take advantage of these opportunities. In the GATS, Colombia has made no commitments in energy services.

Professional Services, Including Accounting, Legal Services, and Management Consulting

Liberalization in such sectors as banking, investment, and financial services will offer increased opportunities for professional service providers in Colombia. The cross-border services chapter includes obligations intended to ensure that administrative decisions related to licensing are prompt and fair. The chapter also calls for entities in Colombia and the United States to work together to seek mutually acceptable standards and criteria for licensing, certification and mutual recognition of professional service suppliers.

TELECOMMUNICATIONS AND E-COMMERCE

Colombia will provide full market access with no exceptions to the information services sector, going significantly beyond its GATS commitments (where, for example, foreign equity in telecommunications services was capped at 70 percent). The "negative list" approach also ensures that rapidly evolving Internet-enabled services, driven by continual advances in technology, will be covered by commitments contained in the Agreement.

Commitments on electronic commerce are forward-looking in nature, including elements such as customs valuation for digital products, electronic supply of services, network access, and music and video on demand. These commitments seek to address commercial opportunities created by the convergence of technologies and applications, and seek to avoid barriers to the use of the next generation of digital communication devices and a changing future Internet. Significant obligations benefitting the U.S. audiovisual and software industry include the provision on non-discrimination with respect to digital products, and elimination of duties on carrier media with digital products fixed on them, or on digital products that are transmitted digitally.

Colombia also committed to pro-competitive regulatory obligations for the basic telecommunications sector. These obligations build on the WTO Basic Telecommunications Reference Paper and GATS Telecommunications Annex, extending access rights to facilities and resources such as cable landing stations, switch exchanges, and numbering resources; ensuring the right of a supplier to resell another's services; and significantly improving the transparency obligations a regulator must follow in developing and enforcing rules.

INVESTMENT

The U.S. – Colombia TPA establishes a secure, predictable legal framework for U.S. investors in Colombia. The Agreement's commitments improve transparency, reduce barriers to investment, and improve the dispute settlement process, addressing key concerns about the investment climate in Colombia. Foreign investment can contribute significantly to the economic development and stability of Colombia. Increased foreign investment in Colombia will greatly improve the development of efficient, reliable systems for power generation, water, sewage, transportation, and telecommunications. The Santos administration has stepped up the economic liberalization begun in the early 1990's and is committed to an open investment regime. Liberalization has progressed furthest in telecommunications, accounting/auditing, energy, and tourism, and to a lesser extent in legal services, insurance, distribution services, advertising, and data processing.

Key Investment Provisions

- Establishes a secure, predictable legal framework for U.S. investors operating in Colombia.
- Protects all forms of investment, including enterprises, debt, concessions, contracts, and intellectual property.
- Gives U.S. investors, with limited exceptions, the right to establish, acquire, and operate investments in Colombia on an equal footing with local investors, and with investors of other countries.
- Provides U.S. investors in Colombia the same substantive protections foreign investors enjoy in the United States.
- Ensures that U.S. investors will receive the fair market value of their investment in the event of an expropriation.
- Backs investor rights by effective, impartial dispute settlement procedures.

Colombia is actively seeking foreign investment in nearly all sectors of the economy, notably in the hydrocarbon sector. In 2003 the Colombian government shifted regulatory responsibilities from Ecopetrol, the state-owned oil company, to a government entity called the National Hydrocarbons Agency (ANH). The ANH administers Colombia's concession process, allowing Ecopetrol to compete side-by-side with foreign firms for hydrocarbon contracts. Foreign companies may assume up to 100 percent of investment and risk activities in all exploration and production contracts. Oil companies may obtain the right to exploit fields for 30 years or until depleted, as well as extend previous association contracts.

Colombia's National Development Plan calls for \$11 billion in public infrastructure investment over the next four years to ensure the nation's roads, ports, and other infrastructure will be able to handle growing foreign trade. Because Colombia's infrastructure needs cannot be financed solely through the national budget, the government's plan assumes an additional \$17 billion in private sector participation.¹⁹ With the U.S. – Colombia TPA in effect, U.S. companies will be well positioned to pursue these investment opportunities.

In July 2005, the Colombian government adopted an investment stability law, Law 963. This law guarantees investors that the laws applicable to an investment at the time it is made will remain in effect for a period between 3 and 20 years, depending on the type and amount of the investment. This pro-investment policy, coupled with the more secure, predictable legal framework that the U.S. – Colombia TPA will establish, should improve the investment climate in Colombia.

The U.S. – Colombia TPA includes an effective, impartial, and transparent investor-state dispute settlement mechanism, which provides investors with the option of seeking recourse outside of Colombian courts, through binding international arbitration. Additionally, the U.S. – Colombia TPA will make binding arbitration available for breaches of written agreements with the Colombian government that cover activities such as the exploration and extraction of natural resources; the supply of power generation services to the public; and infrastructure projects, such as the construction of roads, bridges, canals, dams, or pipelines.

INTELLECTUAL PROPERTY RIGHTS

The U.S. – Colombia TPA requires high levels of intellectual property protection, consistent with U.S. standards of protection and emerging international standards, and will support the growth of trade in valuable digital and other intellectual property-based products.

Although Colombia has made great strides modernizing intellectual property laws, shortcomings remain in its laws, and effective enforcement continues to be a challenge. Implementation of the commitments made under the U.S. – Colombia TPA will reinforce national efforts to strengthen intellectual property law enforcement. Like our other free trade agreements, this Agreement takes into account significant legal and technological developments that have taken place since the WTO's Agreement on Trade-Related Aspects of Intellectual Property Rights and NAFTA were implemented. It establishes clear precedents in most key areas of intellectual property protection for future trade liberalization negotiations. The Industry Trade Advisory Committee on Intellectual Property Rights' report to the U.S. Trade Representative on the U.S. – Colombia TPA notes, "...the fact that Colombia found it in its own interest to significantly increase its levels of IPR protection beyond that required by TRIPS is a testament to the principle that high levels of protection benefit all innovators, including indigenous creators, in the same manner as they do in developed countries."²⁰

Trademarks

U.S. trademark holders will see much stronger protections in Colombia. The U.S. – Colombia TPA expands the definition of trademark to include protection for non-visually perceptible marks such as sounds and scents. It also recognizes the principles of priority and exclusivity in the relationship between trademarks and geographical indications.

Colombia committed to improving its trademark application system by implementing an online system for the registration and maintenance of trademarks, and committed to developing a public on-line database of trademark applications and registrations. This will save U.S. companies time and money and make it easier for them to take the necessary steps to protect their trademarks. Improved transparency provisions will give interested parties the opportunity to oppose and cancel registrations and to know the reason for decisions with respect to registration. Additionally, Colombia's commitment to accede to the Protocol Relating to the Madrid Agreement Concerning the Registration of Marks will make it easier for U.S. trademark owners to file for trademark protection in Colombia.

Copyright

The U.S. – Colombia TPA includes many important provisions benefiting U.S. copyright industries. One of these important provisions is the prohibition on the circumvention of technological protection measures (TPMs) that authors, performers, and producers of phonograms use in the exercise of their rights to prohibit or restrict unauthorized acts (e.g., unauthorized access to a work or illegal copying). Defined and limited exceptions to the prohibition on the circumvention of TPMs will provide further certainty to right holders while also accommodating the legitimate needs of users of copyright

Key Intellectual Property Facts

Protection for copyrighted works

- Copyright-based industries are among the fastest growing and most productive of any sector of the U.S. economy. They employ new workers in higher-paying jobs at over three times the rate of the rest of the economy; create new revenue at over two times that rate; and contribute close to \$90 billion to the U.S. economy each year through foreign sales and exports. The industries' principal barrier to trade is the lack of effective protection and enforcement of intellectual property rights.

Stronger protections for patents

- Innovation has historically been a driving force in U.S. industry. Competitive advantage based on innovation needs to be protected and defended. U.S. companies need access to legal tools in all markets across the globe.

Tough penalties for piracy and counterfeiting

- The strong, deterrent criminal penalties against piracy and counterfeiting required by the U.S. - Colombia TPA will benefit industry by providing for efficient and effective protection of American intellectual property rights.

content. This prohibition on circumvention of TPMs is also an effective tool for addressing the challenges presented in the digital environment.

The protection of encrypted program-carrying satellite signals directly addresses some of the concerns of U.S. broadcasters and content providers. Colombia has also committed to mandating that government agencies use computer software only as authorized by the right holder and to actively regulate the acquisition and management of the software, a high priority for the U.S. software industry. In addition to the needs addressed by industry-specific challenges, Colombia will extend protection for copyrighted works consistent with U.S. law and emerging international standards.

Patent and Data Protection

Colombia committed to provide robust patent and pharmaceutical and agricultural chemical data protection, as well as restore patent rights for the term of protection lost due to unreasonable delays in granting the patent or marketing approval for certain products. Data protection is significant to the pharmaceutical industry because it ensures that pharmaceutical innovators can recoup the large investment of both time and money in clinical research and testing to prove the safety and efficacy of pharmaceutical products. Therefore, test data will be protected from unfair commercial use for a period of 5 years from the marketing approval of a pharmaceutical product and for a period of 10 years from the marketing approval for an agricultural chemical product. If Colombia relies on the U.S. Food and Drug Administration's approval of a given drug and certain other conditions are met, the period of data protection will begin on the date of product approval in the United States. Colombia also committed to limit the grounds on which patents may be revoked and to undertake all reasonable efforts to extend patent protection to new plant varieties. Additionally, Colombia has committed to putting in place an effective system to address patent issues expeditiously in connection with applications to market pharmaceutical products.

Improved Transparency and Reduced Corruption

As in other recent free trade agreements, the U.S. – Colombia TPA contains an obligation to publicize information on efforts to provide effective enforcement of intellectual property rights. Final judicial decisions or administrative rulings of general applicability pertaining to the enforcement of intellectual property rights must be in writing and must state any relevant findings of fact and the reasoning or the legal basis on which the decisions or rulings are based.

Enforcement

The U.S. – Colombia TPA includes measures that should facilitate enforcement of the enhanced intellectual property protections, thereby improving the enforcement environment in Colombia. The agreement establishes a framework for determining damages and establishes a system of statutory or “pre-established” damages, offering the right-holder the option to elect between statutory damages and the often-difficult task of

proving actual damages. The agreement also mandates that courts must have the authority to order the infringing party to identify accomplices, suppliers and others involved in the infringement at the risk of sanctions for failure to do so. The Agreement also authorizes the seizure, forfeiture, and destruction of counterfeit and pirated goods and the equipment used to produce them. As Colombia's economy grows, its government will have additional resources, including personnel and expertise to wage a more effective campaign against copyright piracy, trademark counterfeiting and other intellectual property violations.

GOVERNMENT PROCUREMENT

The government procurement provisions of the U.S. – Colombia TPA guarantee non-discriminatory access to the covered procurements of the largest purchasing entities in Colombia. These procurements include areas where U.S. goods and services companies are very competitive, such as aerospace, energy, health care (including pharmaceuticals), construction, environmental technology, and information communication technology (ICT).

The Agreement covers purchases of most Colombian central government entities, including all key ministries and significant state-owned enterprises.

Colombia also agreed to include all of its regional governments. Governments are typically the single largest purchasing entity in any market. Government procurement is generally 10

percent to 15 percent of a country's GDP. Colombia's total GDP in 2010 was over \$283 billion²¹, thus total procurement is estimated to be between \$28.3 billion and \$42.4 billion. U.S. companies will immediately benefit as the Colombian government brings its laws and practices into compliance with the procurement obligations set forth in the US-Colombia TPA. The U.S. – Colombia TPA requires the use of fair and transparent procurement procedures, and the availability of timely and effective domestic review procedures to address complaints about the award of tenders.

Key U.S. – Colombia TPA Procurement Provisions

- The U.S. – Colombia TPA imposes strong disciplines on government procurement procedures, such as requiring advance public notice of purchases and provision of information to all interested suppliers regarding covered procurement opportunities, as well as timely and effective domestic review procedures.
- Colombia's central and regional governments and certain state-owned enterprises cannot apply "buy local" provisions that discriminate against U.S. suppliers in procurements covered by the Agreement.
- The Agreement does not cover low-value contracts, and the United States can maintain set-asides on behalf of U.S. small and minority-owned businesses.
- The Colombian government must maintain a system to declare ineligible for participation in procurements suppliers that engage in fraudulent or illegal actions related to procurement.

The U.S. – Colombia TPA also covers important state-owned enterprises such as ECOPETROL (national oil company), ISS (healthcare provider) and ADPOSTAL (postal service). The U.S. – Colombia TPA also secures transparency and non-discrimination for U.S. companies seeking to bid on procurements conducted by three significant Colombian entities: ISA (electricity transmission), ISAGEN (electricity generation) and Colombia Telecomunicaciones (telecom). All of these are major procurers that will be bound by the procurement obligations of the Agreement, enabling U.S. companies to compete on a level playing field.

The U.S. – Colombia TPA explicitly provides that build-operate-transfer contracts (BOTs) are within the scope of the government procurement obligations in the Agreement. BOTs act as financing vehicles for large-scale construction projects and the building or rehabilitation of public work facilities. The U.S. – Chile Free Trade Agreement was the first free trade agreement to include this clarification and it is significant that the U.S. – Colombia TPA also contains the guarantee that U.S. suppliers will receive non-discriminatory and transparent treatment when competing for BOT contracts.

CUSTOMS ADMINISTRATION AND TRADE FACILITATION

In administering customs procedures, the U.S. – Colombia TPA establishes rules that are designed to encourage predictability and efficiency. The specific and cutting-edge customs obligations will maximize the gains for U.S. exporters once the customs administration and trade facilitation provisions are fully implemented.

Businesses frequently complain that unclear rules, inconsistent interpretation of customs regulations and directives, and arbitrary clearance procedures often result in lengthy delays for the importation of goods into Colombia. The commitments established in the Customs chapter of the U.S. – Colombia TPA will ensure that the aforementioned concerns are addressed by making the following improvements to Colombian customs measures.

Improved Customs Procedures and Rules of Origin

- *Comprehensive rules of origin*- Rules of origin will ensure that only U.S. and Colombian goods receive preferential tariff treatment under the U.S. – Colombia TPA.
- *Enhanced Transparency* – The U.S. – Colombia TPA requires transparency and efficiency in administering customs procedures, including rules of origin. Colombia commits to publish laws and regulations on the Internet, and will be required to take other steps that will promote certainty and fairness in customs administration. This will make it easier for U.S. exporters to understand the Colombian Customs process.
- *Heightened Predictability*. The Agreement will allow exporters to obtain binding advance rulings on tariff classification, origin of goods and other customs matters.

This important provision will provide increased predictability and certainty to exporters, importers and customs administrators, which will minimize delays at the port of entry.

- *Greater Accountability.* Under the Agreement, companies will be guaranteed to have access to both administrative and judicial review of customs decisions.
- *Improved Procedures for Express Delivery Shipments.* The demand for express-delivery services is increasing rapidly as a result of the growth of electronic commerce, the globalization of business, and rising demand by manufacturers for outsourced logistic services. The Agreement responds to that demand by requiring that, within two years after the date the Agreement takes effect, Colombia must provide a separate and expedited customs procedure for express shipments through electronic submission and processing of customs information needed for the release of an express shipment prior to the arrival of the shipment itself. Most importantly, the Agreement obligates Colombia to clear express shipments within six hours of submission of all necessary documents and with no maximum weight or value limitations.
- *Greater Customs Efficiency through Information Technology.* Responding to U.S. exporters' requests, the Agreement promotes the use of information technology, including pre-arrival electronic submission of information. This will help expedite procedures for the release of goods, thereby saving companies time and money.
- *Information Sharing* - Both the U.S. and Colombia agree to share information to combat illegal trans-shipment of goods.

CONCLUSION

Approving and implementing the United States – Colombia Trade Promotion Agreement is in the best interest of United States commerce and a “win-win” for both countries. This comprehensive Agreement not only eliminates tariffs, but also reduces barriers for services, provides for leading-edge protection and enforcement of intellectual property, keeps pace with new technologies, ensures regulatory transparency and requires effective enforcement of domestic labor and environmental laws. Once the U.S. – Colombia TPA is in effect, doing business with Colombia will be easier, faster, and more transparent. The Agreement also promotes economic development for a vital U.S. ally, fostering new opportunities for the people of Colombia as they continue to make admirable strides toward peace and economic prosperity.

THE UNITED STATES – COLOMBIA TRADE PROMOTION AGREEMENT

Summary of the Agreement

This summary briefly describes key provisions of the United States - Colombia Trade Promotion Agreement (“Agreement”) that the United States has concluded with Colombia and represents an authoritative expression of Administration views regarding the interpretation of the Agreement both for purposes of U.S. international obligations and domestic law.

Preamble

The Preamble to the Agreement provides the Parties’ underlying objectives in entering into the Agreement and provides context for the provisions that follow. It includes the following statement:

“AGREE that foreign investors are not hereby accorded greater substantive rights with respect to investment protections than domestic investors under domestic law where, as in the United States, protections of investor rights under domestic law equal or exceed those set forth in this Agreement”.

This statement clarifies that, as stated in the Bipartisan Trade Promotion Authority Act of 2002, under the Agreement foreign investors in the United States are not to be accorded greater substantive rights with respect to investment protections than United States investors in the United States.

Chapter One: Initial Provisions and General Definitions

Section A of Chapter One sets out provisions establishing a free trade area and affirming the Parties’ existing rights and obligations with respect to each other under the *Marrakesh Agreement Establishing the World Trade Organization* (WTO) and other agreements to which they are party.

Section B defines certain terms that recur in various chapters of the Agreement.

Chapter Two: National Treatment and Market Access for Goods

Chapter Two and its relevant annexes and appendices set out the Agreement’s principal rules governing trade in goods. Each Party must treat products from the other Party in a non-discriminatory manner, provide for the phase-out and elimination of tariffs on “originating” goods (as defined in Chapter Four) traded between the Parties, and eliminate a wide variety of non-tariff trade barriers that restrict or distort trade flows.

Tariff Elimination. Chapter Two provides for the elimination of customs duties on originating goods traded between the Parties. Duties on most tariff lines covering industrial and consumer

goods will be eliminated as soon as the Agreement enters into force. Duties on other goods, including all industrial goods, will be phased out over periods of up to 10 years. Some agricultural goods will have longer periods for elimination of duties or be subject to other provisions, including, in some cases, the application of preferential tariff-rate quotas (TRQs). The General Notes to the U.S. and Colombia Schedules to Annex 2.3 include detailed provisions on staging of tariff reductions and application of TRQs for certain agricultural goods. The Chapter provides that the Parties may agree to speed up tariff phase-outs on a product-by-product basis after the Agreement takes effect.

Waiver of Customs Duties. The Parties may not adopt new duty waivers or expand existing duty waivers conditioned on the fulfillment of a performance requirement. Chapter Two defines the term “performance requirements” so as not to restrict a Party’s ability to provide duty drawback on goods imported from the other Party.

Temporary Admission. The Parties will provide duty-free temporary admission for certain products. Such items include professional equipment, goods for display or demonstration, and commercial samples. The Chapter also includes specific provisions on transit of vehicles and containers used in international traffic.

Import/Export Restrictions, Fees, and Formalities. The Agreement clarifies that restrictions prohibited under the *General Agreement on Tariffs and Trade* (GATT) 1994 and this Agreement include export and import price requirements (except under antidumping and countervailing duty orders and undertakings) and import licensing conditioned on the fulfillment of a performance requirement. In addition, a Party must limit all fees and charges imposed on or in connection with importation or exportation to the approximate cost of services rendered. The United States will not apply its merchandise processing fee on imports of originating goods. Colombia will not require a person of the United States to have or maintain a relationship with a “distributor” as a condition for allowing the importation of a good.

Distinctive Products. Colombia will recognize Bourbon Whiskey and Tennessee Whiskey as “distinctive products” of the United States, meaning Colombia will not permit the sale of any product as Bourbon Whiskey or Tennessee Whiskey unless it was manufactured in the United States in accordance with applicable laws and regulations.

Committee on Trade in Goods. The Parties establish a Committee on Trade in Goods to consider matters arising under Chapters Two, Four (Rules of Origin and Origin Procedures), and Five (Customs Administration and Trade Facilitation). The functions of the Committee are to promote trade in goods between the Parties and address barriers to trade in goods and to provide advice and recommendations on trade capacity building with respect to matters those chapters cover.

Agriculture

TRQs. Under Chapter Two, each government must administer TRQs in a manner that is transparent, non-discriminatory, responsive to market conditions, and minimally burdensome on

trade. In addition, the Parties will make every effort to administer TRQs in a manner that allows importers to fully utilize import quotas. In addition, the Chapter provides that Parties may not condition application for, or utilization of, import licenses or quota allocations on the re-export of an agricultural good.

Export Subsidies. Each Party will eliminate export subsidies on agricultural goods destined for the other Party. Under Article 2.16, no Party may introduce or maintain an export subsidy on agricultural goods destined for the other Party unless the exporting Party believes that a third country is subsidizing its exports to that other Party. In such a case, the exporting Party may initiate consultations with the importing Party to develop measures the importing Party may adopt to counteract such subsidies. If the importing Party agrees to such measures, the exporting Party must refrain from applying export subsidies to its exports of the good to the importing Party.

Safeguards. Chapter Two sets out a transitional agricultural safeguard mechanism that allows a Party to impose a temporary additional duty on specified agricultural products if imports exceed an established volume “trigger.” The safeguard measure will remain in force until the end of the calendar year in which the measure applies. A Party may not apply an agricultural safeguard on a good after the date that the good is subject to duty-free treatment under the Party’s Schedule to Annex 2.3 of the Agreement.

A Party may not apply a safeguard measure to a good that is already the subject of a safeguard measure under either Chapter Eight (Trade Remedies) of the Agreement or Article XIX of GATT 1994 and the *WTO Agreement on Safeguards*. All agricultural safeguard measures must be applied and maintained in a transparent manner and the Party applying such a measure must, on request, consult with the other Party concerning the application of the measure.

Neither Party may impose safeguard duties pursuant to the *WTO Agreement on Agriculture* on originating goods.

Sugar. The Agreement contains several unique features applicable to imports of sugar into the United States. First, imports under the TRQs provided for in the Agreement will be limited to the lesser of (i) the quantity established in the TRQ, or (ii) Colombia’s trade surplus in specific sugar goods. (“Colombia’s trade surplus” is the amount by which Colombia’s exports to all destinations exceed its imports from all sources in specified sugar and sweetener goods, except that Colombia’s exports of sugar to the United States and its imports of high fructose corn syrup from the United States are not included in the calculation of its trade surplus). The aggregate quantities established for the TRQ start at 50,000 metric tons in the first year and go up to 60,500 metric tons by year 15 of the Agreement. After year 15, the quantities increase by 750 metric tons per year. Second, in contrast to how it will treat other commodities subject to TRQs, the United States will not eliminate its over-quota duty on sugar imports under the Agreement. Lastly, the Agreement includes a mechanism that allows the United States, at its option, to provide some form of alternative compensation to Colombian exporters in place of imports of sugar in any given year.

Additional Provisions. Chapter Two provides for the creation of a Committee on Agricultural Trade. The Committee will be established within 180 days after the date the Agreement enters into force and will provide a forum for promoting cooperation in the implementation and administration of the Agreement, as well as for consultations on matters related to the agricultural provisions of the Agreement. In addition, the Chapter provides that the Parties will consult on and review the operation of the Agreement as it relates to trade in chicken nine years after the Agreement enters into force.

Chapter Three: Textiles and Apparel

Tariff Elimination. Chapter Three provides for duties on all originating textile or apparel goods to be eliminated on the date the Agreement enters into force.

Safeguards. The Chapter also establishes a transitional safeguard procedure for textile and apparel goods, under which an importing Party may temporarily impose additional duties up to the level of the normal trade relations (most-favored-nation) (NTR(MFN)) duty rates on imports of textile or apparel goods that cause, or threaten to cause, serious damage to a domestic industry as a result of the elimination or reduction of duties under the Agreement. An importing Party may impose a textile safeguard measure only once on the same textile or apparel good. The measure may not be in place for more than two years, or three years if the measure is extended. The ability to impose or maintain textile safeguards lapses five years after the Agreement enters into force. A Party may not apply a textile safeguard measure to a good while the good is subject to a safeguard measure under (i) Chapter Eight (Trade Remedies), or (ii) Article XIX of the GATT 1994 and the *WTO Agreement on Safeguards*.

A Party imposing a safeguard measure under Chapter Three must provide the exporting Party with mutually agreed compensation in the form of trade concessions for textile or apparel goods that have a value substantially equivalent to the increased duties resulting from application of the safeguard measure. If the Parties cannot agree on compensation, the exporting Party may raise duties on any goods from the importing Party in an amount that has a value substantially equivalent to the increased duties resulting from application of the safeguard measure.

Rules of Origin and Related Matters. A textile or apparel good will generally qualify as an “originating good” eligible to receive preferential treatment under the Agreement only if all processing from the yarn stage to the final product (*e.g.*, yarn-spinning, fabric production, cutting, and assembly) takes place in the United States, Colombia, or both, or if there is an applicable change in tariff classification under the specific rules of origin contained in Annex 3-A of the Agreement.

Chapter Three sets out special rules for determining whether a textile or apparel good is an “originating good,” including a *de minimis* exception for non-originating yarns or fibers, a process for designating inputs not available in commercial quantities, a rule for treatment of sets, an exception for use of certain nylon filament yarn, and consultation provisions.

The *de minimis* rule applies to goods that ordinarily would not be considered originating goods because certain of their fibers or yarns do not undergo an applicable change in tariff classification. Under the rule, the Parties will consider a good to be “originating” if those fibers or yarns constitute ten percent or less of the total weight of the component of the good that determines origin. This special rule does not apply to goods containing elastomeric yarns in the component of the good that determines the classification.

Annex 3-B of the Agreement sets out a list of fabrics, yarns, and fibers that the Parties have determined are not available in commercial quantities in a timely manner from producers in the United States and Colombia. A textile or apparel good that includes the fabrics, yarns, or fibers included in this list will be treated as if it is “originating” for purposes of the specific rules of origin in Annex 3-A of the Agreement, regardless of the actual origin of those inputs. Chapter Three establishes procedures under which the United States will determine whether additional fabrics, yarns, or fibers are not available in commercial quantities in the United States and Colombia. The United States may also remove a fabric, yarn, or fiber from the list if it determines that the fabric, yarn, or fiber has become available in commercial quantities.

Customs Cooperation. In Chapter Three, the Parties commit to cooperate in enforcing their laws related to trade in textile and apparel goods, to ensure the accuracy of claims of origin, and to prevent circumvention of the Parties’ laws or agreements relating to trade in textile and apparel goods. The Chapter also provides that, under certain circumstances, the exporting Party must conduct a verification to determine that a claim of origin is accurate, or to determine compliance with relevant laws. A verification may include visits to the premises of the exporter or producer of the goods in question. If there is insufficient information to make the relevant determination, or if an enterprise provides incorrect information, the importing Party may take appropriate action, which may include denying application of preferential tariff treatment or denying entry to the goods in question. Further, either Party may convene consultations to resolve technical or interpretive issues arising with respect to customs cooperation or may request technical assistance from the other Party in implementing the Chapter’s customs cooperation provisions.

Duty Free Treatment for Certain Goods. The United States and Colombia will provide duty-free treatment for goods that both Parties may agree qualify as handmade, hand-loomed, or traditional folklore goods.

Chapter Four: Rules of Origin and Origin Procedures

To benefit from various trade preferences provided under the Agreement, including reduced duties, a good must qualify as an “originating” good under the rules of origin set out in Chapter Four and Annex 4.1. These rules ensure that the preferential tariff treatment and other benefits of the Agreement accrue primarily to firms or individuals that produce or manufacture goods in the Parties’ territories.

Key Concepts. Chapter Four provides general criteria under which a good may qualify as “originating:”

- When the good is wholly obtained or produced entirely in Colombia, the United States, or both countries (*e.g.*, crops harvested or minerals extracted in the United States); or
- When the good is produced entirely in Colombia, the United States, or both countries and: (1) is manufactured or assembled from non-originating materials that undergo a specified change in tariff classification in Colombia, the United States, or both countries; or (2) meets any applicable “regional value content” requirement (see below); and (3) satisfies all other requirements of Chapter Four, including Annex 4.1, or Annex 3-A; or
- When the good is produced entirely in Colombia, the United States, or both countries, exclusively from “originating” materials.

De Minimis. Even if a good does not undergo a specified change in tariff classification, it will be treated as an originating good if the value of non-originating materials that do not undergo the required tariff shift does not exceed 10 percent of the adjusted value of the good, and the good otherwise meets the criteria of the Chapter. This *de minimis* exception does not apply to certain agricultural and textile goods.

Regional Value Content. Some origin rules under the Agreement require that certain goods meet a regional value content test in order to qualify as “originating,” meaning that a specified percentage of the value of the good must be attributable to originating materials. In general, the Agreement provides two methods for calculating that percentage: (1) the “build-down method” (based on the value of non-originating materials used); and (2) the “build-up method” (based on the value of originating materials used). The regional value content of certain automotive goods, however, must be calculated on the basis of the net cost of the good. Finally, accessories, spare parts, and tools delivered with a good are considered part of the material making up the good so long as these items are not separately classified or invoiced and their quantities and values are customary. The *de minimis* rule does not apply in calculating regional value content.

Claims for Preferential Tariff Treatment. Under the Chapter, importers who wish to claim preferential tariff treatment for particular goods must be prepared to demonstrate, on the request of the importing Party’s customs authority, that the goods are originating. A Party may only deny preferential treatment through a written determination that the claim is invalid as a matter of law or fact. The Chapter provides that, subject to certain conditions, a Party must allow for the filing of claims for preferential treatment and for seeking a refund of any excess duties paid up to one year after a good is imported. Chapter Four also provides that a Party will not penalize an importer if the importer promptly and voluntarily corrects an incorrect claim and pays any duties owed.

Verification. Each Party must ensure that its customs authority is empowered to conduct verifications for purposes of determining whether a good is an originating good. Where an importing Party determines through a verification that an importer, exporter, or producer has engaged in a pattern of conduct in providing false or unsupported statements, declarations, or certifications that a good is an originating good, the Party may suspend preferential tariff treatment to identical goods from that importer, exporter, or producer until the importing Party

determines that the importer, exporter, or producer is in compliance with the rules set out in the Chapter.

Additional Rules. Chapter Four provides specific rules with respect to the treatment of (1) packing materials and containers; (2) indirect materials; (3) fungible goods; and (4) sets of goods for purposes of determining origin. The Chapter provides that a Party may not treat a good as originating if the good undergoes production or any operation in a third country other than being unloaded, reloaded, or preserved in good condition, or if it is shipped through a third country and does not remain under the control of customs authorities there.

Chapter Five: Customs Administration and Trade Facilitation

Chapter Five establishes rules designed to encourage transparency, predictability, and efficiency in the operation of each Party's customs procedures and to provide for cooperation between the Parties on customs matters.

General Principles. In Chapter Five, each Party commits to observe certain transparency obligations. Each Party must promptly publish its customs measures, including on the Internet, and, where possible, solicit public comments before amending its customs regulations. Each Party must also provide written advance rulings, on request, to its importers and to exporters and producers of the other Party, regarding whether a product qualifies as an "originating" good under the Agreement, as well as on other customs matters. In addition, each Party must guarantee importers access to both administrative and judicial review of customs decisions. The Parties must release goods from customs promptly and expeditiously clear express shipments. After the Agreement enters into force Colombia will have one year to comply with the Chapter's rules on release of goods; two years to comply with the Chapter's express shipments obligations and certain of its transparency obligations; and three years to comply with the Chapter's requirement to provide advance rulings.

Cooperation. Chapter Five also is designed to enhance customs cooperation. The Parties are encouraged to give each other advance notice of customs developments likely to affect the Agreement. The Chapter calls for the Parties to cooperate in securing compliance with each other's customs measures related to the implementation and operation of the provisions of the Agreement governing importations and exportations. It includes specific provisions requiring the Parties to share customs information where a Party has a reasonable suspicion of unlawful activity relating to its laws and regulations governing importations.

Chapter Six: Sanitary and Phytosanitary Measures

Chapter Six defines the Parties' obligations to each other regarding sanitary and phytosanitary (SPS) measures. It reflects the Parties' understanding that implementation of existing obligations under the *WTO Agreement on the Application of Sanitary and Phytosanitary Measures* (SPS Agreement) is a shared objective. Nothing in the Agreement imposes new limitations on the United States in terms of maintaining high safety and inspection standards.

Key Concepts. SPS measures are laws or regulations that protect human, animal, or plant life or health from certain risks, including plant- and animal-borne pests and diseases, additives, contaminants, toxins, or disease-causing organisms in food and beverages.

