**Statement from Chevron Corp. Executive Vice President Mike Wirth on the Free Trade Agreements**

“Chevron welcomes the White House decision to transmit the Korea, Columbia and Panama Free Trade Agreements to the U.S. Congress. We urge Congress to ratify the agreements. Rules-based trade and investment agreements are essential to provide U.S. firms with the ability to manage complex and risky overseas investments, strengthen the rule of law and contract sanctity and increase exports. Chevron has been a longstanding supporter of expanding trade and investment disciplines and has played a significant role in the Korea agreement, in particular.”