Cooperation. Under Chapter Six, the Parties will establish an SPS Committee consisting of relevant trade and regulatory officials. The objectives of the Committee are to (i) enhance the implementation by each Party of the WTO SPS Agreement; (ii) assist each Party to protect human, animal, or plant life or health; (iii) enhance consultation and cooperation between the Parties on SPS matters; and (iv) address SPS measures affecting trade between the Parties. The Committee will also provide a forum for enhancing mutual understanding of each Party's SPS measures and the regulatory processes that relate to those measures; consulting on SPS matters that may affect trade between the Parties; and consulting on issues, agendas, and positions for meetings of certain international organizations that address SPS matters.

Dispute Settlement. No Party may invoke the Agreement's dispute settlement procedures for a matter arising under Chapter Six. Instead, any dispute between the Parties involving an SPS measure must be resolved through the WTO.

Chapter Seven: Technical Barriers to Trade

Chapter Seven builds on WTO rules related to technical barriers to trade to promote transparency, accountability, and cooperation between the Parties on regulatory issues.

Key Concepts. The term "technical barriers to trade" (TBT) refers to barriers that may arise in preparing, adopting, or applying voluntary product standards, mandatory product standards ("technical regulations"), and procedures used to determine whether a particular good meets such standards, *i.e.*, "conformity assessment" procedures.

International Standards. The principles articulated in the WTO TBT Committee's *Decision on Principles for the Development of International Standards, Guides and Recommendations* emphasize the need for openness and consensus in the development of international standards. Under Chapter Seven, the Parties will apply these principles when determining whether an international standard exists and consult on pertinent matters under consideration by relevant international or regional bodies.

Cooperation. In Chapter Seven, the Parties establish a Committee on Technical Barriers to Trade through which the Parties will cooperate to reduce technical barriers and improve market access. The Committee's specific functions will include: (i) enhancing cooperation in the development and improvement of standards, technical regulations, and conformity assessment procedures; (ii) facilitating sectoral cooperation between governmental and non-governmental conformity assessment bodies; (iii) exchanging information on developments in non-governmental, regional, and multilateral fora engaged in activities related to standards, technical regulations, and conformity assessment procedures; and (iv) consulting, at a Party's request, on any matter arising under the Chapter.

Conformity Assessment. Chapter Seven provides for a dialogue between the Parties on ways to facilitate the acceptance of conformity assessment results. Each Party will recognize conformity assessment bodies in the territory of the other Party on terms no less favorable than it accords conformity assessment bodies in its own territory.

Transparency. Chapter Seven contains various transparency obligations, such as requiring each Party to: (i) allow persons of the other Party to participate in the development of technical regulations, standards, and conformity assessment procedures on a non-discriminatory basis; (ii) transmit regulatory proposals notified under the *WTO Agreement on Technical Barriers to Trade* directly to the other Party; (iii) describe in writing the objectives of and reasons for the proposed technical regulations or conformity assessment procedure; and (iv) consider comments on such proposals and respond in writing to significant comments it receives. Each Party must implement the Chapter's transparency provisions as soon as practicable, and no later than three years after the Agreement enters into force.

Chapter Eight: Trade Remedies

Safeguards. Chapter Eight establishes a safeguard procedure that will be available to aid domestic industries that sustain or are threatened with serious injury due to increased imports resulting from tariff reduction or elimination under the Agreement. The Chapter does not affect the Parties' rights or obligations under the WTO's safeguard provisions (global safeguards) or under other WTO trade remedy rules.

In Chapter Eight, each Party is authorized to impose temporary duties on an imported originating good if, as a result of the reduction or elimination of a duty under the Agreement, the good is being imported in such increased quantities and under such conditions as to constitute a substantial cause of serious injury, or threat of serious injury, to a domestic industry producing a "like" or "directly competitive" good.

A safeguard measure may be applied on a good only during the Agreement's "transition period" for phasing out duties. A safeguard measure may take one of two forms – a temporary increase in duties to NTR (MFN) levels or a temporary suspension of duty reductions called for under the Agreement. A Party may not impose a safeguard measure under Chapter Eight more than once on any good. A safeguard measure may be in place for an initial period of up to two years. A Party may extend a measure for up to an additional two years, if it determines that the industry is adjusting and the measure remains necessary to facilitate adjustment and prevent or remedy serious injury. If a measure lasts more than one year, the Party must scale it back at regular intervals.

If a Party imposes a safeguard measure, that Party must provide offsetting trade compensation to the other Party whose goods are subject to the measure. If the Parties cannot agree on the amount or nature of the compensation, the exporting Party may unilaterally suspend "substantially equivalent" trade concessions that it has made to the importing Party.

Global Safeguards. Each Party maintains its right to take action against imports from all sources under Article XIX of GATT 1994 and the *WTO Agreement on Safeguards*. A Party may exclude imports of an originating good from the other Party from a global safeguard measure if those imports are not a substantial cause of serious injury or do not create a threat of serious injury. A Party may not apply a safeguard measure under Chapter Eight at the same time that it applies a safeguard measure on the same good under the *WTO Agreement on Safeguards*.

Antidumping and Countervailing Duties. The Parties confirm that each retains its rights and obligations under the WTO Agreement relating to the application of antidumping and countervailing duties. Antidumping and countervailing duty measures may not be challenged under the Agreement's dispute settlement procedures.

Chapter Nine: Government Procurement

Under Chapter Nine each Party must apply fair and transparent procurement procedures and rules and each government and its procuring entities are prohibited from discriminating in purchasing practices against goods, services, and suppliers from the other Party. The rules of Chapter Nine are broadly based on the rules of the *WTO Agreement on Government Procurement*.

General Principles. Chapter Nine establishes a basic rule of "national treatment," meaning that each Party's procurement rules and the entities applying those rules must treat goods, services, and suppliers of such goods and services from the other Party in a manner that is "no less favorable" than their domestic counterparts. Parties are also barred from discriminating against locally established suppliers on the basis of foreign affiliation or ownership. Chapter Nine also provides rules aimed at ensuring a fair and transparent procurement process.

Coverage and Thresholds. Chapter Nine applies to purchases and other means of obtaining goods and services valued above certain dollar thresholds by those government departments, agencies, and enterprises listed in each Party's schedule. Specifically, the Chapter applies to procurements by listed agencies of the "central government," which for the United States is the federal government, of goods and services valued at \$64,786 or more and construction services valued at \$7,407,000 or more. The equivalent thresholds for purchases by listed "sub-central" government entities (*i.e.*, "Gobernaciones" for Colombia and U.S. state government agencies) are \$526,000 and \$7,407,000, for goods and services and construction services, respectively. The Chapter's thresholds for other covered entities are either \$250,000 or \$593,000 for goods and services, and \$7,407,000 for construction services. The thresholds (other than the \$250,000 threshold for other covered entities) are subject to adjustment every two years on January 1, with the next adjustment set for January 1, 2012. With respect to construction services, during the three-year period following the date of entry into force of the Agreement, Colombia may apply a threshold of \$8,000,000 with respect to all three types of entities. The Agreement also provides that certain Colombian telecommunications and electric utilities that would not otherwise be covered by the Agreement must comply with the national treatment non-discrimination obligations in making purchases.

Transparency. Chapter Nine establishes rules designed to ensure transparency in procurement procedures. Each Party must publish its laws, regulations, and other measures governing procurement, along with any changes to those measures. Procuring entities must publish notices of procurement opportunities in advance. The Chapter also lists minimum information that such notices must include.

Tendering Rules. Chapter Nine provides rules for setting deadlines on “tendering” (bidding on government contracts). Procuring entities must give suppliers all the information they need to prepare tenders, including the criteria that procuring entities will use to evaluate tenders. Entities must also, where appropriate, base their technical specifications (*i.e.*, detailed descriptions of the goods or services to be procured) on performance-oriented criteria and international standards. Chapter Nine provides that procuring entities may not write technical specifications with the purpose or effect of creating an unnecessary obstacle to trade between the Parties while clarifying that an entity may adopt technical specifications to promote environmental conservation. The Chapter also clarifies that an entity may adopt technical specifications that require suppliers to comply with generally applicable laws regarding fundamental principles and rights at work and acceptable conditions of work with respect to minimum wages, hours of work, and occupational safety and health in the territory where they make the product or perform the service that the entity will purchase. It also sets out the circumstances under which procuring entities are allowed to use limited tendering, *i.e.*, award a contract to a supplier without opening the procurement to all interested suppliers.

Award Rules. Chapter Nine provides that to be considered for an award, a tender must be submitted by a qualified supplier. The tender must meet the criteria set out in the tender documentation, and procuring entities must base their award of contracts on those criteria. Procuring entities must publish information on awards, including the name of the supplier, a description of the goods or services procured, and the value of the contract. Chapter Nine also calls for each Party to ensure that suppliers may bring challenges against procurement decisions before independent reviewers.

Additional Provisions. The provisions in Chapter Nine build on the anti-corruption provisions of Chapter Nineteen (Transparency), including by requiring each Party to maintain procedures to declare suppliers that have engaged in fraudulent or other illegal actions in relation to procurement ineligible for participation in the Party’s procurement. It establishes procedures under which a Party may modify its coverage under the Chapter, such as when a Party privatizes an entity whose purchases are covered under the Chapter. It also provides that Parties may adopt or maintain measures necessary to protect: (1) public morals, order, or safety; (2) human, animal, or plant life or health, including environmental measures necessary to protect human, animal, or plant life or health; or (3) intellectual property. Parties may also adopt measures relating to goods or services of handicapped persons, philanthropic institutions, or prison labor.

Chapter Ten: Investment

Chapter Ten establishes rules to protect investors from one Party against wrongful or discriminatory government actions when they invest or attempt to invest in the other Party’s

territory. The Chapter's provisions reflect traditional standards incorporated in earlier U.S. bilateral investment treaties, previous trade agreements, and customary international law.

Key Concepts. Under Chapter Ten, the term "investment" covers all forms of investment, including enterprises, securities, certain forms of debt, intellectual property rights, licenses, and certain contracts. The Chapter covers both investments existing when the Agreement enters into force and future investments. The term "investor of a Party" encompasses U.S. and Colombian nationals as well as firms (including branches) established in one of the Parties.

General Principles. Under the Agreement, investors enjoy six basic protections: (1) the right to non-discriminatory treatment relative both to domestic investors and investors of non-Parties; (2) limits on imposition by the host Party of "performance requirements;" (3) the right to free transfer of funds related to an investment; (4) protection from expropriation except when done in conformity with customary international law; (5) the right to the minimum standard of treatment of aliens in accordance with customary international law; and (6) the right to hire key managerial personnel without regard to nationality. (As to this last protection, a Party may require that a majority of the board of directors be of a particular nationality, as long as this does not prevent the investor from controlling its investment.)

Sectoral Coverage and Non-Conforming Measures. With the exception of investments in or by regulated financial institutions (which are treated in Chapter Twelve), Chapter Ten generally applies to all sectors, including service sectors. However, each Party negotiated a limited list, in Annexes I and II, of exemptions from the Chapter's obligations relating to national treatment, NTR (MFN), performance requirements, or senior management and boards of directors ("non-conforming measures"). Annex I contains each Party's list of existing non-conforming measures at the central and regional levels of government. The United States has scheduled an exemption from all of the aforementioned obligations for all existing state measures. All existing local measures are exempted from those obligations for both Parties without the need to be listed. If a Party liberalizes any of these non-conforming Annex I measures, it must thereafter maintain the measure at least at that level of openness. In Annex II, each Party has listed sectors or activities in which it reserves the right to adopt or maintain future non-conforming measures. (Annexes I and II also include exemptions from Chapter Eleven (Cross-Border Trade in Services). See below).

Investor-State Disputes. Chapter Ten provides a mechanism for an investor of a Party to submit to binding international arbitration a claim for damages against the other Party. The investor may assert that the Party has breached a substantive obligation under the Chapter or that the Party has breached an "investment agreement" with, or an "investment authorization" granted to, the investor or a covered investment that the investor owns or controls. "Investment agreements" and "investment authorizations" are arrangements between an investor and a host government based on contracts and authorizations, respectively. These terms are defined in Chapter Ten.

Chapter Ten affords public access to information on investor-State arbitrations conducted pursuant to the Agreement. For example, Chapter Ten requires that hearings be generally open to the public and key documents be publicly available, with exceptions for confidential information,

including confidential business information. The Parties also authorize tribunals to accept *amicus* submissions from the public. In addition, the Chapter includes provisions similar to those used in U.S. courts to dispose quickly of claims a tribunal finds to be frivolous. Finally, within three years after the Agreement enters into force the Parties will consider whether to establish an appellate body, or similar mechanism, to review arbitral awards rendered by tribunals under the Chapter.

Chapter Ten provides that, “except in rare circumstances,” nondiscriminatory regulatory actions designed and applied to meet legitimate public welfare objectives, such as public health, safety, and the environment, are not indirect expropriations.

The Agreement does not require the United States to give Colombian investors greater substantive rights that U.S. companies already enjoy in the United States.

Chapter Eleven: Cross-Border Trade in Services

Chapter Eleven governs measures affecting cross-border trade in services between the Parties. Certain provisions also apply to measures affecting investments to supply services.

Key Concepts. Under the Agreement, cross-border trade in services covers supply of a service:

- from the territory of one Party into the territory of the other Party (*e.g.*, electronic delivery of services from the United States to Colombia);
- in the territory of a Party by a person of that Party to a person of the other Party (*e.g.*, a Colombian company provides services to U.S. visitors in Colombia); and
- by a national of a Party in the territory of the other Party (*e.g.*, a U.S. lawyer provides legal services in Colombia).

Chapter Eleven should be read together with Chapter Ten (Investment), which establishes rules pertaining to the treatment of service firms that choose to provide their services through a local presence, rather than cross-border. Chapter Eleven applies where, for example, a service supplier is temporarily present in a territory of a Party and does not operate through a local investment.

General Principles. Among Chapter Eleven’s core obligations are requirements to provide national treatment and NTR (MFN) treatment to service suppliers of the other Party. Thus, each Party must treat service suppliers of the other Party no less favorably than its own suppliers or those of any other country. This commitment applies to state and local governments as well as the federal government. The Chapter’s provisions apply to existing service suppliers as well as those who seek to supply services. The Parties are prohibited from requiring firms to establish a local presence as a condition for supplying a service on a cross-border basis. In addition, certain types of market access restrictions on the supply of services (*e.g.*, that limit the number of firms that may offer a particular service or that restrict or require specific types of legal structures or joint ventures with local companies in order to supply a service) are also barred. The Chapter’s

market access rules apply both to services supplied on a cross-border basis and through a local investment.

Sectoral Coverage and Non-Conforming Measures. Chapter Eleven applies across virtually all services sectors. The Chapter excludes financial services (which are addressed in Chapter Twelve), except that certain provisions of Chapter Eleven apply to investments in financial services that are not regulated as financial institutions and are covered by Chapter Ten (Investment). In addition, Chapter Eleven does not cover air transportation, although it does apply to specialty air services and aircraft repair and maintenance.

Each Party has listed in Annexes I and II measures or sectors for which it negotiated exemptions from Chapter Eleven's core obligations (national treatment, NTR (MFN), local presence, and market access). Annex I contains the list of existing non-conforming measures at the central and regional level of government. The United States has scheduled an exemption from national treatment, NTR (MFN), and local presence for all existing state measures. Our coverage under the market access discipline is the same as our commitments under the WTO *General Agreement on Trade in Services*, with the right to take measures not inconsistent with those commitments. All existing local measures are exempted for both Parties without the need to be listed. However, once a Party liberalizes any of these non-conforming Annex I measures, it must thereafter maintain the measure at least at that level of openness. Each Party has listed in Annex II sectors or activities in which it reserves the right to adopt or maintain future non-conforming measures.

Specific Commitments. Chapter Eleven includes a comprehensive definition of express delivery services under which each Party must provide national treatment, NTR (MFN) treatment, and additional benefits to express delivery services of the other Party. The Chapter provides that the Parties will try to maintain the level of market openness for express delivery services they provided on the date the Agreement was signed, and a Party may request consultations with the other if it believes the other Party is not maintaining that level of access. The Chapter also addresses the issue of postal monopolies directing revenues derived from monopoly postal services to confer an advantage on express delivery services. In addition, Colombia has committed to eliminate a requirement that has prevented U.S.-owned companies in Colombia from hiring the managers, professionals, and specialists of their choice for their operations in Colombia.

Transparency and Domestic Regulation. Provisions on transparency and domestic regulation complement the core rules of Chapter Eleven. The transparency rules apply to the development and application of regulations governing services. The Chapter's rules on domestic regulation govern the operation of approval and licensing systems for service suppliers. Like the Chapter's market access rules, its provisions on transparency and domestic regulation cover services supplied both on a cross-border basis and through a local investment.

Exclusions. Chapter Eleven does not apply to any service supplied "in the exercise of governmental authority" – that is, a service that is provided on a non-commercial and non-competitive basis. Chapter Eleven also does not apply to government subsidies. In addition, the

Chapter makes clear that the Agreement does not impose any obligation on a Party with respect to its immigration measures, including admission or conditions of admission for temporary entry.

Chapter Twelve: Financial Services

Chapter Twelve covers measures relating to the supply of financial services. It provides rules governing each Party's treatment of: (1) financial institutions of the other Party; (2) investors of the other Party, and their investments, in financial institutions; and (3) cross-border trade in financial services.

Key Concepts. The Chapter defines a "financial institution" as any financial intermediary or other enterprise authorized to do business and regulated or supervised as a financial institution under the law of the Party where it is located. A "financial service" is any service of a financial nature, including, for example, insurance, banking, securities, asset management, financial information and data processing services, and financial advisory services.

General Principles. Chapter Twelve's core obligations parallel those in Chapters Ten (Investment) and Eleven (Cross-Border Trade in Services). Specifically, Chapter Twelve imposes rules requiring national treatment and NTR (MFN) treatment, prohibits certain quantitative restrictions on market access of financial institutions, and bars restrictions on the nationality of senior management. As appropriate, these rules apply to measures affecting financial institutions, investors and investments in financial institutions of the other Party, and services companies that are currently supplying and that seek to supply financial services on a cross-border basis. The rules do not apply to measures adopted or maintained by a Party relating to certain specified services and activities – for example, activities or services forming part of a public retirement plan or statutory system of social security – unless a Party allows its financial institutions to compete with a public entity or a financial institution to supply such services and activities. Provisions such as the prudential and monetary and exchange rate exceptions ensure that governments may continue to regulate the financial sector and to take action to ensure the stability and integrity of the financial system in a financial crisis.

Non-Conforming Measures. Similar to Chapters Ten (Investment) and Eleven (Cross-Border Trade in Services), each Party has listed in an annex (Annex III) particular measures for which it negotiated exemptions from the Chapter's core obligations. Existing non-conforming U.S. state and local laws and regulations are exempted from these obligations. Once a Party, including a state or local government, liberalizes one of these non-conforming measures, however, it must, in most cases, maintain the measure at least at that new level of openness.

Other Provisions. Chapter Twelve also includes provisions on regulatory transparency, "new" financial services, self-regulatory organizations, and the expedited availability of insurance products.

Relationship to Other Chapters. Measures that a Party applies to financial services suppliers of the other Party, other than regulated financial institutions, that make or operate investments in the Party's territory are covered principally by Chapter Ten (Investment) and certain provisions of

Chapter Eleven (Cross-Border Trade in Services). In particular, the core obligations of Chapter Ten apply to such measures, as do the market access, transparency, and domestic regulation provisions of Chapter Eleven. Chapter Twelve incorporates by reference certain provisions of Chapter Ten, such as those relating to transfers and expropriation.

Chapter Thirteen: Competition Policy, Designated Monopolies, and State Enterprises

Recognizing that anticompetitive business conduct has the potential to restrict bilateral trade and investment, Chapter Thirteen calls for each government to proscribe such conduct. The Chapter also sets out basic procedural safeguards and rules ensuring against harmful conduct by government-designated monopolies and state enterprises.

Competition Laws. Each Party must adopt or maintain laws prohibiting anticompetitive business conduct and to take appropriate action with respect to such conduct. Each Party must also maintain authorities responsible for enforcing its national competition laws. The Parties affirm that the enforcement policy of each Party's national competition authority is not to discriminate on the basis of nationality. It also obligates each Party to provide certain procedural protections for persons facing enforcement actions. Each Party will ensure that persons subject to sanctions or remedies for competition law violations will be provided a right to be heard and to present evidence, and to seek review by a court or independent tribunal.

Designated Monopolies. There are specific rules governing instances in which a Party gives a private or national government-owned entity a monopoly to provide or purchase a good or service. In particular, the Party must ensure that the entity: (1) abides by the Party's obligations under the Agreement wherever it exercises authority delegated to it by the government in connection with the monopoly good or service; (2) purchases or sells the monopoly product in a manner consistent with commercial considerations; (3) does not discriminate against the other Party's investments, goods, or service suppliers in the purchase or sale of the monopoly product; and (4) does not engage in anticompetitive practices in markets outside its monopoly mandate that harm the other Party's investments.

State Enterprises. Chapter Thirteen sets forth obligations regarding the Parties' responsibilities for "state enterprises," *i.e.*, enterprises owned or controlled by a Party. Each Party must ensure that its state enterprises accord non-discriminatory treatment in the sale of their products to the other Party's investments.

Cooperation and Working Group. Chapter Thirteen provides for bilateral cooperation in relation to the enforcement of competition laws. In addition, the Parties will establish a working group to promote greater understanding and cooperation between the Parties with respect to the matters covered under the Chapter.

Dispute Settlement. Many of the Chapter's provisions are not subject to the Agreement's dispute settlement procedures, including the provisions requiring a Party to adopt and enforce laws prohibiting anticompetitive business conduct and the provisions governing cooperation and

consultations. The Chapter's rules addressing designated monopolies and state enterprises, however, may be enforced through the Agreement's State-to-State dispute settlement mechanism.

Chapter Fourteen: Telecommunications

Chapter Fourteen includes disciplines beyond those imposed under Chapters Ten (Investment) and Eleven (Cross-Border Trade in Services) on regulatory measures affecting telecommunications trade and investment between the Parties. It is designed to ensure that service suppliers of each Party have non-discriminatory access to public telecommunications networks in the territory of the other Party. In addition, each Party must regulate its major telecommunications suppliers in ways that will ensure a level playing field for new entrants. The Parties also seek to ensure that telecommunications regulations are set by independent regulators applying transparent procedures, and is designed to encourage adherence to principles of deregulation and technological neutrality.

Key Concepts. Under Chapter Fourteen, a "public telecommunications service" is any telecommunications service that a Party requires to be offered to the public generally. The term includes voice and data transmission services. It does not include the offering of "information services" (e.g., services that enable users to create, store, or process information over a network). A "major supplier" is a company that, by virtue of its market position or control over certain facilities, can materially affect the terms of participation in the market.

Competition. Chapter Fourteen establishes rules promoting effective competition in telecommunications services. It also provides flexibility to account for changes that may occur through new legislation or regulatory decisions. The Chapter includes commitments by each Party to:

- ensure that all service suppliers of the other Party that seek to access or use a public telecommunications network in the Party's territory can do so on reasonable and non-discriminatory terms (e.g., Colombia must ensure that its public phone companies do not provide preferential access to Colombian banks or Internet service providers, to the detriment of U.S. competitors);
- give the other Party's telecommunications suppliers, in particular, the right to interconnect their networks with public networks in the Party's territory;
- ensure that telecommunications suppliers of the other Party enjoy the right to lease lines to supplement their own networks or, alternatively, purchase telecommunications services from domestic suppliers and resell them in order to build a customer base; and
- impose disciplines on the behavior of "major suppliers."

Regulation. The Chapter addresses key regulatory concerns that may create barriers to trade and investment in telecommunications services. In particular, each Party:

- will adopt procedures that will help ensure that they maintain open and transparent telecommunications regulatory regimes, including requirements to publish interconnection agreements and service tariffs;
- will require their telecommunications regulators to resolve disputes between suppliers and provide foreign suppliers the right to seek judicial review of those decisions;
- may elect to deregulate telecommunications services when competition emerges and certain standards are met; and
- will avoid impeding telecommunications suppliers from choosing technologies they consider appropriate for supplying their services.

Chapter Fifteen: Electronic Commerce

Chapter Fifteen establishes rules designed to prohibit discriminatory regulation of electronic trade in digitally encoded products such as computer programs, video, images, and sound recordings. The provisions in this and other recent U.S. trade agreements represent a major advance over previous international understandings on this subject.

Customs Duties. Chapter Fifteen provides that a Party may not impose customs duties on digital products of the other Party transmitted electronically and will determine the customs value of an imported carrier medium bearing a digital product based on the value of the carrier medium alone, without regard to the value of the digital product stored on the carrier medium.

Non-Discrimination. The Parties will apply the principles of national treatment and NTR (MFN) treatment to trade in electronically-transmitted digital products. Thus, a Party may not discriminate against electronically-transmitted digital products on the grounds that they have a nexus to another country, either because they have undergone certain specific activities (*e.g.*, creation, production, first sale) there or are associated with certain categories of persons of the other Party or a non-Party (*e.g.*, authors, performers, producers). Nor may a Party provide less favorable treatment to digital products that have a nexus to the other Party than it gives to like products that have a nexus to a third country. The non-discrimination rules do not apply to non-conforming measures adopted under Chapters Ten (Investment), Eleven (Cross-Border Trade in Services), or Twelve (Financial Services).

Additional Provisions. Chapter Fifteen contains additional provisions relating to authentication, online consumer protection, and paperless trade administration.

Chapter Sixteen: Intellectual Property Rights

Chapter Sixteen complements and enhances existing international standards for the protection of intellectual property and the enforcement of intellectual property rights, consistent with U.S. law.

General Provisions. In Chapter Sixteen the Parties commit to ratify or accede to several agreements on intellectual property rights, including, by the date the Agreement enters into force, the WIPO *Copyright Treaty*, the *Brussels Convention Relating to the Distribution of Programme-Carrying Satellite Signals*, and the WIPO *Performances and Phonograms Treaty*, and, within specified periods, *the International Convention for the Protection of New Varieties of Plants*, the *Trademark Law Treaty*, and the *Patent Cooperation Treaty*. The United States is already a party to these Agreements. With very limited exceptions, each Party commits to provide national treatment to the other Party's nationals with respect to the enjoyment and protection of the intellectual property rights covered by the Chapter.

Trademarks and Geographical Indications. Each Party must protect trademarks and geographical indications, including by refusing protection or recognition of a geographical indication that is likely to cause confusion with a preexisting trademark. The Chapter provides that trademarks protection includes protection for collective marks and certification marks. Each Party must also establish an electronic system for applying for, registering, and maintaining trademarks, as well as an online database. (Colombia has one year from the date of entry into force of the Agreement to give effect to this provision.) Each Party must also provide efficient and transparent procedures governing applications to protect trademarks and geographical indications. Furthermore, each Party's Internet domain name management system must include a dispute resolution procedure to address trademark cyber-piracy.

Copyright and Related Rights. Under Chapter Sixteen, the Parties must provide broad protection for copyright and related rights, affirming and building on rights set out in several international agreements. For instance, each Party must provide copyright protection for the life of the author plus 70 years (for works measured by a person's life). The Chapter also provides enhancements of the rights of copyright owners over digital copies of their works. Each Party must also provide a right of communication to the public, including the exclusive right to authorize making protected works available online. Each Party must also protect the rights of performers and producers of phonograms.

To curb copyright piracy, government agencies of the Parties must use only legitimate computer software, setting an example for the private sector. The Chapter also includes provisions on anti-circumvention of effective technological measures, under which the Parties commit to prohibit tampering with technology used to protect copyrighted works. In addition, Chapter Sixteen sets out obligations with respect to the liability of Internet service providers in connection with copyright infringements that take place over their networks. Finally, recognizing the importance of satellite broadcasts, Chapter Sixteen provides that each Party will protect encrypted program-carrying satellite signals. It obligates the Parties to extend protection to the signals themselves, as well as to the content contained in the signals.

Patents. Chapter Sixteen also includes a variety of provisions for the protection of patents. The Parties will make patents available for any invention, subject to limited exclusions. To guard against arbitrary revocation of patents, each Party must limit the grounds for revoking a patent to the grounds that would have justified a refusal to grant the patent. Under Chapter Sixteen, each Party must make best efforts to process patent applications and marketing approval applications

expeditiously. With respect to most products, a Party must adjust the patent term to compensate for unreasonable delays that occur while granting a patent. For pharmaceutical products, a Party may provide for such adjustments if there is an unreasonable delay in granting a patent or providing marketing approval for a product.

Certain Regulated Products. Chapter Sixteen includes additional specific provisions relating to pharmaceuticals and agricultural chemicals. Among other things, the Chapter provides for the protection of test data and other data concerning safety or efficacy that a company submits in seeking marketing approval for such products by precluding other firms from relying on the data. It provides specific periods for such protection – normally five years for pharmaceuticals and ten years for agricultural chemicals. This means, for example, that during the period of protection, information that a company submits for approval of a new agricultural chemical product cannot be used without that company’s consent in granting approval to market a new product. If a Party bases its decision to approve a pharmaceutical product for marketing in its territory on a marketing approval the other Party has granted for that product, and it approves the product within six months after the company applies for the approval in the Party, the period of test data protection will be counted from the date the other Party approved the product. The Chapter’s rules governing test data protection for pharmaceutical products are subject to a public health exception in accordance with the *Doha Declaration on the TRIPS Agreement and Public Health*. The Parties must implement procedures for the expeditious adjudication of disputes concerning the validity or infringement of a patent, a transparent system to provide notice to a patent holder that another person is seeking to market an approved pharmaceutical product during the term of a patent, and sufficient time and opportunity for a patent holder to seek, prior to the marketing of an allegedly infringing product, available remedies for an infringing product.

Public Health. Chapter Sixteen expresses the Parties’ understanding that its obligations do not and should not prevent a Party from taking measures to protect public health, in accordance with the *Doha Declaration on the TRIPS Agreement and Public Health*, by promoting access to medicines for all.

Enforcement Provisions. In Chapter Sixteen the Parties also assume obligations with respect to the enforcement of intellectual property rights in administrative, civil, and criminal proceedings, and at the border. For example, each Party, in determining damages in civil proceedings involving copyright infringement or trademark counterfeiting, must take into account the value of the legitimate goods as well as the infringer’s profits, and must also provide for damages based on a fixed range (*i.e.*, “pre-established damages”) as an option that the right holder can elect instead of actual damages.

Chapter Sixteen further provides that each Party’s law enforcement agencies must have authority to seize suspected pirated and counterfeit goods, the equipment used to make or transmit them, and documentary evidence. Each Party must give its courts authority to order the forfeiture and/or destruction of such items. Chapter Sixteen also provides that each Party must apply criminal penalties against willful counterfeiting and piracy, including end-user piracy, on a commercial scale.

Each Party must empower its law enforcement agencies to take *ex officio* enforcement action at the border against pirated or counterfeit goods without waiting for a formal complaint.

Transition Periods. Most obligations in the Chapter take effect on the date the Agreement enters into force. However, Colombia may delay giving effect to certain specified obligations for periods ranging from one year to three years after that date.

Chapter Seventeen: Labor

Chapter Seventeen sets out the Parties' commitments and undertakings regarding trade-related labor rights.

Fundamental Labor Rights. Each Party commits to adopt and maintain in its statutes, regulations, and practice certain enumerated labor rights, as stated in the 1998 ILO *Declaration on Fundamental Principles and Rights at Work and Its Follow Up*. Specifically, these are (1) freedom of association; (2) the effective recognition of the right to collective bargaining; (3) the elimination of all forms of forced or compulsory labor; (4) the effective abolition of child labor and, for purposes of the Agreement, a prohibition on the worst forms of child labor; and (5) the elimination of discrimination in respect of employment and occupation. In order to establish a violation of this obligation, a Party must demonstrate that the other Party has failed to comply in a manner affecting trade or investment between the Parties. Neither Party may waive or otherwise derogate from its statutes or regulations implementing this obligation in a manner affecting bilateral trade or investment where the waiver or derogation would be inconsistent with one of the enumerated rights. For the United States, the Chapter's provisions regarding fundamental labor rights apply to federal law only.

Effective Enforcement. Each Party commits not to fail to effectively enforce its labor laws on a sustained or recurring basis in a manner affecting trade or investment between the Parties. The Chapter defines "labor laws" to include laws directly related to the ILO fundamental labor rights, as well as laws providing for acceptable conditions of work with respect to minimum wages, hours of work, and occupational safety and health, and laws providing labor protections for children and minors, including a prohibition on the worst forms of child labor. For the United States, "labor laws" includes federal statutes and regulations addressing these areas, but it does not cover state or local labor laws.

Procedural Guarantees. Each Party commits to afford procedural guarantees that ensure workers and employers have access to tribunals for the enforcement of its labor laws. To this end, each Party must ensure that proceedings before these tribunals are fair, equitable, and transparent and comply with due process of law. Decisions of such tribunals must be in writing, made publicly available, and based on information or evidence in respect of which the parties were offered the opportunity to be heard. In addition, hearings in such proceedings must be open to the public, except where the administration of justice otherwise requires. Each Party also commits to make remedies available to ensure the enforcement of its labor laws. Such remedies might include orders, fines, penalties, or temporary workplace closures.

Dispute Settlement. Chapter Seventeen provides for cooperative consultations as a first step if a Party considers that the other Party is not complying with its obligations under the Chapter. The complaining Party may, after an initial 60-day consultation period under Chapter Seventeen, invoke the Agreement's general dispute settlement mechanism by requesting additional consultations or a meeting of the Agreement's cabinet-level Free Trade Commission under the provisions of Chapter Twenty-One (Dispute Settlement). If the Commission is unable to resolve the dispute, the matter may be referred to a dispute settlement panel.

Institutional Arrangements, Cooperation and Capacity Building. Chapter Seventeen establishes a cabinet-level Labor Affairs Council to oversee the Chapter's implementation and to provide a forum for consultations and cooperation on labor matters. Each Party must designate a contact point for communications with the other Party and the public regarding the Chapter. Each Party's contact point must provide transparent procedures for the submission, receipt, and consideration of communications from persons of a Party relating to the Chapter.

The Parties also create a labor cooperation and capacity building mechanism through which the Parties will work together to address labor matters of common interest. In particular, the mechanism will assist the Parties to establish priorities for, and carry out, cooperation and capacity building activities relating to such topics as: the effective application of fundamental labor rights; legislation and practice relating to compliance with ILO Convention 182 on the worst forms of child labor; strengthening labor inspection systems and the institutional capacity of labor administrations and tribunals; mechanisms for supervising compliance with laws and regulations pertaining to working conditions; and the elimination of gender discrimination in employment.

Chapter Eighteen: Environment

Chapter Eighteen sets out the Parties' commitments and undertakings regarding environmental protection.

General Principles. Each Party must strive to ensure that its environmental laws provide for and encourage high levels of environmental protection and continue to improve its respective levels of environmental protection. Each Party also commits not to waive or otherwise derogate from its environmental laws to weaken or reduce the levels of environmental protection in a manner affecting trade or investment between the Parties other than pursuant to a provision in its environmental law providing for waivers or derogations. Chapter Eighteen further includes commitments to enhance cooperation between the Parties in environmental matters and encourages the Parties to develop voluntary, market-based mechanisms as one means for achieving and sustaining high levels of environmental protection.

Multilateral Environmental Agreements. The Parties recognize that certain multilateral environment agreements (MEAs) play an important role globally and domestically in protecting the environment. The Chapter includes a provision requiring each Party to adopt, maintain, and implement laws, regulations, and all other measures to fulfill its obligations under certain MEAs to which both governments are parties ("covered agreements"). To establish a violation of this

obligation a Party must demonstrate that the other Party has failed to comply in a manner affecting trade or investment between the Parties.

Chapter Eighteen provides that in the event of any inconsistency between a Party's obligations under the Agreement and a covered agreement, the Party must seek to balance its obligation under both agreements, but this will not preclude a Party from taking measures to comply with the covered agreement as long as the measure's primary purpose is not to impose a disguised restriction on trade.

Effective Enforcement. Each Party commits not to fail to effectively enforce its environmental laws, and its laws, regulations, and other measures to fulfill its obligations under the covered agreements, on a sustained or recurring basis in a manner affecting trade or investment between the Parties. For the United States, "environmental laws" comprise federal environmental statutes and regulations promulgated under those statutes that are enforceable by action of the federal government.

Procedural Matters. Each Party commits to make judicial, quasi-judicial, or administrative proceedings available to sanction or remedy violations of its environmental laws. Each Party must ensure that such proceedings are fair, equitable, and transparent, and, to this end, comply with due process of law and are open to the public, except where the administration of justice otherwise requires. Each Party must ensure that interested persons may request the Party's competent authorities to investigate alleged violations of its environmental laws and that those authorities duly consider such requests. Each Party must also make appropriate and effective remedies available for violations of its environmental laws. These remedies may include, for example, fines, injunctions, or requirements to take remedial action or pay for the cost of containing or cleaning up pollution.

Environmental Performance: Each Party will encourage the development and use of flexible, voluntary, and incentive-based mechanisms for environmental protection, and will encourage the development and improvement of performance goals and indicators for measuring environmental performance as well as flexible means for achieving performance goals.

Institutional Arrangements and Cooperation. Chapter Eighteen establishes a senior-level Environmental Affairs Council to oversee implementation of the Chapter. The Council will provide for the public to participate in its work, including by affording an opportunity at each Council meeting, unless the Parties otherwise agree, for the public to express views on how the Chapter is being implemented. The Council must also provide appropriate opportunities for the public to participate in the development and implementation of joint environmental activities, including those developed under a separate bilateral environmental cooperation agreement that the Parties have negotiated.

Public Participation and Submissions. Each Party must provide for the receipt and consideration of submissions from persons of a Party on matters related to implementation of the Chapter. Each Party will also convene a national advisory committee to solicit views on matters related to the implementation of the Chapter. In addition, the Chapter provides that any person of a Party

may file a submission with an independent secretariat asserting that a Party is failing to effectively enforce its environmental laws. The secretariat will review the submission according to specified criteria and in appropriate cases recommend to the Environmental Affairs Council that a factual record concerning the matter be developed. The secretariat will prepare a factual record if a member of the Environmental Affairs Council instructs it to do so. The Council will consider the record and, where appropriate, provide recommendations to an environmental cooperation commission that will be created under the related environmental cooperation agreement. U.S. persons who consider that the United States is failing to effectively enforce its environmental laws may invoke the comparable public submissions process under the North American Agreement on Environmental Cooperation. The Parties will designate the secretariat and make related arrangements through a separate understanding.

Biological Diversity. The Chapter includes a specific provision on biological diversity, in which the Parties recognize the importance of biological diversity, restate their commitment to encouraging and promoting its protection, and agree to enhance their cooperative efforts with respect to biological diversity.

Dispute Settlement. Chapter Eighteen provides for cooperative consultations as a first step if a Party considers that the other Party is not complying with its obligations under the Chapter. The complaining Party may, after an initial 60-day consultation period, invoke the Agreement's general dispute settlement mechanism by requesting additional consultations or a meeting of the Agreement's cabinet-level Free Trade Commission under Chapter Twenty-One (Dispute Settlement). If the Commission is unable to resolve the dispute, the matter may be referred to a dispute settlement panel.

Chapter Nineteen: Transparency

Section A of Chapter Nineteen sets out requirements designed to foster openness, transparency, and fairness in the adoption and application of measures on matters covered by the Agreement. Each Party must promptly publish all laws, regulations, procedures, and administrative rulings of general application concerning subjects covered by the Agreement, or otherwise make them available. To the extent possible, the Parties must publish proposed regulations in advance and give interested persons a reasonable opportunity to comment. Wherever possible, each Party must provide reasonable notice to the other Party's nationals and enterprises that are directly affected by an agency process, including an adjudication, rulemaking, licensing, determination, and approval process. A Party is to afford such persons a reasonable opportunity to present facts and arguments prior to any final administrative action, when time, the nature of the process, and the public interest permit.

Chapter Nineteen also provides for independent review and appeal of final administrative actions. Appeal rights must include a reasonable opportunity to present arguments and to obtain a decision based on evidence in the administrative record.

In Section B of Chapter Nineteen, the Parties affirm their commitment to prevent and combat corruption, including bribery in international trade and investment. To this end, each Party is

obligated to make it a criminal offense for its public officials to solicit or accept a bribe, and for any person subject to its jurisdiction to bribe a public official of that Party or a foreign public official in exchange for favorable government action in matters affecting international trade or investment. Each Party must also endeavor to protect persons who, in good faith, report acts of bribery or corruption and to work together to encourage and support initiatives in relevant international fora to prevent bribery and corruption.

Chapter Twenty: Administration of the Agreement and Trade Capacity Building

In Chapter Twenty, the Parties create a Free Trade Commission to supervise the implementation and overall operation of the Agreement. The Commission comprises the Parties' trade ministers and will meet annually. The Commission will assist in the resolution of any disputes that may arise under the Agreement. The Commission may issue interpretations of the Agreement and agree to accelerate duty elimination on particular products and adjust the Agreement's product-specific rules of origin.

Each Party must designate an office to provide administrative assistance to dispute settlement panels and perform such other functions as the Commission may direct.

The Parties also establish a Committee on Trade Capacity Building comprising representatives of each Party. The overall objective of the Committee is to assist Colombia to implement the Agreement and adjust to liberalized bilateral trade. Particular functions of the Committee include: prioritizing trade capacity building projects; inviting international donor institutions, private sector entities, and non-governmental organizations to assist in the development and implementation of trade capacity building projects; and monitoring and assessing progress in implementing those projects.

Chapter Twenty-One: Dispute Settlement

Chapter Twenty-One sets out detailed procedures for the resolution of disputes between the Parties over compliance with the Agreement. Those procedures emphasize amicable settlements, relying wherever possible on bilateral cooperation and consultations. When disputes arise under provisions common to the Agreement and other agreements (*e.g.*, the WTO agreements), the complaining government may choose a forum for resolving the matter that is set forth in any valid agreement between the Parties. The selected forum will be the exclusive venue for resolving that dispute.

Consultations. A Party may request consultations with the other Party on any actual or proposed measure that it believes might affect the operation of the Agreement. If the Parties cannot resolve the matter through consultations within a specified period (normally 60 days), any consulting Party may refer the matter to the Free Trade Commission, which will attempt to resolve the dispute.

Panel Procedures. If the Commission cannot resolve the dispute within a specified period (normally 30 days), any consulting Party may refer the matter, if it involves an actual measure, to

a panel comprising independent experts that the Parties select. The Parties will set rules to protect confidential information, provide for open hearings and public release of submissions, and allow an opportunity for the panel to accept submissions from non-governmental entities in the Parties' territories.

Unless the Parties agree otherwise, a panel is to present its initial report within 120 days after the last panelist is selected. Once the panel presents its initial report containing findings of fact and a determination on whether a Party has met its obligations, the Parties will have the opportunity to provide written comments to the panel. When the panel receives these comments, it may reconsider its report and make any further examination that it considers appropriate. Within 30 days after it presents its initial report, the panel will submit its final report. The Parties will then seek to agree on how to resolve the dispute, normally in a way that conforms to the panel's determinations and recommendations. Subject to protection of confidential information, the panel's final report will be made available to the public 15 days after the Parties receive it.

Suspension of Benefits. If the Parties cannot resolve the dispute after they receive the panel's final report, the Parties will seek to agree on acceptable trade compensation. If they cannot agree on compensation, or if the complaining Party believes the defending Party has failed to implement an agreed resolution, the complaining Party may provide notice that it intends to suspend trade benefits equivalent in effect to those it considers were impaired, or may be impaired, as a result of the disputed measure.

If the defending Party considers that the proposed level of benefits to be suspended is "manifestly excessive," or believes that it has modified the disputed measure to make it conform to the Agreement, it may request the panel to reconvene and decide the matter. The panel must issue its determination no later than 90 days after the request is made (or 120 days if the panel is reviewing both the level of the proposed suspension and a modification of the measure).

The complaining Party may suspend trade benefits up to the level that the panel sets or, if the panel has not been asked to determine the level, up to the amount that the complaining Party has proposed. The complaining Party cannot suspend benefits, however, if the defending Party provides notice that it will pay an annual monetary assessment to the other Party. The amount of the assessment will be established by agreement of the Parties or, failing that, will be set at 50 percent of the level of trade concessions the complaining Party was authorized to suspend.

Compliance Review Mechanism. If, at any time, the defending Party believes it has made changes in its laws or regulations sufficient to comply with its obligations under the Agreement, it may refer the matter to the panel. If the panel agrees, the dispute ends and the complaining Party must withdraw any offsetting measures it has put in place. Concurrently, the defending government will be relieved of any obligation to pay a monetary assessment.

The Parties will review the operation of the compliance procedures either five years after the Agreement enters into force or within six months after benefits have been suspended or assessments paid in five proceedings initiated under this Agreement, whichever occurs first.

Settlement of Private Disputes. The Parties will encourage the use of arbitration and other alternative dispute resolution mechanisms to settle international commercial disputes between private parties. Each Party must provide appropriate procedures for the recognition and enforcement of arbitral awards, for example by complying with the 1958 United Nations Convention on the Recognition and Enforcement of Foreign Arbitral Awards or the 1975 Inter-American Convention on International Commercial Arbitration.

Chapter Twenty-Two: Exceptions

Chapter Twenty-Two sets out provisions that generally apply to the entire Agreement. Article XX of the GATT 1994 and its interpretive notes are incorporated into and made part of the Agreement, *mutatis mutandis*, and apply to those Chapters related to treatment of goods. Likewise, for the purposes of Chapters Eleven (Cross-Border Trade in Services), Fourteen (Telecommunications), and Fifteen (Electronic Commerce), GATS Article XIV (including its footnotes) is incorporated into and made part of the Agreement. For both goods and services, the Parties understand that these exceptions include certain environmental measures.

Essential Security. Chapter Twenty-Two makes clear that nothing in the Agreement prevents a Party from taking actions it considers necessary to protect its essential security interests, and specifically provides that an arbitration panel must apply the essential security exception if a Party invokes it. With respect to non-conforming measures relating to port activities listed by Colombia and the United States in Annex I and II, respectively, each Party has clarified that the landside aspects of port activities are subject to the Agreement's essential security exception.

Taxation. An exception for taxation limits the field of tax measures subject to the Agreement. For example, the exception generally provides that the Agreement does not affect a Party's rights or obligations under any tax convention. The exception sets out certain circumstances under which tax measures are subject to the Agreement's: (1) national treatment obligation for goods; (2) national treatment and NTR (MFN) obligations for services; (3) prohibitions on performance requirements; and (4) expropriation rules.

Disclosure of Information. The Chapter also provides that a Party may withhold information from the other Party where such disclosure would impede domestic law enforcement, otherwise be contrary to the public interest, or prejudice the legitimate commercial interests of particular enterprises.

Chapter Twenty-Three: Final Provisions

Chapter Twenty-Three provides that (i) the annexes, appendices, and footnotes are part of the Agreement, (ii) the Parties may amend the Agreement subject to the legal requirements of each Party, and (iii) the English and Spanish texts are both authentic. It also provides for consultations if any provision of the WTO Agreement that the Parties have incorporated into the Agreement is amended.

In Chapter Twenty-Three, the Parties establish the procedures for the Agreement to enter into force and terminate. The Chapter provides that any other country or group of countries may accede to the Agreement on terms and conditions that are agreed with the Parties and approved according to each Party's legal requirements.

EFFECT OF THE UNITED STATES – COLOMBIA TRADE PROMOTION AGREEMENT ON STATE AND LOCAL GOVERNMENTS

I. Introduction

The United States – Colombia Trade Promotion Agreement (CTPA or Agreement) will eliminate tariffs and trade barriers and expand opportunities for workers, manufacturers, consumers, farmers, ranchers and service providers in the United States and Colombia. The United States exported \$12 billion to Colombia in 2010.

Until very recently, most Colombian products have entered the United States duty-free under unilateral trade preference programs – the Andean Trade Preference Act, as amended (ATPA) and the Generalized System of Preferences (GSP) – as well as under existing duty-free treatment provided on a normal trade relations/most-favored-nation (NTR/MFN) basis. The CTPA opens Colombia's markets to manufactured goods, services, and farm products from the United States. Over 80 percent of U.S. exports of industrial and consumer goods (not including petroleum) will become duty-free immediately upon the entry into force of the Agreement. An additional six percent will become duty-free within five years, with remaining tariffs phased out over 10 years. Key U.S. export sectors that will benefit from the elimination of duties include agriculture and construction equipment, aircraft and parts, auto parts, fertilizers and agro-chemicals, information technology equipment, and medical and scientific equipment.

Many U.S. farm exports to Colombia, including high quality beef, cotton, wheat, soybeans, soybean meal, almonds, apples, pears, peaches, cherries, and many processed food products including frozen french fries and cookies will receive immediate duty-free treatment. Upon implementation of the CTPA, almost 70 percent of current U.S. agricultural exports by value will become duty-free.

Colombia will accord substantial market access across its entire services regime, including financial services, subject to very few exceptions. Colombia agreed to exceed commitments made in the WTO, and to dismantle significant services and investment barriers, such as requirements that U.S. firms hire Colombians rather than Americans to provide professional services in Colombia.

At the same time, the Agreement will further strengthen democratic and economic reforms, by supporting the rule of law, open and transparent governance, and the protection of private property rights and investments.

One of USTR's statutory advisory committees, the Intergovernmental Policy Advisory Committee (IGPAC), is composed of representatives and associations representing executive, legislative, and judicial branches of sub-federal government, as well as states, counties, and cities. The National Governors Association (NGA), the Council of State Governments (CSG), the National Conference of State Legislatures (NCSL), the National League of Cities (NLC), the National Association of Counties (NACo), and the National Association of Attorneys General (NAAG) are among the organizations represented on the IGPAC. In recent years, USTR has

revitalized and significantly expanded membership and geographic representation on the IGPAC to include State Points of Contact designated by the Governors' offices, as well as state legislators and attorneys general nominated by NCSL and NAAG, respectively.

Pursuant to the Trade Act of 1974, each of the statutory advisory committees, including the IGPAC, was required to produce a report on the Agreement. The IGPAC report assesses the impact of the Agreement from the perspective of U.S. state and local governments. In its report (available in full at www.ustr.gov), the IGPAC recognizes that:

“This agreement with Colombia, a long-standing ally of the US, could foster trade ties and deepen economic integration throughout Latin America. Negotiations with Colombia were concluded in the context of regional negotiations with other nations (Peru and Ecuador) for an Andean TPA. Expanding global market access and broadening economic opportunity throughout the Andean region, and all of Latin America, are essential goals, and IGPAC members hope that USTR negotiations for the Andean TPA and the Free Trade Agreement of the Americas are successful. The US-Colombia TPA should substantially improve the business environment and advance civil society development objectives, while increasing trade capacity and investment opportunities between the US and this critically important world region. US economic interests, entrepreneurs and employees would benefit from improved market access for goods, services, agricultural products, and from better access to government procurement opportunities. IGPAC members note that the US, Colombia and the broader Andean region are poised to benefit, both from greater access between markets, and from greater regional integration amongst smaller and larger nations in Latin America.”

Based on the IGPAC's report and other comments received regarding the potential impact of the Agreement on sub-federal governments, this Report addresses four main areas of interest to states and localities in the Agreement: (i) government procurement; (ii) investment; (iii) services; and (iv) financial services. Additionally, USTR has also taken into account states' and localities' overall interest in preserving sub-federal regulatory abilities and prerogatives.

II. Government Procurement

Participation by state governments in the government procurement disciplines of trade agreements is voluntary. USTR asks states whether they are willing to have their procurement subject to the disciplines of a trade agreement that is being negotiated. The following parameters apply for any state willing to have its procurement covered by a trade agreement:

- a state decides the extent to which it will cover its procurement under new agreements;
- states may exclude sensitive goods, services, and local development programs;
- the agreements also exclude preference programs for small businesses, businesses owned by minorities, disabled veterans, and women, and small businesses in distressed areas;
- states are explicitly permitted to maintain their own environmental policies for “green” procurement and to require suppliers to comply with labor laws that are generally applicable in the territory in which a good is produced or a service is performed;
- county and city procurement is not covered by any of the agreements; and

- the thresholds for the application of the trade agreements at the sub-central (state) level are high: \$526,000 for purchases of goods and services and \$7.407 million for construction contracts. (The thresholds (other than the \$250,000 threshold for certain covered entities) are subject to adjustment every two years on January 1st, with the next adjustment set for January 1, 2012).

In early 2005, the USTR wrote to Governors requesting that state governments consider voluntarily covering their procurement under a new “reciprocity” policy for the Andean and Panama negotiations. If a state agreed to allow nondiscriminatory access to its procurement to foreign suppliers from Colombia, for example, then businesses and workers from that state would enjoy the same access to sub-central procurement in Colombia, opening up new export opportunities. Reciprocal government procurement policies are already used in a number of states, such as New York. More than 30 states have some type of reciprocity in their procurement practices with respect to other U.S. states.

Under the reciprocity policy, eight states and Puerto Rico have agreed to cover some of their procurement under the CTPA. A list is included as Attachment 1.

Regarding government procurement, the IGPAC report states:

“As a matter of general principle, IGPAC members support the goal of improving transparency and increasing fair market access in government procedures and regulatory decisions related to procurement, while preserving the independent authority of state and local governments to adopt legislation, standards and procedures consistent with their experience and interests. Notes to the schedule of the US which clarify certain state terms and conditions are appreciated.”

Regarding reciprocity, IGPAC states:

“...IGPAC members have indicated that potential benefits to participating states tend to be weakened by the policy’s implementation process, through supplier self-certification, and by the overly broad definition of “principal place of business.”

The IGPAC report notes that coverage of state procurement in the CTPA only pertains to those sub-central entities that have affirmatively consented to cover their procurement in the Agreement, subject to any terms and conditions that states may place on this coverage.

Under the Agreement, U.S. suppliers are granted non-discriminatory rights to bid on contracts from Colombian government ministries, agencies and departments, including its legislature and courts and a number of government enterprises, including its oil company as well as all of its first-tier sub-central entities.

In June 2007, the Agreement was amended to include a clarification that, in addition to promotion of “green” procurement, procuring entities may adopt technical specifications that require suppliers to comply with generally applicable labor laws in the territory where they make the product or perform the service that the entity will purchase.

III. Investment

Chapter Ten of the Agreement updates and clarifies important investment protections compared to similar provisions contained in prior U.S. bilateral investment treaties and trade agreements. In accordance with the objectives set out by Congress in the Trade Act of 2002, the investment provisions of the Agreement are designed to reduce barriers to foreign investment and to secure important protections for U.S. investors in Colombia, while ensuring that investors of Colombia do not receive greater substantive rights than U.S. investors in the United States.

As with other trade agreements to which the United States is a party, the investment provisions of the CTPA protect the regulatory authorities of state and local governments. First, while state and local measures will generally be subject to the Chapter's disciplines, the United States will be exempt from the national treatment, most-favored nation treatment, performance requirements, and senior management and boards of directors obligations for all state and local government measures existing on the date on which the Agreement enters into force. State and local measures adopted after the date the Agreement enters into force, however, will generally not be exempt from these obligations.

Second, the investment protections of the Chapter reflect U.S. legal principles and practices. For example, consistent with U.S. takings and due process protections, the Agreement clarifies that only property rights or property interests in an investment are entitled to protection against unlawful expropriation. The Chapter also incorporates standards that reflect U.S. Supreme Court jurisprudence for determining when a regulatory measure rises to the level of an expropriation.

Third, the Chapter includes provisions to ensure that investor-state arbitration tribunals interpret the Agreement in accordance with the intent of the Parties. The Parties will have the authority to issue interpretations of the Agreement's investment provisions that are binding on arbitration tribunals. The non-disputing Party will have the right to make submissions to an arbitration tribunal regarding the interpretation of the Agreement, and the disputing parties will have the opportunity to review draft awards. The Parties have committed, within three years after the date of entry into force of the Agreement, to consider whether to establish an appellate body or similar mechanism to review arbitral awards rendered in arbitrations commenced after the establishment of such a mechanism.

Fourth, the Chapter refines the investor-state dispute settlement process to improve its efficiency and to help deter frivolous claims. The Chapter includes expedited procedures to dismiss frivolous claims (based on Rule 12(b)(6) of the Federal Rules of Civil Procedure) and handle jurisdictional objections. To further deter frivolous claims, the Chapter expressly authorizes tribunals to award attorneys' fees and costs after deciding whether a claimant has raised a frivolous claim.

Finally, the Chapter includes provisions to enhance transparency and public involvement in the investor-state dispute settlement process. The Chapter provides that hearings will generally be open to the public and that key documents submitted to or issued by an arbitral tribunal will be publicly available, subject to the protection of confidential information, including

confidential business information. It also expressly authorizes tribunals to accept and consider *amicus curiae* submissions, whereby the public could present views on issues in dispute.

The IGPAC report states that:

“IGPAC members remain concerned about the inclusion of certain investor-state dispute settlement provisions in this agreement. ... Given the still evolving context of investor-state disputes...IGPAC members maintain significant concerns about overly expansive definitions of investment, and investor-state provisions on dispute settlement claim submission and arbitration and welcome clarifying language in NAFTA interpretive notes and in this TPA.” (Emphasis added).

However, IGPAC acknowledges:

“Some suggest that, where agreements are reached with countries with less fully developed legal systems, inclusion of a wholly separate litigation process, applicable only to foreign commerce and investment, may be viewed as necessary for creating conditions in such countries that are conducive to attracting and retaining international investment...IGPAC members welcome those Chapter 10-Section B provisions in the Agreement that bring about greater transparency, inclusion of non-disputing party and *amicus curiae* submissions, and consideration of whether claims or objections may be frivolous.” (Emphasis added).

IV. Cross-Border Trade in Services

Chapter Eleven of the Agreement covers the supply of services on a cross-border basis. This includes services supplied from the United States into Colombia or vice versa, including by electronic means; services supplied by a national of the United States in the territory of Colombia or vice versa; and services supplied in the United States to a consumer of Colombia or vice versa. Services supplied through investment are covered by the Investment Chapter, but also enjoy the protection of certain provisions in the Cross-Border Trade in Services Chapter. While state and local measures will generally be subject to the Chapter’s disciplines, the United States has scheduled an exemption from the national treatment, most-favored nation treatment, and local presence obligations for all state measures existing on the date on which the Agreement enters into force. With respect to the market access discipline, the United States has reserved the right to take measures that are not inconsistent with our commitments in the *WTO General Agreement on Trade in Services*. In addition, all local measures existing on the date on which the Agreement enters into force will be exempt from the national treatment, most-favored nation treatment, local presence, and market access obligations. State and local measures adopted after the date the Agreement enters into force, however, will generally not be exempt from the Agreement’s obligations.

Nothing in Chapter Eleven or any other provision of the Agreement requires the privatization or deregulation of any government services, including water supply or distribution services, education services, or health services. The Chapter expressly excludes services supplied in the exercise of governmental authority.

The implementation of this Chapter should not require an additional commitment of resources by state and local governments.

The IGPAC report comments that:

“Given the growing importance of services industries to the US economy, state and local governments generally support objectives to liberalize trade in services industries as a means of increasing market access for US firms and for reaching trade development objectives. IGPAC members equally assert that the independent exercise of state and local legislative and regulatory power is critical to protecting citizens’ interests and safeguarding the federal system.”

The IGPAC further notes that a general exemption for existing state and local measures could leave open the possibility of disputes about future changes, highlighting the need for USTR to educate and consult with state and local entities so that they are aware of such constraints on future actions.

V. Financial Services

Chapter Twelve of the Agreement covers measures relating to the supply of financial services. The Chapter covers investment in regulated financial institutions in the United States and Colombia, as well as cross-border trade, including through electronic means, in certain financial services such as insurance related to international transport, reinsurance, and advisory services other than intermediation. The Chapter does not apply to measures relating to public retirement plans or social security systems when managed by a government or private sector monopoly. Provisions such as the prudential and monetary and exchange rate exceptions ensure that governments may continue to regulate the financial sector and to take action to ensure the stability and integrity of the financial system in a financial crisis. While state and local measures will generally be subject to the disciplines of Chapter Twelve, the United States will be exempt from the national treatment, most-favored nation treatment, market access for financial institutions, cross-border trade, and senior management and boards of directors obligations for all state and local measures existing on the date on which the Agreement enters into force. State and local measures adopted after the date the Agreement enters into force, however, will generally be subject to the Agreement’s obligations.

VI. Regulatory Interests

The Agreement does not prevent the United States or state and local governments from enacting, modifying, or fully enforcing domestic laws protecting consumers, health, safety, or the environment.

VII. Conclusion

States and localities are poised to benefit greatly under the Agreement. In 2010, 40 states and Puerto Rico each exported at least \$10 million in goods to Colombia, and goods exports

from 17 states exceeded \$100 million. Tariff eliminations on these products will make U.S. producers even more competitive in this significant market. Moreover, many products imported from Colombia have benefited from duty-free treatment under the ATPA and GSP preference programs until recently, as well as from existing MFN duty-free treatment. A trade agreement would provide reciprocal access for U.S. goods in Colombia, thereby leveling the playing field for U.S. products. It also would provide increased access for U.S. firms to services sectors in Colombia, including opportunities in telecommunications, express delivery, computer and related services, tourism, energy services, transport, construction and engineering, financial services, insurance, audiovisual services and entertainment, professional services, environmental services and other sectors.

Additionally, the Agreement will foster transparency, openness, and the rule of law in Colombia, as well as supporting that country's efforts on environmental protection and labor. The Agreement will also provide an impetus toward the goal of free trade in the Western Hemisphere.

We do not believe that state and local governments will need additional resources to deal with the effects of increased trade under the Agreement.

Executive Summary

Pursuant to authority delegated by the President in Executive Order 13277 (67 *Fed. Reg.* 70305) and consistent with Executive Order 13141 (64 *Fed. Reg.* 63169) and its guidelines (65 *Fed. Reg.* 79442), the Office of the United States Trade Representative (USTR) submits this Final Environmental Review of the United States - Colombia Trade Promotion Agreement (CTPA), in accordance with section 2102(c)(4) of the Trade Act of 2002 (Trade Act).

On November 18, 2003, in accordance with section 2104(a) of the Trade Act, U.S. Trade Representative Robert B. Zoellick notified the Congress of the President's intent to enter into negotiations for a free trade agreement with the Andean Countries of Colombia, Peru, Ecuador and Bolivia. The formal launch of negotiations took place on May 18, 2004 with Colombia, Peru and Ecuador. A trade capacity building group met in parallel with the negotiating groups. The United States and Colombia concluded negotiations on February 27, 2006, and the CTPA was signed on November 22, 2006. On June 28, 2007, the United States and Colombia signed a protocol of amendment modifying the CTPA.

The environmental review process examines possible environmental effects that may be associated with the CTPA. In identifying and examining these possible effects, the Administration drew on public comments submitted in response to notices in the *Federal Register* (69 *Fed. Reg.* 19261, April 12, 2004, and 70 *Fed. Reg.* 10463, March 3, 2005), comments provided at public outreach events held in Colombia and a variety of sources of published information. The review also draws on the environmental and economic expertise of federal agencies. Consistent with Executive Order 13141 and its Guidelines, the focus of the review is on potential impacts in the United States. Additionally, this review includes consideration of global and transboundary effects.

Findings

1. In this Final Environmental Review, the Administration has concluded that changes in the pattern and magnitude of trade flows attributable to the CTPA will not have any significant environmental impacts in the United States. Based on existing patterns of trade and changes likely to result from implementation of the CTPA, the impact of the CTPA on total U.S. production through changes in U.S. exports appears likely to be small. As a result, the CTPA is not expected to have significant direct effects on the U.S. environment. While it is conceivable that there may be instances in which the economic and associated environmental impacts are concentrated regionally or sectorally in the United States, the Administration could not identify any such instances.
2. In considering whether provisions of the CTPA could affect, positively or negatively, the ability of U.S. federal, state, local or tribal governments to enact, enforce or maintain environmental laws and regulations, the Administration took into account the full range of CTPA obligations, including those related to services, sanitary and phytosanitary (SPS) measures and technical barriers to trade (TBT), as well as provisions of the CTPA Environment Chapter and related dispute settlement provisions. The Administration concluded that the CTPA will not adversely affect the ability of U.S. federal, state, local or tribal governments to regulate to protect

the U.S. environment, and that these and related CTPA provisions should have positive implications for the enforcement of environmental laws and the furtherance of environmental protection in both the United States and Colombia.

3. This review also carefully examined the provisions of the Investment Chapter and their environmental implications. The Administration has not identified any concrete instances of U.S. environmental measures that would be inconsistent with the CTPA's substantive investment obligations. The Administration does not expect the CTPA to result in an increased potential for a successful challenge to U.S. environmental measures.

4. As compared to the expected effects in the United States, the CTPA may have relatively greater effects on the economy of Colombia. In the near term, however, net changes in production and trade are expected to be relatively small because exports to the United States from Colombia already face low or zero tariffs. Longer term effects, through investment and economic development, are expected to be greater but cannot currently be predicted in terms of timing, type, and environmental implications.

5. The CTPA may have positive environmental consequences in Colombia by reinforcing efforts to effectively enforce environmental laws, accelerating economic growth and development through trade and investment, promoting sustainable development of natural resources, and disseminating environmentally beneficial technologies. The public submissions process established by the Environment Chapter has significant potential to improve environmental decision-making and transparency in Colombia and to inform capacity-building activities.

6. Through increased economic activity in Colombia, the CTPA may have indirect effects on the U.S. environment, for example through effects on habitat for wildlife, including migratory species. This review examined a range of these possible impacts, but did not identify any specific, significant consequences for the U.S. environment. Nevertheless, the possibility of such effects requires ongoing monitoring. Monitoring of conditions in the U.S. environment will continue as an element of existing domestic environment programs. Monitoring of environmental conditions in Colombia will be enhanced as a component of an Environmental Cooperation Agreement (ECA) between the United States and Colombia.

7. The CTPA provides a context for enhancing cooperation activities to address both trade-related and other environmental issues. As a complement to the CTPA, the United States and Colombia negotiated an ECA that is expected to enhance the positive environmental consequences of the CTPA. The ECA will establish a comprehensive framework for developing cooperative activities. High-level officials with environmental responsibilities from the United States and Colombia will participate in an Environmental Cooperation Commission that will oversee implementation of the ECA. The CTPA encourages the development of environmental performance measures and tasks the Environmental Affairs Council established by the Environment Chapter with reviewing the progress of cooperative activities. The United States and Colombia have begun to develop a work program that will identify specific areas of cooperation and provide more detail on how the ECA's benchmarking and monitoring provisions will be implemented.

I. LEGAL AND POLICY FRAMEWORK

A. The Trade Act of 2002

The Trade Act of 2002 (Trade Act) establishes a number of negotiating objectives and other priorities relating to the environment. As relevant here, the Trade Act contains three sets of objectives: (i) overall trade negotiating objectives; (ii) principal trade negotiating objectives; and (iii) promotion of certain priorities, including associated requirements to report to Congress.

Environment-related overall trade negotiating objectives include:

- (1) ensuring that trade and environmental policies are mutually supportive and seeking to protect and preserve the environment and enhance the international means of doing so, while optimizing the use of the world's resources (section 2102(a)(5)); and
- (2) seeking provisions in trade agreements under which parties to those agreements strive to ensure that they do not weaken or reduce the protections afforded in domestic environmental and labor laws as an encouragement for trade (section 2102(a)(7)).

In addition, the Trade Act establishes the following environment-related principal trade negotiating objectives:

- (1) ensuring that a party to a trade agreement with the United States does not fail to effectively enforce its environmental laws, through a sustained or recurring course of action or inaction, in a manner affecting trade between the parties, while recognizing a party's right to exercise discretion with respect to investigatory, prosecutorial, regulatory, and compliance matters and to prioritize allocation of resources for environmental law enforcement (sections 2102(b)(11)(A)&(B));
- (2) strengthening the capacity of U.S. trading partners to protect the environment through the promotion of sustainable development (section 2102(b)(11)(D));
- (3) reducing or eliminating government practices or policies that unduly threaten sustainable development (section 2102(b)(11)(E));
- (4) seeking market access, through the elimination of tariffs and non-tariff barriers, for U.S. environmental technologies, goods and services (section 2102(b)(11)(F)); and
- (5) ensuring that environmental, health or safety policies and practices of parties to trade agreements with the United States do not arbitrarily or unjustifiably discriminate against U.S. exports or serve as disguised barriers to trade (section 2102(b)(11)(G)).

The Trade Act also provides for the promotion of certain environment-related priorities and associated reporting requirements, including:

(1) seeking to establish consultative mechanisms among parties to trade agreements to strengthen the capacity of U.S. trading partners to develop and implement standards for the protection of the environment and human health based on sound science and reporting to the Committee on Ways and Means and the Committee on Finance (“Committees”) on the control and operation of such mechanisms (section 2102(c)(3));

(2) conducting environmental reviews of future trade and investment agreements consistent with Executive Order 13141 and its relevant guidelines, and reporting to the Committees on the results of such reviews (section 2102(c)(4)); and

(3) continuing to promote consideration of multilateral environmental agreements and consult with parties to such agreements regarding the consistency of any such agreement that includes trade measures with existing exceptions under Article XX of the GATT 1994 (section 2102(c)(10)).

B. The Environmental Review Process

The framework for conducting environmental reviews of trade agreements is provided by Executive Order 13141 – *Environmental Review of Trade Agreements* (64 *Fed. Reg.* 63169) and the associated Guidelines (65 *Fed. Reg.* 79442). The Order and Guidelines are available on USTR’s website at: <http://www.ustr.gov/trade-topics/environment/environmental-reviews>.

The purpose of environmental reviews is to ensure that policymakers and the public are informed about reasonably foreseeable environmental impacts of trade agreements (both positive and negative), identify complementarities between trade and environmental objectives and help shape appropriate responses if environmental impacts are identified. Section 5(b) of Executive Order 13141 provides that “as a general matter, the focus of environmental reviews will be impacts in the United States,” but “[a]s appropriate and prudent, reviews may also examine global and transboundary impacts.” Reviews are intended to be one tool, among others, for integrating environmental information and analysis into the fluid, dynamic process of trade negotiations. USTR and the Council on Environmental Quality (CEQ) jointly oversee implementation of the Order and Guidelines. USTR, through the Trade Policy Staff Committee (TPSC), is responsible for conducting the individual reviews.

The environmental review process provides opportunities for public involvement, including an early and open process for determining the scope of the environmental review (“scoping”). Through the scoping process, potentially significant issues are identified for in-depth analysis, while issues that have been adequately addressed in earlier reviews, or are less significant, are eliminated from detailed study.

The Guidelines recognize that the approach adopted in individual reviews will vary from case to case, given the wide variety of trade agreements and negotiating timetables. Generally, however, reviews address two types of questions: (i) the extent to which positive and negative environmental impacts may flow from economic changes estimated to result from the prospective agreement; and (ii) the extent to which proposed agreement provisions may affect

U.S. environmental laws and regulations (including, as appropriate, the ability of state, local and tribal authorities to regulate with respect to environmental matters).

II. BACKGROUND

Colombia has a population of about 45.7 million and a gross national income of \$227.8 billion (see table 1, Annex II for detailed data). The U.S. trade relationship with Colombia has been conducted in the framework of unilateral trade preferences. Congress enacted the Andean Trade Preference Act (ATPA) in 1991 to promote regional economic development and to provide economic alternatives for the illegal drug trade, promote domestic development, and thereby solidify democratic institutions. In renewing and expanding the ATPA in 2002, through the Andean Trade Promotion and Drug Eradication Act (ATPDEA), Congress further stressed enhancement of trade with the United States as an alternative means for reviving and stabilizing the economies in the Andean region. The ATPDEA amended the ATPA to provide duty-free treatment for certain products previously excluded under the ATPA. The ATPA, as amended, was originally set to expire on December 31, 2006. Since then, Congress has extended the program three times. However, the ATPA expired on February 12, 2011.

A. Economy in Colombia

Colombia's free market economy, the third-largest in South America, has major commercial and investment ties to the United States. Well-endowed with minerals and energy resources, Colombia has the largest coal reserves in Latin America and is second to Brazil in hydroelectric potential. The discovery of two billion barrels of high-quality oil, about 125 miles east of Bogotá, has enabled Colombia to become a net oil exporter. Another major export commodity for Colombia is coffee. Colombia is one of the world's largest producers of coffee, and for many years, coffee was the principal contributor to export earnings. Though its share in total exports revenue has declined, coffee contributed over \$1.9 billion in 2010 to Colombia's economy, about 5% of export income.

The Drug Economy

While the exact figure is unknown, it is estimated that coca cultivation generates many hundreds of millions of dollars in revenue. Colombia is the world's leading supplier of refined cocaine and a growing source for heroin. More than 90 percent of the cocaine that enters the United States is produced, processed or transshipped in Colombia. To combat this, Colombia is engaged in a broad range of narcotics control activities that include aerial spraying of herbicide and manual eradication. Supported by the United States, Colombia has attempted to keep coca, opium poppy, and cannabis cultivation from expanding.

The ATPA, as amended, is designed to reduce production and exports of narcotics to the United States by allowing broader access to U.S. markets to provide incentives to farmers and others to engage in legitimate economic activities. The CTPA builds significantly on this effort. Alternative development programs in Colombia, which the United States also supports, provide former drug-crop producers with alternative sources of income.

B. Environment in Colombia¹

Colombia is the fifth-largest country in Latin America by area and the third-largest by population. Colombia is one of the most biologically rich countries in the world, with 21 distinct vegetation zones, five major watersheds, enormous wetlands, plentiful lakes, a dense network of rivers, and rich deposits of underground water. With over 741,000 river beds, Colombia has the world's fourth largest flow of water relative to its surface area. About 46 percent of Colombia's land is covered by forests, along with 14 million hectares of agricultural land and 19 million hectares of grazing land. There are substantial mineral reserves as well, including one of the world's largest deposits of oil discovered in recent decades, one of the world's largest open coal mines and significant deposits of emeralds, nickel, and natural gas.

With Caribbean and Pacific Coasts and islands in the central Caribbean, Colombia's exclusive economic zone equals its land mass. Marine and coastal habitats include coral reefs, seagrass beds, mangrove forests, estuaries, and coastal lagoons and upwelling systems.

Over the past 50 years, Colombia has taken significant strides in protecting its environment, including restructuring its legal and regulatory landscape, undertaking policy initiatives, strengthening its capacity for natural resource management and environmental protection, and improving environmental quality. The focus of Colombia's management framework with respect to its environment has been on three main priorities: (1) river basin management and conservation of water resources, (2) reforestation, and (3) conservation of biodiversity.

Despite these advances, Colombia continues to face a series of environmental challenges. These include water and air pollution, land degradation and vulnerability to natural disasters. Many of Colombia's natural resources face pressure from rapid population growth, mineral extraction, hydroelectric projects, increasingly intensive agriculture production, and accelerating urbanization.

Colombia faces significant challenges with respect to water pollution, water treatment, and sewage disposal. Water pollution results from untreated residential, agricultural and industrial wastes, as well as unchecked effluents from illegal drug production. As recently as 2002, about 95 percent of Colombian municipalities did not treat sewage, but rather dumped wastes directly

into rivers. As a result of these practices, the Magdalena River, the country's largest, is in crisis, and its traditional fishing economy is threatened. Colombia is making an effort to address some of the water pollution issues facing the country. In early 2004, the government secured a \$28 million loan from the Inter-American Development Bank for protection of river basins, and is also in the process of completing arrangements for a World Bank loan to help establish a nationwide water-management system. Colombia has also made progress in the area of wastewater treatment with the construction of new treatment plants in the cities of Medellín and Bucaramanga.

Air pollution is also a widespread and serious problem, notably in Colombia's cities. Additionally, Colombia faces a variety of problems associated with deforestation and land degradation, including erosion, salinization and increased vulnerability to natural disasters such as floods, landslides, droughts, and earthquakes. Colombia's biodiversity is being threatened by rapid changes in land use. According to the Colombian Institute of Exact, Physical and Natural Sciences, Colombia has lost 30 percent of its biological diversity in recent decades.² In 2000, the Institute estimated that deforestation had affected about 70 percent of the Andean zone, and that about one-third of Colombia's vegetative cover had disappeared in the last 30 to 40 years. Colombia is working to reverse this trend and has focused on conservation of biodiversity and renewable natural resources as environmental priorities in development planning. As an example of results, the system of national parks and forestry reserves now encompasses nearly one-quarter of the national territory.

The illegal drug trade adds to Colombia's environmental problems. Cultivation, processing and distribution of illegal drugs leads to land-clearing, soil erosion, deforestation, and the dumping of chemicals into streams. Coca, poppies, and marijuana require special terrain and climate conditions and, as a result, cultivation is concentrated in formerly undisturbed rainforest regions, especially in the basins of rivers in the southeastern part of Colombia that flow into the Amazon River. Pollution from heroin production is acute in the highland regions, which are crucial headwaters and reserves for Colombia's fresh water system. Contamination also spreads to large lowland zones, where rivers supply water to 70 percent of the country.

Legal Regime and Regulation

Colombia has some of the most comprehensive and up-to-date environmental regulations in Latin America. Since the early 1950s, Colombia's environmental management framework has been based largely on regional agencies. National environmental management in Colombia began in 1952 with the creation of the Division of Natural Resources within the Ministry of Agriculture. The Division's mission is to ensure the rational development of natural resources such as forests and fisheries. Under the Division's leadership, Colombia established its first forest conservation regulations and seven sizable protected areas were created.

The first of Colombia's regional development corporations (*Corporaciones Autónomas Regionales*, CARs), was created to promote integrated regional economic development. From 1954 to 1993, these CARs promoted regional economic development, pursuing a wide range of

² See: <http://www.accefyn.org.co> for additional information (contents in Spanish).

activities, including energy generation and transmission projects, road infrastructure and erosion control. In 1961, the National Congress established the Corporation for the Magdalena Valley and Northern Colombia (*Corporación del Valle del Magdalena y Norte de Colombia*, CVM), which specialized in natural resources conservation, establishment and management of national parks and reforestation. Between 1968 and 1993, the federal government's environmental responsibilities were carried out by the Institute for Development of Renewable Natural Resources (INDERENA). A Presidential Decree in 1968 transformed the CVM into INDERENA by merging it with the Division of Renewable Natural Resources in the Ministry of Agriculture. INDERENA's principal responsibilities were management of the National Parks System and promotion of investment projects in fisheries and reforestation.

Under INDERENA's leadership, Colombia made a number of important advances in environmental management, including the 1969 Forestry Law and the 1974 National Code for Renewable Natural Resources and Environmental Protection, a comprehensive statute that remains Colombia's most important statute for managing environmental and natural resources. The Code covers water, air, solid and hazardous waste, soil, flora and fauna, and it was one of the first environmental protection laws in the world to incorporate pollution fees and environmental impact assessments. Under the Code, INDERENA shared environmental responsibilities with the ministries of Health, Public Works, Defense and Energy, the National Planning Department, regional governments ("*departamentos*") and municipal authorities.

During the 1980s, Colombia designed and implemented air and water pollution control regulations. The 1991 Constitution and Law 99 of 1993 established both the National Environmental System (*Sistema Nacional Ambiental*, SINA) and the Ministry of Environment (*Ministerio del Medio Ambiente*, MMA). The Constitution contains 23 articles related to environmental protection and also sets up a structure for regional and local participation in environmental management. Law 790 of 2002 created a single ministry from the Ministries of Social Protection and the Ministry of the Environment. In 2003, functions of the former Ministry of Economic Development (mainly water, sanitation and housing) were transferred to the new Ministry of Social Protection and the Environment. The current Colombian administration is in the process of creating a separate Ministry of the Environment..

Of additional note with respect to Colombia's environmental regulations is the revised Forestry Law, signed in May 2006. This law is expected to foster a more secure regulatory environment to develop plantation and natural forests, preserve the territorial rights of Afro-Colombian and indigenous communities over communally-owned forests and provide these groups with opportunities to reap increased and sustainable benefits from forest resources.

Colombia's diverse marine and inland fisheries are managed by the Colombian Institute of Rural Development (INCODER), an agency of the Ministry of Agriculture and Rural Development.

C. U.S. – Colombia Goods Trade

The United States is the principal trading partner for Colombia, receiving more than 40 percent of Colombia's exports, while Colombia is currently the 20th largest export market for U.S. goods.

Table 2 (Annex II) summarizes United States goods trade with Colombia.

Between 2007 and 2010, U.S. exports to Colombia increased 41 percent, to \$12.0 billion. The United States is the largest single exporter to Colombia. Major U.S. exports include: non-electrical machinery; oil (not crude); electrical machinery; organic chemicals; plastics; optical, photographic, medical and measuring instruments; cereals; and aircraft and parts. Exports to Colombia account for nearly half of U.S. exports to the Andean region. Colombia is one of the largest purchasers of U.S. agricultural exports in the Western Hemisphere.

U.S. imports from Colombia in 2010 totaled \$15.6 billion. Major products include crude oil, precious stones, coffee, live plants and cut flowers, and bananas. The stock of U.S. foreign direct investment (FDI) in Colombia in 2009 was \$6.7 billion, concentrated largely in the mining and manufacturing sectors.

III. THE UNITED STATES-COLOMBIA TRADE PROMOTION AGREEMENT

A. Overview of the United States – Colombia Trade Promotion Agreement

The CTPA is expected to enhance our efforts to strengthen democracy and support for the fundamental values in Colombia and the Andean region, such as respect for internationally recognized worker rights, greater respect for the rule of law, sustainable development, and government accountability.

Since 1991, Colombia has benefited from unilateral trade preferences under the ATPA, as amended by the ATPDEA, which has allowed nearly all of its goods to enter the United States duty-free. The CTPA would make preferential access to the U.S. market for Colombian goods permanent, and would liberalize access to Colombia's market for U.S. goods and services. The CTPA is a comprehensive trade agreement addressing areas such as trade in goods and services, investment, trade-related aspects of intellectual property rights, government procurement and trade-related environmental and labor matters.

The CTPA consists of a preamble and the following 23 chapters and associated annexes: initial provisions and general definitions; national treatment and market access for goods; textiles and apparel; rules of origin procedures; customs administration and trade facilitation; sanitary and phytosanitary measures; technical barriers to trade; trade remedies; government procurement; investment; cross-border trade in services; financial services; competition policy; telecommunications; electronic commerce; intellectual property rights; labor; environment; transparency; administration and trade capacity building; dispute settlement; exceptions; and final provisions. The complete text of the CTPA, related annexes and side letters, and summary fact sheets are available on USTR's website at: <http://www.ustr.gov/trade-agreements/free-trade-agreements/colombia-fta/final-text>.

Based on the scoping process (see Section IV), public comments and developments since the Interim Environmental Review, the following is a summary of the CTPA provisions most relevant to this Final Environmental Review. The provisions of the Environment Chapter are

described in Section III.B.

Market Access for Goods

Tariff commitments by the United States and Colombia (the Parties) will provide immediate benefits for both countries. More than 80 percent of U.S. exports of consumer and industrial products to Colombia will become duty-free immediately upon entry into force of the CTPA and 85 percent will be duty-free within five years. Most remaining tariffs will be eliminated within ten years of entry into force.

Customs Procedures and Rules of Origin

The CTPA sets out methods for valuing products used to qualify for preferential treatment under certain product-specific rules of origin. The CTPA includes specific obligations on customs procedures to ensure compliance with laws governing importation. The CTPA requires each Party to provide transparency and efficiency in administering customs procedures, with commitments to publish laws and regulations and ensure procedural certainty and fairness. The CTPA also includes a commitment to share information to combat illegal trans-shipment of goods.

Sanitary and Phytosanitary Measures

The United States and Colombia reaffirm their commitments under the World Trade Organization (WTO) Agreement on the Application of Sanitary and Phytosanitary Measures. The CTPA creates a process for enhanced cooperation and coordination on sanitary and phytosanitary issues.

Technical Barriers to Trade

The United States and Colombia reaffirm their commitments to the WTO Agreement on Technical Barriers to Trade (TBT). The CTPA creates a process for enhanced cooperation and coordination on technical regulations and standards.

Intellectual Property Rights

The Intellectual Property Rights Chapter provides for strong protection of copyrights, patents, trademarks and trade secrets, including enhanced enforcement and non-discrimination obligations for all types of intellectual property. Through the copyright provisions, Parties will address the challenge of providing protection in the digital environment of the Internet and provide important protection for performers and producers of phonograms. Under the CTPA, the Parties will provide strong protections for trademarks and limit the grounds for revoking a patent. The Chapter provides for streamlined trademark filing processes and improved protection of trademark owners' rights. The CTPA requires both Parties to ratify or accede to the *Budapest Treaty on the International Recognition of the Deposit of Microorganisms for the Purposes of Patent Procedure* (1977), as amended in 1980 and the *International Convention for*

the Protection of New Varieties of Plants (1991) (UPOV Convention).

Services

The CTPA permits substantial market access across the entire services regimes (based on the “negative list” approach), subject to limited exceptions. Colombia has agreed to exceed its commitments made in the WTO, and to dismantle significant services and investment barriers. The CTPA requires the Parties to provide national treatment and most-favored-nation (MFN) treatment to each other’s services suppliers. Regulatory authorities must use open and transparent administrative procedures, consult with interested parties before issuing regulations, provide advance notice and comment periods for proposed rules and publish all regulations.

Investment

The CTPA establishes a secure, predictable legal framework for U.S. investors operating in Colombia. The CTPA imposes major obligations pertaining to non-discrimination (national treatment and MFN treatment), expropriation, free transfers related to covered investments, prohibition on the use of performance requirements, minimum standard of treatment and limitations on requirements on senior managers. These investor protections are backed by a transparent, binding international arbitration mechanism, under which investors may, at their own initiative, bring claims against either government for an alleged breach of the provisions of the Investment Chapter.

The CTPA preamble states that the agreement does not provide foreign investors with greater substantive rights with respect to investment protections than domestic investors have under domestic law where, as in the United States, protections of investor rights under domestic law equal or exceed those set forth in the CTPA.

Government Procurement

The CTPA will provide a more predictable procurement environment for U.S. suppliers. Parties have committed to using open, transparent and non-discriminatory procurement procedures. The Chapter includes requirements for advance public notice of procurement opportunities and provision of tender documentation to all interested suppliers in a timely fashion, as well as timely and effective bid review procedures.

Transparency

The Transparency Chapter requires each Party to ensure that laws, regulations, procedures and administrative rulings on matters covered by the CTPA are published or otherwise made available to the public. In addition, the chapter requires each Party whenever possible to publish advance notice of proposed measures and provide a reasonable opportunity for interested parties to comment. Further, the chapter requires each Party to establish and maintain procedures for review and appeal of administrative actions regarding matters covered by the CTPA. The chapter also contains strong anti-corruption commitments, including criminalization of bribery in

matters affecting international trade or investment.

Trade Remedies

The CTPA includes provisions governing imposition of bilateral safeguard measures and provides that each Party maintains their rights and obligations under the WTO Agreement on Safeguards. The CTPA also establishes procedures for safeguard measures on agricultural and textile goods.

Labor

The CTPA Labor Chapter reaffirms the Parties' obligations as members of the International Labor Organization (ILO) and commits them to adopt and maintain in their laws and practice the fundamental labor rights, as stated in the 1998 ILO Declaration on Fundamental Principles and Rights at Work and its Follow-Up, including for purposes of the chapter a prohibition on the worst forms of child labor. The CTPA further provides that neither Party may waive or otherwise derogate from the laws that implement this obligation in a manner affecting trade or investment between the Parties. The chapter commits each Party to effectively enforce its labor laws. Procedural guarantees ensure that workers and employers will continue to have fair, equitable and transparent access to labor tribunals. All obligations in the chapter are subject to the same dispute settlement procedures and enforcement mechanisms as obligations in other chapters of the CTPA. The chapter also establishes a mechanism for further cooperation on labor matters.

Dispute Settlement

The CTPA includes a government-to-government dispute settlement mechanism. The mechanism sets high standards of openness and transparency, requiring public hearings and the public release of Parties' legal submissions. It provides opportunities for interested third parties, such as non-governmental organizations, to submit views. The Chapter includes an enforcement mechanism whereby if a Party fails to comply with an arbitral panel decision and the Parties cannot reach a mutually acceptable solution, the complaining Party may have recourse to trade sanctions or, alternatively, the defending Party may pay a monetary assessment.

Exceptions

For certain chapters, the Parties agreed to incorporate into the CTPA Article XX of the GATT 1994 and Article XIV of the GATS. The Parties understand that the measures referred to in Article XX(b) of the GATT 1994 include environmental measures necessary to protect human, animal, or plant life or health, and that Article XX(g) of the GATT 1994 applies to measures relating to the conservation of living and non-living exhaustible natural resources. The Parties also understand that the measures referred to in Article XIV(b) of GATS include environmental measures necessary to protect human, animal, or plant life or health. The CTPA also includes a general exception for measures that a Party considers necessary for the protection of its essential security interests.

Trade Capacity Building

Building on the Parties' trade capacity building efforts during the CTPA negotiations, the CTPA creates a Committee for Trade Capacity Building for the purpose of defining and identifying priority needs to assist Colombia to implement its commitments and maximize the benefits provided under the CTPA.

B. The Environment Chapter and Related Environmental Provisions

Following guidance in the Trade Act and the May 10, 2007 bipartisan Congressional-Executive agreement on trade, the CTPA Environment Chapter requires each Party: (1) to strive to maintain high levels of environmental protection and to strive to improve those levels; (2) to adopt, maintain and implement laws and all other measures to fulfill its obligations under certain multilateral environmental agreements (MEAs) to which both Colombia and the United States are party ("covered agreements");³⁴ and (3) not to waive or otherwise derogate from environmental laws in order to attract trade or investment, except where the waiver or derogation is pursuant to a provision in law providing for waivers or derogations and is not inconsistent with the Party's obligations under a covered agreement. In addition, the Chapter commits each Party not to fail to effectively enforce its environmental laws and its laws, regulations, and other measures to fulfill its obligations under covered agreements through a sustained or recurring course of action or inaction, in a manner affecting trade or investment between the Parties. All obligations in the chapter are subject to the same dispute settlement procedures and enforcement mechanisms as obligations in other chapters of the CTPA.

To assist in the administration and implementation of the CTPA Environment Chapter, the Agreement establishes an Environmental Affairs Council to oversee the implementation of the chapter. This Council will be composed of high-level government officials from each Party. It will meet within the first year of the CTPA's entry into force and annually thereafter, unless the Parties agree otherwise.

The CTPA Environment Chapter encourages a comprehensive approach to environmental protection. Provisions on procedural guarantees promote good environmental governance by obliging each Party to provide appropriate and effective remedies for violations of its

³The Chapter states that to establish a violation of this obligation, a Party must demonstrate that the other Party has failed to adopt, maintain or implement a measure in a manner affecting trade or investment between the Parties.

⁴ The covered agreements are: (a) the Convention on International Trade in Endangered Species of Wild Fauna and Flora, done at Washington, March 3, 1973, as amended; (b) the Montreal Protocol on Substances that Deplete the Ozone Layer, done at Montreal, September 16, 1987, as adjusted and amended; (c) the Protocol of 1978 Relating to the International Convention for the Prevention of Pollution from Ships, 1973, done at London, February 17, 1978, as amended; (d) the Convention on Wetlands of International Importance Especially as Waterfowl Habitat, done at Ramsar, February 2, 1971, as amended; (e) the Convention on the Conservation of Antarctic Marine Living Resources, done at Canberra, May 20, 1980; (f) the International Convention for the Regulation of Whaling, done at Washington, December 2, 1946; and (g) the Convention for the Establishment of an Inter-American Tropical Tuna Commission, done at Washington, May 31, 1949.

environmental laws and to ensure that environmental enforcement proceedings comply with due process, and are open to the public except where the administration of justice requires otherwise. These procedural guarantees are accompanied by provisions that encourage incentives and other voluntary mechanisms to protect the environment, including market-based incentives.

Provisions on the relationship between the CTPA and MEAs acknowledge the importance of effective domestic implementation of MEAs to which the United States and Colombia are both party and the contributions that the CTPA Environment Chapter and the ECA can make to achieve the goals of those MEAs. The CTPA further provides that in the event of an inconsistency between a Party's obligations under the CTPA and a covered agreement the Party shall seek to balance its obligations under both agreements. The Environment Chapter also provides for consultation, as appropriate, with respect to environmental issues of mutual interest.

Public Submissions Process

The CTPA contains a public submissions process that will allow members of the public to raise concerns regarding each Party's enforcement of its environmental laws with an independent secretariat. The CTPA's public submission provisions are similar to the public submissions process established in the Dominican Republic – Central America – United States Free Trade Agreement and the Peru Trade Promotion Agreement. The provisions are modeled on Articles 14 and 15 of the North American Agreement on Environmental Cooperation (NAAEC), but contain a number of improvements to the NAAEC.

Under the CTPA, any person of a Party may file a submission alleging that a Party is failing to effectively enforce its environmental laws with a secretariat that the Parties will designate, and the secretariat will review the submission in light of specified criteria.⁵ The secretariat will prepare a factual record if either member of the Council requests that it do so. The CTPA also provides that the Council will review any factual record prepared in light of the objectives of the Environment Chapter and the ECA, and may make recommendations to the ECA's Environmental Cooperation Commission concerning matters addressed in the factual record, including recommendations relating to the further development of the Party's mechanisms for monitoring its environmental enforcement. This provision represents an important innovation to the NAAEC, which does not contain such a provision.

Further details of the submissions process, including measures to ensure effective public participation in that process in furtherance of CTPA environment package goals, will be established through working arrangements to be developed by the Parties.

Combined with other elements in the environment package (e.g., robust environmental cooperation and capacity building under the ECA, see Section VII *infra*), the public submissions process should significantly contribute to improved environmental governance and transparency in Colombia.

⁵ The CTPA's public submissions procedure is not available to U.S. persons wishing to raise concerns regarding U.S. enforcement of U.S. environmental laws because such persons already have available to them other remedies including the procedures under Articles 14 and 15 of the NAAEC.

Biological Diversity

The CTPA's Environment Chapter includes an article whose objective is to enhance efforts to protect biological diversity. Both Colombia and the United States are classified as "mega-diverse" countries, meaning that they, along with 15 other countries, possess more than 70 percent of the world's biological diversity. Therefore, the Parties recognize the importance of conservation and sustainable use of biological diversity and affirm that they are committed to promoting and encouraging conservation and sustainable use of biological diversity and all its components and levels, including plants, animals and habitat. The importance of public participation on biological diversity issues is also recognized.

IV. PUBLIC AND ADVISORY COMMITTEE COMMENTS

To determine the scope of this review, the Administration considered information provided by the public and solicited comments through notices in the *Federal Register* and at a public hearing. Section IV.A summarizes public comments. In addition to providing guidance on the scope of the environmental review, any information, analysis, and insights available from these sources were taken into account throughout the negotiations and were considered in developing U.S. negotiating positions.

Pursuant to Trade Act requirements (section 2104(e)), advisory committees, including the Trade and Environment Policy Advisory Committee (TEPAC), submitted reports on the CTPA to the President, USTR and Congress within 30 days after the President notified Congress of his intent to enter into the Agreement. The TEPAC report is summarized in section IV.B.

A. Public Comments

This review was formally initiated by publication of a notice in the *Federal Register*, which requested public comment on the scope of a review of the proposed trade agreement with the Andean countries of Colombia, Ecuador and Peru (see 69 *Fed. Reg.* 19261, April 12, 2004). A notice in the *Federal Register* also requested public comments on the overall negotiation and announced a public hearing on the proposed trade agreement (see 69 *Fed. Reg.* 7532, February 17, 2004). Comments and testimony addressing environmental issues received in response to that notice were taken into account in the preparation of this final environmental review. Further public comment was requested in response to an Interim Environmental Review of the proposed trade agreement with Colombia, Ecuador and Peru (see 70 *Fed. Reg.* 10463, March 3, 2005). Comments responding to the *Federal Register* notices were made in the context of a proposed trade agreement with Colombia, Ecuador and Peru and, as such, typically made reference to one or more of the three countries. In the preparation of this Final Environmental Review of the CTPA we drew on all submissions to the extent that they included applicable comments.

We received two sets of comments on the scope for the review of the proposed trade agreement with Colombia, Ecuador and Peru (one of which was a joint submission on behalf of five organizations), and five sets of comments (including one joint submission) on the Interim Review of the proposed trade agreement with Colombia, Ecuador and Peru. Annex I lists all

organizations from which comments were received.⁶

Comments on the Interim Environmental Review generally confirmed that its scope covered the relevant issues to be considered. One comment highlighted the possibilities the CTPA offers to improve the assistance provided to Colombia in its fisheries management and dolphin conservation activities. Further information on progress made in this area since the submittal of the comments can be found in Section V.B.5. Some comments emphasized the importance of protection of migratory birds, guarding against invasive species and reducing threats to biological diversity. Comments were also received that highlighted structural and policy changes in Colombia's Ministry of Environment, Housing, and Territorial Development and described how these changes are expected to improve environmental protection. A number of the comments also recognized the value of the opportunities offered by the ECA, negotiated in parallel and designed to complement the CTPA, and provided specific recommendations for additional cooperation activities. Such activities and projects include promoting wild bird conservation and strengthening implementation and compliance with international treaties, such as the Convention on International Trade in Threatened and Endangered Species (CITES). Further efforts to enhance implementation of and compliance with CITES obligations, as well as strengthen both capacity and constituencies for the long-term management of protected areas, will be identified through the ECA.

B. Advisory Committee Report

Under Section 135(e) of the Trade Act of 1974, as amended, advisory committee reports must include advisory opinions as to whether and to what extent an agreement promotes the economic interests of the United States and achieves the applicable overall and principal negotiating objectives set forth in the Trade Act of 2002. The reports must also include advisory opinions as to whether an agreement provides for equity and reciprocity within the sectoral or functional area of the particular committee. The advisory committee reports are available at: http://ustraderep.gov/Trade_Agreements/Bilateral/Colombia_FTA/Reports/Section_Index.html.

A majority of TEPAC members supported the conclusion that the CTPA provides adequate safeguards to ensure that Congressional environmental objectives will be met. The report reiterates TEPAC's view that public participation helps ensure that an agreement and its provisions operate as intended, while guaranteeing more effective enforcement of environmental laws. The TEPAC majority also noted the inclusion of enhanced public participation mechanisms and that the CTPA's investment provisions demonstrate continued improvements, as compared to earlier trade agreements. A majority of members also expressed the view that trade agreements can create opportunities to enhance environmental protection. The TEPAC majority recognized the enhanced public participation provisions of the CTPA and noted with approval that dispute settlement panels will accept submissions from civil society. With respect to dispute settlement provisions, the TEPAC majority described monetary assessments provided for under the CTPA of up to \$15 million for a violation of the obligation to effectively enforce environmental laws as an "adequate compromise." A majority of TEPAC members also

⁶ All comments on scope for the proposed U.S.-Andean Trade Promotion Agreement are summarized in the Interim Review, available at: <http://www.ustr.gov/sites/default/files/colinterm.pdf>.

supported the negotiation of the ECA, yet expressed concern that the ECA lacks specificity regarding areas of cooperation and affords little guidance on the areas that might be addressed. The TEPAC majority also expressed concerns regarding the availability of funds for activities to be undertaken through the ECA.

A minority of TEPAC members raised concerns, including: (1) increasing trade does not necessarily imply a need for greater regulatory oversight of environmental issues, and (2) the biological diversity provision in the Agreement fails to recognize the benefits that Colombia can derive from efficiency gains and higher yields from its resources through property rights and technological advances.

C. Public Outreach in Colombia

In addition to providing opportunities for written comments and testimony in response to notices in the *Federal Register*, the U.S. Government held public meetings in Colombia with the objective of improving communication on CTPA-related issues with environmental organizations, the private sector and leaders of indigenous groups.⁷ These meetings were held in Bogotá in November 2004 and provided an opportunity to raise questions and express concerns. Participants in the meetings represented a wide variety of local, regional and international organizations. The United States worked closely with the Colombian government to ensure that civil society was actively consulted and engaged during the negotiation of the Environment Chapter of the CTPA and the associated ECA.

V. POTENTIAL ECONOMICALLY-DRIVEN ENVIRONMENTAL IMPACTS

A. Potential Impacts in the United States

The impact of the CTPA on total U.S. production through changes in U.S. exports appears likely to be very small. Exports to Colombia currently account for about 0.94 percent of total U.S. exports (see Table 2, Annex II) and a very small portion of total U.S. production. Nevertheless, Colombia is an important market for some U.S. producers and exporters. Increases in U.S. exports of agricultural and industrial goods to Colombia are expected as a result of the CTPA's reductions in market access barriers. However, any associated increases in U.S. production will represent a very small change in the aggregate U.S. economy.

Although small changes in production and exports in environmentally-sensitive sectors could provide a basis for concern regarding the CTPA's direct environmental effects in the United States, no instances warranting such concerns were identified and none were raised in public comments on the Interim Review (see Section IV.A). Based on this information and analysis, the Administration has concluded that changes in the pattern and magnitude of trade flows and production attributable to the CTPA will not have any significant environmental impacts in the United States, and, in fact, the CTPA may result in positive environmental consequences. For example, the CTPA's provisions on rules of origin and market access may contribute to increased trade in remanufactured products and, as a consequence, provide some environmental

⁷ Similar events were held in Peru and Ecuador as part of the free trade agreement negotiations with those countries.

benefits through energy and material savings, and the minimization of solid waste. Liberalization of services can be expected to have an economic impact in the United States although here, too, the effect of the CTPA is likely to be small, and we could not identify any environmentally sensitive sectors in the United States likely to be affected by such impacts. The United States already allows substantial access to foreign service providers, including in environmentally sensitive areas (*e.g.*, tourism, maritime shipping, and services incidental to energy distribution).

B. Transboundary and Global Issues

While the environmental impacts of expected economic changes in the United States attributable to the CTPA are expected to be minimal, the Administration examined a large number and wide variety of environmental issues with potential global and transboundary impacts in determining the scope of this review. These were provisionally identified through public comments in response to a notice in the *Federal Register* (see Section III.A) and through an open-ended scoping process among agencies with environment, trade, and economic expertise. We subsequently eliminated topics from further and more detailed analysis when initial findings revealed that there was no identifiable link to the CTPA. The following topics warranted further consideration.

1. Economically-Driven Environmental Effects in Colombia

As compared to its effects in the United States, the CTPA may have relatively greater impacts on the economy of Colombia and, through those impacts, effects on its environment. In the short term, however, we do not expect a significant increase in Colombian production or exports to the United States. Significant trade preferences and market access have been provided by the ATPDEA and, as a result, we do not anticipate that the CTPA will cause a rapid and significant increase in industrial or agricultural development.

To the extent that the CTPA has significant effects on the economy of Colombia, over time, the environmental effects may be both positive and negative. The CTPA may further increase investment, trade and production in Colombia, which may be associated with further pressure on the environment. On the other hand, some new investment may bring environmentally-beneficial technologies and production methods, as well as higher standards for private sector environmental performance. Activities developed under the ECA will support these as well as other positive environmental outcomes. In addition, proposed commitments in the CTPA, such as those to effectively enforce environmental laws, should have a positive effect, especially when coupled with capacity-building and environmental cooperation activities. The CTPA also is likely to contribute to increases in per capita income and, through this, to greater demand for environmental regulation in Colombia over time.

2. Endangered Species

The United States and Colombia contain some of the world's greatest concentrations of biological diversity in species of birds, mammals, insects, reptiles, amphibians, and plants, as

well as genetic diversity of important food crops such as the potato. Species diversity in Colombia is found across all of the country's ecosystems, including lowland tropical rainforests, Andean mountain ecosystems, cloud forests, grasslands, and coastal and marine ecosystems.

Colombia is an exporter of specimens of wild flora and fauna, but a substantial amount of this trade is regulated under CITES. CITES is an agreement designed to provide for cooperation among member countries to prevent international trade in specimens of wild animals and plants from threatening their survival. CITES is implemented by its parties through domestic laws and regulations, and regulates international trade in listed species through a system of permits and certificates.

The United States and Colombia are parties to CITES. In the United States, CITES is implemented through the Endangered Species Act of 1973 (ESA). Under the ESA, species may be listed as endangered or threatened, including species that are not native to the United States. The ESA prohibits the import, export, taking, or selling in interstate commerce of any ESA-listed species without a permit.

Under the CITES National Legislation Project, the CITES Secretariat evaluates each party's legislation to ensure that it meets the requirements for implementation of the Convention.⁸ Based on the review conducted by the CITES Secretariat, both Colombia and the United States were placed in Category 1, the category for parties whose legislation is found to be adequate to effectively implement the obligations of CITES.

Given the legal protections for wildlife and endangered species in effect in both the United States and Colombia, the CTPA appears unlikely to contribute to an increase in illegal trade of wildlife, including endangered species. Instead, the CTPA may help to reduce illegal trade by facilitating exchange of information about patterns of and potential or actual problems with illicit wildlife trade. Provisions related to customs cooperation have the potential to enhance cooperation on a variety of trade-related matters, including combating trade in illegally-taken wildlife and CITES enforcement.

In general, concerns related to CITES-regulated species are appropriately addressed within the framework of CITES and through cooperation between the U.S. and Colombian governments. The U.S. Fish and Wildlife Service is the U.S. CITES Management Authority. Several federal agencies, including the Department of Commerce's National Marine Fisheries Service, work cooperatively with Colombia on CITES implementation. The CTPA provides opportunities to reinforce these efforts through provisions of the Environment Chapter such as the obligation to effectively enforce environmental laws and through cooperative activities carried out through the ECA.

⁸ The review of legislation is based on four key requirements for national legislation: (1) designation of at least one Management Authority and one Scientific Authority; (2) prohibition of trade in specimens in violation of the Convention; (3) penalties for trade in violation of the Convention; and (4) authority to confiscate specimens illegally traded or possessed. Further information is available at: <http://www.cites.org>.

3. Migratory Birds

Migratory and resident species of birds are a critically important global resource. In the United States and in the Andean region, birds pollinate flowers, remove insect pests and weed seeds from many important commercial food crops and forest product species, and are a critical component of nature-based tourism that generates hundreds of millions of dollars in economic activity. Nevertheless, many bird species face both direct and indirect threats to survival, many of which are human-caused.

In the United States, 1,007 migratory bird species are currently protected under the Migratory Bird Treaty Act (MBTA), of which over 130 neo-tropical migratory species migrate through or depend on the tropical Andes for wintering habitat, including Colombia. Colombia has more bird species than any other country.⁹ The region is recognized widely as one of the highest global priorities for investment in migratory bird conservation and protection, since it holds exceptionally high biodiversity and is suffering from acute habitat loss. Eighty-seven of Colombia's bird species are globally threatened, of which 12 are classified as critically endangered, 25 as endangered, and 50 as vulnerable.¹⁰

Deforestation (including clearing for agricultural production and development) and forest degradation (including unsustainable timber production) are among the greatest threats to birds and their habitats. Forest cover has been significantly reduced or degraded in Colombia, and it continues to face relatively high rates of deforestation.

Production for export, including export to the United States, is a factor in deforestation. For example, coffee is a major export crop for Colombia whose production has significant impacts on habitat for migratory birds. Efforts are being made to encourage the expanded use of “bird-friendly” production methods (such as shade-grown coffee) in order to protect existing habitat and eliminate the use of bird-deadly pesticides, herbicides, and fertilizers.

The tariff provisions of the CTPA are not likely to have an impact on migratory bird habitat because U.S. applied tariffs on most products, including those linked to deforestation and forest degradation, are already low or at zero. Although the tariff-related production and trade effects appear likely to be small, it is more difficult to predict the effects of the CTPA on investment in the sector. For example, investment may increase as a consequence of a variety of factors that create a more stable and predictable investment climate. The environmental effects of investment in sectors such as agriculture, whose activities may affect migratory bird habitat, may be either positive or negative.

There may be opportunities to address migratory bird issues in connection with the CTPA, for example through cooperative activities. Cooperative activities addressing a number of concerns related to migratory birds are outlined in Annex I of the Interim Environmental Review of the

⁹ Birdlife International, Important Bird Areas AMERICAS: Colombia (2009).

proposed United States – Andean Free Trade Agreement (with Colombia, Ecuador and Peru).¹¹

4. Invasive Species

Public comments and interagency analysis identified invasive species as an environmental concern related to the CTPA.¹² Commodity trade can provide pathways for invasive species, and the introduction of invasive species can result in harmful effects on the environment and economy of the host country. The United States and Colombia face and recognize risks associated with invasive species.¹³ For example, the invasion of Pacific lionfish into wider Caribbean waters poses serious economic and ecological threats, both to fisheries and to the tourism industry in Colombia and neighboring countries.¹⁴

The risk of introduction of invasive species varies across traded commodities.¹⁵ Colombia is an exporter of some products associated with a relatively higher risk of introducing invasive species. For example, Colombia accounts for a large proportion of all U.S. imports of fresh cut flowers, as well as U.S. imports of foliage, other plant parts besides flowers, and live ornamental fish.

The CTPA does not alter either country's regulatory framework for managing the introduction of invasive species. The CTPA also does not alter related regulations, such as those prohibiting or regulating agricultural and other trade for the purpose of protecting against the introduction of agricultural pests or diseases.

This review identified a baseline risk that invasive species may move between Colombia and the United States. However, the CTPA's likely effect on this risk appears to be small, particularly in light of that fact that in the near term, the CTPA is not expected to lead to a significant increase in Colombia's goods exports to the United States (see Section V.B.1 *supra*), including in

¹¹ Available at: <http://www.ustr.gov/sites/default/files/colinterm.pdf>.

¹² The term “invasive species” refers to species not native to a particular ecosystem that are intentionally or unintentionally introduced as a result of human activities and cause, or are likely to cause, harm to ecosystems, economic systems or human health.

¹³ For the United States, Executive Order 13112 (February 3, 1999) established the National Invasive Species Council and commits federal agencies to conducting research on invasive species issues, taking reasonable actions to discourage the introduction of these species into the United States and elsewhere and to undertaking international cooperation aimed at addressing this issue.

¹⁴ See, e.g., <http://www.ccfhr.noaa.gov/stressors/lionfish.aspx>.

¹⁵ Trade-related pathways that involve a risk of invasive introductions include the movement of vehicles used in transporting commodities (e.g., ballast water in ships), or the transport of products and packaging that contain potentially invasive organisms (e.g., grains that contains weed seeds). Some invasive species are also introduced on ornamental plants, fruits, aquarium fish, and through other commonly traded products. Associated pests and pathogens may arrive as “hitch-hikers” in shipments of biological materials.

products associated with a higher risk of introduction of invasive species.¹⁶ Additionally, the CTPA may decrease the risk of introduction of invasive species through increased cooperation and consultation between the Parties.

5. Tuna/Dolphin

Public comments raised concerns that the CTPA could weaken efforts to protect dolphin populations in the eastern tropical Pacific Ocean (ETP) from the adverse affects of commercial fishing.

The Inter-American Tropical Tuna Commission (IATTC), established by international convention in 1949, is responsible for the conservation and management of fisheries for tunas and other species taken by tuna-fishing vessels in the eastern Pacific Ocean. The International Dolphin Conservation Program¹⁷ (AIDCP) is a legally-binding multilateral agreement which entered into force in February 1999. AIDCP aims to: progressively reduce incidental dolphin mortalities in the tuna purse-seine fishery to levels approaching zero through the setting of annual limits; seek ecologically sound means of capturing large yellowfin tunas not in association with dolphins; and ensure the long-term sustainability of tuna stocks in the Agreement Area, as well as that of related marine resources, taking into consideration the interrelationship among species in the ecosystem. The United States is a party to the AIDCP; Colombia applies the Agreement provisionally but is not party.

In 2004, Colombia was denied “cooperating non-party” status under the terms of the IATTC’s Joint Working Group on Fishing by Non-Parties. Colombia’s failure to cooperate with the IATTC’s 2004 fishery closure for purse-seine vessels was cited as a particular concern, and that concern was repeated in the 2005 Joint Working Group on Fishing by Non-Parties. In the course of the CTPA negotiations the United States emphasized the importance of multilateral conservation efforts such as the AIDCP and stressed the importance of Colombian cooperation with the IATTC. In 2007, Colombia joined the IATTC.

In January 2011, the United States identified Colombia as having vessels engaged in illegal, unreported, or unregulated (IUU) fishing under the High Seas Driftnet Fishing Moratorium Protection Act based on noncompliance with IATTC measures.¹⁸

Colombia has expressed a willingness to better control its tuna fishery and, while some issues remain outstanding, recently Colombia has been positively engaged with the United States and other delegations on issues of IUU fishing, capacity controls, and tuna conservation and management.

¹⁶ Imports of fresh cut flowers and foliage had been entering the United States duty-free as a consequence of the ATPA, as amended. As discussed above, the ATPA lapsed on February 12, 2011.

¹⁸ See January 2011 Biennial Report to Congress, available at: http://www.nmfs.noaa.gov/msa2007/docs/biennia_report_to_congress.pdf.

The CTPA does not alter or supersede the IATTC or the AIDCP. On the contrary, through the obligation to effectively enforce environmental laws (including those related to implementation of commitments under the IATTC), the CTPA is expected to complement and reinforce existing fisheries management and dolphin conservation activities.

6. Turtles

Colombia hosts important nesting, foraging and migrating populations of five species of sea turtles. The inshore and nearshore Pacific waters of Colombia provide large areas of important foraging habitat for green turtles, while the nearshore and offshore waters provide important foraging habitat for olive ridleys. In addition, the Caribbean coast of Colombia hosts important nesting populations of leatherbacks, green turtles, hawksbills and a remnant nesting population of loggerhead turtles and also provides expansive areas of foraging habitat for these three species.

All species of sea turtles are listed in CITES Appendix I (the most protective listing), and all sea turtles, except the flatback sea turtle, are protected by the U.S. Endangered Species Act. One of the main threats to their survival is incidental mortality in nets used by shrimp trawlers. In response, the U.S. Government issued voluntary guidelines in 1987 and, subsequently, a mandatory requirement that domestic shrimp trawlers use turtle-excluder devices (TEDs) in their nets. These devices allow larger animals to escape the nets and significantly reduce turtle mortality in shrimp fishing.

Section 609 of Public Law 101-162 requires the President (who has delegated the authority to the Department of State) to make annual certifications to the Congress for countries that meet the requirements of Section 609 in terms of sea turtle protection for commercial shrimp trawl fisheries. Any country that is not certified may not export commercially-harvested shrimp and shrimp products to the United States. This certification requirement does not affect shrimp and shrimp products from aquaculture or artisanal fisheries. This certification program has been applicable to South American countries with shrimp fisheries in the Pacific Ocean since 1996. Certification decisions are based in part on bi-annual verification visits conducted by Department of State and National Marine Fisheries Service personnel to observe compliance and enforcement. To meet the standard for certification a country must have a regulatory enforcement program governing the incidental take of sea turtles in commercial trawl shrimp fisheries that is comparable to that in the United States and an incidental take rate of sea turtles in those shrimp fisheries that is comparable to that in the United States.

On May 1, 2011, the Department of State certified 39 countries, including Colombia, as meeting the requirements set by Section 609 of P.L. 101-162 for continued export of shrimp to the United States. The inspection report found that Colombian inspectors exhibited a basic level of proficiency. The report noted that a strong partnership between INCODER and the Colombian Coast Guard is needed for an effective TED program, and that at-sea inspections and enforcement component would significantly strengthen Colombia's program.

The CTPA will not affect the certification requirement in Section 609, or the manner in which

the Department of State assesses and makes decisions on the effectiveness of foreign governments in their implementation and enforcement of their domestic laws related to protection of sea turtles. The CTPA is expected to provide opportunities to reinforce efforts to protect turtles through the obligation to effectively enforce environmental laws and through environmental cooperation activities aimed at turtle conservation.

7. Marine and Coastal Ecosystems

Coastal and marine ecosystems in Colombia are rich in biological diversity and living marine resources, providing critical habitats for migratory marine species of importance to the United States. For instance, migration routes for some species of whales include waters off the Pacific Coast of Colombia. Some of Colombia's most valuable fisheries resources are found in its coral reefs. Coral reefs also contribute to tourism in the country. Coral reefs in Colombia's Caribbean waters are affected by marine pollution, as well as other factors such as resource extraction, tourism, mining, over-fishing, and coastal development. Some of the most serious threats to coral reefs, as well as other coastal habitats and ecosystems, are a result of sediment in runoff linked to logging, land clearing, and agriculture. Nutrients from untreated sewage in high population centers also are a significant problem, as is oil pollution, including from ship traffic.

The CTPA is not expected to have direct effects on coastal and marine ecosystems in Colombia. However, increased cooperation between the Parties as a result of the CTPA and the ECA may result in improved management and conservation of these critical coral reef ecosystems. The CTPA may also provide a number of opportunities to enhance ongoing efforts to address concerns related to coastal ecosystems, including mangrove habitats.

One such opportunity is pursuant to the Convention on Wetlands of International Importance (Ramsar Convention). The United States and Colombia are parties to the Ramsar Convention. Through a decision of the Conference of Contracting Parties, the Parties to the Ramsar Convention were urged to suspend the creation and promotion of new aquaculture facilities and the expansion of current aquaculture activities that would be harmful to coastal wetlands until the environmental and social impact of such activities are determined, and measures can be enacted to establish a sustainable system of aquaculture.¹⁹ The CTPA Parties, through the environmental cooperation activities of the CTPA, will seek to enhance implementation of this Ramsar Convention decision.

Another such opportunity is the Cartagena Convention for the Protection and Development of the Marine Environment of the Wider Caribbean and its three Protocols. The Cartagena Convention is one of the strongest instruments developed to protect a regional sea, and Colombia serves as its Depository. The United States and Colombia are parties to the Cartagena Convention. In 2010, the Convention's Protocol Concerning Pollution from Land-based Sources and Activities came into force. This protocol sets regional effluent limitations for domestic wastewater (sewage) and requires specific plans for addressing agricultural sources of pollution. Taking steps to stem the flow of land-based source of pollution is critical to halting the further

degradation of Colombia's marine environments.

VI. Potential Regulatory Impacts

A. Regulatory Review

Consistent with Executive Order 13141 and its Guidelines, this review included consideration of the extent to which the CTPA might affect U.S. environmental laws, regulations, policies or international commitments. Within the range of CTPA obligations, those related to investment, services and TBT can have particular significance for domestic regulatory practices concerning the environment, health and safety. Previous environmental reviews, including the interim and final reviews for the Jordan, Chile, Singapore, Morocco, Australia, Dominican Republic –Central America, Bahrain, Oman and Peru free trade agreements, have considered potential impacts on the U.S. regulatory regime with respect to all of these obligations and have found that the respective trade agreements were not anticipated to have a negative impact on U.S. legal or regulatory authority or practices. Further, the reviews noted the potentially positive impact that the agreements could have on the U.S. environmental regulatory regime as a result of the agreements' commitments concerning effective enforcement of U.S. environmental laws, not waiving U.S. environmental laws to attract trade or investment, and providing for high levels of environmental protection in U.S. environmental laws and policies. As a result of the May 10, 2007 bipartisan Congressional-Executive agreement on trade, the CTPA and other trade agreements pending at that time include strengthened environmental provisions.

Based on this previous analysis, and given that the core obligations in these areas are similar to those undertaken in the earlier trade agreements, the Administration has concluded that the CTPA will not have a negative impact on the ability of U.S. government authorities to enforce or maintain U.S. environmental laws or regulations.

For a more in-depth analysis of general trade agreement commitments and their potential regulatory impacts in the United States, see the previous reviews at: <http://www.ustr.gov/trade-topics/environment/environmental-reviews>.

B. Investment

Investment provisions in trade agreements were a matter of intense debate during Congress' consideration of the Trade Act. The central question was the appropriate balance that should be struck between protecting the rights of U.S. investors abroad and preserving the ability of the federal government and state and local governments to regulate with respect to health, safety, and the environment.

In the Trade Act, Congress recognized that securing a stable investment climate and a level playing field for U.S. investment abroad are important objectives of U.S. trade policy. By fostering economic growth and job creation, investment can bring important benefits, including potential benefits to the environment: as wealth grows and poverty decreases, more resources become available for environmental protection, with potential benefits for developing countries,

particularly as they develop constituencies in favor of increased environmental protection. Congress, however, also gave weight to concerns that arbitral claims brought by investors against governments (through “investor-State” arbitration) could be used inappropriately to challenge U.S. domestic laws and regulations, including those concerning the environment. As the Conference Report accompanying the Trade Act states: “[I]t is a priority for negotiators to seek agreements protecting the rights of U.S. investors abroad and ensuring the existence of a neutral investor-State dispute settlement mechanism. At the same time, these protections must be balanced so that they do not come at the expense of making U.S. Federal, State, and local laws and regulations more vulnerable to successful challenges by foreign investors than by similarly situated U.S. investors.”²⁰

The Trade Act strikes a balance between these two goals by recommending U.S. trade negotiating objectives that clarify several substantive investment obligations of particular concern (notably, provisions on expropriation and “fair and equitable treatment”). The objectives seek to ensure that foreign investors in the United States are not accorded greater substantive rights than U.S. investors in the United States, while also securing for U.S. investors abroad core protections that are comparable to those that would be available to them under U.S. law. Other objectives in the Trade Act addressed concerns that investor-State arbitration be conducted efficiently and arbitral tribunals interpret substantive obligations in a consistent and coherent manner. After enactment of the Trade Act, the Administration consulted extensively with Congress and with the business community and environmental non-governmental organizations (NGOs) in order to clarify provisions, develop new procedures and to ensure that those provisions and procedures fully satisfied the Trade Act’s objectives. These provisions and procedures were ultimately incorporated into each of the trade agreements negotiated under the Trade Act.

Previous environmental reviews of trade agreements have examined investment provisions in detail, particularly those clarifications and improvements included in trade agreements negotiated after the Trade Act was enacted.²¹ The Administration concluded that the investment provisions should not significantly affect the ability of the United States to regulate in the environmental area.²² In this review, the Administration has re-examined that conclusion in light of public and advisory committee comments and the most recent experience.

Relevant CTPA Investment Provisions

The CTPA Investment Chapter includes the following substantive clarifications and procedural

innovations with relevance to the environment. These provisions were developed based on careful consideration of Trade Act guidance and consultations with interested constituencies:

- *Expropriation.* The expropriation provisions have been clarified in an annex to ensure that they are consistent with U.S. legal principles and practice, including a clarification that non-discriminatory regulatory actions designed and applied to protect the public welfare (including environmental protection) do not constitute indirect expropriation “except in rare circumstances.” To determine whether an indirect expropriation has occurred, the annex directs tribunals to examine several factors, which derive from the analysis of the U.S. Supreme Court in *Penn Central Transportation Co. v. New York City*, 438 U.S. 104 (1978), the seminal case on regulatory expropriation. The annex also clarifies that only tangible or intangible property rights or interests in an investment are subject to the CTPA’s obligations with respect to expropriation.
- *Minimum standard of treatment/“fair and equitable treatment.”* The minimum standard of treatment obligation, including the obligation to provide “fair and equitable treatment” and “full protection and security,” is clarified to provide that these concepts do not require treatment in addition to or beyond that contained in customary international law, and do not create additional rights. Specifically, “fair and equitable treatment” is defined to include the obligation not to “deny justice” in criminal, civil or administrative adjudicatory proceedings, in accordance with “due process” protections provided in the principal legal systems of the world, including that of the United States. An annex gives further guidance concerning the Parties’ understanding of the term “customary international law.”
- *Increased transparency in the investor-State mechanism.* The CTPA provides that all substantive documents submitted to or issued by an arbitral tribunal shall promptly be made public and that hearings are open to the public, subject to provisions ensuring the protection of classified and business confidential information. It also expressly authorizes *amicus curiae* submissions, allowing the public to present views on issues in dispute.
- *Elimination and deterrence of frivolous claims.* The CTPA includes an expedited procedure to allow for the dismissal of frivolous claims (based on Rule 12(b)(6) of the Federal Rules of Civil Procedure, *i.e.*, the claimant has failed to state a claim upon which relief may be granted) and for the dismissal of claims based on jurisdictional objections. It also expressly authorizes awards of attorneys’ fees and costs after a tribunal decides, as a preliminary question, whether to dismiss a claim for lack of jurisdiction or for failure to state a claim on which relief may be granted.
- *Promoting consistency and coherence of arbitral decisions.* The CTPA allows interim review of draft tribunal decisions by litigants and by the non-litigating Party. The litigants may comment on the draft decision.

In addition to these improvements developed specifically in response to the Trade Act, the

CTPA includes several provisions, similar to those in previous agreements, that accommodate the flexibility that environmental regulators need to do their job and demonstrate the Parties' intent that the investment obligations should be interpreted in a manner consistent with each Party's right to regulate in the environmental area:

- *National treatment and MFN treatment for investors and their investments "in like circumstances."* As in earlier U.S. bilateral investment treaties (BITs) and in Chapter 11 of the North American Free Trade Agreement (NAFTA), the national treatment and MFN obligations of the CTPA Investment Chapter apply to investors "in like circumstances." This means that domestic regulation (including environmental regulation) may, in furtherance of non-discriminatory policy objectives, distinguish between domestic and foreign investors and their investments, as well as among investors of different countries and their investments, without necessarily violating the national treatment and MFN obligations. For example, regulators in appropriate circumstances may apply more stringent operating conditions to an investment located in a wetland, or in a more heavily polluted area, than to an investment located in a less environmentally sensitive area.
- *Relationship to other provisions.* The CTPA includes provisions making clear that in the event of any inconsistency between the Investment Chapter and any other chapter (including the Environment Chapter), the other chapter will prevail to the extent of the inconsistency. While the Administration does not believe there to be any inconsistencies between the Investment Chapter and any other chapters, this provision clarifies the Parties' intentions with respect to the relationship between different chapters. The CTPA Investment Chapter also provides that nothing in the chapter shall be construed to prevent a Party from taking measures otherwise consistent with the Investment Chapter to ensure that investment activity in its territory is undertaken in a manner sensitive to environmental concerns. Furthermore, in the agreement's Environment Chapter each Party commits not to waive or derogate from its environmental laws in a manner that weakens or reduces the protections afforded in those laws in a manner affecting trade or investment between the Parties, except where the waiver or derogation is provided for in its law.

Potential Environmental Regulatory Impacts

The Administration has been unable to identify any concrete instances of U.S. environmental measures that would be inconsistent with the CTPA's substantive investment obligations, and none have been called to the Administration's attention by commenters. No claims have ever been brought against the United States under the almost 40 BITs that are currently in effect or under any of our trade agreements other than the NAFTA. In the 17 years that the NAFTA has been in effect, 15 cases have been brought against the United States by Canadian or Mexican investors. The United States has prevailed in all of the cases that have been decided to date.

The Administration also considered the views of the TEPAC and other commenters on investment issues (see Section IV). The TEPAC majority concluded that the clarifications to the CTPA's investment provisions were an improvement over those in NAFTA Chapter 11

(particularly the clarification of the meaning of “indirect expropriation”), although the majority noted that some concepts could be further clarified. The majority also found that these clarifications reduced the possibility of a successful claim relating to a U.S. environmental measure. In addition, the majority noted that other provisions provide important protections for environmental regulation: the provision that another chapter (including the Environment Chapter) prevails over the Investment Chapter in the event of an inconsistency; the provision that nothing in the Investment Chapter should be construed to prevent a Party from taking measures otherwise consistent with the Chapter to regulate investment in an environmentally sensitive manner; clarifications of the minimum standard of treatment obligation; and the national treatment and MFN treatment obligations. Some members in the minority expressed concerns that investment protections had been inappropriately weakened, while others thought that these provisions should be included in a separate agreement.

Many of the innovations developed as a result of the Trade Act – including in the areas of expropriation, the minimum standard of treatment, and performance requirements – serve as safeguards to ensure that legitimate public interest regulation is fully protected.

Based on the above considerations, and given that U.S. environmental measures can be challenged in U.S. courts under current law, the Administration does not expect the CTPA to result in an increased potential for a successful claim relating to such measures. The CTPA’s innovations (like those of all post-Trade Act U.S. trade agreements) should further reduce the risk that arbitral tribunals will misapply the investment provisions of the CTPA. The Administration will continue to review the potential impact of investment provisions on environmental measures, however, as it implements this agreement and other trade agreements with similar provisions.

VII. ENVIRONMENTAL COOPERATION

As discussed in Section I.A, the Trade Act establishes that a principal U.S. negotiating objective is to strengthen the capacity of our trading partners to protect the environment through the promotion of sustainable development. In addition, the Trade Act instructs negotiators to seek to establish consultative mechanisms among parties to trade agreements to strengthen the capacity of U.S. trading partners to develop and implement standards for the protection of the environment and human health based on sound science.

The United States and Colombia share common concerns and similar responsibilities for protecting and conserving the environment and have a long history of cooperation to address environmental challenges. The United States and Colombia also have a common interest in promoting global environmental improvement and protection and in using science and technology to address environmental challenges.

The negotiation of the CTPA presented opportunities to encourage and foster development of private sector initiatives to promote the goals of the agreement, including innovative partnerships among governments, NGOs, international financial institutions and commercial interests. All of these activities support implementation of the provisions of the CTPA by building capacity

within governments, at all levels, to protect the environment in concert with the strengthening of trade and investment.

In conjunction with the negotiation of the CTPA, the United States and Colombia negotiated an ECA similar to those negotiated in parallel with other trade agreements the United States has concluded in recent years. Under the ECA the United States and Colombia will designate government representatives with environmental responsibilities to participate in an Environmental Cooperation Commission that will oversee the implementation of cooperative activities under the ECA. This Commission is already in existence, comprising representatives from the United States and Peru, to work on implementation of the United States – Peru ECA. Through the development of a work program, the Commission will guide and identify goals and objectives, as well as specific areas for cooperation that are consistent with the national priorities. The ECA envisions the development of performance measures to assist the Commission in examining and evaluating the progress of specific cooperative programs, projects and activities in meeting their intended goals. The ECA also outlines the Commission's role in seeking and considering input from relevant local, regional, and international organizations to assist it in monitoring the progress of cooperative activities. The ECA contemplates the Commission developing the Work Program in a manner that complements the activities undertaken pursuant to the Peru ECA.

The ECA identifies short-, medium- and long-term cooperation activities that include: local and national environmental governance and capacity-building; strengthening conservation and sustainable use of natural resources; promoting economic incentives and flexible mechanisms for conservation; technology transfer, with particular emphasis on efficient production processes and technologies, strengthening the capacity to implement multilateral environmental agreements to which both Parties are party; promoting the development and implementation of domestic initiatives on environmental goods and services; and building capacity to promote public participation in environmental and natural resources decision-making and enforcement, including public access to information.

The ECA will be an important mechanism for the United States and Colombia to achieve shared goals and objectives and comply with the obligations undertaken in the CTPA Environment Chapter. The Administration will work closely with Congress to identify adequate and stable funding sources for potential cooperative activities under the ECA.

Executive Summary

This report provides an overview of labor rights in Colombia in response to the requirement of the *Trade Act of 2002* that the President provide a “meaningful labor rights report” concerning each country with which a free trade agreement is under consideration. The report focuses on important changes that have occurred in recent years, identifies ongoing issues, and discusses the commitments made by the Government of Colombia and the actions it has already taken under the “Colombian Action Plan related to Labor Rights” (“Action Plan”). The Action Plan was announced on April 7, 2011, by President Barack Obama and President Juan Manuel Santos. The Action Plan sets out the specific steps the Government of Colombia has committed to take to address concerns regarding Colombian labor laws and practices and the protection of labor rights.

This report is divided into three sections. Section One provides an introduction to the report. Section Two identifies “Issues of Note,” which are areas of concern with regard to labor laws and practices, and notes changes made by the Government of Colombia during recent years. The section also describes the Colombian Action Plan, which includes a broad range of initiatives to address these areas of concern.

Among the significant changes, Colombia has committed or has already taken steps to:

- Re-establish a separate Ministry of Labor and double the number of labor inspectors to enhance enforcement efforts;
- Accelerate and strengthen reforms to combat the misuse of associated worker cooperatives to deny workers their rights under Colombian law; and
- Establish criminal penalties for employers who undermine the right to organize and bargain collectively, including through collective pacts.

While Colombia has taken substantial steps to improve protection of worker rights, the International Labor Organization (ILO) continues to express concerns in several areas. This report notes those concerns, referencing in each instance the relevant jurisprudence and recommendations from the ILO Committee of Experts on the Application of Conventions and Recommendations and the ILO Committee on Freedom of Association.

As part of the Action Plan, the Government of Colombia has requested the assistance of the ILO to facilitate the implementation of the steps in that plan related to Colombia’s labor law. The ILO was also asked to facilitate a Tripartite Process, bringing together the Government, employers and trade unions, with the goal of ensuring the full protection of labor rights and compliance with labor laws.

In light of the history of violence against trade unionists in Colombia, Section Three, “Labor Violence and Impunity,” describes progress and remaining challenges in combating ongoing violence and intimidation of labor activists. The report notes that the Action Plan includes improvements to a protection program to shield trade unionists from

violence and a separate program to protect teachers, as teachers have been particular targets of violence. The section also describes the detailed steps included in the Action Plan to prosecute anti-trade union crimes.

Overall, this report finds that, while violence against trade unionists and the abuse of workers' rights remain significant challenges, the Government of Colombia's recent and proposed reforms on these issues demonstrate a strong and comprehensive commitment to protect workers' rights, to ensure that trade union activists can exercise their fundamental rights without fear of retaliation and that those who commit violence against trade unionists will be prosecuted.

1. Introduction

This report on labor rights in Colombia has been prepared pursuant to section 2102(c)(8) of the Trade Act of 2002 (“Trade Act”) (Pub. L. No. 107-210). The Trade Act provides that the President shall:

[i]n connection with any trade negotiations entered into under this Act, submit to the Committee of Ways and Means of the House of Representatives and the Committee on Finance of the Senate a meaningful labor rights report of the country, or countries, with respect to which the President is negotiating.

The President, by Executive Order 13277 (67 Fed. Reg. 70305 (Nov. 21, 2002)), assigned the above responsibilities to the Secretary of Labor and provided that they be carried out in consultation with the Secretary of State and the U.S. Trade Representative (USTR). The Secretary of Labor subsequently provided that such responsibilities would be carried out by the Secretary of State, the USTR, and the Secretary of Labor (67 Fed. Reg. 77812 (Dec. 19, 2002)).

This report examines the current situation and highlights the most important recent changes. For the purposes of this report, labor rights are identified as internationally recognized labor rights contained in the definition of “labor laws” under Chapter 17, the Labor Chapter of the Colombia TPA.¹ These rights are:

- a. freedom of association;
- b. the effective recognition of the right to collective bargaining;
- c. the elimination of all forms of forced or compulsory labor;
- d. the effective abolition of child labor, a prohibition on the worst forms of child labor, and other labor protections for children and minors;
- e. the elimination of discrimination in respect of employment and occupation;
- and
- f. acceptable conditions of work with respect to minimum wages, hours of work, and occupational safety and health.

This report does not attempt a comprehensive review of labor laws and practices, but rather draws attention to important developments of recent years. It identifies ongoing issues and discusses the Government of Colombia’s Action Plan commitments to take specific steps needed to bring Colombian labor laws and practices into greater conformity with internationally recognized labor rights. The Action Plan was announced on April 7, 2011 by President Barack Obama and President Juan Manuel Santos.²

The second section of this report, “Issues of Note,” identifies areas of concern and notes recent changes to related law and practice made by the Government of Colombia. These notable areas include: Associated Work Cooperatives, Collective Pacts, Prohibitions on the Right to Strike, Temporary Service Agencies, Freedom of Association and Collective Bargaining, the reconstitution of the Ministry of Labor in Colombia and several other significant developments on labor rights. For each area, this section details related specific steps included in the Action Plan. The third section of the report focuses on remaining challenges and progress made in combating violence against Colombian trade unionists and efforts to prosecute the perpetrators. The report notes the steps in the Action Plan to improve protections from violence for trade unionists and to prosecute anti-trade union crimes.

2. Issues of Note

This section discusses issues of concern identified by the U.S. Government and by the ILO Committee of Experts on the Application of Conventions and Recommendations (CEACR), the ILO Committee on Freedom of Association (CFA) and labor rights groups. The section describes recent labor reforms carried out by the Government of Colombia and the commitments that the Government of Colombia has made and is in the process of undertaking as part of the Action Plan to address remaining concerns.

The Action Plan provides mechanisms for oversight by the two governments as the plan is implemented. In addition, the Government of Colombia has launched a Tripartite Process with trade unions and employers to work on implementation of the Plan and promote improved and effective social dialogue on labor issues. The Government has also requested the ILO to provide technical assistance to help in the implementation of the Action Plan and to foster the Tripartite Process, with the goal of ensuring full protection of labor rights and compliance with labor laws.

2.1 Associated Work Cooperatives

Colombian law allows for workers to join together in self-governed, autonomous enterprises known as Associated Work Cooperatives (*Cooperativos de Trabajo Asociado* - CTAs). Several Colombian laws contain provisions and operating criteria intended to ensure that CTAs are democratically controlled and are not misused to avoid direct employment relationships.³ Until late 2010, penalties for violating such provisions and criteria were enforced only against violating CTAs, rather than the third-party employers who benefited from the prohibited practices. The ILO also considered that enforcement of the existing laws was inadequate.⁴

As a result, CTAs became a vehicle widely used by employers to end direct employment relationships with their workforces, while retaining the same or other workers through

CTAs and continuing to act as their *de facto* employers,⁵ for example by engaging in prohibited practices to control the workers' schedules, assign duties, determine terms and conditions of employment and make personnel decisions.⁶ As members of cooperatives, the workers are vulnerable to exploitation because CTA members are considered cooperative "owners," rather than workers, and are thus excluded from many Labor Code protections.⁷ This status also denies workers the right to form unions and bargain with their *de facto* employers. The ILO has consistently asked the Government of Colombia to reform laws and improve enforcement in order to end misuse of CTAs to impede workers' rights to associate and bargain collectively.⁸

Existing Laws and Practice Governing Cooperatives: Under Colombian law, a minimum of 10 workers is required to form a CTA.⁹ Laws governing CTAs also provide that CTA operations must ensure democratic participation of members and establish an internal governance structure and that CTA leaders and officers must be independently elected.¹⁰ The laws also require that a CTA own, possess or control its means of production.¹¹ Legislation governing CTAs bans the associations from engaging in "labor intermediation,"¹² prohibits cooperatives from acting as temporary service agencies and requires compliance with a range of specifically articulated criteria for CTA operation.¹³ Since 2008, Colombian law has extended to CTA members the Labor Code guarantees governing minimum wage and social security, including health care, pensions, and workers' compensation.¹⁴

Under Colombian law, third-party employers are prohibited from interfering in the operation or organization of cooperatives.¹⁵ When a third-party employer engages a CTA for labor intermediation or as a temporary service agency, that employer is jointly liable for the economic obligations owed to the CTA associates and the CTA's legal authorization to operate can be revoked. When a third-party employer illegally assumes control of internal CTA governance and discipline, the affected associates may be considered direct employees of that employer under the law.¹⁶

Cooperatives are also legally understood to include “pre-cooperatives,” which have similar characteristics as cooperatives but are meant to be transitional, operating for only five years with possible extensions and requiring only five members instead of ten. By law, a pre-cooperative, unlike a cooperative, must have a sponsor that provides financial and technical support and training and participates in its administration and control.¹⁷ These requirements create the potential for the establishment of employer-dominated pre-cooperatives, since the “sponsors” are typically employers who then hire the members of the pre-cooperative. Pre-cooperative members are thus more vulnerable than cooperative members to being denied their rights under labor law, including their ability to form unions. There are presently 341 pre-cooperatives authorized and registered.¹⁸

The use of CTAs has increased dramatically over the last decade,¹⁹ with growth particularly pronounced in the sugar, palm oil and port sectors.²⁰ For example, the Colombian Sugar Industry Association, ASOCAÑA, estimates that nearly 70 percent of its cane cutters nationwide are now members of CTAs.²¹ FEDEPALMA, the Colombian Palm Oil Association, estimates that about 35 percent of its palm workers are employed through cooperatives.²² According to the Ministry of Social Protection (MSP) there are currently 4,555 CTAs in Colombia.²³

Because CTA members are considered joint owners of the cooperative, rather than workers, and their right to organize is thus not protected under law, violations of freedom of association have been prevalent in sectors where CTA use is widespread.²⁴ In the palm oil sector, for instance, some employers reportedly assign their managerial personnel to run the CTA board elections and set limits on the total number of CTA associates in order to maintain control, including for the purpose of avoiding unions.²⁵ Similar practices are reported in the port and sugar sectors.²⁶

A recent ILO High Level Tripartite Mission to Colombia concluded that CTAs had contributed significantly to the drastic reduction in Colombian trade union density,²⁷

currently estimated at 4.4 percent of the labor force.²⁸ The ILO Mission called for “renewed legislative and enforcement measures to put an end to the labor intermediary activities of cooperatives (CTAs), and all other legal and practical obstacles to freedom of association and collective bargaining.”²⁹

The Colombian Government, under President Juan Manuel Santos, shares concerns about the misuse of cooperatives.³⁰ In response to the growing use of cooperatives to undermine workers’ rights, the Santos Administration proposed reforms to the laws governing cooperatives and in 2010 the Colombian Congress adopted Law 1429, the “Law on Formalization and Generation of Employment.” Article 63 of the law prohibits private and public employers from using cooperatives to act as labor intermediaries to provide labor for “permanent core functions” of the user employer. Article 63 also prohibits misuse by the user employer of any other kind of labor relationship that affects workers’ constitutional or labor law rights to carry out “permanent core functions.” For the first time, the law establishes significant fines (up to 5,000 monthly minimum wages, equal to approximately U.S. \$1.4 million) for user employers as well as CTAs that violate the prohibitions. A CTA implicated in the violation of Article 63 is subject to dissolution and liquidation under the law.³¹

Action Plan: When adopted in December 2010, Article 63 was scheduled to enter into force on July 1, 2013. However the Santos Administration introduced legislation to accelerate the effective date, which the Colombian Congress approved on April 26, 2011. All provisions of Article 63 took immediate effect upon the signature of President Santos on June 16, 2011.

Meeting its commitment under the Action Plan, the Government of Colombia issued regulations to implement Article 63 on June 8, 2011. As set out in the Action Plan, the regulations contain clear and sufficiently broad definitions of “permanent core function” and “labor intermediation” to adequately address CTA abuses. The regulations also clarify earlier cooperatives laws and ensure coherence among these laws and the new provisions. In order to promote compliance, the regulations allow for the adjustment of fines where an employer agrees to create and maintain a direct employment relationship with the affected workers. Fines are set higher for repeat offenders and large-scale violators. The Government has committed to strictly apply and enforce legal requirements that only cooperatives that are autonomous, exhibit financial independence and own their methods of production, capital and assets will be permitted to operate. Further, cooperatives’ members must have autonomy in conducting their work and must

share in the economic proceeds of the cooperative. Cooperatives may not be involved in any form of labor intermediation.

The Government of Colombia committed to develop and conduct an outreach program to inform and advise workers of their rights as members of CTAs, including the remedies and courses of action available to enforce recognition of a direct employment relationship when one is deemed to exist. The initial phase of the outreach program began as of June 15, 2011.

To improve enforcement of laws governing cooperatives, the Colombian Government committed to hire and train 100 new inspectors dedicated exclusively to enforcing CTA laws, 50 of which are to be hired in 2011, with an additional 50 hired in 2012. The Government has also committed to prioritize labor inspections, and the hiring of new inspectors, for those sectors in which employment relationships have been widely abused, including palm oil, sugar, mines, ports, and flowers.

2.2 Collective Pacts

There are two types of collective employment contracts under the Colombian Labor Code: collective conventions and collective pacts. A collective convention is a contract negotiated with a duly formed union, and would be termed a collective bargaining agreement in the United States. A collective pact is an agreement concluded by an employer with non-union workers.³²

Existing Law and Practice Governing Collective Pacts: Under Colombian law, collective pacts are legally permissible when a union represents one-third or less of a company's workforce.³³ When a union represents more than one third of a company's workers, collective pacts are banned and any collective convention negotiated between the union and the employer covers all workers in the enterprise.³⁴

The Constitutional Court of Colombia has ruled that an employer's freedom to enter into collective pacts "cannot be exercised or utilized by the employer to affect the fundamental rights of workers and the unions."³⁵ The Court has also declared that terms and conditions offered by employers through a collective pact must be the same as those offered to organized workers through collective bargaining.³⁶

Examining the situation in Colombia, the ILO CEACR has observed "that direct negotiations with workers should only be possible in the absence of trade union

organizations.”³⁷ The CEACR has also raised concerns regarding the application of the law governing collective pacts in Colombia, referring “to enterprise, government and judicial practices giving preference to collective accords with non-unionized workers, disregarding collective agreements and existing trade unions.”³⁸

The ILO CFA has generally observed that “direct negotiation between the undertaking and its employees, by-passing representative organizations where these exist, might in certain cases be detrimental to the principle that negotiation between employers and organizations of workers should be encouraged and promoted.”³⁹ The high-level ILO tripartite mission to Colombia in 2005 observed that union members were frequently encouraged by employers to drop their union affiliation and sign a collective pact instead.⁴⁰

The ILO CEACR has noted the low rate of collective bargaining in Colombia, citing a total of 256 collective conventions in 2008, covering only 1.2 percent of workers.⁴¹ Colombian unionists have expressed concern over the increasing prevalence of collective pacts and what they perceive to be a corresponding decline in the number of workers covered by collective bargaining by unions.⁴² As of February 2011, there were 2,015 collective pacts, covering 227,830 workers; 151 of the pacts, roughly 7.5 percent, covered workplaces where a union was also present.⁴³

Action Plan: The Colombian Government submitted legislation to the Colombian Congress to establish criminal penalties, including imprisonment, for employers that undermine the right to organize and bargain collectively. The reform was approved by Congress on June 1 of this year and was signed by President Santos on June 24, 2011. It includes a provision making it a crime to offer a collective pact to non-union workers that has superior terms to those offered to union workers. The penalties can include imprisonment of up to five years and fines of up to 500 times the minimum wage for certain conduct.⁴⁴ Under the Action Plan, the Government had committed to seek enactment of this legislation by June 15, 2011, and upon passage of the legislation, to conduct a public outreach campaign to promote awareness of the law. The Government has committed to implement a robust enforcement regime, including preventive

inspections, and to provide quarterly reports to interested parties. The Government is also requesting technical assistance from the ILO to monitor the use of collective pacts.

2.3 Prohibitions on the Right to Strike

The Labor Code bans strikes by employees in public services, defined as “all organized activity necessary to satisfy public welfare needs in a regular and continuous form, whether carried out by the State directly or indirectly, or by private persons.”⁴⁵ The ILO CEACR has repeatedly commented that the services in which strikes are banned under Colombian law include “not only . . . essential services in the strict sense of the term [services the interruption of which would endanger the life, personal safety or health of the whole or part of the population] but also . . . a wide range of services which are not necessarily essential” and in which, therefore, strikes should be permitted.⁴⁶ Such non-essential services in which strikes are banned include, for example, ground, air, and water transportation; telecommunications; social assistance establishments; all levels and branches of government; and the petroleum industry.⁴⁷

Until 2008, the salt sector was also identified under Colombian law as a public service in which strikes were banned. In a 2008 ruling, however, the Constitutional Court declared the ban unconstitutional, citing the unitary nature of the Colombian legal system, which requires that the Labor Code comply with both the Constitution and ratified international conventions.⁴⁸ Similarly, in 2009, the Supreme Court struck down the designation of rail transport of coal as an essential public service, based largely on the same reasoning followed by the Constitutional Court in 2008.⁴⁹

Action Plan: The Government of Colombia has committed to collect the body of Colombian doctrine, case law and jurisprudence narrowing the definition of essential services and disseminate this information as well as relevant guidelines to labor inspectors, the judicial branch, unions and employers.

undermine workers' rights, including limits on the types of work that can be performed by ESTs and the number of times EST contracts can be renewed. The use of ESTs has expanded in the Colombian labor market over recent years and enforcement of the law has reportedly been inconsistent.⁵¹

EST workers are considered direct employees of the EST but not of the contracting third party employer.⁵² While workers' rights to associate and bargaining collectively are protected with respect to the EST, these rights are not protected with respect to the third party employer. In addition, as ESTs are hired only on a temporary basis, EST workers' employment can be precarious, which can make them more vulnerable than permanent workers and less likely to exercise their rights to associate and bargain collectively. The ILO CFA has expressed concern that contractors may use ESTs as a way to evade in practice the rights of workers to freedom of association and collective bargaining.⁵³

Existing Laws and Practice Governing ESTs: Colombian law limits the contracting of temporary employees through ESTs to the following situations: 1) for occasional, unforeseen, or transitory work; 2) to substitute for personnel on vacation or on medical leave for illness or maternity; and 3) to address surges in production, transport or sales, in the periods of peak harvests and in the provision of services, for a period of no longer than six months, with the possibility of an extension for no more than an additional six months.⁵⁴ The law also prohibits ESTs from providing workers to replace striking workers.⁵⁵

An employer may hire an EST to send workers to the employer's worksite or to perform the work at facilities owned by the EST within the limits noted above. (As noted above, Colombian law prohibits cooperatives from engaging in these functions that are permitted

for ESTs.) When EST employees work on-site, the law requires that they be paid the same salary as permanent employees at the worksite performing the same work and must receive many of the same benefits, including those related to transportation, food and recreation.⁵⁶ ESTs cannot provide services to third-party employers that have economic ties to the EST.⁵⁷

The MSP is responsible for enforcing Colombian laws governing Temporary Service Agencies, and the MSP must authorize ESTs to operate.⁵⁸ The MSP is required to deny an EST operating authorization if any of its proprietors, administrators or legal representatives has been associated with another EST whose operating authorization was suspended or terminated for legal violations over the previous five years.⁵⁹

Where abuses of the EST laws are found, the MSP is charged with imposing fines on both the violating EST and the third-party employer. MSP fines are authorized for up to 100 monthly minimum wages for each violation,⁶⁰ and repeated violations may result in suspension or cancellation of the EST authorization.⁶¹

An insufficient number of labor inspectors has reportedly limited the capacity of the MSP to monitor and uncover illegal practices.⁶² Labor rights groups claim that fines imposed by the MSP against violating ESTs and third-party employers may be too low to dissuade potential violators.⁶³ Some reports indicate that as many as 350,000 Colombian workers have been employed by unauthorized ESTs in recent years.⁶⁴

Action Plan: In response to concerns that ESTs may be used unlawfully to circumvent labor rights, the Government of Colombia has committed to strengthen enforcement of Colombian laws governing ESTs. The Government has committed to improve the inspection process, provide a new training program for labor inspectors on enforcement of EST-related laws and build databases to identify regions and sectors where there has been abuse. The Government has also committed to create a monitoring and reporting mechanism through which interested parties can verify progress and compliance by ESTs with labor laws. The MSP will issue quarterly reports that include the results of the measures taken to improve enforcement, such as preventative inspections, penalties, fines, cancellation of licenses and permits, and a list of ESTs found to be in violation.

2.5 Freedom of Association and Collective Bargaining

As noted above, the percentage of workers organized in trade unions has declined steadily in Colombia over recent decades. In 2010, approximately 820,000 workers (4.4 percent of the workforce of 18.4 million) were union members⁶⁵. According to the ILO, only 1.2 percent of the workforce was covered by a collective bargaining agreement in 2008.⁶⁶ The reasons for the decline in union membership and collective bargaining are numerous and varied, including some of the issues described above. The High-level ILO Mission to Colombia in February 2011 expressed concern at the “repeated and detailed information it received concerning acts of anti-union discrimination at the enterprise level . . . as well as the failure to take effective action to stop it.”⁶⁷

Action Plan: To address these concerns, the Government of Colombia submitted legislation to the Colombian Congress to establish criminal penalties, including imprisonment, for employers that undermine the right to organize and bargain collectively. The reform was approved by Congress and signed by President Santos on June 24, 2011. It establishes both fines and imprisonment for actions such as impeding or preventing workers from meeting, threatening reprisal for strikes or association, and offering a collective pact to non-union workers with better conditions than those offered to union workers. The penalties can include imprisonment of up to five years and fines of up to 500 times the minimum wage, for certain conduct.

2.6 Ministry of Labor

In 2003, the Government of Colombia merged the Ministry of Labor and Social Security and the Ministry of Health to form the current Ministry of Social Protection (MSP). Since that time, the MSP Vice-Minister for Labor Affairs has overseen the three divisions of the Ministry that are responsible for labor policy development and implementation of Colombian labor laws.⁶⁸ The three divisions are the General Directorate for Labor Protection, the General Directorate for Employment Promotion, and the Labor Inspectorate.

Labor rights groups have asserted that the MSP is “markedly weaker” than its Ministry of Labor predecessors.⁶⁹ The ILO’s CEACR has also articulated a number of specific concerns regarding the MSP’s capacity to uphold internationally recognized workers’ rights in Colombia. These include concerns that mechanisms for notification to the labor inspectorate of industrial accidents and cases of occupational disease may be insufficient; that inspectors are tasked with too many responsibilities, interfering with the discharge of

their principal duties; and that initial inspector training and subsequent training during employment, including on risk assessment and workplace access, need strengthening.⁷⁰ Partly in response to such criticisms, the Government of Colombia introduced legislation, signed into law by President Santos on May 4, 2011, to reconstitute a separate Ministry of Labor.⁷¹

Action Plan: In addition to establishing a separate Ministry of Labor, the Government has committed to double the size of the labor inspectorate by hiring 480 new inspectors over a four-year period, with the hiring and training of the first 100 new inspectors to be completed in 2011.⁷² An additional 100 labor inspectors will be hired in 2012. The Government has also committed to establish systems for filing anonymous labor complaints, including by creating a toll-free telephone hotline and a new web-based filing mechanism. The Government has committed to improve and extend the mediation and conflict resolution system which has been operated by the MSP, including through workshops on alternative dispute resolution for labor inspectors and additional resources for regional offices, worker and employer conflict resolution trainings and outreach.

2.7 Other Recent Labor Law Developments

Determination of Legality of a Strike: Prior to 2008, the Colombian Ministry of Social Protection was charged with determining the legality of a labor strike. The ILO CEACR had commented “that a declaration of illegality of a strike should be made by the judicial authority or an independent authority, not by the Ministry of Labour.”⁷³ In addition, the ILO CFA has observed generally that “responsibility for declaring a strike illegal should not lie with the government, but with an independent body which has the confidence of the parties involved.”⁷⁴ Law No. 1210 of 2008 transferred the authority to rule on the legality of a strike to the judiciary by amending Article 451 of the Labor Code to provide

Registration of Trade Unions: Prior to a Constitutional Court ruling in 2008, union registration procedures were administered by the MSP. The procedures were reportedly very slow and official union recognition could sometimes take years.⁷⁶ Labor rights groups additionally contended that the Government abused the requirements to slow or deny registration to new unions.⁷⁷ The ILO CEACR noted that there were a high number of seemingly arbitrary rejections of union registration documents and called on the government to amend its laws to ensure that the administrative authority would not have undue discretion in the union registration process.⁷⁸ However, Resolution No. 626 of 2008, instead expanded the grounds on which the MSP could refuse to register a union to include “that the trade union organization has been established for purposes that are different from those deriving from the fundamental right of association.”⁷⁹ In a 2008 ruling, the Constitutional Court found the new grounds for denying union registration established in Resolution 626 to violate both the Constitution of Colombia and ILO Convention No. 87.⁸⁰ The Court further ruled that the constitutional provisions requiring unions to register with the MSP served only as a *pro forma* registration requirement and did not justify the MSP in denying or approving a union’s registration documents. The ruling removed a significant obstacle to union registration. In accordance with the Court’s ruling, the Government of Colombia has clarified that Resolution 626 of 2008 is inapplicable. MSP officials are now depositing union documents in the register without the restrictive prior controls and procedures.⁸¹ Labor rights groups have confirmed that the MSP is largely following the new procedures for depositing union registration documents.⁸²

Compulsory Arbitration: Between 1990 and 2008, Article 448(4) of the Colombian Labor Code allowed the Ministry of Labor (and then its successor MSP) to refer a dispute to an arbitration tribunal when a strike lasted for more than 60 calendar days.⁸³ The ILO CEACR repeatedly expressed concern that this provision was contrary to international standards on freedom of association.⁸⁴ The ILO CFA explicitly requested the Government of Colombia to take steps to amend Article 448 to provide that compulsory arbitration to end a collective labor dispute and a strike is acceptable only at the request of both parties involved in the dispute; if the strike involves public servants exercising authority in the name of the State; or if the strike affects essential services.⁸⁵

Law No. 1210 of 2008, discussed above, amended Labor Code Article 448(4). The amended section now states that, following a mandatory five-day conciliation period, “both parties shall request” the MPS to convene an arbitration board.⁸⁶ The Government of Colombia has subsequently clarified that such a request must be made voluntarily by both parties and therefore does not provide for compulsory arbitration.⁸⁷

3. Labor Violence and Impunity

This section describes concerns about violence against trade unionists and prosecution of the perpetrators and recent commitments made and steps taken by the Government of Colombia to address the issue. It provides an overview on violence levels; examines issues of justice and impunity, including investigations, prosecutions, convictions, sentencing, and victims' rights; and describes current and newly launched efforts to protect at-risk union members.

The administration of Colombian President Santos has publicly recognized the significant problem of anti-union violence and impunity.⁸⁸ Under the Action Plan of April 7, 2011, the Government of Colombia committed to take substantial and concrete measures to address the problem, discussed below.

3.1 Recent History of Violence

Historically, there has been “an extremely serious problem of violence [against trade unionists] in Colombia,”⁸⁹ largely perpetrated by illegally armed groups. This has occurred in the context of a long history of violent conflict in Colombia, which surged with great intensity from the mid-1980s, with armed confrontations between revolutionary guerrillas and newly created paramilitary organizations, funded by the proceeds of illicit drug production and trafficking. Trade unionists, along with other social and political leaders, became the targets of violence committed by these armed groups.⁹⁰

The levels of violence in general and labor violence in Colombia have fallen substantially since 2005.⁹¹ According to the Escuela Nacional Sindical (ENS),⁹² although there was a significant drop in the murder of Colombian trade unionists from 2002 to 2007, falling from 191 to 39 per year, murders have increased again during the last three years, with 52 murders in 2008, 47 in 2009, and 51 in 2010.⁹³ According to the Colombian

Government, the number of murders of trade unionists was 26 in 2007, 39 in 2008 and 28 in 2009.⁹⁴

According to the ENS, forms of violence against trade unionists other than murder have been rising.⁹⁵ The ENS reports that in 2010 there were seven cases of forced disappearances, 21 assassination attempts, 35 forced displacements, five kidnappings, three arbitrary detentions and 338 death threats against trade unionists.⁹⁶

3.2 Investigations, Prosecutions, Convictions, and Sentencing

Colombian Government sources indicate 353 convictions in cases involving the murder of trade unionists over the last 25 years.⁹⁷ According to the ENS, in 95.6 percent of cases involving the murder of trade unionists since 1986, there have been no convictions.⁹⁸ The ILO described the “situation of impunity” as “intolerable” in 2002.⁹⁹

In response to the continued problem of labor violence and few convictions of perpetrators, in 2006 the Colombian Prosecutor General’s Office established a Labor Sub-Unit of the Human Rights Unit, devoted exclusively to the investigation and prosecution of violent acts committed against trade unionists. That year, the Government of Colombia also designated three special judges from the existing criminal justice system to rule on criminal cases involving anti-union violence.¹⁰⁰ Although there has

The discrepancy between the Colombian government and the ENS is due to the differing research methodologies. The MPS tends to concentrate on trade union leadership or on rank-and-file members who have assumed formal trade union functions, while the ENS applies a more expansive standard of workers engaged in trade union activity. been an increase in convictions since 2006, most murders and other cases of violence against trade unionists remain unsolved. In addition, few cases of non-lethal violence, including death threats, are effectively investigated.¹⁰¹

The ILO's supervisory bodies have found a direct connection between violence against trade unionists and violation of workers' right to freedom of association and collective bargaining. The ILO CFA has stated that "[a] genuinely free and independent trade union movement cannot develop in a climate of violence and uncertainty" and has further noted that "[a] climate of violence, such as that surrounding the murder or disappearance of trade union leaders, . . . constitutes a serious obstacle to the exercise of trade union rights." The ILO CFA has held that "such acts require severe measures to be taken by the authorities,"¹⁰² and has also noted:

In the event that judicial investigations into the murder and disappearance of trade unionists are rarely successful, the Committee has considered it indispensable that measures be taken to identify, bring to trial and convict the guilty parties and has pointed out that such a situation means that, in practice, the guilty parties enjoy impunity which reinforces the climate of violence and insecurity and thus has an extremely damaging effect on the exercise of trade union rights.¹⁰³

In March 2009 in a case concerning Colombia, the ILO CFA reiterated these conclusions and emphasized the Colombian government's responsibility to end the violence and impunity.¹⁰⁴ In February 2011, an ILO High Level Tripartite Mission to Colombia similarly stated that "ending impunity is the strongest deterrent to acts of violence in the future."¹⁰⁵

In the cases where convictions were obtained, there have been concerns expressed about the investigative methodology used to obtain them, including failure to fully explore possible anti-union motive; failure to investigate potential intellectual authors, in particular in cases involving plea bargains and confessions; and failure to examine similar cases together as a pattern.¹⁰⁶ In approximately 34 percent of labor violence cases, the defendants were convicted *in absentia* and are therefore still at large.¹⁰⁷ A Colombian

Commission of Jurists (CCJ) study that examined 150 cases of anti-union violence from 2002 to 2008¹⁰⁸ found that in only ten percent of the cases had a full examination been conducted of the victim's union activity and the possible relevancy of that activity to the crime at issue.¹⁰⁹

A number of factors contribute to the shortfalls in the number and quality of convictions obtained, including resource and staffing shortages for the Prosecutor General's Office; inadequate training for judicial police, who generally are the first at the scene of union homicides; and lack of internal coordination between units working on such cases.

Of the 2,857 murders of trade unionists since 1986 reported by the ENS, 1,387 have been assigned to the special Labor Rights Sub-Unit.¹¹⁰ The status of the unassigned cases remains unclear. Reportedly, of the assigned cases, about 1,150 are actively under investigation or prosecution; most are still in the preliminary stage of investigation, meaning there is no identification of suspects. There are no criminal files in 194 cases, indicating that investigations have not yet been launched.¹¹¹ The Prosecutor General's Office moved forward with indictments and prosecutions in 12.3 percent of the 1,150 cases according to the ENS and CCJ.¹¹² As noted above, the Colombian Government has reported 353 convictions in cases involving the assassination of trade unionists over the last 25 years.¹¹³

In order to address the large number of unresolved cases, in 2006 the Government of Colombia and the three national trade union centrals, with the assistance of the ILO, identified 185 priority cases of trade unionist murders.¹¹⁴ Of those, about half are still in the first stage of investigation, without suspects having been identified. Final rulings have been issued in 22.7 percent of the priority cases.¹¹⁵

There are a number of factors that contribute to the lack of prosecutions. The Prosecutor General's Office lacks sufficient staff and resources and, in particular, faces a shortage of

prosecutors, investigators, and judicial police, especially at the regional level.¹¹⁶ During an ILO 2009 mission to Colombia, the Colombian Government acknowledged insufficient resources for the Prosecutor General's Office, specifically citing the Labor Rights Sub-Unit.¹¹⁷ In addition, the judicial police lack sufficient training on crime scene management, preservation of evidence and other investigative techniques necessary to facilitate effective and successful investigations and prosecutions in cases of labor violence.

There is also a lack of coordination within the Labor Rights Sub-Unit and between the Labor Rights Sub-Unit and the Justice and Peace Sub-Unit of the Prosecutor General's Office. As a result, cases involving the same regions, industrial sectors, or unions are not being sufficiently investigated together, impeding detection of similarities that could assist in identifying possible anti-union motives and related perpetrators, including intellectual authors, across cases. For example, in 2009, there were convictions in seven cases involving assassination of trade unionists in the health care industry. Three of the cases involved murders on the Caribbean coast (Barranquilla and Santa Marta), but neither the National Police nor the Prosecutor General's Office investigated the possible relationship between these assassinations, although all occurred after the victims tried to fight the privatization of their hospitals.¹¹⁸ According to the Inter-American Court on Human Rights, a systematic and contextual method of investigation and prosecution is essential to combating impunity in Colombia.¹¹⁹

A substantial number of the convictions in cases of trade unionist murders are the result of the application of the 2005 Justice and Peace Law, which has served as a legal framework for the demobilization of paramilitary groups and is largely administered by the Justice and Peace Sub-Unit of the Prosecutor General's Office.¹²⁰ This law offers reduced prison sentences of five to eight years to members of armed groups who agree to demobilize and confess all their crimes, including violent acts against trade unionists.¹²¹ Although the Justice and Peace process has helped secure convictions, the paramilitary confessions are often general and fail to identify other accomplices or the specific circumstances of the crimes, resulting in convictions based on voluntary statements rather

3.3 Recent Developments and Action Plan

In recognition of the serious, ongoing problems of labor violence and impunity, in 2009 the Colombian Government passed Law 1309, which increased penalties and promoted improved prosecutions in cases of labor violence. Law 1309 expanded the category of crimes requiring a minimum sentence of 40 years to include violent crimes against union members. The law also expanded the category of aggravated threats to include threats against union members, thereby increasing potential prison terms for the convicted perpetrators of such threats. The law also increased from 20 to 30 years the statute of limitations in cases of union-related assassinations.¹²³

Under the Action Plan, the Government of Colombia has made and is in the process of implementing a series of important commitments to protect trade union activists and threatened teachers and to address concerns related to the investigation and prosecution of labor violence cases, described below in 3.3.2.

3.3.1 Protection of Threatened Trade Union Activists and Teachers

The Colombian Ministry of Interior and Justice (MIJ) has maintained a protection program for human rights advocates, including trade unionists, since 1997.¹²⁴ There are two major criteria for eligibility: the existence of imminent risk of violence against the life, integrity, security or liberty of the trade unionist; and that the trade unionist be a leader of his or her labor organization or a trade union activist.¹²⁵ In practice, the Government has limited the program to leaders and executive board members of unions. As of 2010, the program covered 1,454 unionists, constituting 13.5 percent of protection program participants.¹²⁶ Separate protection regimes are offered for workers in the petroleum sector (United Workers Union) and teachers (Colombian Federation of

Educators), because trade unionists in these sectors have been subject to higher levels of violence.¹²⁷

The MIJ regime provides two kinds of protection for trade union participants, depending on the results of a risk assessment conducted by the National Police: soft measures, including access to communication equipment, such as cell phones, occasional transit to minimize danger and temporary relocations; and hard measures, including bodyguards, bullet-proof vests, armored vehicles and relocation out of the country, either temporary or long-term.¹²⁸

Two of Colombia's three national labor centrals, the Unitary Central of Workers (CUT) and CTC (Confederation of Colombian Workers), have raised concerns about the MIJ protection program. They have noted that while over 75 percent of the victims of labor violence have been rank and file members engaging in union activity or workers attempting to organize into unions, the MIJ program has been limited, in practice, to union leaders. The CUT and the CTC have also criticized the risk assessments performed by the National Police for requiring a clearly articulated and proven threat of death or severe bodily harm, which is lacking in most cases, prior to designation of an "extraordinary risk" which is required for protection program eligibility.¹²⁹ They claim that National Police risk assessments often do not take into consideration relevant community-specific and region-specific circumstances.¹³⁰ The two labor centrals have also raised concerns that the initial risk assessments on which protection program eligibility is based suffer from chronic delays and backlogs. Although Colombian law requires the National Police to make a risk determination within 30 days,¹³¹ deliberations often last for months.¹³² In March 2011, the MIJ was informed by the National Police that the assessment backlog totaled 1,040 cases, 304 of which were applications for protection by trade unionists.¹³³

Teachers have been particular targets of violence. Of the total number of trade union murders from 1986 to the present, one-third (946) have been leaders or members of the Colombian Federation of Educators (FECODE).¹³⁴ The Government of Colombia instituted a system of special protection measures for teachers in 1992.¹³⁵ Between 1992 and 2010, if a teacher reported to the relevant local Ministry of Education that he or she

had received threats of violence and presented appropriate documentation, the teacher would be automatically transferred to another school district while the threat was evaluated, and permanently thereafter if the threat was confirmed.¹³⁶ In 2010, however, the Ministry of Education changed the protection program significantly.¹³⁷ Under Resolution 1240 of 2010, a teacher alleging threats of violence would be provisionally transferred for two months, pending completion of the risk assessment. If it was determined that the teacher faced “ordinary risk” rather than “extraordinary risk”, the teacher would be returned to his or her home district and denied salary for the period of transfer.¹³⁸ FECODE expressed serious concern about the change, arguing that it put teachers at greater risk because they could not afford to face the potential financial hardship of denial of compensation.

Action Plan: In response to these concerns, the Government of Colombia has committed to and has begun to take a series of specific steps to improve the protection program for union activists. In April 2011, the MIJ issued Ministerial Resolution 716 of 2011, broadening the scope of the protection program to cover all labor activists, including those engaged in advocating for worker rights at the workplace level and workers engaged in active efforts to form a union. The Resolution also extends coverage to former union leaders and activists who are determined to be under extraordinary risk because of their past union activities. The Government of Colombia has committed to plan and budget for the additional resources necessary to support the resulting expansion of the protection program and to consult with the relevant unions to verify the status of the individuals seeking protection.

With regard to the teacher protection program, the Government of Colombia has amended the program to eliminate any pecuniary sanctions against teachers who are transferred provisionally under the program, but later found not to be under extraordinary risk.

Under the Action Plan, the Government launched an emergency effort to eliminate the backlog of risk assessments with respect to applications for protection filed by union members, which it completed by July 30, 2011. The Government has committed to henceforth comply with the legal requirement to process all risk assessments within a 30-day period.

The Government of Colombia has implemented a commitment to reform the scope and functioning of the interagency advisory committee on protection and risk assessments by September 15, 2011. The committee is being reconstituted to include not only representatives of the National Police but also the Inspector General’s Office and the

3.3.2 Investigation and Prosecution of Labor Violence Cases

Action Plan: In April 2011, the Prosecutor General's Office issued a directive to regional directors of prosecutors, to the national prosecutorial units and to the National Directorate of the Technical Investigative Body (CTI)¹³⁹ instructing them that in all murder cases, they must immediately report the victim's identity to headquarters in order to: check union affiliation status with the MSP; and take all urgent actions necessary to determine the motive for the murder and, specifically, any relationship between the victim's status as a union member and the violence committed.¹⁴⁰ In April 2011, the Prosecutor General's Office also issued a directive to the chiefs of the Units of Justice and Peace and Human Rights, directing them to more effectively share evidence and information about cases involving labor violence.¹⁴¹

Under the Action Plan, the Government of Colombia committed to assign an additional 95 National Police as full-time judicial police investigators dedicated exclusively to cases of labor violence. In April 2011, the Government assigned 100 National Police to those responsibilities in fulfillment of the Action Plan commitment. The Prosecutor General's Office will develop a plan and identify specific budgetary needs to strengthen the institutional capabilities and the number of prosecutors and judicial police investigators assigned to process labor cases in the regional office based on an assessment of structural weaknesses or lack of sufficient resources. The Colombian Government has also committed to seek funding for the plan in the 2012 budget.

The Prosecutor General's Office has also committed to work to enhance the training of judicial police investigators and prosecutors on crime scene management, as well as jointly training them in investigative techniques with specific reference to the issues involved in cases of violence against trade unionists. The Office has drafted an analysis of closed cases of homicides of union members and activists in order to extract lessons that can be used to improve the guidelines and protocols for effectively investigating and prosecuting future cases. The Office will make the analysis public as soon as it is finalized.

The Prosecutor General's Office has also committed to meet with union confederations and the ENS to reconcile discrepancies between databases on unionist homicide cases

and will provide guidance to prosecutors to accelerate action on those cases with leads and to provisionally close cold cases.

3.3.3 Victims' Rights

Lack of reparation for victims of labor violence and their families and a lack of transparency regarding investigations, prosecutions, and convictions in labor violence cases have been significant concerns, particularly for labor rights groups.¹⁴² Victims and their families have reported finding it difficult to obtain information on the status of labor violence investigations and prosecutions, including procedural posture of the cases, evidence of anti-union motive, formal charges and arrests. Once such cases have been concluded, victims, their families and trade unions have been able to obtain only limited information. They have had difficulty in ascertaining critical details about the role of convicted perpetrators, whether convictions were obtained *in absentia*, and whether sentences were imposed and enforced.¹⁴³

On June 10, 2011, President Santos signed into law the Victims and Land Restitution Law. The law offers reparations to victims of violence due to the internal armed conflict, which would include individual trade unionists and their families, and provides for restitution of land to families displaced due to the internal armed conflict. The law provides a broad definition of victims and is intended to include victims of state agents; calls for special guarantees and protection measures, within the framework of assistance and reparations, for those considered to be “at greater risk,” defined to include union members and other specific categories of victims; inverts the burden of proof in land restitution cases in favor of displaced victims; and creates expedited channels for restitution.¹⁴⁴

Action Plan: The Government of Colombia has committed to take additional measures for victims of labor violence. Under the Action Plan, the Prosecutor General’s Office will establish victims’ assistance centers specializing in human rights cases, including labor cases. The centers will be staffed by professionals with expertise on human rights and labor issues. The Prosecutor General’s Office will direct these centers and authorize them to share information with the victims and their families about the status of their

EXPLOITATIVE CHILD LABOR 3

REPUBLIC OF COLOMBIA..... 4

Introduction

This report on the laws of Colombia that govern exploitative child labor has been prepared pursuant to section 2102(c)(9) of the Trade Act of 2002 (“Trade Act”) (Pub. L. No. 107-210). Section 2102(c)(9) provides that the President shall:

[w]ith respect to any trade agreement which the President seeks to implement under trade authorities procedures, submit to the Congress a report describing the extent to which the country or countries that are parties to the agreement have in effect laws governing exploitative child labor.

The President, by Executive Order 13277 (67 Fed. Reg. 70305 (Nov. 21, 2002)), assigned the responsibility under section 2102(c)(9) to the Secretary of Labor and provided that it be carried out in consultation with the Secretary of State and the United States Trade Representative (USTR). The Secretary of Labor subsequently provided that such responsibilities would be carried out by the Secretary of State, the USTR and the Secretary of Labor (67 Fed. Reg. 77812 (Dec. 19, 2002)).

Pursuant to Section 2102(c)(9) of the Trade Act, this report provides information on the laws of Colombia that govern exploitative child labor. The report relies upon research, reports and materials prepared by U.S. Government agencies, the Government of Colombia, international organizations such as the International Labor Organization (ILO) and nongovernmental organizations.

Exploitative Child Labor

There is no universally accepted definition of the term “exploitative child labor.” ILO Convention 138 on the Minimum Age for Admission to Employment provides that the minimum age of admission into employment or work in any occupation “shall not be less than the age of completion of compulsory schooling and, in any case, shall not be less than 15.”¹ Countries whose economies and educational facilities are insufficiently developed may initially specify a minimum legal working age of 14 when ratifying the convention. Additionally, under Article 7(1) of the Convention, “National laws or regulations may permit the employment or work of persons 13 to 15 years of age on light work which is (a) not likely to be harmful to their health or development; and (b) not such as to prejudice their attendance at school, their participation in vocational orientation or training programmes approved by the competent authority or their capacity to benefit from the instruction received.” Countries that have specified a minimum legal working age of 14 may permit persons 12 to 14 years of age to engage in light work, as defined in Article 7(1). Examples of such light work may include work in a family business, on a family farm, after school or in a legitimate apprenticeship opportunity that is not hazardous and does not affect a child’s attendance at school.

¹ ILO Convention 138, Article 2(3).

The ILO has defined the “worst forms” of child labor in ILO Convention 182 on the Worst Forms of Child Labor, which prohibits such labor for “all persons under the age of 18.”² Under Article 3 of ILO Convention 182, the term “worst forms of child labour” comprises:

- (a) all forms of slavery or practices similar to slavery, such as the sale and trafficking of children, debt bondage and serfdom and forced or compulsory labour, including forced or compulsory recruitment of children for use in armed conflict;
- (b) the use, procuring or offering of a child for prostitution, for the production of pornography or for pornographic purposes;
- (c) the use, procuring or offering of a child for illicit activities, in particular for the production and trafficking of drugs as defined in the relevant international treaties;
- (d) work which, by its nature or the circumstances in which it is carried out, is likely to harm the health, safety or morals of children.³

According to Convention 182, the types of work referred to under Article 3(d) “shall be determined by national laws or regulations or by the competent authority . . . taking into consideration relevant international standards, in particular Paragraphs 3 and 4 of the Worst Forms of Child Labor Recommendation, 1999.”⁴

Republic of Colombia

Colombia ratified ILO Convention 138 on the Minimum Age for Admission to Employment on February 2, 2001 and ILO Convention 182 on the Worst Forms of Child Labor on January 28, 2005.⁵

The Colombian Code for Children and Adolescents sets the minimum age for work at 15. Children under 15 years may perform artistic, sports or cultural work with authorization from the labor inspectorate or local authority.⁶ A labor inspector or relevant local government official must also provide authorization for adolescents aged 15 to 17 to work.⁷ Adolescents aged 15 and 16 may work only 6 hours per day (30 hours per week) and until 6 p.m.; those age 17 may work 8 hours per day (40 hours per week) and until 8 p.m.⁸

The Code for Children and Adolescents sets the minimum age for hazardous work at 18.⁹ The Labor Code specifically prohibits children under 18 from work in underground mining and industrial painting.¹⁰ Resolution No. 01677 of 2008 provides a more extensive list of activities within 11 occupational categories and sub-categories identified as the worst forms of child labor.¹¹ The activities in which minors are not permitted to work include a variety of tasks within agriculture, livestock raising, hunting and forestry, fishing, mining and quarrying, manufacturing, construction, transport and storage, health services and defense. Minors are also prohibited from engaging in work in public utilities such as electricity, water and gas. They are also banned from working in informal-sector activities and unskilled work, including street vending, domestic service and garbage scavenging and recycling.¹²

The Labor Code authorizes inspectors to issue fines of up to 100 times the minimum monthly wage for labor law violations, including those related to child labor.¹³ The Code for Children and Adolescents authorizes family ombudsmen from Municipal Ombudsman Offices to penalize parents or legal guardians for failing to protect children against economic exploitation, the worst forms of child labor, work harmful to the health, safety and integrity of children, or work that limits their right to education. Penalties include fines of up to 100 times the minimum monthly wage and imprisonment.¹⁴ Resolution No. 2438 of 2010 specifies penalties of up to 40 times the minimum monthly wage for violations of child labor laws, including Resolution No. 01677.¹⁵

The Ministry of Social Protection (MSP), the National Police, the Office of the Inspector General, the General Comptroller Office, and the National and Municipal Ombudsman Offices enforce child-labor related laws. The MSP has 424 inspectors who conduct labor inspections, while the National Police, and the Offices of the Attorney General, the Inspector General, and the National Ombudsman have established children and youth units.¹⁶ Under the Colombian Action Plan Related to Labor Rights, the Government of Colombia committed to create a separate labor ministry and strengthen its institutional capacity to enforce labor laws, including by hiring 480 new labor inspectors between 2011 and 2014.¹⁷ The Colombian National Institute for Family Welfare (ICBF) operates a hotline that receives complaints of violations of children's

rights, including child labor.¹⁸ In May 2011, the MSP launched, with the support of ILO-IPEC, a new monitoring system. The Government will use it to register and monitor working children.¹⁹

In March 2011, the Colombian National Department of Statistics released the results of the 2009 child labor survey. According to the report, 9.2 percent (1,050,147) of children aged 5 to 17 are economically active, up from 6.9 percent (787,000) in 2007, an increase of approximately 33.3 percent.²⁰ According to the Government of Colombia, the impact of the global economic crisis on Colombian households is one of the reasons for this increase, as it may have led to an increase in child labor to generate additional family income.²¹

Children are engaged in the worst forms of child labor in Colombia, most commonly in agriculture and mining.²² In the agricultural sector, children may be exposed to long hours, the elements and high levels of dust, perform physically arduous tasks, use dangerous tools and face high risk of occupational injury.²³ They work in the production of coffee, sugarcane and coca, an illegal stimulant. Reportedly, children are engaged in the production of a variety of vegetables and fruits, cotton and livestock.²⁴ Children are also engaged in artisanal mining, where they are exposed to toxic gases, long hours, explosives, and dangerous chemicals such as nitric acid. They work in emerald, gold, clay and coal mining, breaking rocks, digging in dirt with picks or their bare hands, removing water from mines and lifting heavy loads.²⁵ Limited evidence suggests that indigenous *Wayúu* children work alongside their families in the

Children work on the streets in urban areas, where they may be exposed to long hours, the elements and risk of physical injuries and robberies. They lift heavy loads in markets and are engaged in street vending.²⁷ Children are also involved in recycling, where they are exposed to toxic substances such as lead and sulfuric acid as well as dangerous waste.²⁸

Children are engaged in domestic service in Colombia. Indigenous families in rural areas often send their children to urban households to work as domestic workers.²⁹ Child domestic workers may work up to 12 hours per day and perform household chores such as ironing, cleaning and cooking.³⁰ Children working in domestic service are vulnerable to physical and sexual abuse by their employers.³¹

The National Strategy to Eradicate the Worst Forms of Child Labor (2008-2015) is the primary framework to address the worst forms of child labor in Colombia.³² In December 2010, the Government established guidelines for a new program that aims to target children who are engaged in the worst forms of child labor.³³ In April 2011, the Government approved the National Development Plan (2010 – 2014), which seeks to create more jobs, reduce poverty and provide greater security as a way to promote social prosperity. One of its goals is to rescue more than 600,000 children from child labor.³⁴

The Constitution prohibits slavery, servitude and human trafficking and the Penal Code establishes strict sanctions for violations.³⁵ The Penal Code also penalizes commercial sexual

exploitation of children—including through prostitution, pornography and sex tourism—with incarceration and fines.³⁶ Law 679 of 2001 penalizes tourism agencies and hotel owners with fines and cancellation of their registration and right to operate for involvement in child sex tourism. It requires that hotels, airlines and tourist agencies include warnings about penalties for commercial sexual exploitation of children on information they provide to customers.³⁷ Law 1336 of 2009 requires that tourism agencies, airlines and hotels adopt a code of conduct to prevent commercial sexual exploitation of children.³⁸

The Anti-Human Trafficking Operations Center (COAT) leads efforts to combat trafficking by operating a hotline, tracking cases, coordinating investigations and facilitating access to social services among victims of trafficking. The Attorney General's Office and the National Police also receive training in combating human trafficking³⁹ and they investigate cases of commercial sexual exploitation and human trafficking.⁴⁰ In 2010, the ICBF established an exclusive hotline to report cases of child commercial sexual and trafficking.⁴¹

A 2006 study conducted by Plan International, Antonio Restrepo Barco Foundation, and Renacer Foundation found 2,117 children engaged in commercial sexual exploitation in 11 cities in Colombia.⁴² Children are also involved in child pornography and sex tourism and are trafficked for the purpose of commercial sexual exploitation domestically and internationally.⁴³

Children are victims of forced labor in coca cultivation, mining and quarries and domestic work and are forcibly recruited as child soldiers.⁴⁴ Children from Honduras and Nicaragua have been found working under forced labor conditions in fishing. Children from Ecuador are trafficked for labor exploitation.⁴⁵

The National Plan of Action for the Prevention and Eradication of Commercial Sexual Exploitation of Boys, Girls, and Adolescents Less than 18 Years of Age (2006-2011) lays out the strategy to combat commercial sexual exploitation of children.⁴⁶ The National Strategy to Combat Trafficking in Persons (2007-2012) guides government efforts to combat human trafficking, including the trafficking of children.⁴⁷

The Penal Code penalizes crimes involving the use of minors in the cultivation, manufacture and trafficking of illegal drugs, with penalties of 16 to 30 years and fines of up to 100,000 times the equivalent of the minimum monthly wage.⁴⁸ Nonetheless, evidence indicates that children are used by adults for illegal activities, such as coca production and processing and the transport of illicit drugs.⁴⁹

The compulsory and voluntary recruitment age for military service is 18 years.⁵⁰ The Penal Code punishes forced prostitution and sexual slavery related to armed conflict with imprisonment and fines, and it penalizes the recruitment of minors by illegal armed groups and the armed forces. It likewise penalizes the use of minors in terrorist activities with prison terms of 16 to 30 years and fines of up to 45,000 times the equivalent of the minimum monthly wage.⁵¹

Law 782 of 2002 regards minors that participate in the country's hostilities as victims.⁵² However, the Code for Children and Adolescents allows the Office of the Attorney General to prosecute a minor when he or she has violated international humanitarian law or committed

genocide.⁵³ Law 975 of 2005 establishes that armed groups must place all minor recruits under the care of the ICBF in order to participate in the government's demobilization process.⁵⁴

Although the recruitment of children below the age of 18 into the National Armed Forces is prohibited, reports state that children have been used as informants by members of the National Armed Forces, in direct contravention of military policy, and have participated in civic-military activities.⁵⁵ In addition, children continue to be recruited by illegal armed groups. A 2008 report by the UN Office of the High Commissioner for Human Rights contains an estimate indicating that 11,000 to 14,000 children, including indigenous children, were acting as combatants in various non-state groups.⁵⁶ According to a 2008 study, many of them handle explosives, transport food supplies and perform intelligence and logistical activities. Female combatants are subject to sexual exploitation by other group members.⁵⁷ Children from Ecuador are also recruited by Colombian non-state groups.⁵⁸

In 2010, the Government of Colombia adopted the National Policy to Prevent the Recruitment of Children and Adolescents by Illegal Armed Groups, which guides efforts to prevent the recruitment and use of children by non-state groups.⁵⁹ The Government also removed from unlawful conscription 338 children who were recruited by illegal armed groups.⁶⁰

Executive Summary

This employment impact report was prepared pursuant to section 2102(c)(5) of the Trade Act of 2002. Section 2102(c)(5) requires the President to review and report to the Congress on the impact of future trade agreements on U.S. employment and labor markets. This report describes the relevant provisions of the United States–Colombia Trade Promotion Agreement (CTPA), including a summary of its labor provisions, and assesses the potential employment effects of the CTPA.

The major finding of this report is that the CTPA is expected to have a negligible effect on aggregate employment in the United States. This finding is attributable to: (i) the small size of Colombia’s economy relative to the United States; (ii) the small volume of bilateral trade between the two countries; (iii) the fact that nearly 93 percent of all U.S. imports from Colombia in 2010 entered the United States duty-free; (iv) provisions in the CTPA for the gradual removal of U.S. tariffs on import-sensitive goods from Colombia over an extended period; (v) safeguards contained in the CTPA to attenuate the effects of certain increases in imports; and (vi) quantitative estimates that the CTPA will increase U.S. output and consumption by less than one-twentieth of one percent of current U.S. gross domestic product. Any employment effects would follow from these small changes in output and consumption.

I. Introduction: Overview of the U.S. Employment Impact Report

A. Scope, Outline, and Data Sources of the Report

This employment impact report provides background and context for the United States–Colombia Trade Promotion Agreement (CTPA), including the bilateral economic setting, current barriers to bilateral trade, and the major elements of the CTPA (found in Part II). The report then considers the potential employment effects of the CTPA on the United States (Part III). Finally, the report briefly describes the Labor Chapter of the CTPA (Part IV). All of the referenced data tables appear at the end of this report.

Unless otherwise specified, the value of U.S. imports and exports used in this report are based on compilations of official statistics gathered by the U.S. Department of Commerce. They are extracted from the U.S. International Trade Commission’s (USITC) Interactive Tariff and Trade Dataweb.¹

B. Legislative Mandate

This report on the U.S. employment impact of the CTPA is prepared pursuant to section 2102(c)(5) of the Trade Act of 2002 (“Trade Act”) (Pub. L. No. 107-210). Section 2102(c)(5) provides that the President shall review the impact of future trade agreements on United States employment, including labor markets, modeled after Executive Order 13141 to the extent appropriate in establishing procedures and criteria. The report is prepared for the Committee on Ways and Means of the House of Representatives and the Committee on Finance of the Senate and is made available to the public.

The President, by Executive Order 13277 (67 Fed. Reg. 70305 (Nov. 21, 2002)), assigned the responsibility for conducting reviews under section 2102(c)(5) to the United States Trade Representative (USTR). USTR delegated its responsibility to the Secretary of Labor with the requirement that reviews be coordinated through the Trade Policy Staff Committee (67 Fed. Reg. 71606 (Dec. 2, 2002)).

The employment impact report is modeled, to the extent appropriate, on the environmental review of trade agreements mandated by Executive Order 13141 (64 Fed. Reg. 63169 (Nov. 18, 1999)). The guidelines developed for the implementation of that order have been adapted for use in this employment impact report.

¹ The USITC Interactive Tariff and Trade Dataweb is available at <http://dataweb.usitc.gov/>. All trade data are in nominal (current dollar) terms. The value of U.S. imports is the customs value (the appraised value of the merchandise, exclusive of import duties, freight, insurance, and other charges incurred in placing the merchandise alongside the carrier at the port of exportation) of U.S. merchandise imports for consumption (the amount that immediately enters U.S. consumption channels, but not bonded warehouses or Foreign Trade Zones). The value of U.S. exports is the free alongside ship (FAS) value of domestic U.S. merchandise exports (goods that are grown, mined, produced, or manufactured in the United States and sent to foreign countries).

C. Public Outreach and Comments

1. Responses to Federal Register Notice

The U.S. Department of Labor (USDOL) and USTR jointly published a notice in the *Federal Register* on May 14, 2004. The notice announced the initiation of the review of the potential impact on U.S. employment of proposed free trade agreements with three Andean region countries – Colombia, Ecuador, and Peru.² It requested written comments from the public on potentially significant sectoral or regional employment impacts (both positive and negative) of the proposed agreement in the United States. The public was also invited to comment on other likely labor market effects of the proposed agreement.

Four submissions were received in response to the notice.

- The American Dehydrated Onion and Garlic Association (ADOGA) opposed any tariff reduction on U.S. imports of dehydrated onion and garlic under the agreement. ADOGA argued that duty-free treatment of dehydrated onion and garlic from the Andean countries would have a negative impact on their industry, its 4,000 employees, their families, and the economically distressed small rural Western communities in which they operate with few alternative employment opportunities. ADOGA has reiterated the same concerns in each of their submissions on the U.S. employment impact of previous free trade agreements.
- The Government of the Commonwealth of Puerto Rico (the Commonwealth) supported the agreement, but noted that the agreement needs to take into account the import-sensitivity of products of particular importance to Puerto Rico and other U.S. insular economies. Of particular concern were low-value rum, canned tuna, and coffee shipments into Puerto Rico. The Commonwealth argued that the elimination of duties on these items would have severe employment impacts in key sectors of Puerto Rico's economy.
- The Government of the U.S. Virgin Islands (GVI) opposed any tariff reduction on imports of low-value rum. The Virgin Islands' rum industry sells almost exclusively in the low-value sector of the market. They argued that duty-free or reduced duty treatment for low-value rum from low-cost and resource-rich Andean countries would have potentially devastating impacts on the Virgin Islands' rum industry. It would also threaten the congressionally mandated program to finance the development needs of the Virgin Islands through the return of excise taxes on rum to the GVI treasury.

² See 69 Fed. Reg. 26917 (May 14, 2004). At the time of the publication of the notice in the Federal Register, the United States entered into free trade negotiations with Colombia, Ecuador, and Peru (with Bolivia participating as an observer). The Peru Trade Promotion Agreement Implementation Act was signed into U.S. law on December 14, 2007. The United States concluded negotiations with Colombia on February 27, 2006, and the United States and Colombia signed the United States-Colombia Trade Promotion Agreement (CTPA) on November 22, 2006. The United States and Colombia signed a protocol of amendment to the CTPA on June 28, 2007.

- The Rubber and Plastic Footwear Manufacturers Association (RPFMA), representing domestic manufacturers of fabric-upper, rubber-soled footwear and protective footwear, urged the exclusion of the seventeen core products of the domestic rubber footwear industry from the agreement on the grounds that the agreement would pose a threat to the industry and set a precedent for the rest of Latin America. These seventeen products do not receive preferential treatment under the Andean Trade Preference Act (ATPA) or the Andean Trade Promotion and Drug Eradication Act (ATPDEA).

2. *Reports of the Labor Advisory Committee for Trade Negotiations and Trade Policy and Other Advisory Committees*

Section 2104(e) of the Trade Act requires that advisory committees provide the President, USTR, and Congress with reports under section 135(e)(1) of the Trade Act of 1974, as amended, not later than 30 days after the President notifies Congress of his intent to enter into an agreement. All of the advisory committee reports were submitted in the fall of 2006, and are available on the USTR Web site.³

The Advisory Committee on Trade Policy and Negotiations (ACTPN) and nearly all of the other trade advisory committees expressed the view that the CTPA is in the economic interest of the United States and stated their support for it. The ACTPN found the CTPA to be “strongly in the economic interest of the United States” and that it “should be enacted into law as soon as possible.”

The Labor Advisory Committee for Trade Negotiations and Trade Policy (LAC) argued that the agreement would not promote the economic interests of the United States. The LAC also found that it would not protect the fundamental human rights of workers in either country. They argued that provisions in the CTPA represent a step backwards from the unilateral trade preference programs – the Generalized System of Preferences (GSP) and the ATPA/ATPDEA – that currently apply to Colombia. The LAC expressed particular concern about the “well-documented violations of trade union rights in Colombia,” including violence against trade unionists. The LAC noted that the CTPA’s labor provisions only commit the Parties to enforce their own labor laws. The LAC argued that the CTPA’s dispute resolution procedures provide for capped penalties lower than those for other violations of the CTPA, with little punitive or deterrent effect for violations of the Labor Chapter. Regarding these concerns, it is important to note that the Labor Chapter and dispute resolution procedures were subsequently modified in May 2007.⁴

³ See <http://www.ustr.gov/trade-agreements/free-trade-agreements/colombia-fta/advisory-group-reports-us-colombia-fta>.

⁴ Relative to trade agreements approved prior to May 2007, the obligations of the Labor Chapter have been strengthened in two ways. First, the Parties commit to adopt and maintain, and to enforce in practice, labor laws that protect the fundamental rights stated in the 1998 *International Labor Organization (ILO) Declaration on Fundamental Principles and Rights at Work and its Follow-up*. In trade agreements prior to May 2007, and the Labor Chapter as originally negotiated in the CTPA, the obligation was to strive to

The LAC also expressed concerns about the CTPA's rules of origin and safeguard provisions, which, in their view, fail to adequately protect workers from import surges that may result. They expressed further concerns that the CTPA's provisions on investment, government procurement, and services could constrain the ability of both governments to regulate in the public interest and to provide public services.

II. Background and Contents of the CTPA

A. Bilateral Economic Setting

1. Population and the Economy

Colombia's population in 2009 was 45.7 million, approximately 14.9 percent of that of the United States.⁵ It has a land area approximately twice the size of the State of Texas. Colombia's gross domestic product (GDP) was \$234.0 billion in 2009, approximately 1.7 percent that of the U.S. GDP of \$14.1 trillion. Colombia's gross national income (GNI) per capita was \$4,990, approximately 10.8 percent that of U.S. per capita GNI of \$46,360.

2. Labor Force

a. U.S. Labor Force

In 2010, the U.S. civilian labor force totaled 153.9 million workers.⁶ The U.S. civilian labor force consists of employed and unemployed persons in the civilian non-institutional population age 16 and older.

A total of 139.1 million workers were employed in the United States in 2010.⁷ Employment was distributed across activities as follows: 1.6 percent in agriculture, 17.2 percent in industry, and 81.2 percent in services.⁸ The unemployment rate in the United States was 9.6 percent. Persons are classified as unemployed if they had no employment

enforce existing national labor laws and internationally recognized labor rights. Second, disputes arising under the Labor Chapter will be handled according to the same procedures as commercial disputes arising under other chapters, rather than according to procedures specific to labor disputes.

⁵ The data in this section are from the World Bank's World Development Indicators. The World Development Indicators database is available online at <http://data.worldbank.org/indicator>. GDP figures are in current U.S. dollars. GNI per capita figures are in current U.S. dollars and use the Atlas Method.

⁶ All data on the U.S. labor force are annual averages based on the Current Population Survey. They are available on the Bureau of Labor Statistics' Web site at <http://www.bls.gov/cps/>.

⁷ Employment and unemployment data refer to the civilian labor force.

⁸ Percent of total employment in agriculture, industry, and services is the terminology used in most databases with cross-country coverage. Industry includes mining, manufacturing, and construction. U.S. employment data broken out by activity (i.e., services, industry, and agriculture) are classified according to the North American Industrial Classification System (NAICS) in the Current Population Survey. Therefore, they are not strictly comparable with other countries' data.

during the reference week, had actively looked for work in the prior four weeks, and are currently available for work.

b. Colombia's Labor Force

In 2010, Colombia's labor force consisted of approximately 21.8 million workers.⁹ The Colombian labor force consists of employed and unemployed persons in the civilian non-institutional population who are age ten and older.¹⁰

A total of 19.2 million workers were employed in Colombia in 2010. Employment was approximately distributed across activities as follows: 18 percent in agriculture, 20 percent in industry, and 62 percent in services.¹¹ In Colombia, the official definition of unemployment is broader than in the United States. The unemployed in Colombia include those without work but actively looking (as in the United States), and also those without work who have not looked for work in the past month, but have looked for work in the past year and have a valid reason for discouragement (unlike the United States). By Colombia's definition, its unemployment rate was 11.8 percent in 2010. Colombia's "open unemployment rate" is defined more similarly to the unemployment rate in the United States. It was 10.8 percent in 2010.

3. *International Merchandise Trade*

a. Global Merchandise Trade

Based on available statistics from the World Trade Organization (WTO), total U.S. merchandise trade with the world amounted to \$2.7 trillion (\$1.1 trillion in merchandise exports and \$1.6 trillion in merchandise imports) in 2009.¹² The United States was the world's third largest merchandise exporter (behind China and Germany) and the number one merchandise importer. The United States' primary export partners were the European Union, Canada, Mexico, and China. Its primary import partners were China, the European Union, Canada, and Mexico.

Colombia's total merchandise trade with the world amounted to \$65.8 billion (\$32.9 billion in merchandise exports and \$32.9 billion in merchandise imports) in 2009. Colombia was ranked the 57th largest merchandise exporter and the 54th largest

⁹ Unless noted otherwise, data on the Colombian labor force are from the Colombian National Statistical Agency's (Departamento Administrativo Nacional de Estadística) "Great Integrated Household Survey". Data are available at http://www.dane.gov.co/daneweb_V09/en/index.php?option=com_content&view=article&id=121&Itemid=67.

¹⁰ Although Colombian statistical instruments assess labor force status of persons age 10 and older, the minimum age for most work is 15. See USDOL, *Colombia: Laws Governing Exploitative Child Labor*, (2011).

¹² Unless otherwise noted, data for this and the next paragraph are from the WTO and are based on total merchandise trade. merchandise importer in the world. Colombia's major exports included petroleum, coffee, coal, nickel, emeralds, apparel, bananas, and cut flowers. Its major imports included industrial equipment, transportation equipment, consumer goods, chemicals, paper products, fuels, and electricity.¹³ Colombia's primary export partners were the United States, the European Union, and Venezuela. Its primary import partners were the United States, the European Union, China, and Mexico.

b. Bilateral Merchandise Trade

U.S. bilateral merchandise trade with Colombia represents a small share of total U.S. merchandise trade.¹⁴ U.S. merchandise exports to Colombia amounted to \$11.0 billion in 2010 or 1.0 percent of all U.S. merchandise exports to the world. Colombia ranked as the 20th largest U.S. merchandise export market. U.S. merchandise imports from Colombia amounted to \$15.7 billion, accounting for 0.8 percent of all U.S. merchandise imports from the world. Colombia ranked as the 25th largest source for U.S. merchandise imports.

4. *International Trade in Services*

The United States was the world's number one commercial services exporter (\$476.0 billion) and number one commercial services importer (\$334.3 billion) in 2009, based on data from the WTO.¹⁵ By comparison, Colombia's exports of commercial services to the world amounted to \$4.1 billion (ranked 67th) and its imports of commercial services from the world totaled \$6.9 billion (ranked 58th).

The United States does not keep statistics on bilateral services trade with Colombia.

5. *Foreign Direct Investment*

U.S. foreign direct investment (FDI) in Colombia was \$6.7 billion (on a historical-cost basis) in 2009, up from \$5.6 billion in 2008.¹⁶ Colombian FDI in the United States was \$220 million (on a historical-cost basis) in 2009, down from \$855 million in 2008.¹⁷

In 2009, Colombia's inward stock of FDI was estimated to be \$74.1 billion and its outward stock of FDI was estimated to be \$16.2 billion.¹⁸

6. *Summary and Conclusions*

Colombia's population, economy, and labor force are substantially smaller than those of the United States. Colombia ranks 20th as a destination for U.S. exports and 25th as a source for U.S. merchandise imports. The small size of the Colombian economy relative to that of the United States and the dominance of other partners in U.S. trade greatly limit the effect that the CTPA can have on aggregate levels of U.S. employment.

B. Barriers to Bilateral Trade Prior to the CTPA

1. Merchandise Trade

The United States and Colombia are members of the WTO. WTO members are obligated to accord "most favored nation/normal trade relations" (MFN/NTR)¹⁹ tariff treatment to the goods of other WTO members. Under MFN, with certain exceptions, if a tariff is applied to a good from one Member country, the same tariff must be applied to the same good from all member countries.²⁰

According to the WTO, Colombia's simple average MFN applied tariff rate was 12.5 percent for all products in 2009.²¹ The average was 16.8 percent for agricultural products (based on the WTO definition) and 11.8 percent for non-agricultural products. Most duties have been consolidated into tariff levels: 0 to 5 percent on capital goods, industrial goods, and raw materials not produced in Colombia; 10 percent on most manufactured goods; and 15 to 20 percent on consumer goods and certain "sensitive" goods.²² Exceptions to this tariff structure include bans on imports of used clothing and used or refurbished medical equipment that is older than five years. Colombia also uses discretionary import licensing to restrict imports of powdered milk and poultry parts. Many agricultural goods fall under a variable price band import duty system. Under the price band system, tariffs fluctuate to ensure that the import prices of such products equal a predetermined minimum import price. At times this has resulted in duties exceeding 100 percent.

The United States maintains a transparent and largely open trade regime, although it maintains some non-tariff barriers to trade. According to the WTO, the United States'

¹⁹ U.S. law uses the term "normal trade relations" (NTR) instead of the term "most favored nation" (MFN) to describe the principle of nondiscriminatory treatment of trading partners. The WTO uses the term MFN.

²⁰ Among the allowable exceptions to MFN are bilateral free trade agreements. Any removal of tariffs agreed between the United States and Colombia in the CTPA does not have to be extended to other countries. See Paul R. Krugman and Maurice Obstfeld, *International Economics* (Boston, MA: Addison-Wesley, 2009), p. 239. See also WTO, *Principles of the Trading System*, available online at http://www.wto.org/english/thewto_e/whatis_e/tif_e/fact2_e.htm#nondiscrimination.

²¹ Averages are simple averages of MFN applied tariffs. See WTO Tariff Profile for Colombia. Available online at <http://stat.wto.org/TariffProfile/WSDBTariffPFHome.aspx?Language=E>.

²² Unless otherwise noted, the discussion on Colombia is based upon *2010 National Trade Estimate Report on Foreign Trade Barriers: Colombia* (Office of the U.S. Trade Representative, 2010). Available online at http://www.ustr.gov/sites/default/files/uploads/reports/2010/NTE/2010_NTE_Colombia_final.pdf.

simple average MFN applied tariff rate was 3.5 percent for all products in 2009.²³ The average was 4.7 percent for agricultural products (based on the WTO definition) and 3.3 percent for non-agricultural goods. The WTO Secretariat recently noted that “the U.S. trade and investment regimes are among the most open in the world, and have remained so throughout the period under review.”²⁴ Most imports either enter the United States duty-free or at low tariffs, although the United States maintains some relatively high tariffs on sensitive products, including tobacco, certain dairy products, sugar, textiles and apparel, and footwear.²⁵

2. *Trade in Services*

Colombia has an investment regime that is generally open, although it maintains restrictions in a variety of service sectors.²⁶ Restrictions, including economic needs tests and residency requirements, exist in accounting, tourism, legal services, insurance, distribution services, advertising, and data processing. Colombian law guarantees national treatment of foreign investors.²⁷ In most sectors, 100 percent foreign ownership is permitted. Exceptions include activities related to national security, broadcasting, and the disposal of hazardous waste.

The U.S. services and investment regimes are generally open, with some exceptions.²⁸ For example, in the maritime sector, cabotage laws reserve domestic routes to U.S. operators and provide government support for U.S.-flag vessels. Similarly, the United States restricts foreign ownership and control of U.S. air transport carriers, and the provision of domestic air service is restricted to U.S. carriers.

C. **Major Elements of the CTPA**

The CTPA consists of a Preamble, twenty-three chapters and various annexes, letters, and joint statements. The chapters are: Initial Provisions and General Definitions; National Treatment and Market Access for Goods; Textiles and Apparel; Rules of Origin and Origin Procedures; Customs Administration and Trade Facilitation; Sanitary and Phytosanitary Measures; Technical Barriers to Trade; Trade Remedies; Government Procurement; Investment; Cross-Border Trade in Services; Financial Services; Competition Policy, Designated Monopolies, and State Enterprises; Telecommunications; Electronic Commerce; Intellectual Property Rights; Labor; Environment; Transparency;

III. Potential Employment Effects of the CTPA

The major finding of this report is that the CTPA is expected to have a negligible effect on employment in the United States. This finding is based partly on a qualitative assessment of the current volume and structure of bilateral trade, the potential effects of removing current barriers to trade, and features in the CTPA that are available to ease the adjustment process. Publicly available quantitative economic modeling studies are also summarized. The quantitative results are consistent with the qualitative assessment. They show that the CTPA's effects on output and consumption (from which employment effects would follow) are expected to amount to less than one-twentieth of one percent of U.S. GDP.

A. The Current Volume and Industrial Structure of U.S.–Colombia Trade

U.S. merchandise exports to Colombia represent a small share of all U.S. merchandise exports. Over the past five years, Colombia's share of total U.S. merchandise exports has increased from 0.7 percent in 2006 to 1.0 percent in 2010. In 2010, U.S. merchandise exports to Colombia amounted to \$11.0 billion. They have been concentrated primarily in a few industrial subsectors (based on the North America Industrial Classification System, NAICS), all within the manufacturing sector: petroleum and coal products; chemicals; machinery, except electrical; computer and electronic products; and transportation equipment (see Table III.1).³⁰

Similarly, U.S. merchandise imports from Colombia represent a small share of all U.S. merchandise imports. Over the past five years, Colombia's small share of all U.S. merchandise imports has increased from 0.5 percent in 2006 to 0.8 percent in 2010. In 2010, U.S. merchandise imports from Colombia amounted to \$15.7 billion. They have been concentrated in the following NAICS-based subsectors: oil and gas; primary metal manufacturing; agricultural products; petroleum and coal products; and mineral and ores (see Table III.2).

²⁹ See <http://www.ustr.gov/trade-agreements/free-trade-agreements/colombia-fta>.

³⁰ For the purposes of relating foreign trade statistics to U.S. industrial output and employment, the Bureau of the Census has mapped 10-digit Harmonized Tariff Schedule of the United States (HTS) numbers used for U.S. exports and import statistics to their closest NAICS-based code. Some categories of traded items have no direct domestic counterpart. NAICS-based 91000-99000 categories were created to classify such goods. For example, NAICS 99000—Special Classification Provisions, not otherwise specified or included, contains primarily imports and exports of low-value shipments not specified by kind, exposed film and prerecorded tapes, articles imported for repairs, returned goods, and articles donated to charity.

Many goods from Colombia have long been granted reduced duties or duty-free entry to the United States through MFN treatment or under unilateral U.S. trade preference programs,³¹ including the ATPA/ATPDEA³² and the GSP.³³ In 2010, 92.8 percent of all U.S. merchandise imports from Colombia entered the United States duty-free, while the remaining 7.2 percent of imports were subject to an average 0.8 percent rate of duty. On a NAICS subsector basis:

- \$9.5 billion of U.S. merchandise imports from Colombia entered duty-free under the provisions of the ATPA/ATPDEA. These accounted for 60.4 percent of all U.S. imports from Colombia. ATPA/ATPDEA-duty-free imports consisted primarily of oil and gas (83.5 percent).
- \$4.9 billion of U.S. merchandise imports from Colombia entered duty-free under MFN duty-free or under special temporary rate provisions. These accounted for 31.3 percent of all U.S. imports from Colombia. Duty-free imports under these provisions consisted primarily of primary metal manufacturing (34.8 percent); agricultural products (20.7 percent); and minerals and ores (18.9 percent).
- \$158.5 million of U.S. merchandise imports from Colombia entered duty-free under the provisions of the GSP program. These accounted for 1.0 percent of all U.S. imports from Colombia. GSP-duty-free imports consisted primarily of food and kindred products (24.3 percent); plastics and rubber products (22.0 percent); and chemicals (19.6 percent).
- \$1.1 billion – or 7.2 percent – of all U.S. merchandise imports from Colombia incurred duties. At the average 0.8 percent ad valorem tariff rate, estimated total duties were \$9.0 million.

In 2010, U.S. imports from Colombia in the following NAICS-based subsectors faced average duties of six percent or higher on goods subject to duty (see Table III.3):

³¹ The subsequent list omits the Agreement on Trade in Civil Aircraft. In 2010, \$132,997 of imports from Colombia entered duty-free under this Agreement.

³² The ATPA was enacted on December 4, 1991 (Pub. L. No. 102-182, Title II, 105 Stat. 1233) as part of a larger Andean Initiative that the United States launched that year. The primary goal of the Andean Initiative was to expand private sector opportunities and investment in nontraditional sectors of the Andean countries as an alternative to production of illegal drugs and to help them diversify their economies and expand their exports. ATPA preferential duty treatment expired on December 4, 2001, but was renewed by the ATPDEA to apply to imports as of December 5, 2001, as part of the Trade Act of 2002 (Pub. L. No. 107-210, Div. C, Title XXXI, 116 Stat. 1023) on August 6, 2002. The ATPDEA significantly expanded the product coverage of the ATPA program. The ATPA/ATPDEA expired with respect to Colombia on February 12, 2011. For more information see: <http://www.ustr.gov/trade-topics/trade-development/preference-programs/andean-trade-preference-act-atpa>.

³³ The U.S. GSP was a program designed to promote economic growth in the developing world by providing preferential duty-free entry for about 4,800 products from 131 designated beneficiary countries and territories. The GSP program expired on December 31, 2010. For more information see <http://www.ustr.gov/trade-topics/trade-development/preference-programs/generalized-system-preference-gsp>.

- apparel and accessories (average rate of duty on dutiable goods, 18.4 percent);
- food and kindred products (17.1 percent);
- textiles and fabrics (12.8 percent);
- leather and allied products (11.8 percent);
- textile mill products (8.7 percent); and
- nonmetallic mineral products (6.5 percent).

Considering individual goods,³⁴ the ten leading U.S. merchandise imports accounted for 81.9 percent of all U.S. merchandise imports from Colombia. Each of the ten leading imports received duty-free treatment. Five of the ten leading imports – two types of crude petroleum oils; distillate and residual fuel oils derived from petroleum oils; fresh-cut sweetheart, spray and other roses; and other fresh-cut flowers – received ATPA/ATPDEA duty-free treatment. The other five leading imports – nonmonetary gold bullion and dore; bituminous coal; not roasted, not decaffeinated coffee; fresh or dried bananas; and low valued transactions – received MFN duty-free treatment.

B. The Potential Effects of Removing Current Barriers to Trade

The immediate effects of the CTPA will come from the removal of tariffs on bilateral merchandise trade and the provision of expanded market access (through preferential tariff rate quotas) on specific sensitive goods, mainly agricultural items.

In 2009, Colombia's average applied import tariff was 12.5 percent. In contrast, the U.S. average applied tariff was just 3.5 percent.³⁵ Tariff rates on specific items are designated at the tariff line level. Prior to the CTPA, 38 percent of U.S. tariff lines and just 2 percent of Colombian tariff lines were MFN duty-free. When the CTPA enters into force, an additional 60 percent of U.S. tariff lines and 74 percent of Colombian tariff lines will become duty-free immediately.³⁶ Duties on other goods will be phased out over varying transition periods. The Colombian tariff commitments represent increased duty-free access for U.S. exporters. The U.S. tariff commitments under the CTPA largely make permanent duty-free benefits that had already been afforded to Colombia under the ATPA/ATPDEA and the GSP. These benefits are subject to periodic expiration and legislative renewal. At the time of the submission of this report, these programs have expired.

For these reasons, the simultaneous removal of barriers by each of the Parties will likely mean that the price paid by Colombian consumers of U.S. goods will fall more than the price paid by U.S. consumers of Colombian goods. Accordingly, it is reasonable to expect that the lowering of the barriers through the CTPA will have a greater positive effect on U.S. exports to Colombia than on Colombian exports to the United States.

³⁴ This paragraph examines imports on an eight-digit HTS tariff line basis.

³⁵ See WTO Tariff Profiles for Colombia and the United States, available online at: <http://stat.wto.org/TariffProfile/WSDBTariffPFHome.aspx?Language=E>

³⁶ The figures presented include both agricultural tariff lines and industrial and textile tariff lines. For a more detailed discussion of the tariff staging commitments of the CTPA, see USITC (2006) Tables 2-1 and 2-2. Available online at www.usitc.gov/publications/332/pub3896.pdf.

The CTPA will also require Colombia to further open its services market to U.S. service providers.³⁷ Under the CTPA, Colombia commits to provide substantial market access across its entire services regime, with few exceptions. Colombia will provide improved access in sectors including financial services and grant new access in land cargo transportation services that previously had been reserved exclusively to Colombian nationals. Because the U.S. services market is already very open (see section II.B.2 of this report), the CTPA will likely not have as much of an effect on U.S. imports of services from Colombia.

Under the CTPA, Colombia commits to open its government procurement market to U.S. goods, services and suppliers. Colombia is not a signatory to the WTO Government Procurement Agreement.³⁸

In the longer term, the CTPA may also lead to increased FDI between Colombia and the United States. The CTPA creates a more stable legal framework for investors. All forms of investment are protected under the agreement.

C. Features in the CTPA to Ease the Adjustment Process

This section discusses features in the CTPA that affect the extent and speed of adjustments that may follow from increased bilateral trade between the United States and Colombia.

The CTPA contains a general safeguard mechanism to address potential increases in imports that cause serious injury to a domestic industry, as well as special agricultural and textile safeguard mechanisms. For example, if, as the result of the reduction or elimination of a customs duty under the CTPA, an originating good of the other Party is imported into the territory of a Party in such increased quantities as to be a substantial cause or threat of serious injury to a domestic industry producing a like or directly competitive product, during a transition period beginning after entry into force,³⁹ the Trade Remedies Chapter (Chapter 8) allows the importing Party to:

- Suspend the further reduction of the rate of customs duty provided for that good under the CTPA; or
- Increase the rate of customs duty on the good to a level not to exceed the lesser of the MFN applied rate of duty on the good in effect at the time the action is taken or the MFN applied rate of duty on the good in effect on the day immediately preceding the date of entry into force of the CTPA.

³⁷ The discussion in this paragraph and the following two paragraphs is based upon *2010 National Trade Estimate Report on Foreign Trade Barriers: Colombia* (Office of the U.S. Trade Representative, 2010).

³⁸ See http://www.wto.org/english/tratop_e/gproc_e/memobs_e.htm#parties.

³⁹ The transition period is ten years, except that for any good for which a Party will eliminate tariffs over a period of more than ten years, the transition period is the tariff elimination period.

A safeguard action may be in place for up to four years, but must terminate at the end of the transition period. Neither Party may impose a bilateral safeguard measure more than once on the same good. The Party taking the action must provide appropriate trade liberalizing compensation in the form of concessions having substantially equivalent trade effects or equivalent to the value of the additional duties expected to result from the measure. Each Party retains its rights and obligations for global safeguard actions under Article XIX of GATT 1994 and the WTO Agreement on Safeguards.

Products benefiting from preferential treatment under the CTPA must originate in Colombia or the United States. Final products from other countries are ineligible for preferential treatment under the CTPA. The CTPA contains strict rules of origin, including requirements that specify that items from outside the two countries must undergo substantial transformation within the United States or Colombia to be eligible for benefits under the CTPA.

Finally, some goods traded between the countries will not become duty-free immediately. The CTPA specifies that tariffs on sensitive goods will be phased out over transition periods that range up to nineteen years.

D. Effects as Determined by Publicly Available Quantitative Assessments

This section summarizes publicly available quantitative assessments of trade liberalization between the United States and Colombia. The assumptions underlying the assessments do not necessarily correspond to the specific terms of the CTPA. For example, the CTPA stages tariff reductions and quota changes over a number of years, while the assessments typically assume immediate removal of tariffs and quotas. Nevertheless, the studies provide insight about the magnitude and direction of change that might stem from the CTPA.

Most assessments are simulations produced using a database and adaptations of a computable general equilibrium (CGE) model from the Global Trade Analysis Project (GTAP). The GTAP global database contains historical information on bilateral trade patterns, production, consumption, and the intermediate use of commodities and services. It also contains information on tariffs, some non-tariff barriers, and other taxes.

The standard GTAP model is a multi-region, multi-sector model with perfect competition and constant returns to scale. Bilateral trade is handled using the Armington assumption that internationally traded goods are differentiated by country of origin.⁴⁰ The simulations use expected liberalization-induced changes in consumer and producer prices to estimate changes in the volume of trade of goods between the United States and Colombia and other related outcomes.

The available CGE simulations are based on a common modeling assumption that there is always full employment in the modeled economies. Adjustments that might imply some

⁴⁰ That is, imports are imperfect substitutes for domestic products.

unemployment as the economies move from the pre-agreement equilibrium to a new equilibrium are not captured by the model. Economy-wide employment levels remain constant as a logical consequence of the full employment assumption, with increased employment in some sectors fully counterbalanced by decreases in others.⁴¹

Variations in results from different simulations arise from differences in policy assumptions, the age of the data used, extent of aggregation employed, how sectors are defined, and assumptions about how U.S.-Colombian bilateral trade interacts with global trading patterns. The simulations cannot predict what may happen to goods that historically have not been traded between partners. Because of difficulty in quantifying services liberalization, liberalization of trade in services was not modeled in these simulations.

Across the studies, the estimated economy-wide welfare gains⁴² are all significantly less than one-twentieth of one percent of U.S. GDP. At a sectoral level, all changes in U.S. production or employment, positive or negative, are of an order of well less than one percent.

1. *United States International Trade Commission (2006)*⁴³

The United States International Trade Commission (USITC) uses the GTAP model to simulate the immediate removal of tariff and quota restraints affecting U.S.-Colombian bilateral merchandise trade.⁴⁴ Their simulation estimates a resulting U.S. GDP increase of \$2.5 billion and a U.S. welfare increase of \$419 million. Both amount to less than 0.05 percent of U.S. GDP.⁴⁵

With regard to total merchandise exports and imports, the USITC simulation estimates that U.S. exports to Colombia increase by 13.7 percent (\$1.1 billion) and U.S. imports from Colombia increase by 5.5 percent (\$487 million). In dollar values, the largest

⁴¹ Technically within the model output and input prices (e.g., wages) adjust to ensure that there is no unsatisfied demand or excess supply in output and factor (e.g., labor) markets. These price adjustments are typically not reported at any level of sectoral detail.

⁴² The measure of welfare gains is a monetary estimate of the additional consumption benefits expected from CTPA-type trade liberalization. CGE models typically are “representative household” models where welfare is identical to the utility of the representative household. Technically, welfare gains are measured by equivalent variation; that is, the money necessary to achieve the same increase in utility associated with trade liberalization, assuming trade liberalization does not take place.

⁴³ United States International Trade Commission. *U.S.-Colombia Trade Promotion Agreement: Potential Economy-wide and Selected Sectoral Effects*. Investigation No.TA-2104-023. December 2006. Available online at: <http://hotdocs.usitc.gov/docs/pubs/2104F/pub3896.pdf>.

⁴⁴ Due to data limitations, the model does not take into account liberalization in trade in services, removal of non-tariff barriers, and other regulatory changes that may occur as a result of the CTPA. The USITC model assumes a simplified version of the CTPA where all phased-in tariff reductions are immediately reduced to zero and that the sugar import quota is increased by 200 percent which approximates the expected increase in sugar imports from Colombia over the first 15 years of the CTPA. The model further assumes that the U.S.-Peru TPA is fully implemented and that ATPA/ATPDEA benefits for Ecuador and Bolivia expire upon implementation of the CTPA.

⁴⁵ USITC (2006), p. 2-8. Estimates pertain to the expected effects that would have accrued in 2007 had CTPA-type provisions been in effect.

sectoral increases of U.S. exports are in chemical, rubber, and plastic products (\$357 million); machinery and equipment not elsewhere classified (\$191 million); and motor vehicles and parts (\$106 million). The largest increases of U.S. imports are in “other sectors” (\$118 million), sugar (\$105 million), and crops not elsewhere classified (which includes coffee and cut flowers; \$73 million).⁴⁶

The USITC concludes that “there is likely to be minimal to no effect on output or employment for most sectors in the U.S. economy.”⁴⁷ Their simulation shows declines in employment in sugar (-0.3 percent) and sugar cane/sugar beet (-0.3 percent) and employment increases in processed rice (0.4 percent), cereal grains not elsewhere classified (0.3 percent), and wheat (0.2 percent).⁴⁸ All other sectoral employment changes amount to a gain or loss of less than one-tenth of one percent. Sectoral effects on output are of similar signs, pattern, and orders of magnitude.

2. *Institute for International Economics: DeRosa and Gilbert (2006)*⁴⁹

DeRosa and Gilbert also use the GTAP model and database to simulate the immediate removal of tariff and quota restraints affecting U.S.-Colombian bilateral merchandise trade.⁵⁰ Their simulation estimates an increase of \$227 million (measured in 1997 dollars) in U.S. welfare. They do not estimate potential changes in GDP.⁵¹

They find that U.S. exports to Colombia rise by 44 percent (\$2.5 billion). U.S. imports from Colombia rise by 37 percent (\$2.1 billion).⁵² In dollar values, the simulation shows the largest sectoral increases of U.S. exports in machinery (\$525 million), motor vehicles (\$440 million), and chemicals (\$264 million). The largest increases of U.S. imports are in “other crops” (\$868 million), wearing apparel (\$732 million), and food products (\$301 million).⁵³

⁵⁰ Unlike (USITC), DeRosa and Gilbert assume the continuation of ATPA/ATPDEA benefits for Ecuador and Bolivia.

⁵¹ DeRosa and Gilbert (2006), p. 89. To compare this welfare figure to that of the USITC, note that the rate of inflation for the period from 1997 and 2007 was 29 percent, i.e., prices were on average 29 percent higher in 2007 than 1997. This means that \$227 million in 1997 is approximately equivalent to \$293 million in 2007. Rate of inflation is based on the CPI-U presented in Table B-62 of *The Economic Report of the President* (2011).

⁵² DeRosa and Gilbert (2006), p. 89. Dollar values are USDOL calculations based on Table 4.4.

⁵³ Dollar values are USDOL calculations based on DeRosa and Gilbert (2006), Table 4.6. “Other crops” are crops other than grains and vegetables and fruits.

DeRosa and Gilbert also use a gravity model to predict the impact on total trade flows. They report an expected increase in the sum of U.S. exports to Colombia and U.S. imports from Colombia of between 38 and 140 percent.⁵⁴

DeRosa and Gilbert do not present estimates of sectoral employment changes. However, estimates of sectoral output changes from their GTAP simulation may be indicative. The largest increases in U.S. production are found in grains (0.14 percent), motor vehicles (0.08 percent), and other manufactures (0.07 percent). U.S. production declines in other crops (-0.56 percent), other transportation equipment (-0.06 percent), and wearing apparel (-0.05 percent).⁵⁵

3. *Durán Lima, de Miguel and Schuschny (2007)*⁵⁶

This study uses GTAP to simulate the effects of simultaneous bilateral trade agreements between the United States and each of Colombia, Peru, and Ecuador. Each agreement is assumed to set tariffs to zero. The authors provide a number of alternative estimates of the impact on U.S. welfare of these three agreements. The largest is that U.S. welfare would have been \$759 million higher in 2004 had such agreements been in place.⁵⁷ They also estimate that U.S. exports to Colombia would have been 43.4 percent higher and U.S. imports from Colombian would have been 5.4 percent higher.⁵⁸ No sectoral impacts for the United States are presented.

IV. The Labor Chapter of the CTPA

The Labor Chapter of the CTPA⁵⁹ contains provisions that support protection of labor rights and enforcement of labor laws, thereby helping to preserve a level playing field for American workers. It satisfies the relevant provisions of the Trade Act of 2002 and reflects the May 10, 2007, Congressional-Executive Agreement on Trade.

⁵⁴ DeRosa and Gilbert (2006), p. 83. A gravity model is a statistical model that estimates the correlation of total trade flows (i.e., the sum of U.S. exports and imports) with variables such as distance between trading partners, size of the economies, and other factors. The main variable of interest in the authors' analysis is an indicator of the existence of a free trade agreement (FTA) between trading partners. The estimates presented here are the average effect of FTA existence between pairs of countries for 1990-99 (38 percent) and 1995-99 (140 percent). To interpret these as predictions of the effect of the CTPA, it is necessary to assume that the CTPA will have an impact similar to the average existing FTA between an average pair of countries in the 1990s or the last half of the 1990s. The gravity model cannot predict welfare changes or sectoral impacts.

Article 17.1 of the Chapter reaffirms the Parties' obligations as members of the International Labor Organization (ILO). Article 17.2.1 commits each Party to "adopt and maintain in its statutes and regulations, and practices thereunder," fundamental labor rights as stated in the 1998 ILO Declaration on Fundamental Principles and Rights at Work,⁶⁰ and includes a prohibition on the worst forms of child labor.⁶¹ Article 17.2.2 further provides that "neither Party shall waive or otherwise derogate from, or offer to waive or otherwise derogate from, its statutes or regulations implementing" the obligation in Article 17.2.1 "in a manner affecting trade or investment between the Parties." Article 17.3 states that "a Party shall not fail to effectively enforce its labor laws,⁶² including those it adopts or maintains in accordance with Article 17.2.1, through a sustained or recurring course of action or inaction, in a manner affecting trade or investment between the Parties." Article 17.4 obligates each Party to provide procedural guarantees for enforcement of its labor laws, including access to labor tribunals, proceedings that are transparent and comply with due process of law, and remedies to ensure enforcement of labor laws.

All obligations in the Chapter are subject to the same dispute settlement procedures and enforcement mechanisms as commercial obligations in the CTPA. The Chapter also establishes a labor cooperation and capacity building mechanism to improve labor standards and advance common commitments regarding labor matters.

⁶⁰ The ILO Declaration states that all ILO members have an obligation "to respect, to promote and to realize, in good faith and in accordance with the Constitution, the principles concerning the fundamental rights which are the subject of those Conventions, namely: (a) freedom of association and the effective recognition of the right to collective bargaining; (b) the elimination of all forms of forced or compulsory labour; (c) the effective abolition of child labour; and (d) the elimination of discrimination in respect of employment and occupation." See <http://www.ilo.org/public/english/standards/relm/ilc/ilc86/com-dtxt.htm>.

⁶¹ Establishing a Party's violation of Article 17.2.1 requires demonstration that the Party "has failed to adopt or maintain a statute, regulation, or practice in a manner affecting trade or investment between the parties [to the agreement]."

⁶² Article 17.8 defines "labor laws" for the purposes of the Agreement as "a Party's statutes and regulations, or provisions thereof, that are directly related to the following internationally recognized labor rights: (a) freedom of association; (b) the effective recognition of the right to collective bargaining; (c) the elimination of all forms of forced or compulsory labor; (d) the effective abolition of child labor, a prohibition on the worst forms of child labor, and other labor protections for children and minors; (e) the elimination of discrimination in respect of employment and occupation; and (f) acceptable conditions of work with respect to minimum wages, hours of work, and occupational safety and health."

Note: The customs value of U.S. imports is the appraised value of the merchandise, exclusive of import duties, freight, insurance, and other charges incurred in placing the merchandise alongside the carrier at the port of exportation. The customs value given is for imports for consumption, which represents the amount that immediately enters U.S. consumption channels, but not bonded warehouses or Foreign Trade Zones. The dutiable value represents the customs value of the foreign merchandise imported into the United States that is subject to duty. The calculated duty represents the estimated import duties collected. Estimated duties are calculated based on the applicable rates of duty as shown in the Harmonized Tariff Schedule of the United States Annotated for Statistical Reporting Purposes. Estimates of calculated duty do not necessarily reflect amounts of duty paid. The average rate of duty is the ratio of calculated duties over dutiable value, expressed in percentage terms. Because of rounding, figures may not add to totals shown.
